*Aircraft Procurement, Navy—Overview*

The budget request for fiscal year 2008 included an authorization of \$12,747.8 million for Aircraft Procurement, Navy in the Department of Defense.

The House bill would authorize \$12,750.8 million.

The Senate amendment would authorize \$13,475.1 million.

The conferees recommended an authorization of \$12,432.6 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

*Weapons Procurement, Navy—Overview*

The budget request for fiscal year 2008 included an authorization of \$3,084.4 million for Weapons Procurement, Navy in the Department of Defense.

The House bill would authorize \$3,058.4 million.

The Senate amendment would authorize \$3,078.4 million.

The conferees recommended an authorization of \$3,068.2 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

*Procurement of Ammunition, Navy and Marine Corps—Overview*

The budget request for fiscal year 2008 included an authorization of \$760.5 million for Procurement of Ammunition, Navy and Marine Corps in the Department of Defense.

The House bill would authorize \$1,060.5 million.

The Senate amendment would authorize \$926.6 million.

The conferees recommended an authorization of \$1,058.8 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

*Shipbuilding and Conversion, Navy—Overview*

The budget request for fiscal year 2008 included an authorization of \$13,656.1 million for Shipbuilding and Conversion, Navy in the Department of Defense.

The House bill would authorize \$15,744.1 million.

The Senate amendment would authorize \$13,605.6 million.

The conferees recommended an authorization of \$13,596.1 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

*Other Procurement, Navy—Overview*

The budget request for fiscal year 2008 included an authorization of \$5,470.4 million for Other Procurement, Navy in the Department of Defense.

The House bill would authorize \$5,443.6 million.

The Senate amendment would authorize \$5,432.4 million.

The conferees recommended an authorization of \$5,209.3 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

*Procurement, Marine Corps—Overview*

The budget request for fiscal year 2008 included an authorization of \$2,999.1 million for Procurement, Marine Corps in the Department of Defense.

The House bill would authorize \$2,580.3 million.

The Senate amendment would authorize \$2,699.1 million.

The conferees recommended an authorization of \$2,299.4 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

*Aircraft Procurement, Air Force—Overview*

The budget request for fiscal year 2008 included an authorization of \$12,393.3 million for Aircraft Procurement, Air Force in the Department of Defense.

The House bill would authorize \$12,356.3 million.

The Senate amendment would authorize \$12,593.8 million.

The conferees recommended an authorization of \$12,117.8 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

*Procurement of Ammunition, Air Force—Overview*

The budget request for fiscal year 2008 included an authorization of \$868.9 million for Procurement of Ammunition, Air Force in the Department of Defense.

The House bill would authorize \$868.9 million.

The Senate amendment would authorize \$868.9 million.

The conferees recommended an authorization of \$854.2 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

*Missile Procurement, Air Force—Overview*

The budget request for fiscal year 2008 included an authorization of \$5,131.0 million for Missile Procurement, Air Force in the Department of Defense.

The House bill would authorize \$5,138.0 million.

The Senate amendment would authorize \$5,166.0 million.

The conferees recommended an authorization of \$4,984.1 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

*Advanced extremely high frequency satellite*

The budget request included \$700,000 in Missile Procurement, Air Force (MPAF line 13) for the advanced extremely high frequency satellite system (AEHF).

The House bill would authorize an increase of \$100.0 million.

The Senate amendment would authorize an increase of \$125.0 million.

The conferees agree to authorize \$125.0 million for advanced procurement for the fourth AEHF satellite. The conferees continue to be concerned about a potential gap in protected communications.

*Other Procurement, Air Force—Overview*

The budget request for fiscal year 2008 included an authorization of \$15,421.2 million for Other Procurement, Air Force in the Department of Defense.

The House bill would authorize \$15,441.8 million.

The Senate amendment would authorize \$16,313.0 million.

The conferees recommended an authorization of \$15,405.8 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

*Procurement, Defense-wide—Overview*

The budget request for fiscal year 2008 included an authorization of \$3,318.8 million for Procurement, Defense-wide in the Department of Defense.

The House bill would authorize \$3,537.8 million.

The Senate amendment would authorize \$3,386.0 million.

The conferees recommended an authorization of \$3,280.4 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

*National Guard and Reserve Equipment—Overview*

The budget request for fiscal year 2008 included an authorization request for National Guard and Reserve Equipment in the Department of Defense.

The House bill would authorize \$1,131.9 million for National Guard and Reserve Equipment.

The Senate amendment would provide no authorization for National Guard and Reserve Equipment.

The conferees recommend an authorization of \$980.0 million for National Guard and Reserve Equipment. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

## ITEM OF SPECIAL INTEREST

*Unmanned aerial systems management*

The report accompanying the Senate amendment (S. Rept. 110-77) would direct the Air Force to shift its procurement of MQ-1 Predator aircraft to the MQ-1C version of Predator in fiscal year 2008, if possible. The Senate report also would provide direction regarding the Air Force proposal to assume executive agency for medium- and high-altitude unmanned aerial systems (UAS).

Shortly before conference, the Department of Defense (DOD) completed action on this Air Force proposal and presented its plans for UAS management to Congress. The conferees do not take issue with the management plan per se, but are very concerned about serious bottlenecks to meeting urgent needs for more UAS that are able to meet the needs of ground commanders.

The Air Force is fielding 21 orbits of Predators as rapidly as it can. However, the limiting factor for expanding Predator operations is the number of trained system operators. Two factors cause this bottleneck: (1) the time required to train new rated pilots before they learn to fly UAS; and (2) the current limitations on flight operations of UAS in national airspace, especially at night.

Section 1044(b) of the John Warner National Defense Authorization Act for Fiscal year 2007 (Public Law 109-364) required the Secretary of Defense and the Administrator of the Federal Aviation Administration (FAA) to each submit a report on achieving wider access to the National Airspace System (NAS) for DOD UAS.

The FAA report has yet to be provided.

The Secretary of Defense recently delivered his report, which included the dire warning that the DOD-FAA schedule for developing standards and expanding UAS access to the NAS does not support DOD operational requirements. Negotiations between DOD and the FAA are reportedly not making progress.

The conferees understand that many ground force operations require UAS imagery in real-time. Ground force commanders find the delay in receiving intelligence information unacceptable when the raw data is transmitted via satellite to remote operating locations, processed and forwarded to the ground commanders' forces. This drives ground force operators to acquire manned aircraft solutions when a possible simple design change to UAS would suffice.

Finally, the conferees note that while UAS systems like the Predator are being fielded to provide support to the Army and Marine Corps ground forces, these armed forces are not currently training together.

The conferees direct the Secretary of Defense to report to the congressional defense and intelligence committees by February 15, 2008, on the actions he proposes to take to address these issues. The conferees request that this report include solutions to the backlog of UAS pilot training (including alternatives to using fully-rated pilots for UAS), an assessment of the status of negotiations with the FAA regarding UAS use of national airspace, and the way in which the Department's new UAS Task Force will alleviate similar issues in the future.

Subtitle A—Authorization of Appropriations

*Authorization of appropriations (secs. 101–105)*

The House bill contained provisions (secs. 101–105) that would authorize the recommended fiscal year 2008 funding levels for procurement for the Army, Navy, Marine Corps, Air Force, Defense-wide activities, and National Guard and reserve equipment.

The Senate amendment contained provisions (secs. 101–105) that would authorize the recommended fiscal year 2008 funding levels for procurement for the Army, Navy, Marine Corps, Air Force, Defense-wide activities, and Rapid Acquisition Fund.

The Senate recedes.

Subtitle B—Army Programs

*Multiyear procurement authority for M1A2 Abrams System Enhancement Package upgrades (sec. 111)*

The House bill contained a provision (sec. 111) that would authorize the Secretary of the Army to enter into a multiyear contract for procurement of M1A2 Abrams System Enhancement Package upgrades.

The Senate amendment contained a provision (sec. 111) that would do the same.

The House recedes.

*Multiyear procurement authority for M2A3/M3A3 Bradley fighting vehicle upgrades (sec. 112)*

The House bill contained a provision (sec. 112) that would authorize the Secretary of the Army to enter into a multiyear contract for procurement of M2A3/M3A3 Bradley fighting vehicle upgrades.

The Senate amendment contained a provision (sec. 112) that would do the same.

The House recedes.

*Multiyear procurement authority for conversion of CH–47D helicopters to CH–47F configuration (sec. 113)*

The House bill contained a provision (sec. 113) that would authorize the Secretary of the Army to enter into a multiyear contract for conversion of CH–47D helicopters to the CH–47F configuration.

The Senate amendment contained no similar provision.

The Senate recedes.

*Multiyear procurement authority for CH–47F helicopters (sec. 114)*

The House bill contained a provision (sec. 114) that would authorize the Secretary of the Army to enter into a multiyear contract for procurement of CH–47F helicopters.

The Senate amendment contained no similar provision.

The Senate recedes.

*Limitation on use of funds for Increment 1 of the Warfighter Information Network-Tactical program pending certification to Congress (sec. 115)*

The House bill contained a provision (sec. 115) that would limit the funds for the Joint Network Node program pending a certification to Congress.

The Senate amendment contained no similar provision.

The Senate recedes with a clarifying amendment.

*Prohibition on closure of Army Tactical Missile System production line pending report (sec. 116)*

The House bill contained a provision (sec. 116) that would prohibit the Army from commencing, continuing, or completing the closure of the Army Tactical Missile System (ATACMS) production line until at least 120 days after submission of a report that contains the Secretary of the Army's certification that the long-range surface-to-surface and counter-battery mission of the Army can be adequately performed by other elements of the armed forces, a plan to mitigate any shortfalls in the industrial base that would be created by the closure, and a plan to replace the Army's capability to perform long-range surface-to-surface strike and counter-battery missions.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would only prohibit the closure of the ATACMS production line until after submission of the report containing the Secretary of the Army's certification. Further, the amendment would delete the report requirement for a plan to replace the Army's capability to perform long-range surface-to-surface strike and counter-battery missions.

*Stryker Mobile Gun System (sec. 117)*

The Senate amendment contained a provision (sec. 113) that would prohibit the obligation or expenditure of funds for the procurement of the Stryker Mobile Gun System until 30 days after the Secretary of the Army certifies to Congress that the Stryker Mobile Gun System is operationally effective, suitable, and survivable for its anticipated deployment missions.

The House bill contained no similar provision.

The House recedes.

Subtitle C—Navy Programs

*Multiyear procurement authority for Virginia-class submarine program (sec. 121)*

The House bill contained a provision (sec. 122) that would authorize the Secretary of the Navy to enter into a multiyear contract for procuring Virginia-class submarines.

The Senate amendment contained a similar provision (sec. 131) that would authorize the Secretary of the Navy to enter into more than one contract for the same purpose.

The House recedes with a clarifying amendment.

*Report on shipbuilding investment strategy (sec. 122)*

The House bill contained a provision (sec. 125) that would permit the Secretary of the Navy to carry out a program providing capital expenditure incentives for contractors in the shipbuilding industry. The program would be funded from amounts made available for shipbuilding procurement.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of the Navy to provide for a study to determine the effectiveness of current financing mechanisms for shipbuilding capital expenditures, and to assess capital expenditure incentives that would lead to ship construction or life cycle savings to the Federal Government. The amendment would require a report on the results of the study to be submitted not later than October 1, 2008. The amendment would not authorize a new incentive program.

The conferees understand that the Navy's utilization of capital expenditure incentives on individual shipbuilding contracts has shown early progress in improving efficiency and productivity, which has tended to benefit multiple shipbuilding contracts at the same facility. The conferees encourage the Secretary to evaluate further concepts for capital expenditures that would provide high return on investment, facility-wide and industry-wide, and to identify in this report any specific authorities which would have to be authorized by Congress for the Secretary to implement such concepts. The conferees note the success achieved by the National Shipbuilding Research Program in providing industry-wide productivity improvements, and strongly encourage the Navy to leverage further opportunities available through this program.

*Sense of Congress on the preservation of a skilled United States shipyard workforce (sec. 123)*

The House bill contained a provision (sec. 126) that would prohibit the use of Shipbuilding and Conversion, Navy, funds for the purpose of construction of a Navy vessel at a construction facility where the contractor employs or contracts for foreign workers who are legally present in the United States under the H-2B visa program. The provision would allow for an exception to the prohibition, if the Secretary of the Navy were to identify potential surplus shipyard labor in all geographical areas, and if the hiring shipyard were to have shown an attempt to recruit such labor before hiring H-2B visa workers.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of the Navy, in consultation with the Department of Labor, to provide a one-time report identifying the average number of H-2B visa workers employed by the major shipbuilders in the construction of United States Navy ships during calendar year 2007, and the number of H-2B visa workers petitioned by the major shipbuilders for calendar year 2008, as of the first quarter of 2008.

*Assessments required prior to start of construction on first ship of a shipbuilding program (sec. 124)*

The House bill contained a provision (sec. 127) that would require the Secretary of the Navy to certify to the congressional defense committees that ship design, development, and contractor preparedness are mature prior to the start of construction of the first ship in a new class of vessels, the first ship to be built at a shipyard, or the first vessel after a major design change.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary to submit a report to the congressional defense committees on the results of any production readiness review conducted in conjunction with approval of start of construction of the first ship for any major shipbuilding program, and to certify to the congressional defense committees that the findings of such review support commencement of construction.

*Littoral Combat Ship (LCS) program (sec. 125)*

The Senate amendment contained a provision (sec. 132) that would limit the total amount to be obligated or expended for the procurement costs of the fifth and sixth vessels in the Littoral Combat Ship (LCS) class of vessels to \$460.0 million per vessel. The provision would require that the Navy employ a fixed-price type contract for construction of the fifth and follow ships of the Littoral Combat Ship class of vessels, and would restrict the Navy from entering into, or modifying, such contract if the limitation of the government's cost liability, when added to the sum of other budgeted procurement costs, would exceed \$460.0 million per vessel. The provision would also define procurement costs to include all costs for plans, basic construction, change orders, electronics, ordnance, contractor support, and other costs associated with completion of production drawings, ship construction, test, and delivery, including work performed post-delivery that is required to meet original contract requirements.

The House bill contained no similar provision.

The House recedes with an amendment that would extend the limitation of cost to Littoral Combat Ships authorized and appropriated in fiscal year 2008 or subsequent fiscal years.

Subtitle D—Air Force Programs

*Limitation on Joint Cargo Aircraft (sec. 131)*

The House bill contained a provision (sec. 132) that would prohibit the Secretary of the Air Force or the Secretary of the Army from obligating or expending authorized appropriations for the development or procurement of the Joint Cargo Aircraft until 30 days after the Secretary of Defense submits to the congressional defense committees the Air Force Air Mobility Command's Airlift Mobility Roadmap; the Department of Defense Intra-Theater Airlift Capabilities Study; the Department of Defense Joint Intra-Theater Distribution Assessment of the Joint Cargo Aircraft Functional Area Series Analysis; the Joint Cargo Aircraft Analysis of Alternatives; and the Secretary of Defense certifies that validated operational requirements exist to fill a Department of the Army, Department of

the Air Force, Army National Guard, or Air National Guard capability gap or shortfall for intra-theater airlift with the Joint Cargo Aircraft.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would add the Intra-Theater Airlift Fleet Mix Analysis to the required set of studies that the Department must deliver.

*Clarification of limitation on retirement of U-2 aircraft (sec. 132)*

The House bill contained a provision (sec. 133) that would modify section 133(b) of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109-364) to clarify limitations on retirement of U-2 aircraft.

The Senate amendment contained no similar provision.

The Senate recedes.

*Repeal of requirement to maintain retired C-130E tactical aircraft (sec. 133)*

The House bill contained a provision (sec. 134) that would repeal section 137(b) of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109-364). Section 137(b) requires that the Secretary of the Air Force maintain any C-130E aircraft retired after September 30, 2006 in a condition that would allow recall of that aircraft to future service. The Air Force refers to this status as “Type-1000 storage”.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would allow the Secretary of the Air Force to remove these retired C-130 aircraft from Type-1000 storage if he:

- (1) submits the Fleet Mix Analysis Study to the congressional defense committees; and
- (2) waits for a period of 30 days.

*Limitation on retirement of C-130E/H tactical airlift aircraft (sec. 134)*

The Senate amendment contained a provision (sec. 141) that would: (1) prevent the Secretary of the Air Force from retiring any C-130E/H aircraft during fiscal year 2008; and (2) require that he maintain any C-130E aircraft retired after September 30, 2006 in a condition that would allow recall of that aircraft to future service. The Air Force refers to this status as “Type-1000 storage”.

The House bill contained no similar provision.

The House recedes with an amendment that would allow the Secretary of the Air Force to retire up to 24 C-130E/H aircraft during fiscal year 2008 if he:

- (1) maintains any aircraft retired under this provision in Type-1000 storage;
- (2) submits the Fleet Mix Analysis Study to the congressional defense committees; and
- (3) waits for a period of 30 days.

*Limitation on retirement of KC-135E aerial refueling aircraft (sec. 135)*

The Senate amendment contained a provision (sec. 142) that would prohibit the Secretary of the Air Force from retiring any KC-135 aerial refueling aircraft during fiscal year 2008 unless the Air Force provides the congressional defense committees with a request to retire KC-135E aircraft during fiscal year 2008 in accordance with established procedures similar to those used for prior approval reprogramming requests.

The House bill contained no similar provision.

The House recedes with an amendment that would allow the Secretary of the Air Force to retire up to 48 KC-135E aircraft in fiscal year 2008. The Secretary would not be allowed to retire any additional KC-135E until the Secretary certifies to the congressional defense committees that:

- (1) the Air Force has awarded the KC(X) contract;
- (2) any bid protest arising from the award of the KC(X) contract have been adjudicated by the Government Accountability Office (GAO); and
- (3) the Air Force has responded to GAO determinations arising from any such bid protest.

*Transfer to Government of Iraq of three C-130E tactical airlift aircraft (sec. 136)*

The Senate amendment contained a provision (sec. 144) that would permit the Secretary of the Air Force to transfer up to three C-130E aircraft to the Government of Iraq from among aircraft that the Air Force had retired during fiscal year 2007.

The House bill contained no similar provision.

The House recedes.

The conferees note that, under the conditions of transfer of surplus property, neither the Air Force nor the U.S. Government will retain any responsibility for maintenance of these aircraft.

*Modification of limitations on retirement of B-52 bomber aircraft (sec. 137)*

The Senate amendment contained a provision (sec. 145) that would amend section 131 of the John Warner National Defense Authorization Act for Fiscal 2007 (Public Law 109-364) to direct the Secretary of the Air Force to maintain a primary aircraft inventory of not less than 63 B-52 bomber aircraft in a common configuration and backup aircraft inventory of not less than 11 B-52 bomber aircraft. The provision would also extend to 60 days the period of time in which the Secretary cannot retire B-52 bomber aircraft following submission of the report required by section 131.

The House bill contained no similar provision.

The House recedes with an amendment that would direct the Secretary of the Air Force to retain an attrition reserve of not less than two B-52 bomber aircraft and prohibit any of the 76 B-52 bomber aircraft from being put into a storage status or in a status considered excess to the requirements of the possessing command and awaiting disposition instructions. The provision would also allow the Secretary of the Air Force to use two retired B-52 bomber aircraft for maintenance ground training. In addition, the

amendment would define the terms used to describe the aircraft status categories.

The conferees believe that a B-52 total aircraft inventory of less than 76 aircraft is not sufficient to meet combatant commander requirements for conventional, long-range strike requirements if the need should arise to conduct near simultaneous operations in two major regional conflicts. The conferees strongly discourage the Secretary of the Air Force from taking action to reduce the B-52 aircraft inventory below 76 total aircraft prior to the next generation bomber reaching initial operational capability status and strongly oppose a strategy that reduces current conventional long-range strike capability.

#### LEGISLATIVE PROVISIONS NOT ADOPTED

##### *Advance procurement for Virginia class submarine program*

The Senate amendment contained a provision (sec. 133) that would authorize \$400.0 million for procurement of a second ship set of reactor components, and \$70.0 million for advance procurement of non-nuclear long lead time material in order to support a reduced construction span time for the boats in the next multiyear procurement program.

The House bill contained no similar provision.

The Senate recedes.

The conference outcome is reflected in the tables of this report in Shipbuilding and Conversion, Navy (SCN), line number 4.

The National Defense Authorization Acts for Fiscal Years 1998 and 2004 (Public Law 105-85 and Public Law 108-136, respectively) authorized the Secretary of the Navy to enter into a contract for procurement of New Attack Submarines provided that the prime contractor, which was selected to be General Dynamics, entered into one or more subcontracts with the subcontractor, which is Northrop Grumman, for submarine construction as contemplated in the New Attack Submarine Team Agreement.

The Secretary of the Navy has advised the committee that the teaming arrangement has worked well for the Navy in the highly unique circumstance of submarine construction and has proven to be the most practical manner of maintaining two viable sources for building nuclear powered submarines in this low-rate production environment. The committee understands that the Navy intends to continue to support teaming by General Dynamics and Northrop Grumman for the 2009 Virginia class submarine multiyear procurement contract.

##### *Authority to transfer funds for submarine engineered refueling overhauls and conversions and for aircraft carrier refueling complex overhauls*

The House bill contained a provision (sec. 121) that would authorize the Secretary of Defense to transfer to the Shipbuilding and Conversion, Navy account, from funds available in fiscal year 2008 or after, such funds as may be necessary to cover increased costs of submarine engineered refueling overhauls and conversions or aircraft carrier refueling complex overhauls.

The Senate amendment contained no similar provision.

The House recedes.

*Consolidation of Joint Network Node program and Warfighter Information Network-Tactical program into single Army tactical network program*

The Senate amendment contained a provision (sec. 114) that would require the Secretary of the Army to consolidate the Joint Network Node (JNN) program and the Warfighter Information Network-Tactical (WIN-T) program into one tactical network program.

The House bill contained no similar provision.

The Senate recedes.

The conferees note that subsequent to the Committee on Armed Services of the Senate's mark-up of the National Defense Authorization Act for Fiscal Year 2008, the Under Secretary of Defense for Acquisition, Technology, and Logistics certified a restructured WIN-T program consisting of four distinct increments that provide increasing capability. The first increment of the new program consolidated the JNN program into the WIN-T program, as prescribed by the Senate bill.

*General fund enterprise business system*

The Senate amendment contained a provision (sec. 115) that would reallocate funding in the bill for the General Fund Enterprise Business System program from the procurement and operation and maintenance accounts to the research and development account to reflect changes in the program schedule.

The House bill contained no similar provision.

The Senate recedes.

The conference outcome is reflected in the tables of this report.

*Limitation on final assembly of VH-71 presidential transport helicopters*

The House bill contained a provision (sec. 123) that would prevent any obligation or expenditure of funds from Aircraft Procurement, Navy for final assembly of more than five VH-71 presidential transport helicopters, unless final assembly of those helicopters would be carried out in the United States.

The Senate amendment contained no similar provision.

The House recedes.

The conferees support the current program of record, in which the Navy intends to assemble no more than five VH-71 presidential helicopters outside the United States.

The conferees direct that, before making any decision to change the location of final assembly for helicopters beyond the first five in the VH-71 acquisition strategy, the Secretary of Defense provide at least a 60-day notice to the congressional defense committees before implementing any such change. The conferees expect that the current acquisition strategy program of record will remain in place absent an extraordinary circumstance.

*Limitation on retiring C-5 aircraft*

The House bill contained a provision (sec. 131) that would allow the Secretary of the Air Force to retire C-5A aircraft from the inventory and replace that capability with C-17 aircraft if a

cost analysis were to show that this would be a prudent alternative in meeting strategic airlift requirements and would not significantly increase costs above those already planned in the out-years. The provision would also repeal section 132 of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108-136), which prevents retiring any C-5A until testing of a C-5A aircraft with the reliability enhancement and re-engining program (RERP) modification is complete.

The Senate amendment contained no similar provision.

The House recedes.

The conferees direct the Air Force to identify options for accelerating the completion of C-5 RERP operational testing, including rephrasing the program depot maintenance availability, that would:

- (1) complete all required testing objectives;
- (2) cut no corners regarding aircraft or aircrew safety; and
- (3) result in accelerating the completion of operational testing and producing the required reports from that testing.

The conferees also direct the Secretary of Defense to task the Institute for Defense Analyses (IDA) to perform an objectivity/sufficiency review and net present value analysis of the RERP service cost position of the Air Force submitted to the Department of Defense pursuant to the Nunn-McCurdy breach notification, the most recent cost estimate provided to the Air Force by the RERP prime contractor, and the cost estimate of the Cost Analysis Improvement Group used during the Nunn-McCurdy breach review and certification process. The conferees direct that the Secretary forward the results of that IDA review to the congressional defense committees not later than March 1, 2008.

*Responsibility of the Air Force for fixed-wing support of Army intra-theater logistics*

The Senate amendment contained a provision (sec. 1030) that would require the Secretary of Defense, acting through the Chairman of the Joint Chiefs of Staff, to prescribe directives or instructions to provide that the Air Force would be responsible for the missions and functions of fixed-wing support for Army intra-theater logistics.

The House bill contained no similar provision.

The Senate recedes.

The conferees agree that no one should interpret this action as the conferees having made a judgment as to which military service should operate the Joint Cargo Aircraft or provide intra-theater airlift capability to Joint Force commanders. The conferees expect to make such a decision after reviewing the results of the quadrennial roles and missions report by the Secretary of Defense directed in title IX of this Act (sec. 941). The conferees expect that the mission of providing fixed-wing airlift support for intra-theater logistics will be specifically addressed in the report to determine the appropriate allocation of the Joint Cargo Aircraft platform.

The conferees understand that it is the Department's intent, irrespective of any decision on roles and missions, that authority for operational control and tasking of fixed-wing intra-theater airlift that is allocated or apportioned to support a regional combatant commander will reside with the respective Joint Force Air Compo-

ment Commander or Combined Forces Air Component Commander to best support military operations.

*Sense of Congress on rapid fielding of Associate Intermodal Platform system and other innovative logistics systems*

The Senate amendment contained a provision (sec. 147) that would express the sense of Congress that the Department of Defense should: (1) rapidly field innovative logistics systems such as the Associate Intermodal Platform system (AIPS); and (2) seek to fully procure such innovative logistics systems in the future.

The House bill contained no similar provision.

The Senate recedes.

The conferees understand that the U.S. Transportation Command and the Air Mobility Command have been evaluating the AIPS and a number of other innovative logistics systems to reduce operating and support costs and increase capability. The conferees agree that the Department should continue these reviews and provide funding in future budgets for programs that show promise in these evaluations.

*Sense of Congress on the Air Force strategy for the replacement of the aerial refueling tanker aircraft fleet*

The Senate amendment contained two provisions (secs. 143 and 146) that would express the sense of Congress on the Air Force strategy for the replacement of the aerial refueling tanker aircraft fleet. The new tanker has been called the "KC(X)".

(1) Section 143 would state the sense of Congress that the Air Force should hold a full and open competition for KC(X) and should take no action to limit the ability of the teams seeking the contract from competing for the KC(X) contract.

(2) Section 146 would state the sense of Congress that tanker modernization is a vital national priority and that Congress supported the Air Force strategy of buying new tankers, upgrading and maintaining the remaining fleet of tankers, and augmenting capability with aerial refueling fee-for-service.

The House bill contained no similar provision.

The Senate recedes.

The conferees have included statement of managers language in title X of this Act expressing the views of the conferees on the multifaceted Air Force strategy to recapitalize and augment the aerial refueling aircraft fleet.

*Sense of Congress regarding need to replace Army M109 155mm self-propelled howitzer*

The House bill contained a provision (sec. 1052) expressing the sense of Congress that the Army has not been timely in procuring a replacement for the M109 self-propelled howitzer and that the Army should transition to the Non-Line-of-Sight Cannon (NLOS-C) as that replacement.

The Senate amendment contained no similar provision.

The House recedes.

The conferees reiterate congressional intent that the first Future Combat Systems (FCS) manned ground vehicle fielded be the NLOS-C. However, currently fielded armored vehicles, including

the M109 self-propelled howitzer, will have to be maintained and sustained for the foreseeable future in those Army and Army National Guard heavy brigade combat teams which will not transition to the FCS structure. In that regard the conferees support the Army's M109 Paladin Integrated Management upgrade program.

## TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

### BUDGET ITEMS

#### *Research, Development, Test, and Evaluation overview*

The budget request included \$75,117.2 million in Research, Development, Test and Evaluation for the Department of Defense.

The House bill would authorize \$73,476.3 million.

The Senate amendment would authorize \$74,718.1 million.

The conferees agree to authorize \$73,727.5 million.

Unless noted explicitly in the statement of managers, all changes are made without prejudice.

## ARMY

*Research, Development, Test, and Evaluation, Army overview*

The budget request included \$10,589.6 million in Research, Development, Test, and Evaluation, Army for the Department of Defense.

The House bill would authorize \$10,057.5 million.

The Senate amendment would authorize \$11,328.0 million.

The conferees agree to authorize \$10,840.4 million.

Unless noted explicitly in the statement of managers, all changes are made without prejudice.

*Wide-area persistent surveillance*

The budget request included a classified amount in PE35206A for improvements to the Constant Hawk persistent surveillance system.

The House bill would approve the requested amount.

The Senate amendment would authorize an additional \$30.0 million to accelerate and broaden the scope of the Constant Hawk system.

The conferees agree to authorize the requested amount.

The current deployment of the Army's Constant Hawk system has proven the importance of large-area persistent surveillance in the campaign against improvised explosive device (IED) networks in Iraq. However, the coverage area is limited, and the platform's endurance is also limited. The system is designed to provide support only to the forensic analysis mission.

The Marine Corps is fielding a similar capability called Angel Fire. Angel Fire is designed to provide real-time support to ground force operations with improved sensor resolution. The conferees agree that while these two systems should eventually be merged into a single program with improved capabilities, this merger must not hinder current efforts to complete the fielding of either the Constant Hawk or Angel Fire systems. The conferees also urge the Army and Marine Corps to commit to integrating these systems in accordance with the equipment and procedures required by Task Force ODIN, and Army and Marine Corps ground forces. This merger should be accomplished as soon as practicable.

The conferees direct the Secretary of Defense to provide a conceptual plan for merger of the Constant Hawk and Angel Fire programs, which must include an assessment of the intelligence, surveillance, and reconnaissance (ISR) impacts of such a merger. The conferees also direct the Secretaries of the Army and Navy to provide program management plans for the Constant Hawk and Angel Fire programs, including respective budget detail to the congressional defense and intelligence committees within 60 days of enactment of this Act. The conferees also direct the Secretary of Defense to provide a study of future improvements to wide-area persistent surveillance, including: an assessment of sensor technology capabilities and limitations; an analysis of the most suitable sensor platforms; an evaluation of the best system architecture for collecting, sharing, and analyzing sensor data; and analysis of the optimum use of wide-area surveillance for defeating IED and other asymmetric threat networks. The results of this study should be provided to the congressional defense and intelligence committees within 180 days of enactment of this Act.

## NAVY

*Research, Development, Test, and Evaluation, Navy overview*

The budget request included \$17,075.5 million in Research, Development, Test, and Evaluation, Navy for the Department of Defense.

The House bill would authorize \$17,323.6 million.

The Senate amendment would authorize \$16,296.4 million.

The conferees agree to authorize \$16,980.7 million.

Unless noted explicitly in the statement of managers, all changes are made without prejudice.

*Threat D*

The budget request included \$32.4 million in PE64258N for target systems development.

The House bill would authorize \$42.4 million, an increase of \$10.0 million, for a Threat D advanced cruise missile target systems development.

The Senate amendment would authorize the budget request.

The conferees agree to authorize \$32.4 million in PE64258N for target systems development.

The conferees are concerned about the limited effort that the Navy has undertaken in developing test resources that can adequately simulate emerging advanced cruise missile threats to Navy platforms. The conferees are aware that the lack of this test capability has been raised specifically by the Director of Operational Test and Evaluation as potentially impacting the operational testing of a number of major Navy acquisition programs. The conferees encourage the Department of Defense to program for adequate resources to ensure that such cruise missile threats can be adequately simulated in a timely manner, in order to avoid disruption to the operational test and evaluation of major systems and to ensure that such systems are operationally suitable and effective at the time of deployment.

## AIR FORCE

*Research, Development, Test, and Evaluation, Air Force overview*

The budget request included \$26,711.9 million in Research, Development, Test, and Evaluation, Air Force for the Department of Defense.

The House bill would authorize \$25,739.0 million.

The Senate amendment would authorize \$25,582.0 million.

The conferees agree to authorize \$25,692.5 million.

Unless noted explicitly in the statement of managers, all changes are made without prejudice.

*Global positioning system III*

The budget request included \$587.2 million for global positioning system III (GPS III).

The House bill would authorize \$437.2 million in PE63421F for GPS III.

The Senate amendment would authorize \$587.2 million, the amount of the budget request.

The conferees agree to authorize \$487.2 million, a reduction of \$100.0 million below the budget request.

The conferees fully support the need for the GPS III program. There are indications, however, that challenges between the development and acquisition plans for space vehicles, ground systems, and user equipment may be increasing. The conferees are concerned that GPS III space systems may be ahead of the development and acquisition plans for ground systems and user equipment. To avoid this potential disconnect the conferees urge the Department of Defense (DOD) and the Air Force to request adequate funding to keep the ground operational control systems and space segments fully synchronized and to support timely development and fielding of the user equipment.

The block approach adopted by the GPS III program office is a good step toward reducing technical risks and ensuring that the program stays on budget and schedule. However, the conferees are concerned that capabilities like spot-beams and cross-links may not be properly phased to support the warfighter requirements or may no longer be required. The conferees urge the DOD and the Secretary of the Air Force to examine the GPS acquisition strategy and warfighter requirements to determine the appropriate next-generation capabilities to include in each subsequent block to meet user needs, while maintaining schedule, cost, and appropriate level of technical risk.

The GPS satellite constellation provides accurate position, navigation, and timing (PNT) to support military, civil, and commercial activities and enterprises throughout the United States and the world. The conferees note the budget request included funds for other PNT capabilities and augmentations such as the GPS extension program, commonly known as iGPS. The conferees are concerned that these investment decisions are being made without an integrated PNT architecture. The conferees direct the DOD, as one of the co-chairs of the PNT Executive Committee, to submit a report to the congressional defense committees that includes future PNT-related investments for the next 5 years and an integrated PNT architecture plan. The report should be submitted within 6 months from the date of enactment of this Act.

*Transformational communication satellite system*

The budget request included \$964.0 million in PE63845F for the transformational communication satellite system (TSAT).

The House bill would authorize the budget request.

The Senate amendment would authorize the budget request.

The conferees agree to authorize \$814.0 million in PE63845F for the TSAT, a reduction of \$150.0 million below the budget request. The conferees fully support the TSAT program and have made this reduction with no prejudice to the program.

### *Space Radar*

The budget request included funds for the Space Radar program, but the amount requested is classified.

The House bill would authorize \$30.0 million below the requested amount in a classified line item for Space Radar.

The Senate amendment would authorize \$20.0 million in a classified line item and would authorize \$80.0 million in PE63858F for a Space Radar technology study.

The conferees agree to authorize funding for Space Radar capabilities in a classified line item.

The conferees continue to support space-based radar capabilities to meet both warfighter and intelligence community requirements. However, the conferees remain concerned about the overall approach to radar capabilities in space and, in particular, about the Space Radar program of record. These concerns include requirements scope, technology risk, the acquisition plan, and the affordability of a space radar program. The conferees continue to strongly support a joint program and a joint approach to requirements development, concept of operations, and tasking, processing, and exploitation regimes.

The conferees are aware of several alternative space-based radar concepts that have been proposed over the past year that could lower technical risk and development costs. In addition, the administration has recently proposed a new, incremental acquisition strategy for the Space Radar program designed to reduce program risk. As a result of these developments, the conferees direct the Secretary of Defense and the Director of National Intelligence to prepare a plan for the analysis of space-based radar alternatives and a plan for expenditure of funds for fiscal year 2008. Of the amount authorized by the conferees for fiscal year 2008, only \$40.0 million shall be available for expenditure until 30 days after the submission of this plan for an analysis of alternatives.

The plan for an analysis of alternatives should bound the options related to space-based radar technology and system alternatives. It must consider all programs and activities (at all levels of classification) that can contribute to the missions that space-based radar systems would support. Once the options are bounded, the plan should outline a strategy for evaluating the space-based radar options. The plan should describe how the Department of Defense proposes to allocate the remaining fiscal year 2008 funding to achieve the objectives described below and to support any other space-based radar related activities. The plan for an analysis of alternatives should be submitted to the congressional defense and intelligence committees by March 1, 2008.

The plan for an analysis of space-based radar alternatives should be a roadmap for evaluating the options for space and ground segments. The conferees expect the plan to identify the schedule and resources necessary to evaluate: the maturity of the various radar technologies and design concepts; system and architecture performance; requirements; technology producibility; industry capacity; cost and risk estimates for the proposed options; proposed acquisition plans; concepts of operations; how other programs can be leveraged to meet requirements; and any other matters

identified by the Secretary of Defense and the Director of National Intelligence.

The conferees expect that the Department will perform the work outlined in the plan for an analysis of space-based radar alternatives before establishing a new program baseline for space radar capabilities and that no acquisition decision will be made in fiscal year 2008.

Additional direction and information is contained in the classified annex to this report.

*Alternate infrared satellite system*

The budget request included \$230.9 million in PE64443F for the alternative infrared satellite system (AIRSS).

The House bill would authorize a decrease of \$200.9 million in PE64443F for AIRSS.

The Senate amendment would authorize no funding for AIRSS.

The conferees agree to authorize \$75.9 million for AIRSS in PE64443F.

The conferees understand the Space Based Infrared System (SBIRS) geosynchronous (GEO) program has experienced additional problems over the course of the summer. Nevertheless, the conferees are still convinced that the AIRSS program as it was described in the budget request is not the backup program that was originally conceived to serve as an alternative to SBIRS as directed in the SBIRS recertification acquisition decision memorandum. In addition, the current AIRSS concept is not a suitable competitor for the fourth SBIRS GEO satellite.

The conferees acknowledge that a follow-on program for SBIRS will be needed in the future and believe that the AIRSS program should focus on maturing technology and focus on the next generation of infrared sensor technology. The conferees expect the Air Force to develop AIRSS as a follow-on program at an appropriate time in the future. To that end, the conferees expect the budget request for AIRSS for fiscal year 2009 to include a clear plan to support research and development on technologies that could be evolved into the next generation of non-imaging infrared systems.

Recognizing that a backup plan may still be needed for SBIRS GEO, the conferees direct the Air Force to study the cost and feasibility of integrating a SBIRS highly elliptical orbit sensor onto a GEO satellite bus. The results of this study should be provided with the fiscal year 2009 budget request.

DEFENSE-WIDE

*Research, Development, Test, and Evaluation, Defense-wide overview*

The budget request included \$20,559.9 million in Research, Development, Test, and Evaluation, Defense-wide for the Department of Defense.

The House bill would authorize \$20,176.0 million.

The Senate amendment would authorize \$21,331.5 million.

The conferees agree to authorize \$20,033.6 million.

Unless noted explicitly in the statement of managers, all changes are made without prejudice.

*National Defense Education Program*

The budget request included \$44.4 million in PE61120D8Z for the National Defense Education Program (NDEP).

The House bill would authorize the budget request.

The Senate amendment would authorize the budget request.

The conferees agree to authorize \$44.4 million in PE61120D8Z for NDEP.

The conferees note that the budget request included \$13.0 million for Pre-engineering Modules under NDEP, but lacked sufficient justification for that level of funding. Therefore, the conferees direct that funding for NDEP be executed as follows: \$3.5 million for Pre-engineering Modules; \$6.5 million for Materials World Modules; \$27.0 million for Science, Mathematics, and Research for Transformation; and \$7.4 million for National Security Science and Engineering Faculty Fellowships. The conferees direct the Director of Defense Research and Engineering to continue appropriate efforts to support science and mathematics education, including at the K-12 level, and recommend that the Director provide clear objectives and rationale for future funding requests for new programs in this area.

*Airborne Laser*

The budget request included \$548.8 million in PE63883C for the Airborne Laser (ABL) boost-phase missile defense technology demonstration program.

The House bill would authorize \$298.9 million in PE63883C, a reduction of \$250.0 million.

The Senate amendment would authorize \$348.8 million in PE63883C, a reduction of \$200.0 million.

The conferees agree to authorize \$513.8 million in PE63883C, a reduction of \$35.0 million.

The conferees note that the ABL program remains a high risk technology development and demonstration program that is seeking to determine the technical feasibility of using an airborne chemical laser to destroy ballistic missiles in the boost-phase of their flight, within the first few minutes after launch.

The ABL program has suffered numerous delays and cost increases since its inception in 1996, and it is currently estimated that it will cost \$5.1 billion from inception to the completion of the first test to shoot down a target missile, currently scheduled for 2009. The original cost estimate to complete the first shoot-down test was \$1.0 billion, which indicates the magnitude of cost growth in the ABL program.

Even if it is successful, the first shoot-down test will not determine whether the ABL could be made operationally effective or affordable. There are inherent operational constraints in the ABL concept that would have to be overcome. Much more additional testing would be required to demonstrate operational capability and military utility. Furthermore, even if the follow-on testing were successful, the system would likely not provide an operational capability until 2018 or later.

The conferees remain concerned that the requested and planned level of funding for the ABL program comes at the expense of other near-term capabilities specified in section 223 of the John

Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109-364), which places a priority on the development, testing, fielding, and improvement of effective near-term missile defense capabilities.

The conferees believe that missile defense resources and effort need to be focused and prioritized on those near-term effective capabilities that can meet our combatant commanders' current operational requirements to defend against existing missile threats, particularly those short- and medium-range missiles that can strike forward-deployed U.S. forces, allies, and other friendly nations in various regions.

It remains unclear whether the ABL system will be affordable. The Congressional Budget Office has made a preliminary estimate that the ABL program could cost as much as \$36.0 billion to develop, procure, and operate a fleet of seven aircraft for 20 years. This would be a huge investment in a fleet of seven aircraft that may not be able to provide an operationally effective capability.

The conferees are also concerned about the number of ABL aircraft that may be required to maintain a single operational ABL aircraft on combat patrol, known as an orbit. According to the Department of Defense, 3 to 5 ABL aircraft would be required to maintain a single orbit. Additionally, to provide full coverage against geographically large countries may require three or more ABL aircraft operating simultaneously, which could require a total force of 15 or more aircraft. That would add billions of dollars to the cost of the program.

By comparison, investing that level of funding in near-term capabilities like the Aegis Ballistic Missile Defense (BMD) program, the Terminal High Altitude Area Defense program, and the Patriot PAC-3 program would provide a considerable increase in the ability of our combatant commanders to meet their operational requirements for defending our forward-deployed forces and our allies and friends against existing missile threats.

As the ABL program proceeds toward the planned shoot-down test in 2009, the conferees believe the program should receive thorough independent review, as recommended by the Government Accountability Office in its March 2007 report, "Defense Acquisitions: Missile Defense Acquisition Strategy Generates Results but Delivers Less at a Higher Cost." The conferees strongly urge the Department of Defense to commission an independent review of the technical, operational, cost, and effectiveness aspects of the proposed ABL system, particularly in comparison to the proposed Kinetic Energy Interceptor program, and the Aegis BMD system using the Standard Missile-3 Block IIA interceptor in an ascent-phase capacity.

#### *Aegis Ballistic Missile Defense*

The budget request included \$1.1 billion in PE63892C for the sea-based Aegis Ballistic Missile Defense (BMD) system.

The House bill would authorize an increase of \$78.0 million in PE63892C.

The Senate amendment would authorize an increase of \$75.0 million in PE63892C.

The conferees agree to authorize an increase of \$65.0 million in PE63892C.

The conferees note that the Missile Defense Agency (MDA) recently informed Congress that the Aegis BMD program will experience a major funding shortfall in its fiscal year 2008 program. This shortfall has caused MDA to modify its plans for Aegis BMD for fiscal year 2008, which include, among other things, delaying the introduction of the Standard Missile-3 (SM-3) Block IB missile by a year, deferring the upgrades of four Aegis BMD ships until 2010, and possibly reducing the number of flight tests. The MDA had previously told Congress that no additional money was needed for the Aegis BMD program.

As Congress made clear in section 223 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109-364), the emphasis of our missile defense efforts should be on the current generation of missile defense capabilities, even if this comes at the expense of longer-term development efforts. Furthermore, in testimony before Congress earlier this year, combatant commanders noted the importance of attaching priority to deploying missile defense systems like Aegis BMD, which are designed to provide a wide-area defense capability against existing short- and medium-range ballistic missile threats to our forward-deployed forces, allies, and other friendly nations.

The conferees urge MDA to address the funding shortfall by identifying funds to “buy back” schedule, with priority placed on resolving technical issues with the SM-3 Block IA missile program, returning the SM-3 Block IB missile to its previous schedule, and ensuring that all original test objectives for fiscal year 2008 are met.

The conferees direct that no later than January 31, 2008, MDA provide a report to the congressional defense committees detailing the specific reasons for the funding shortfall in the Aegis BMD program, its plan for identifying funds to place the program back on schedule, and its plans for ensuring that the Aegis BMD program is fully funded in the future.

Over the past several years, Congress has been clear on the importance it attaches to the Aegis BMD program and other near-term missile defense systems. The conferees expect the Department’s fiscal year 2009 budget request to reflect that priority.

#### *Prompt global strike*

The budget request included a total of \$175.4 million for the Conventional Trident Modification (CTM), with \$126.4 million in hard and deeply buried target defeat systems, PE 64327N; \$36.0 million in Trident II modifications, Weapons Procurement, Navy (WPN) line 1; and \$13.0 million in strategic systems missile equipment, Other Procurement, Navy (OPN) line 108. The budget request also included \$32.8 million for the Common Aero Vehicle (CAV) in PE 64856F.

The House bill would authorize a total of \$142.0 million for the CTM, with \$126.4 million in hard and deeply buried target defeat systems, PE 64327N; \$6.0 million in Trident II modifications, WPN line 1; and \$6.0 million in strategic systems missile equipment,

OPN line 108. The House would authorize the budget request for the CAV.

The Senate would authorize no funding for the CTM, but would authorize \$208.2 million for prompt global strike (PGS) concepts in PE 65104D8Z. The Senate would authorize no funding for the CAV in PE 64856F but would authorize the budget request for the CAV in PE 65104D8Z as part of PGS concepts.

The conferees agree to authorize \$100.0 million in PE 64165D8Z for PGS in a new budget line that includes funding for the CAV. No funds are authorized for the CTM program. A further discussion of PGS is included elsewhere in this conference report.

#### *Joint command and control*

The budget request included \$70.3 million in PE33158K for the joint command and control program.

The House bill would authorize a decrease of \$20.0 million in PE33158K for net enabled command and control, due to activity delays that raised concerns over the ability of the program to execute the full fiscal year 2008 request.

The Senate amendment would authorize the budget request.

The conferees agree to authorize \$58.3 million, a decrease of \$12.0 million in PE33158K. The conferees recognize there has been improvement in the execution of the program, and remain supportive of the program's technical approach. The conferees are supportive of the program's efforts to drive the Department of Defense towards a service-oriented architecture approach, and the use of a federated development and certification environment to accelerate the process of testing and certifying new capabilities. The conferees believe that this program has the potential to dramatically influence how the Department develops and fields software-intensive systems, and provide significant new capabilities in shorter time frames.

### TEST AND EVALUATION

#### *Operational, Test, and Evaluation, Defense overview*

The budget request included \$180.3 million in Operational, Test, and Evaluation, Defense for the Department of Defense.

The House bill would authorize \$180.3 million.

The Senate amendment would authorize \$180.3 million.

The conferees agree to authorize \$180.3 million.

Unless noted explicitly in the statement of managers, all changes are made without prejudice.

## ITEMS OF SPECIAL INTEREST

*Aerial Common Sensor*

The conferees note that the restructured Aerial Common Sensor (ACS) program represents the Army's second and the Navy's third attempt to replace the Aerial Reconnaissance-Low, the Guardrail Common Sensor, and the EP-3 systems. Repeated acquisition failures waste scarce investment resources and deprive the combatant commands of needed capabilities.

The repeated setbacks demonstrate the need to maintain discipline with respect to requirements and acquisition management for the Army and Navy ACS programs.

Given the expenditures of the previously joint ACS program, the conferees stress the need for energetic oversight of both the Army and Navy ACS efforts. Therefore, the conferees direct both the Army and Navy ACS program managers to submit to the congressional defense and intelligence committees an Acquisition Program baseline, System Development and Demonstration exit criteria, and a Capability Development Document for each program no later than July 1, 2008.

*Missile defense test and targets program*

The conferees note the importance of the test and targets program of the Missile Defense Agency (MDA) for the development and success of the ballistic missile defense program. Congress has enacted legislation concerning the testing program repeatedly, and has stressed the need for robust and operationally realistic testing.

For example, section 234 of the Ronald W. Reagan National Defense Authorization Act for 2005 (Public Law 108-375) requires operationally realistic testing of the Ballistic Missile Defense System (BMDS), and section 234 of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109-163) requires test and evaluation plans to characterize the operational capability of each block of the BMDS. In section 234 of the National Defense Authorization Act for Fiscal Year 2002 (Public Law 107-107), Congress included a requirement for "sufficient schedule flexibility and expendable test assets, including missile interceptors and targets, to ensure that failed or aborted tests can be repeated in a prudent, but expeditious manner." It also included specific requirements for the Ground-based Midcourse Defense (GMD) program "to establish a flight-test capability of launching not less than three missile defense interceptors and not less than two ballistic missile targets to provide a realistic test infrastructure."

Congress has also authorized additional resources for enhanced testing. In the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109-364), Congress authorized an increase of \$225.0 million for enhancements to the testing program of the GMD program, including: \$140.0 million for enhanced testing and to increase the pace of GMD flight testing; \$60.0 million for efforts to accelerate the ability of the GMD system to conduct concurrent test and operations; and \$25.0 million for advance procurement of an additional six flight test missiles.

In the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109-163), Congress authorized an increase of \$100.0

million for the GMD program to implement the recommendations of the MDA Independent Review Team and the Mission Readiness Task Force to enhance the GMD testing program.

Despite these repeated and consistent efforts to improve the missile defense testing program, and to make clear the requirement for robust, operationally realistic testing that demonstrates the operational capabilities of our missile defense systems and provides confidence in the systems, the conferees note with disappointment that the Missile Defense Agency has failed to ensure an adequate testing program.

The conferees note that MDA has accomplished successful flight tests, including intercept tests, over the last 5 years in each of the near-term missile defense programs, namely the Patriot PAC-3 system, the Aegis BMD system, the Terminal High Altitude Area Defense (THAAD) system, and the GMD system. While these test successes represent significant accomplishments in extremely complex weapon systems, their testing programs have also all experienced delays and failures, some because of shortcomings in the testing and targets program. Much more testing remains to be done, and the MDA test and targets program needs to be managed so as to fully support these high priority near-term programs.

One of the most troubling aspects of the testing program is the failure of MDA to ensure an adequate number of reliable targets for the various flight test programs. Over the past 2 years, the conferees have become concerned with the health of the MDA targets program. The reliability and availability of the targets program has come into question as targets failed during two tests, target anomalies occurred during other tests, and the program was unable to deliver targets on schedule or within budget, thus forcing MDA to reduce the flight test schedule of the THAAD system.

Target availability has become the pacing item in the flight test program, and a target failure in a GMD test in May of 2007 resulted in MDA completing only one GMD test during the year. Three flight tests were removed from the THAAD testing program because targets were not funded. These are serious problems. Some appear due to MDA not budgeting sufficient resources for targets, and some appear due to insufficient management attention.

The conferees are also concerned that MDA's planned future Flexible Target Family (FTF), a program designed to increase commonality in target components and subsystems thus reducing costs and production times, is proceeding at a slower pace and at greater cost than expected.

For these reasons, the conferees request that the Government Accountability Office (GAO) initiate a review of the MDA targets program. The review should include the following elements:

- (1) Determine the number of target failures and anomalies that have occurred since 2002, their causes, and their impact on the BMDS;
- (2) Assess whether targets are being delivered on time and if not, the causes of late deliveries;
- (3) Assess how MDA estimates the cost of targets and recoups those costs from BMDS elements;
- (4) Assess MDA's risk management and risk reduction strategies for the targets program;

(5) Determine whether MDA's targets program is adequately funded over the future-years defense program to deliver reliable targets on schedule to support the planned testing program;

(6) Determine the status of MDA's effort to establish an FTF, including any issues that have slowed its progress, and whether the FTF program is likely to correct any of the problems that have occurred in the targets program; and

(7) Make any recommendations for improvements to the MDA targets program.

The GAO should work with the Committees on Armed Services of the Senate and the House of Representatives to define a reporting timeline for this review.

The conferees believe that MDA should consider, plan, and budget for a robust testing program—including an adequate number of reliable targets—that includes salvo launches, multiple target engagements, multi-mission tests, liquid target tests, and tests that will stress the systems to determine how they would perform under real-world operational conditions. The conferees plan to monitor the testing and targets program carefully in the coming year.

#### *NSA acquisition management*

The Senate report accompanying S. 1547 (S. Rept. 110–77) directs a series of actions regarding the National Security Agency's (NSA) transformation programs. The conferees endorse this direction, but with two modifications.

The Senate report directs that the Director of Operational Test and Evaluation (DOT&E) exercise oversight over all major elements of the NSA's Transformation 3.0 activities. The conferees understand that the Joint Interoperability Test Command (JITC) is already supporting the NSA's test and evaluation activities, and directs that JITC be substituted for the DOT&E in complying with the direction in the Senate report.

The Senate report also mandates that the NSA's transformation programs may not proceed to Milestone B without certain certifications to Congress. The conferees agree that this language should be understood to mean that the certifications required can be prepared and issued as part of the Milestone B approval process.

### Subtitle A—Authorization of Appropriations

#### *Authorization of appropriations (sec. 201)*

The House bill contained a provision (sec. 201) that would authorize the recommended fiscal year 2008 funding levels for all research, development, test, and evaluation accounts.

The Senate amendment contained a similar provision (sec. 201).

The conference agreement includes this provision.

#### *Amount for defense science and technology (sec. 202)*

The House bill contained a provision (sec. 202) that would authorize \$11,504.3 million for defense science and technology programs.

The Senate amendment contained a similar provision (sec. 202) that would authorize \$11,203.3 million for defense science and technology programs.

The conferees agree to include a provision that would authorize \$10,913.9 million for defense science and technology programs.

Subtitle B—Program Requirements, Restrictions, and Limitations

*Operational test and evaluation of Future Combat Systems network (sec. 211)*

The House bill contained a provision (sec. 211) that would require an operational test and evaluation of the Future Combat Systems (FCS) network in a realistic environment simulating operational conditions. No funds could be obligated for low-rate initial production or full-rate production of FCS manned ground vehicles until 60 days after the submission of a required report on the testing by the Director of Operational Test and Evaluation (DOT&E). The provision would exclude the Non-Line-of-Sight Cannon from the funding prohibition.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would clarify that the test and evaluation of the network would be conducted in accordance with a FCS Test and Evaluation Master Plan approved by the DOT&E, that the test and evaluation would be conducted using prototype equipment, sensors, and software for the FCS network, and that the prohibited funding subject to this provision would not include funds for advance procurement items for FCS manned ground vehicles.

The conferees do not intend to require any additional testing and evaluation beyond that deemed necessary by the DOT&E to determine operational effectiveness and suitability of the network. The conferees also do not intend for that testing and evaluation to be conducted under any other conditions or in any other environment than that provided by the location or locations specified in an approved Test and Evaluation Master Plan, and within the safety, legal, and electromagnetic interference constraints of the approved testing location.

The conferees intend that the testing be conducted within the development and resource constraints of the FCS program. Additionally, funding for FCS Spin Outs, which do not include manned ground vehicles as currently defined by the Army, would not be prohibited under this provision.

*Limitation on use of funds for systems development and demonstration of Joint Light Tactical Vehicle program (sec. 212)*

The House bill contained a provision (sec. 212) that would restrict the obligation of authorized funds for the Joint Light Tactical Vehicle (JLTV) program beyond its Design Readiness Review until the congressional defense committees receive a progress report on the program's compliance with section 2366a of title 10, United States Code.

The Senate amendment contained no similar provision.

The Senate recedes with a clarifying amendment that would limit the obligation of authorized funds for the JLTV program be-

yond the Milestone B decision and system design and demonstration (SDD) phase until the congressional defense committees receive and review the Milestone Decision Authority's required certifications that comply with section 2366a of title 10, United States Code.

The conferees strongly support the JLTV program, but are concerned that the JLTV program may enter the acquisition phase of SDD with insufficient knowledge of technology maturity, requirements, and affordability.

*Requirement to obligate and expend funds for development and procurement of a competitive propulsion system for the Joint Strike Fighter (sec. 213)*

The House bill contained a provision (sec. 213) that would require the Department of Defense to develop a competitive propulsion system for the Joint Strike Fighter (JSF) aircraft. The House language was not explicit on the issue of permitting a winner-take-all down select at the time the alternate engine is ready for production.

The Senate amendment contained a similar provision (sec. 213). The Senate provision would explicitly require, however, that competition continue throughout the production phase of the JSF program.

The conferees agree to include language that would require the Department of Defense to: (1) develop a competitive propulsion system for the JSF aircraft; and (2) continue competition for the propulsion system throughout the production phase of the JSF program.

*Limitation on use of funds for defense-wide manufacturing science and technology program (sec. 214)*

The House bill contained a provision (sec. 214) that would restrict the use of funds for the manufacturing science and technology program, unless competitive procedures were used in project awards; projects were carried out in a manner that was consistent with statute and directives; and a formal technology transition agreement was executed for each project.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Department of Defense to solicit competitive proposals for funding under the program, and would replace the requirement for a formal technology transition agreement with a requirement for an implementation plan.

The conferees believe that the manufacturing science and technology program should invest in higher risk efforts aimed more at developing next generation or cross-cutting capabilities than those currently being pursued in the manufacturing technology programs of the services and agencies.

*Advanced sensor applications program (sec. 215)*

The Senate amendment contained a provision (sec. 211) that would require that \$20.0 million in funds authorized and appropriated for the Foreign Materials Acquisition and Exploitation program and for activities of the Office of Special Technology be allo-

cated to the Advance Sensor Applications Program (ASAP). That provision would have also required that management oversight of the program be transferred to the Defense Threat Reduction Agency.

The House bill contained no similar provision.

The House recedes with an amendment that would require that \$13.0 million in funds authorized and appropriated for activities of the Intelligence Systems Support Office and \$5.0 million of operation and maintenance funds from the office of the Director of Naval Intelligence be allocated to the ASAP program. The modified provision would also require that the management oversight of the program remain within the office of the Under Secretary of Defense for Intelligence until certain conditions as specified in the classified annex to this report are met.

*Active protection systems (sec. 216)*

The Senate amendment contained a provision (sec. 212) that would require comparative live-fire tests and a comprehensive assessment of active protection systems.

The House bill contained no similar provision.

The House recedes with an amendment that would emphasize the need to perform live-fire tests of systems that are suitable for use on tactical wheeled vehicles, especially light tactical wheeled vehicles, and specify that the source of funding for the test should be the Joint Improvised Explosive Device Defeat Fund.

Subtitle C—Ballistic Missile Defense

*Participation of Director, Operational Test and Evaluation, in missile defense test and evaluation activities (sec. 221)*

The House bill contained a provision (sec. 221) that would require that the Director of Operational Test and Evaluation have access to certain operational test and evaluation information of the Missile Defense Agency pertaining to any major defense acquisition program.

The Senate amendment contained a similar provision (sec. 234) that would amend title 10, United States Code, to ensure that the Director of Operational Test and Evaluation has access to missile defense test and evaluation information of the Missile Defense Agency.

The House recedes with a clarifying amendment.

*Study on future roles and missions of the Missile Defense Agency (sec. 222)*

The House bill contained a provision (sec. 222(d), (e), (f)) that would require an independent study of the future structure, roles, and missions of the Missile Defense Agency, including its relationship with other entities of the Department of Defense. The study would also make recommendations on the future structure, roles, and missions of the Missile Defense Agency.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would add several matters to be included in the study, including: the operation and sustainment of missile defenses; the missile defense acquisi-

tion process; the missile defense requirements process; and the transition and transfer of missile defense capabilities to the military departments. The Senate amendment would also clarify the scope of the recommendations to be included in the study.

*Budget and acquisition requirements for Missile Defense Agency activities (sec. 223)*

The House bill contained a provision (sec. 222(a), (b), (c)) that would require the Missile Defense Agency (MDA) to request operation and maintenance (O&M) funds for any operation and support activities in its fiscal year 2009 budget request. It would also require MDA to submit a plan, no later than March 1, 2008, for transitioning MDA from using research, development, test, and evaluation (RDT&E) funds for missile defense fielding activities to using procurement funds for such activities. The provision would also require an independent study of the future roles and missions of MDA.

The Senate amendment contained a similar provision (sec. 233) that would require MDA, starting with its budget submission for fiscal year 2009, to request separate amounts for RDT&E, procurement, O&M, and military construction. The provision would also establish objectives and requirements for improving transparency, accountability, and oversight of MDA acquisition activities.

The House recedes with an amendment that would combine the budget and acquisition provisions of the two bills to establish future budget and acquisition requirements for MDA. The issue of an independent study of the future roles and missions of MDA is described elsewhere in this report.

The agreed provision would require MDA to revise its budget structure to transition to the use of all the normal categories of funding in fiscal year 2010 (RDT&E, procurement, O&M, and military construction), instead of using exclusively RDT&E funds for all activities. In fiscal year 2009 the MDA budget request would include, in addition to RDT&E funds, military construction funds and procurement funds for long lead items, including for Terminal High Altitude Area Defense firing units 3 and 4, and for Standard Missile-3 Block IA interceptors. The provision would provide defined authority for MDA to use RDT&E funds in fiscal year 2009 for fielding of missile defense capabilities previously approved by Congress.

The provision would direct MDA to submit to Congress by March 1, 2008, its plan to transition from using exclusively RDT&E funding to using procurement, O&M, military construction, and RDT&E funds, as well as its plan for transitioning from incremental funding to full funding in fiscal years after fiscal year 2010. The conferees note that over the long term, it is likely more cost-effective and less expensive to fully fund assets than to fund them incrementally over several years.

The conferees are aware that the missile defense capabilities developed and fielded by MDA have been funded on an incremental funding basis, using RDT&E funds, since 2002. As MDA transitions from exclusively RDT&E funding to procurement and other funding, the conferees understand that it will take time for MDA to transition from incremental funding to full funding of fielded ca-

pabilities. Consequently, the conference agreement would provide MDA with the authority to use procurement funds for fiscal years 2009 and 2010 to field missile defense capabilities on an incremental funding basis, without any requirement for full funding.

The conferees understand that MDA may seek to use incremental funding after fiscal year 2010 to continue fielding specific missile defense capabilities. Congress will consider a request for additional authority for incremental funding of a specific program or capability in fiscal years after 2010 if the Department of Defense makes such a request in a future budget request. The conferees caution the Department that this additional authority will be considered on a limited, case-by-case basis, and expect that future missile defense programs will be funded in a manner more consistent with other acquisition programs of the Department of Defense.

The conferees expect MDA to continue to place high priority attention and resources on fielding the near-term missile defense capabilities previously approved by Congress, namely Ground-based Interceptors, the Aegis Ballistic Missile Defense program and its Standard Missile-3 interceptors, and the Terminal High Altitude Area Defense program, and to make every effort to keep these programs on schedule.

*Limitation on use of funds for replacing warhead on SM-3 Block IIA missile (sec. 224)*

The House bill contained a provision (sec. 223) that would prohibit the use of funds authorized to be appropriated in this Act to replace the currently planned unitary warhead for the Standard Missile-3 (SM-3) Block IIA interceptor missile with a multiple kill vehicle (MKV) warhead until after the Secretary of Defense certifies that two conditions have been met: (1) the United States and Japan have reached agreement to replace the unitary kill vehicle with an MKV; and (2) replacing the unitary kill vehicle on the SM-3 Block IIA missile with an MKV will not delay the expected deployment date of that SM-3 missile.

The Senate amendment contained no similar provision.

The Senate recedes.

The conferees note that the Missile Defense Agency (MDA) has indicated an interest in replacing the unitary kill vehicle development program, which is specified in the agreement with Japan, with a new MKV development program. This would have undermined the agreed program of cooperation between the United States and Japan on joint development of the SM-3 Block IIA interceptor missile. It is important to support the joint development program in accordance with the agreed program of record, which currently specifies a unitary kill vehicle.

This provision does not restrict the MDA from conducting research, development, analysis, or testing of MKV technologies, including those which could be used in the future with the SM-3 Block IIA missile. It also does not restrict MDA from conducting analysis and discussions with Japanese officials to consider the possibility of including MKV on the SM-3 Block IIA.

*Extension of Comptroller General assessments of ballistic missile defense programs (sec. 225)*

The House bill contained a provision (sec. 224) that would extend by 2 years the period for which the Government Accountability Office (GAO) would review the programs of the Missile Defense Agency.

The Senate amendment contained a similar provision (sec. 235) that would extend by 5 years the period for which the GAO would review the programs of the Missile Defense Agency.

The House recedes.

The conferees note that the annual reviews and reports of the GAO on missile defense programs have proven very useful to Congress in providing detailed oversight and recommendations. The conferees value the work of the GAO, and note the importance of the Department of Defense and the Missile Defense Agency providing information to GAO in a timely and responsive manner to facilitate their review of, and reporting to Congress on, ballistic missile defense programs.

*Limitation on availability of funds for procurement, construction, and deployment of missile defenses in Europe (sec. 226)*

The House bill contained a provision (sec. 225) that would require an independent assessment of the proposed deployment of Ground-based Midcourse Defense interceptors and associated radars in Europe, and would require an assessment of alternatives to that proposed deployment.

The Senate amendment contained a related provision (sec. 231) that would limit the obligation of fiscal year 2008 funds for procurement, site activation, construction, preparation of equipment for, or deployment of the proposed European deployment until two conditions are met: (1) the Governments of Poland and the Czech Republic have given final approval to bilateral missile defense deployment agreements negotiated with the United States; and (2) 45 days have elapsed after Congress receives an independent assessment of options for missile defense in Europe. The provision would also limit the availability of fiscal year 2008 funds for the acquisition or deployment of operational interceptor missiles for the proposed European deployment until the Secretary of Defense certifies that the 2-stage interceptor proposed for deployment in Europe has demonstrated, through successful, operationally realistic flight testing, a high probability of working in an operationally effective manner. The provision would also require an independent assessment of specified options for missile defense in Europe. The provision would not limit the availability of fiscal year 2008 funds for activities not otherwise limited by the provision, including site surveys, studies, analyses, and planning and design for the proposed missile defense deployment in Europe.

The House recedes with an amendment that would combine the elements of the two provisions.

The conferees note that the administration requested fiscal year 2008 funds to begin construction for the proposed missile defense deployment before it began negotiations on deployment with either Poland or the Czech Republic. The conferees believe it is premature to seek construction funds before even negotiating agree-

ments with Poland and the Czech Republic, and have authorized reduced funding accordingly.

The conferees observe that, if the Governments of Poland and the Czech Republic give final approval to any successfully negotiated deployment agreements during fiscal year 2008, the Department of Defense will have the option of submitting a reprogramming request for site activation and construction funds.

The administration's proposed deployment is intended to address a potential future long-range missile threat from Iran to the U.S. homeland and to Europe. While this potential threat may or may not emerge by 2015, Iran already has the largest inventory of short- and medium-range ballistic missiles in the Middle East, and these missiles currently pose a threat to forward-deployed forces of the United States and to its allies and other friendly nations in the region.

As enacted by section 223 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109-364), "it is the policy of the United States that the Department of Defense accord a priority within the missile defense program to the development, testing, fielding, and improvement of effective near-term missile defense capabilities." The conferees believe that, consistent with this policy, it is essential to focus on developing, testing, and deploying effective, near-term missile defense capabilities to defend against these existing missile threats.

The Commander of the Joint Forces Component Command for Integrated Missile Defense, a component of United States Strategic Command, informed Congress that in order to fulfill the combatant commanders' operational requirements to defend against existing short- and medium-range missile threats the U.S. would require almost twice the number of Terminal High Altitude Area Defense (THAAD) and Standard Missile-3 (SM-3) interceptors as currently planned for and budgeted. The independent assessment required in this provision will examine the full range of threats and missile defense options to meet these threats, including the THAAD and SM-3 systems.

The conferees strongly support the need to work closely with our North Atlantic Treaty Organization (NATO) allies, including Poland and the Czech Republic, to defend against the mutual threats we face, including ballistic missile threats. In this regard, there are several key principles that should guide the proposed missile defense deployment in Europe.

First, NATO must play a central role with regard to future discussions on European missile defense. To the extent the proposed deployment is placed in a larger NATO context, NATO is more likely to be supportive. The conferees encourage NATO to accelerate its efforts to acquire wide area missile defense capabilities against short- and medium-range missile threats.

Second, any future long-range U.S. missile defense system deployed in Europe should, to the maximum extent possible, be integrated and fully interoperable with the missile defense systems that NATO is developing for deployment. Since NATO is expected to begin deploying an initial capability in 2010, this will require a clear understanding of the planned capabilities and the command

and control arrangements for the systems of NATO and of the United States.

Third, it is imperative that any U.S. missile defense system deployed to protect our forward-deployed forces and NATO allies in Europe be part of a larger network of systems that defends all such allies, and must not leave the territory of certain allies unprotected against short- and medium-range missile threats. The proposed U.S. system would leave parts of NATO's southeastern region unprotected, thus requiring other systems, such as those mentioned above, to provide full protection. As the NATO Secretary General has indicated, the indivisibility of alliance security is a principle on which there can be no compromise.

*Sense of Congress on missile defense cooperation with Israel (sec. 227)*

The House bill contained a provision (sec. 228) that would require the Secretary of Defense to expand the U.S. ballistic missile defense system to better integrate with the Israeli ballistic missile defense system, and also would require the Secretary to submit a report on the status of integrating U.S. and Israeli missile defense systems. The provision would also authorize funding for a variety of missile defense programs to assist Israel's defensive capability.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that expresses the sense of Congress that the United States should have an active program of ballistic missile defense cooperation with Israel, and should take steps to improve the coordination, interoperability, and integration of their missile defense capabilities, and enhance their capability to defend against ballistic missile threats present in the Middle East region. The amendment would also require the Secretary of Defense to submit to the congressional defense committees a report that describes in detail the program of missile defense cooperation between the United States and Israel, including plans for future capability enhancement.

The conferees note that the United States and Israel have a long-standing program of cooperation on ballistic missile defense, including joint development of technology like the Arrow interceptor missile, and joint missile defense testing and exercises. This cooperation continues to serve the security interests of both nations.

The conferees are aware that Israel is considering a follow-on system for the Arrow Weapon System that would provide better defensive capability against faster, higher, and more challenging missiles than Arrow can currently provide. The conferees encourage Israel and the Missile Defense Agency to evaluate the possibility of using the U.S. Terminal High Altitude Area Defense (THAAD) system, or a land-based version of the Standard Missile-3, as a successor to Arrow. If either or both of these systems could provide the desired level of defensive protection, it would be much more cost-effective and less expensive than developing a new Arrow system.

*Limitation on availability of funds for deployment of missile defense interceptors in Alaska (sec. 228)*

The Senate amendment contained a provision (sec. 232) that would limit the availability of funds authorized in this Act to deploy more than 40 Ground-Based Interceptors at Fort Greely, Alaska, until the Secretary of Defense submits a certification that the Block 2006 Ground-based Midcourse Defense system has demonstrated, through operationally realistic end-to-end flight testing, that it has a high probability of working in an operationally effective manner.

The House bill contained no similar provision.

The House recedes.

*Policy of the United States on protection of the United States and its allies against Iranian ballistic missiles (sec. 229)*

The Senate amendment contained a provision (sec. 1218) that would state the policy of the United States to develop and deploy, in conjunction with its allies and other nations whenever possible, an effective defense against Iranian ballistic missiles that threaten forward-deployed forces of the United States and its North Atlantic Treaty Organization (NATO) allies in Europe, and which could eventually pose a threat to the United States homeland. The provision would also make it the policy of the United States to proceed with the development of such defenses so that any missile defenses fielded by the United States in Europe are integrated with or complementary to missile defense capabilities fielded by NATO.

The House bill contained no similar provision.

The House recedes with an amendment that would add a policy statement to encourage NATO to accelerate its efforts to acquire missile defense capabilities to defend NATO territory against the existing threat of Iranian short- and medium-range ballistic missiles, including wide-area defense. It also includes references to other allies and friendly nations in the region.

#### Subtitle D—Other Matters

*Coordination of human systems integration activities related to acquisition programs (sec. 231)*

The House bill contained a provision (sec. 231) that would require the designation of a senior official to be responsible for human systems integration (HSI) activities throughout acquisition programs, supervise such activities, recommend resource requirements for such activities, and develop a departmental instruction, and possibly directive, relating to HSI.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the designation of a senior official to coordinate HSI activities related to acquisition programs and eliminate the statutory requirement for the development of a specific directive or instruction on HSI.

The conferees note that the Department of Defense (DOD) April 2006 report to Congress entitled “Human Systems Integration Activity in DOD Acquisition Programs” concluded that “. . . a sound HSI strategy in acquisition is a highly effective method of both saving the Department significant costs during the life cycle

of systems and improving system performance,” but also found that business practices in this area “. . . are not mature and consistent across DOD.” It further concluded that effectiveness of HSI is improved by the “institutionalization and standardization of assessment methods and modeling tools across DOD.”

The conferees believe that this area should continue to be a high priority within the Department and believe that this provision will support efforts at the effective coordination and prioritization of HSI efforts. The conferees urge the Department to continue to invigorate and invest in HSI activities throughout acquisition programs, including in science and technology programs.

The conferees note the Department’s failure to satisfy the reporting requirement set out in the Committee on Armed Services of the House of Representatives report to accompany the National Defense Authorization Act for Fiscal Year 2006 (H. Rpt. 109–89), and that a comprehensive review of HSI is over 1 year late. Therefore, to improve DOD responsiveness and intra-departmental coordination, the conferees believe designation of a senior official to coordinate and develop HSI-related activities and methodologies is necessary. The conferees direct the designated official to develop and report on a timeline and plan to satisfy outstanding report and assessment requirements.

*Expansion of authority for provision of laboratory facilities, services, and equipment (sec. 232)*

The House bill contained a provision (sec. 232) that would authorize defense laboratories to provide facilities, services, and equipment through leases, contracts, or other arrangements to private sector entities. It would also permit defense laboratories to receive fees and in-kind payments for these activities and to deposit those fees into appropriate accounts of the laboratory.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would modify existing authority regarding the provision of samples, drawings, and other services to private sector persons or entities. The amendment would broaden these existing authorities to enable the Department of Defense to make available, under regulations prescribed by the Secretary of Defense, facilities, services, and equipment, as long as that availability would not place the Department in direct competition with the domestic private sector, and does not involve in-kind payments for services provided.

The conferees are supportive of efforts that will improve the quality of the defense laboratories and increase their ability to perform their designated missions effectively and efficiently. The conferees believe that the taxpayer-funded infrastructure managed by the Department of Defense should be utilized to support private sector activities when in the interest of national defense. The conferees expect that such support should not displace defense activities or create situations in which the government is in competition with elements of the private sector.

The conferees anticipate that the Secretary of Defense will promulgate regulations for the utilization of this authority that adequately protect both the government’s and the private sector’s interests through the establishment of appropriate safeguards. The

conferees further expect to be kept informed of progress in the establishment of this regulatory framework, lessons learned through the use of this new authority, specific benefits to the Department that are resulting from its use, and any difficulties encountered in its execution.

*Modification of cost sharing requirement for Technology Transition Initiative (sec. 233)*

The Senate amendment contained a provision (sec. 252) that would modify the cost sharing requirements in the Technology Transition Initiative.

The House bill contained no similar provision.

The House recedes.

*Report on implementation of Manufacturing Technology Program (sec. 234)*

The House bill contained a provision (sec. 235) that would require a report on the implementation of the technologies and processes developed under the Manufacturing Technology Program.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would modify the reporting requirement to include assessments of performance enhancements attributable to the Manufacturing Technology Program and related investments, and to modify the time period covered by the implementation analyses.

The conferees intend that the analyses and reporting required by the report should include all projects which received funding from a service or Defense Agency Manufacturing Technology Program in fiscal years 2003, 2004, or 2005, including projects which were initiated prior to 2003.

*Assessment of sufficiency of test and evaluation personnel (sec. 235)*

The House bill contained a provision (sec. 236) that would require an assessment of the sufficiency of the workforce of the Office of the Director of Operational Test and Evaluation.

The Senate amendment contained no similar provision.

The Senate recedes.

The conferees are supportive of efforts to assess accurately the required size and technical skill mix of the workforce necessary to fulfill the important statutory role of the Office of the Director of Operational Test and Evaluation. The conferees are concerned, however, that the organization is heavily reliant on contractor support. Therefore, the conferees expect that this assessment will also address the appropriate balance between government personnel and contractor support in the organization, given its critical, independent oversight role.

*Repeal of requirement for separate reports on technology area review and assessment summaries (sec. 236)*

The House bill contained a provision (sec. 237) that would repeal the statutory requirement for a report to Congress that summarizes the Director of Defense Research and Engineering's Technology Area Review and Assessment (TARA).

The Senate amendment contained no similar provision.

The Senate recesses.

The conferees note that the role of the Director of Defense Research and Engineering (DDR&E) in coordinating the science and technology (S&T) programs of the military services, defense agencies, Special Operations Command, other departmental organizations, and other federal agencies is critical to the efficient and effective execution of the Department of Defense's overall S&T strategy. Further, the Defense Science Board in its October 2005 report "The Roles and Authorities of the Director of Defense Research and Engineering" noted that ". . . the DDR&E should be tasked to assure that all research and development organizations are implementing the strategic technology guidance of the Department."

The conferees further note that the TARA process has been replaced by a combination of S&T collaborative reviews, forward looking assessments, and technology focus teams, under the newly established Reliance 21 process. The conferees support any efforts to improve the coordination and execution of the S&T program and expect the Department to keep the congressional defense committees informed of the maturity and effectiveness of the new processes, as well as outcomes, when appropriate, of specific technical reviews and assessments.

*Modification of notice and wait requirement for obligation of funds for foreign comparative test program (sec. 237)*

The Senate amendment contained a provision (sec. 251) that would shorten the notice and wait time required for the obligation of funds in the Foreign Comparative Test program.

The House bill contained no similar provision.

The House recesses.

*Strategic plan for the Manufacturing Technology Program (sec. 238)*

The Senate amendment contained a provision (sec. 253) that would require the development of a strategic plan for the Manufacturing Technology Program.

The House bill contained no similar provision.

The House recesses with an amendment that would clarify the time period covered by the plan and modify the requirements for development of the plan and for its submission to Congress.

The conferees are supportive of the efforts of the Manufacturing Technology Program to enhance the producibility, improve the performance, and increase the affordability of defense systems. The conferees note that the Defense Science Board, in its recent study entitled, "The Manufacturing Technology Program: A Key to Affordably Equipping the Future Force" recommended that the Department of Defense "ensure implementation" of the Manufacturing Technology Program strategic plan and investment strategy "with periodic reviews of plan execution." The conferees believe that this provision, as well as other manufacturing-related provisions adopted by the conferees, are consistent with that recommendation and would support efforts to identify best practices that can be used in making future manufacturing technology investments and transitioning technologies to the defense industrial base.

*Modification of authorities on coordination of Defense Experimental Program to Stimulate Competitive Research with similar federal programs (sec. 239)*

The Senate amendment contained a provision (sec. 254) that would give the Department of Defense more flexibility in its execution of the Defense Experimental Program to Stimulate Competitive Research.

The House bill contained no similar provision.

The House recedes.

*Enhancement of defense nanotechnology research and development program (sec. 240)*

The Senate amendment contained a provision (sec. 255) that would update the program and reporting requirements for the defense nanotechnology research program.

The House bill contained no similar provision.

The House recedes with an amendment that would modify the activities and interagency coordination efforts under the program and eliminate the requirement for a Comptroller General study of the program.

The conferees believe that nanotechnology can enable novel future military capabilities if research efforts can be matured into battlefield applications. This type of technology transition is difficult for all technologies, and will be difficult for nanotechnology as well. The conferees believe that the Department of Defense should begin to anticipate and address future technology transition issues, such as manufacturing of nanosystems and developing a sustainable nanotechnology industrial base.

The conferees further see the value in supporting government-wide efforts as part of the National Nanotechnology Initiative and therefore direct the Department to participate in all appropriate interagency activities, including providing appropriate resources to support its involvement in those activities.

*Federally funded research and development center assessment of the Defense Experimental Program to Stimulate Competitive Research (sec. 241)*

The Senate amendment contained a provision (sec. 256) that would require an assessment by the Comptroller General of the Defense Experimental Program to Stimulate Competitive Research.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary of Defense to utilize a defense federally funded research and development center for an independent assessment of the Defense Experimental Program to Stimulate Competitive Research.

*Cost-benefit analysis of proposed funding reduction for High Energy Laser Systems Test Facility (sec. 242)*

The Senate amendment contained a provision (sec. 258) that would require a cost-benefit analysis of the proposed funding reduction for the High Energy Laser Test Facility.

The House bill contained no similar provision.

The House recedes.

*Prompt global strike (sec. 243)*

The House bill contained a provision (sec. 124) that would prohibit the Department of Defense (DOD) from obligating or expending any fiscal year 2008 funds for operational deployment of a weapons system that uses Trident missiles converted to carry conventional payloads. The provision would also direct the Secretary of Defense to notify the congressional defense committees within 30 days after the date on which he determines such a weapons system is fully functional and is necessary to meet military requirements.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would direct the Secretary of Defense to prepare and submit to the congressional defense committees a research, development, and test plan for capabilities that could be used in prompt global strike (PGS) systems. Further, the amendment would direct the Under Secretary of Defense for Acquisition, Technology, and Logistics to submit a plan for obligation and expenditure of funds for fiscal year 2008, and would prohibit implementation of that plan until at least 10 days after it is submitted to the congressional defense committees.

The conferees provide no funds for the Conventional Trident Modification (CTM) program. This limitation on the CTM program does not preclude continued research, development, test, and evaluation on subsystems or technologies previously pursued under the CTM program if applicable to other PGS alternatives or use of the Trident D5 as a test platform.

The conferees have consolidated funding requested by the Navy for CTM and funds requested by the Air Force for the Common Aero Vehicle (CAV) into PE 64165D8Z to be used to establish an integrated PGS program. Requirements for the program should be provided by the United States Strategic Command as informed by the ongoing analysis of alternatives for PGS and the PGS technology road map.

The conferees look to the PGS program to conduct research and development in a wide variety of technology areas including propulsion systems, advanced payload delivery and dispensing mechanisms, system command and control, and non-nuclear, kinetic and non-kinetic payloads.

The conferees note the value of developing conventional prompt global strike capabilities that may be needed for time-sensitive operations. Conventional prompt global strike capabilities would also continue the post-Cold War trend of reducing U.S. reliance on nuclear weapons by providing the President with a wider variety of viable non-nuclear strike options.

The conferees remain concerned about prompt global strike concepts that would employ a mixed loading of nuclear and non-nuclear systems and believe that DOD should carefully address these ambiguity concerns.

## LEGISLATIVE PROVISIONS NOT ADOPTED

*Gulf War illnesses research*

The Senate amendment contained a provision (sec. 214) that would authorize a \$15.0 million increase for Gulf War illnesses research.

The House bill contained no similar provision.

The Senate recedes.

The conference outcome is reflected in the tables of this report in Research, Development, Test, and Evaluation, Army, PE 63002A.

The conferees direct the Secretary of the Army to utilize the authorized funding for this program to undertake research on Gulf War illnesses. The conferees direct that activities under the program should include studies of treatments for the complex of symptoms commonly referred to as "Gulf War Illness"; and identification of objective markers for Gulf War Illness. The conferees recommend that no studies based on psychiatric illness and psychological stress as the central cause of Gulf War Illness be funded under the program. The conferees direct that the program be conducted using competitive selection and peer review for the identification of research with the highest technical merit and military value. Further, the conferees direct that this program be coordinated with similar activities in the Department of Veterans Affairs and the National Institutes of Health.

*Increased funds for X Lab battlespace laboratory*

The House bill contained a provision (sec. 227) that would authorize an increase of \$10.0 million for the X Lab battlespace laboratory.

The Senate amendment contained no similar provision.

The House recedes.

The conference outcome is reflected in the tables of this report in Research, Development, Test, and Evaluation (RDT&E), Defense-wide, line 30.

*Modeling, analysis, and simulation of military and non-military operations in complex urban environments*

The House bill contained a provision (sec. 238) that would express findings of Congress relating to modeling and simulation of urban environments.

The Senate amendment contained no similar provision.

The House recedes.

The conferees believe that modeling and simulation activities hold the promise of improving defense capabilities across the spectrum of missions and have adopted a provision elsewhere in this bill that reflects the high priority that these activities should have. The conferees believe that modeling and simulation activities show significant promise in improving military and non-military capabilities for operating in complex urban environments.

*Reduction of amounts for Army Venture Capital Fund demonstration*

The House bill contained a provision (sec. 233) that would authorize a decrease of \$10.0 million for the Army Venture Capital Fund demonstration.

The Senate amendment contained no similar provision.

The House recedes.

The conference outcome is reflected in the tables of this report in Research, Development, Test, and Evaluation, Army, PE 63125A.

*Sense of Congress concerning full support for development and fielding of a layered ballistic missile defense*

The House bill included a provision (sec. 226) that would express the sense of Congress concerning support for development and fielding of a layered ballistic missile defense system.

The Senate amendment contained no similar provision.  
The House recedes.

### TITLE III—OPERATION AND MAINTENANCE

*Operation and maintenance overview*

The budget request included \$142.8 billion for operation and maintenance for the Department of Defense.

The House bill would authorize \$142.5 billion for operation and maintenance.

The Senate amendment would authorize \$143.6 billion for operation and maintenance.

The conferees agree to authorize \$142.8 billion for operation and maintenance for the Department of Defense.

Unless noted explicitly in the statement of managers, all changes are made without prejudice.

### Title III - Operation and Maintenance (Dollars in Thousands)

| <u>Program Title</u>                            | <u>FY2008<br/>Request</u> | <u>House<br/>Authorized</u> | <u>Senate<br/>Authorized</u> | <u>Conference<br/>Change</u> | <u>Conference<br/>Authorized</u> |

|                     | <b>TOTAL OPERATION AND MAINTENANCE TITLE:</b>             | <b>142,854,017</b>    | <b>142,514,115</b>      | <b>143,461,217</b>       | <b>-58,714</b>           | <b>142,795,303</b>           |

Subtitle A—Authorization of Appropriations

*Operation and maintenance funding (sec. 301)*

The House bill contained a provision (sec. 301) that would authorize fiscal year 2008 funding levels for all operation and maintenance accounts.

The Senate amendment contained a similar provision (sec. 301).

The conference agreement includes this provision.

Subtitle B—Environmental Provisions

*Reimbursement of Environmental Protection Agency for certain costs in connection with Moses Lake Wellfield Superfund Site, Moses Lake, Washington (sec. 311)*

The House bill contained a provision (sec. 311) that would authorize the Secretary of Defense to reimburse the Environmental Protection Agency for certain costs in connection with the Moses Lake Wellfield Superfund Site, Moses Lake, Washington.

The Senate amendment contained a similar provision (sec. 311).

The House recedes.

*Reimbursement of Environmental Protection Agency for certain costs in connection with the Arctic Surplus Superfund Site, Fairbanks, Alaska (sec. 312)*

The House bill contained a provision (sec. 312) that would authorize the Secretary of Defense to reimburse the Environmental Protection Agency for certain costs in connection with the Arctic Surplus Superfund Site, Fairbanks, Alaska.

The Senate amendment contained a similar provision (sec. 312).

The House recedes.

*Payment to Environmental Protection Agency of stipulated penalties in connection with Jackson Park Housing Complex, Washington (sec. 313)*

The House bill contained a provision (sec. 313) that would authorize the Secretary of the Navy to pay a stipulated penalty assessed by the Environmental Protection Agency against the Jackson Park Housing Complex, Washington.

The Senate amendment contained a similar provision (sec. 313).

The House recedes.

*Report on control of the brown tree snake (sec. 314)*

The Senate amendment contained a provision (sec. 314) that would require a report from the Secretary of Defense on the Department's efforts to control the brown tree snake on Guam and prevent its introduction to other areas.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary of Defense to include in this report the results of management, control, and eradication efforts through integrated nat-

ural resource management plans prepared for military installations in Guam under the pilot program authorized by section 670a(g) of title 16, United States Code. The amendment would also require, as part of the Secretary's report, information on the Department's actions to implement the recommendations of the Brown Treesnake Review Panel in its final report published in March 2005.

*Notification of certain residents and civilian employees at Camp Lejeune, North Carolina, of exposure to drinking water contamination (sec. 315)*

The Senate amendment contained a provision (sec. 1082) that would require the Secretary of the Navy to take certain steps with regard to individuals who may have been exposed to drinking water contamination at Camp Lejeune, North Carolina.

The House bill contained no similar provision.

The House recedes with an amendment that would authorize the Secretary of the Navy to use available funds to pay for the health survey required by the provision.

Subtitle C—Workplace and Depot Issues

*Availability of funds in Defense Information Systems Agency working capital fund for technology upgrades to Defense Information Systems Network (sec. 321)*

The Senate amendment contained a provision (sec. 321) that would authorize the Defense Information Systems Agency to use up to \$500,000 of working capital funds to pay for any project directly related to technology upgrades to the Defense Information System Network.

The House bill contained no similar provision.

The House recedes with an amendment that would provide this authority notwithstanding section 2208 of title 10, United States Code, and clarifies the limitation on its use with respect to changing a system's performance envelope.

*Modification to public-private competition requirements before conversion to contractor performance (sec. 322)*

The House bill contained a provision (sec. 324) that would modify the provisions of section 2461 of title 10, United States Code, regarding the requirements for public-private competition for the performance of a function.

The Senate amendment contained an identical provision (sec. 365). The conference agreement includes this provision.

*Public-private competition at end of period specified in performance agreement not required (sec. 323)*

The House bill contained a provision (sec. 325) that would override the requirement in Office of Management and Budget Circular A-76 that all work awarded to federal employees pursuant to a public-private competition be recompeted at the end of the period specified in the performance agreement.

The Senate amendment contained a similar provision (sec. 370).

The House recedes.

The conferees note that this provision would give Department of Defense managers discretion to determine whether it is in the interest of the Department of Defense to conduct a follow-on competition at the end of the period specified in the performance agreement. Nothing in this provision would prohibit the conduct of such a competition, if it were determined to be in the Department's interest.

*Guidelines on insourcing new and contracted out functions (sec. 324)*

The House bill contained a provision (sec. 326) that would require the Under Secretary of Defense for Personnel and Readiness to establish guidelines and procedures for ensuring that full consideration is given to using federal employees to perform new functions and other categories of work that would otherwise be performed under contract.

The Senate amendment contained a similar provision (sec. 368).

The Senate recedes with an amendment that would eliminate language prohibiting the Department of Defense from initiating any new public-private competitions until the guidelines and procedures are issued. The amendment would require the Inspector General of the Department of Defense to report to the Committees on Armed Services of the Senate and the House of Representatives on the compliance of the Secretary of Defense with the requirements of this section.

*Restriction on Office of Management and Budget influence over Department of Defense public-private competitions (sec. 325)*

The House bill contained a provision (sec. 328) that would prohibit the Office of Management and Budget (OMB) from directing or requiring the Secretary of Defense or the secretary of a military department to undertake a particular public-private competition under OMB Circular A-76.

The Senate amendment contained a similar provision (sec. 369).

The Senate recedes with an amendment that would strike the requirement that the Secretary of Defense suspend public-private competitions under OMB Circular A-76 and substitute a requirement that the Inspector General conduct a comprehensive review of the compliance of the Secretary of Defense and the secretaries of the military departments with the requirements of the provision.

The conferees remain concerned about efforts by OMB to intervene in internal Department of Defense (DOD) decisions regarding how the Department should best be staffed to carry out its vital national security functions. Most recently, the Deputy Director of OMB sent a memorandum to the Deputy Secretary of Defense complaining that the Department of the Army had not subjected a large enough number of federal employee positions to public-private competition and that DOD had classified too many positions as being inappropriate for public-private competition. The OMB memorandum further urged DOD to actively review positions in the intelligence community for possible public-private competition.

The conferees agree that decisions about which functions should be performed by DOD employees in the interest of national security are best made by the Department of Defense. In recent years the DOD budget has grown dramatically as the Department has taken on substantial new burdens in the global war on terrorism. The Department of the Army and the defense intelligence agencies bear a particularly heavy share of these burdens. Under these circumstances, the conferees believe that DOD decisions regarding the structure of the civilian workforce required to meet national defense needs should be made without outside interference. Accordingly, the conferees direct the Secretary of Defense to make these decisions on the merits, without regard to any views that may be expressed by OMB officials.

*Bid protests by federal employees in actions under Office of Management and Budget Circular A-76 (sec. 326)*

The House bill contained a provision (sec. 329) that would give federal employees the same right to appeal the outcome of a public-private competition that contractors competing against those employees already have.

The Senate amendment contained an identical provision (sec. 366). The conference agreement includes this provision.

The conferees note that this provision applies to a protest of an agency decision that was made after the date of the enactment of this Act, even if the competition, study, or analysis which formed the basis for such decision was initiated prior to the date of enactment.

*Public-private competition required before conversion to contractor performance (sec. 327)*

The House bill contained a provision (sec. 330) that would extend government-wide certain provisions regarding public-private competitions conducted by the Department of Defense.

The Senate amendment contained an identical provision (sec. 367). The conference agreement includes this provision.

*Extension of authority for Army industrial facilities to engage in cooperative activities with non-Army entities (sec. 328)*

The Senate amendment contained a provision (sec. 341) that would amend section 4544 of title 10, United States Code, to extend until September 30, 2014, the authority for any working capital funded Army industrial facility to enter into a contract or cooperative arrangement with a non-Army entity to carry out specified military or commercial projects. This provision would also provide for an annual report by the Secretary of the Army explaining how the Army is using this extended authority, and would require the Army to submit a business case analysis on the advisability of making this authority permanent.

The House bill contained no similar provision.

The House recedes.

*Reauthorization and modification of multi-trades demonstration project (sec. 329)*

The House bill contained a provision (sec. 331) that would reauthorize and expand section 338 of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108–136) to allow the Secretary of the Air Force and the Secretary of the Navy to conduct demonstration projects through 2013 to evaluate the benefits of promoting workers who perform multiple trades.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would: (1) grant the Secretary of the Army the same authority to establish a multi-trades demonstration project; (2) limit demonstrations to one industrial facility per service; and (3) require the secretaries to make a recommendation on whether multi-trade authority should become permanent.

The conferees note that, in accordance with section 338 of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108–136), the Comptroller General will submit a report on the projects at the end of the demonstration.

*Pilot program for availability of working capital funds to Army for certain product improvements (sec. 330)*

The House bill contained a provision (sec. 322) that would amend section 2208 of title 10, United States Code, by adding a new paragraph at the end granting limited authority to the Department of Defense to use Defense Working Capital Funds to make product improvements for weapon systems, major end items, and components.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would grant authority to the Secretary of the Army in a pilot program to use working capital funds for certain product improvements. The Senate amendment would also strike amendments to section 2208 of title 10, United States Code, and grant working capital fund activities limited authority to spend up to \$1.0 million to insert technology improvements into weapon systems or major end items. The conferees agree that this authority would expire in 2013.

The conferees are concerned that Department of Defense policy and regulations governing the implementation of the authority provided in section 2208 of title 10, United States Code, is undermining the Department's and services' ability to use working capital fund activities, such as depot maintenance activities and department-wide services, to maximize equipment recapitalization and modernization. This is particularly the case for the Army and the Marine Corps as significant numbers of their tactical systems will cycle through the depot maintenance systems as part of their reset strategies over the next several years.

The intent of the pilot program is to allow the Army to demonstrate whether use of working capital funds could decrease procurement lead times, implement steady workload requirements at the depots, as well as improve supplier workload coordination with the private sector. The conferees are concerned that the Financial Management Regulation has limited the authority, and therefore the intent, of section 2208 of title 10, United States Code, by re-

stricting technology refreshment and insertion to those components or systems that would not “significantly improve the performance envelope” of the end item. The conferees believe that a less restrictive application of this authority would allow working capital fund activities to acquire mission-related system upgrades and insert technologies that improve major components of end items, such as large system engines, as they would other parts to maximize depot capacity, workload management, and flexibility. A less restrictive application of this authority would also allow working capital fund services to upgrade or refresh mission equipment to increase performance and reduce costs.

The conferees are aware of the services’ concerns regarding the potential impact of this authority. The conferees share these concerns and, accordingly, sunset the authority in 2013. Additionally, the conferees direct the Army to address these issues during the pilot program and in the report mandated by this provision:

- (1) the definition of “significant” change to the performance envelope of an end item;
- (2) the impact on cost, including training;
- (3) the distinction between investment and improvement (i.e., service-life extensions, new capabilities, safety) and their relationship to appropriation law and the role of program managers;
- (4) the impact on depot competitiveness; and
- (5) the impact on performance-based logistics agreements.

The conferees have included an annual reporting requirement in this provision to ensure congressional oversight of the pilot program. The annual reports will serve to inform the congressional defense committees on whether this authority should be considered for Department of Defense-wide application.

#### Subtitle D—Extension of Program Authorities

##### *Extension of Arsenal Support Program Initiative (sec. 341)*

The House bill contained a provision (sec. 341) that would amend section 343 of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 (Public Law 106–398) to extend the Arsenal Support Program Initiative (ASPI) through fiscal year 2010.

The Senate amendment contained a similar provision (sec. 342).

The Senate recedes.

The conferees agree that the Army’s arsenals provide the Nation critical manufacturing capabilities not available from any other domestic source and, therefore, are vital to the industrial capacity of the Department of Defense. The conferees believe that for many years the Department has neglected the arsenals in terms of capital investment to keep pace with modern manufacturing requirements and retention of core skills in the arsenal workforce.

One of the central purposes for the creation of the ASPI was to retain and possibly strengthen the viability of the Army arsenals by leveraging the availability of military industrial facilities and a skilled workforce and commercial ventures related to the arsenals’ mission. The conferees are concerned that the ASPI has had lim-

ited success in contributing to the arsenals' retention of skills in manufacturing processes necessary to ensure these unique skills are available for national security purposes. Unlike initiatives at Army ammunition plants where the commercial ventures are complementary or compatible to the plants' core military mission, the arsenal initiatives appear to have minimal connection to core mission skills. Some arsenals appear to create force protection and security risks by introducing relatively open access to the installations by non-defense personnel. The conferees are also concerned about reported conflicts over the availability and use of Department-owned land and facilities. These conflicts between the arsenals' military mission and ASPI-related commercial ventures undermine control of the pace and scope of the program that arsenal commanders and the Department must retain.

The conferees are aware that ASPI-related recapitalization of critical arsenal plants and equipment has been limited. Based on the congressionally mandated Department of the Army report of October 5, 2007, the ASPI appears to be contributing to the local economic development purposes laid out in the enacting legislation. However, the \$15.5 million in congressionally directed funding that has supported the program since fiscal year 2001 has produced only \$3.1 million in cost avoidance to the Army. The Army's October report recommends permanent authority for the ASPI, but the Department of Defense did not request any ASPI authority in its fiscal year 2008 legislative package, nor did the Army budget request include ASPI funding for fiscal year 2008 or any future year.

For the reasons noted above, the conferees expect the Department of Defense to take action to increase the capital investment and enhance the manufacturing processes and skills of the Army's arsenals, either through an improved ASPI program or by seeking additional statutory authorities. During the additional 2 years of authorization that this provision would provide, the conferees expect to see progress in the selection and execution of projects that will enhance the arsenals' core missions and workforce, and result in contributions to the recapitalization of plants and equipment.

The conferees direct the Congressional Budget Office (CBO) to conduct a business case analysis that examines the cost, return on investment, and economic impact of the ASPI. Furthermore, the conferees direct the Comptroller General to: (1) review how effective ASPI has been in achieving the 11 purposes outlined in Public Law 106-398; (2) evaluate variations in the ASPI implementation at the Army arsenals; and (3) provide recommendations on how the ASPI could be restructured to support the arsenals' core missions. The conferees direct CBO and the Comptroller General to submit these reports to the Committees on Armed Services of the House of Representatives and Senate no later than September 1, 2009.

*Extension of period for reimbursement for helmet pads purchased by members of the armed forces deployed in contingency operations (sec. 342)*

The House bill contained a provision (sec. 342) that would extend the period during which members of the armed forces deployed in contingency operations may request and receive reimbursement for helmet pads that were purchased at personal ex-

pense. This section would cover purchases made through September 30, 2007, and would give the service member up to a year to submit a claim for reimbursement. This section does not allow reimbursement for purchases made on behalf of a service member.

The Senate amendment contained no similar provision.

The Senate recesses.

*Extension of temporary authority for contract performance of security guard functions (sec. 343)*

The Senate amendment contained a provision (sec. 322) that would continue the orderly phase-out of the temporary authority for contract performance of security guard functions under section 322 of the Bob Stump National Defense Authorization Act for Fiscal Year 2003 (Public Law 107–314).

The House bill contained no similar provision.

The House recesses.

Subtitle E—Reports

*Reports on National Guard readiness for emergencies and major disasters (sec. 351)*

The House bill contained a provision (sec. 351) that would amend section 482 of title 10, United States Code, to require the Department of Defense to begin reporting on the readiness of the National Guard to respond to civil support mission requirements. The report would be included in the quarterly readiness report to Congress provided to the congressional defense committees and also reported to the State governors.

The Senate amendment contained a similar provision (sec. 343) that would amend sections 482 and 10541 of title 10, United States Code, to require the Department of Defense to routinely measure and report on the readiness of the National Guard to perform domestic support missions.

The House recesses with an amendment that would set an effective date for the first report's submission to allow a reasonable amount of time for the Department to develop appropriate measures and processes to implement this change to the reporting systems. The House amendment would also require that the Department's reports refer to the National Guard's duties specified in sections 331 through 333 and 12304(b) of title 10, United States Code. The House amendment would also specify that the terms emergency and major disaster are used as defined in section 5122 of title 42, United States Code.

The conferees are concerned that increased demands on the personnel and equipment of the National Guard in support of operations in Iraq and Afghanistan have left the States at significant risk in terms of the Guard's ability to respond to domestic crises. The Government Accountability Office reported in January 2007, that the Department does not routinely measure or report to Congress on the readiness of non-deployed National Guard forces for domestic missions. The conferees believe that the degree or acceptability of domestic risk cannot be appropriately managed, by either the Department or the States, without an accurate and reliable readiness measurement and reporting system.

The conferees intend that this provision would result in the establishment of clear lines of authority and responsibility for measuring and reporting readiness that helps define clear lines of federal and State responsibility for strategies and investment priorities to achieve and maintain the appropriate levels of readiness.

The Department has recognized the need to have more visibility over the availability and repair of the National Guard's equipment provided by the Department specifically for its federal mission essential tasks but that is also relevant and useful for the Guard's domestic support missions. The conferees understand that the Department has begun to collect data on this federally provided equipment and units' readiness but note that these efforts are not mature.

The conferees are pleased with the progress of the development and fielding of the Defense Readiness Reporting System and expect that this system would also provide the basis for the measurement and management of National Guard readiness for its domestic support missions.

*Annual report on prepositioned materiel and equipment (sec. 352)*

The House bill contained a provision (sec. 355) that would amend chapter 131 of title 10, United States Code, by adding a section to require the Secretary of Defense to report to the congressional defense committees annually on the materiel and equipment in the prepositioned stocks.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would strike the reference to the obsolete Status of Resources and Training system and adds a requirement for the Government Accountability Office to review the report each year for 7 years.

The conferees believe in the strategic importance of the collection and placement of military materiel and supplies in locations around the world to facilitate and speed our response to crisis or contingencies. Prepositioned stocks have been a critical strategic hedge in our global response strategy since the Cold War, especially for our Army and Marine Corps ground forces. These stocks, both stored on land and on ships afloat, become even more important if we anticipate continuing conflict in the global war on terror in other parts of a dangerous world.

The conferees are aware, however, that current stocks of prepositioned materiel and equipment have been largely distributed or consumed in support of operations in Iraq and Afghanistan. The depleted condition of these stocks reduces our strategic depth and flexibility and increases risk. The conferees are concerned that the Department of Defense's plans and resources are not aligned and sufficient to aggressively reconstitute or reset prepositioned stocks to reduce risk and reestablish strategic flexibility. The conferees expect that this annual report will aid in addressing these concerns and will enable increased congressional oversight.

Consistent with this view and enduring congressional concerns, section 1046 of the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108-375) directed the Department to conduct a policy review of programs for prepositioned materiel and equipment. The conferees note the arrival of an in-

terim report, 2 years late, and urge the Department to complete its analysis and final report as rapidly as possible. Any plan to reconstitute or reset prepositioned stocks, as the provision in this bill would require, must be guided by strategic policy that addresses current and future requirements and manages risk.

*Report on incremental cost of early 2007 enhanced deployment (sec. 353)*

The Senate amendment contained a provision (sec. 323) that would amend section 323 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109–364) to include a reporting requirement on the incremental increase in reset costs related to the deployment of additional forces to Iraq.

The House bill contained no similar provision.

The House recedes with an amendment that would include the incremental change in reset costs associated with the redeployment of forces from Iraq.

The conferees acknowledge that deployed and redeployed force levels will increase and decrease consistent with changes in strategy in both the current and next fiscal years. This fluctuation will change the reset requirements and costs over time. This provision requires the military departments to identify and project the actual and potential increase and decrease in costs of reset and report those changes to Congress.

*Modification of requirements of Comptroller General report on the readiness of Army and Marine Corps ground forces (sec. 354)*

The Senate amendment contained a provision (sec. 357) that would amend section 323 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109–364) to include, as part of the reporting requirement, the Comptroller General's assessment of (1) the ability of Army and Marine Corps forces to meet the requirements of operations in Iraq and Afghanistan, and (2) the strategic depth of the Army and Marine Corps and their ability to meet other contingency plans or requirements.

The House bill contained no similar provision.

The House recedes with an amendment that would change the deadline of the report to June 1, 2008, and would clarify the baseline for troop increase calculations.

*Plan to improve readiness of ground forces of active and reserve components (sec. 355)*

The House bill contained a provision (sec. 352) that would require the Secretary of Defense to submit an annual report to the congressional defense committees regarding plans for the improvement of the readiness of active and reserve component ground forces.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would strike reference to the obsolete Status of Resources and Training System and set the expiration of this reporting requirement after the receipt of five annual reports.

The conferees support the Department of Defense's efforts to modernize its readiness management system and encourage the

Department to use the new Defense Readiness Reporting System to meet the requirements of this provision.

*Independent assessment of Civil Reserve Air Fleet viability (sec. 356)*

The House bill contained a provision (sec. 354) that would require the Secretary of Defense to provide for an independent assessment of the viability of the Civil Reserve Air Fleet (CRAF) to be conducted by a federally-funded research and development center. The provision would require that the independent assessment examine defense planning for organic lift requirements, commercial market factors, and any barriers to the viability of CRAF and provide recommendations for improving the CRAF program.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the independent assessment to examine the efficacy of authorizing the Department of Defense to establish minimum annual purchase amounts for CRAF partners as a means for improving the program's viability when operations transition from the current tempo to peacetime operations.

*Department of Defense Inspector General report on physical security of Department of Defense installations (sec. 357)*

The Senate amendment contained a provision (sec. 359) that would require a report to Congress within 1 year from the Department of Defense Inspector General on the physical security of Department of Defense installations and resources.

The House bill contained no similar provision.

The House recedes.

*Review of high-altitude aviation training (sec. 358)*

The Senate amendment contained a provision (sec. 362) that would require a report by the Secretary of the Army regarding potential costs and cost avoidance in permanently stationing utility, cargo, and light utility helicopters at the High Altitude Aviation Training Site in Colorado.

The House bill contained no similar provision.

The House recedes with an amendment that would require the report to be from the Secretary of Defense instead of the Secretary of the Army; would change the report due date to 180 days after enactment; and would expand the analysis to include the high-altitude and power-limited helicopter training requirements, systems, and resources of all military departments.

The conferees are aware that geographic and environmental conditions in Iraq and particularly the mountainous terrain of Afghanistan present significant challenges to effective and safe helicopter operations. The conferees note that there is little evidence that the Army, or any other military department, has defined a requirement for or adequately resourced this type training either in basic pilot training or in pre-deployment training. The conferees believe that specific training in high-altitude and power-limited helicopter flight can increase effectiveness and reduce accident risks by ensuring that pilots and crews are properly trained for these conditions.

The conferees note that the Army National Guard provides this training at the High-Altitude Aviation Training Site at Gypsum, Colorado. However, because the National Guard has neither the helicopters nor funds adequate to fully support this training mission, units attending the training are required to fund the transportation of their own equipment and support personnel to Colorado. This resource shortfall particularly burdens the National Guard despite the fact that over 50 percent of the annual student load is active-duty Army personnel.

Furthermore, the conferees are aware that deploying aviation units of all services want this training but may not have the time or aircraft available to take advantage of it because of the way resources are currently configured and provided, or because of limitations in regulatory authorities necessary to share aircraft across services.

Accordingly, the conferees believe that the Department of Defense should be responsible for a comprehensive review of high-altitude and power-limited requirements and training to ensure that helicopter units of all military departments deploying to environments such as Iraq or Afghanistan have access to appropriate and necessary pre-deployment training opportunities.

*Reports on safety measures and encroachment issues and master plan for Warren Grove Gunnery Range, New Jersey (sec. 359)*

The Senate amendment contained a provision (sec. 364) that would require three annual reports on safety efforts at the Warren Grove Gunnery Range by the services who use it. It would also require a study by the Secretary of the Air Force on encroachment issues at the range.

The House bill contained no similar provision.

The House recedes with an amendment that would change the requirement from a report on encroachment issues to a master plan for the range.

*Report on search and rescue capabilities of the Air Force in the northwestern United States (sec. 360)*

The House bill contained a provision (sec. 367) that would prohibit the deactivation of the 36th Rescue Flight assigned to Fairchild Air Force Base in Spokane, Washington.

The Senate amendment contained a similar provision (sec. 361) that would require the Secretary of the Air Force to provide a report on search and rescue requirements and capabilities in the northwestern United States to support Air Force operations and training as well as the National Search and Rescue Plan. The Senate amendment would also require the Secretary of Defense to review this report for the purposes of certification regarding search and rescue capabilities in the northwestern United States as required by section 1085 of the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108-375).

The House recedes with an amendment that would add an element to the reporting requirement for an assessment of non-Air Force search and rescue capabilities in the northwestern United States.

*Report and master infrastructure recapitalization plan for Cheyenne Mountain Air Station, Colorado (sec. 361)*

The House bill contained a provision (sec. 356) that would prohibit the Secretary of Defense from proceeding with the relocation of the North American Aerospace Defense (NORAD) command center until 180 days after the Secretary submits a report containing a cost-benefit analysis of the relocation, and the final plans for the relocation. The provision would also require the Comptroller General of the United States to submit a review of the report and final plans not later than 60 days after the Secretary submits them.

The Senate amendment contained a related provision (sec. 1050) that would require the Secretary of Defense to submit a report, not later than 90 days after the date of enactment of this Act, on the relocation of the NORAD command center, including a cost-benefit analysis of the relocation and an explanation of the functions that will remain at Cheyenne Mountain Air Station, Colorado. The provision would also require the Secretary of the Air Force to submit, not later than March 16, 2008, a master infrastructure recapitalization plan for Cheyenne Mountain Air Station.

The Senate recedes with an amendment that would merge the reporting requirements of the two provisions and require, as an added element of the report of the Secretary of Defense, the findings and recommendations of a security and vulnerability assessment of Peterson Air Force Base, Colorado and the Secretary's plans for mitigating any risks identified in the assessment. The amendment would require the Secretary to submit the report not later than March 1, 2008. The amendment would also limit the availability of \$5.0 million of the fiscal year 2008 funds for Air Force operation and maintenance for the Cheyenne Mountain transformation project until Congress receives the report by the Secretary of Defense. The amendment would also require the Comptroller General to submit to Congress a review of the report by the Secretary of Defense not later than 120 days after the Secretary submits the report.

Subtitle F—Other Matters

*Enhancement of corrosion control and prevention functions within Department of Defense (sec. 371)*

The House bill contained a provision (sec. 1041) that would amend section 2228 of title 10, United States Code, to make permanent and strengthen the Director of the Office of Corrosion Policy and Oversight as an independent activity within the Office of the Under Secretary of Defense for Acquisition, Technology and Logistics. This section would also require the Secretary of Defense to submit, with the Department's annual budget request, a report detailing the Department's long-term corrosion control and prevention strategy; the return on investment achieved by implementing the strategy; and an explanation of the funding request versus the funding requirement. The Government Accountability Office would be required to review the Secretary's report within 60 days of submission.

The Senate amendment contained a similar provision (sec. 351).

The Senate recedes with an amendment that would grant the Director of the Office of Corrosion Policy and Oversight authority to interact directly with other government corrosion prevention agencies and academic research and educational institutions, including entering into cooperative research agreements.

*Authority for Department of Defense to provide support for certain sporting events (sec. 372)*

The House bill contained a provision (sec. 361) that would amend section 2564 of title 10, United States Code, to authorize the Secretary of Defense to support sporting events sanctioned by the United States Olympic Committee (USOC) through the Paralympic Military Program. The provision would also authorize the Secretary to provide support for USOC-sanctioned national or international paralympic sporting events when the events are held in the United States and when participation exceeds 100 athletes.

The Senate amendment contained a similar provision (sec. 358) that would additionally condition support for paralympic sporting events to those in which at least 10 percent of the athletes are members or former members of the armed forces who are participating based upon an injury or wound incurred in the line of duty and veterans who are participating based on a service-connected disability.

The House recedes.

*Authority to impose reasonable restrictions on payment of full replacement value for lost or damaged personal property transported at government expense (sec. 373)*

The House bill contained a provision (sec. 362) that would authorize the Secretary of Defense to require compliance with reasonable conditions for a military member or civilian employee of the Department of Defense to receive full replacement value for personal property lost or damaged while being transported at government expense.

The Senate amendment contained a similar provision (sec. 355).

The Senate recedes with a technical amendment.

The conferees believe that requiring service members and civilian employees to submit surveys about the quality of their permanent change of station moves is a reasonable condition for obtaining the benefits of the full replacement value standard for claims relating to lost or damaged personal property. Survey data is a key factor in rating the quality of service provided by individual moving companies. In this regard, the conferees are concerned about potential adverse effects on capable, service-oriented small business movers resulting from the implementation of the full replacement value standard for recovery due to higher costs involved in obtaining liability insurance. The conferees direct the Secretary of Defense to analyze the potential effects of implementing full replacement value on small businesses' and, no later than April 1, 2008, to provide a report to the congressional defense committees on these effects and the Secretary's recommendations for improving small businesses' ability to compete for Department of Defense-related moves.

*Priority transportation on Department of Defense aircraft of retired members residing in commonwealths and possessions of the United States for certain health care services (sec. 374)*

The House bill contained a provision (sec. 363) that would increase the priority standing for space available travel of TRICARE beneficiaries under the age of 65 in commonwealths or possessions of the United States who are referred by a primary care physician on the commonwealth or possession for specialty care outside of the commonwealth or possession.

The Senate amendment contained no similar provision.  
The Senate recedes with a technical amendment.

*Recovery of missing military property (sec. 375)*

The House bill contained a provision (sec. 364) that would amend chapter 165 of title 10, United States Code, to add new sections 2788 and 2789 in order to make uniform among the military departments the prohibition on unauthorized disposition of military property and the authority to seize improperly disposed military property.

The Senate amendment contained a similar provision (sec. 354).

The Senate recedes with an amendment that would require that seizures of U.S. property take place pursuant to applicable Department of Defense and service regulations and that would clarify that transfers of property may take place between members of the armed forces.

*Retention of combat uniforms by members of the armed forces deployed in support of contingency operations (sec. 376)*

The House bill contained a provision (sec. 365) that would add a new section 4566 to title 10, United States Code, authorizing the Secretary of the Army to allow soldiers to keep their combat uniforms if they had been deployed in support of a contingency operation for at least 30 days.

The Senate amendment contained a similar provision (sec. 356) that would authorize the secretaries of each of the military departments to allow members of the armed forces under their jurisdiction to retain their combat uniforms issued as part of organizational clothing and individual equipment in connection with their deployment in support of a contingency operation.

The House recedes with an amendment that would change the provision to add a new section 2568 to title 10, United States Code, authorizing the secretaries of each military department to allow service members under their jurisdiction who are deployed for at least 30 days in support of contingency operations to retain combat uniforms issued as organizational clothing and individual equipment.

*Issue of serviceable material of the Navy other than to armed forces (sec. 377)*

The House bill contained a provision (sec. 366) that would extend to all military departments the same authority currently provided to the Army to issue excess arms, tentage and equipment to the Junior Reserve Officers Training Corps in support of training.

The Senate amendment contained no similar provision.  
The Senate recesses.

*Reauthorization of Aviation Insurance Program (sec. 378)*

The Senate amendment contained a provision (sec. 353) that would amend section 44310 of title 49, United States Code, relating to the expiration of chapter 443, Aviation Insurance Program. The provision would extend the authority of the Secretary of Transportation to provide insurance and reinsurance until December 31, 2013.

The House bill contained no similar provision.  
The House recesses.

LEGISLATIVE PROVISIONS NOT ADOPTED

*Increase in threshold amount for contracts for procurement of capital assets in advance of availability of working capital funds for the procurement*

The House bill contained a provision (sec. 321) that would amend section 2208 of title 10, United States Code, to increase the authority for the acquisition of capital assets through the working capital fund from \$100,000 to \$300,000.

The Senate amendment contained no similar provision.

The House recesses based on the inclusion in the conference report of a provision (sec. 330) that would make working capital funds available to the Army to conduct a pilot program for certain product improvements.

*Authorization of use of working capital funds for acquisition of certain items*

The House bill contained a provision (sec. 323) that would amend section 2208 of title 10, United States Code, by adding a new paragraph at the end that would establish dollar thresholds for the Defense Working Capital Funds to acquire items that support maintenance and technology refreshment and ensure the viability of core logistics capabilities.

The Senate amendment contained no similar provision.  
The House recesses.

*Individual body armor*

The Senate amendment contained a provision (sec. 324) that would require a joint technical assessment by the Director of Defense Research and Engineering (DDR&E) and the Director of Operational Test and Evaluation (DOT&E) of individual body armor systems currently available in the domestic market.

The House bill contained no similar provision.  
The Senate recesses.

The conferees note that the Army has published a request for proposals to initiate a competition as part of a formal acquisition to qualify a range of ballistic protection technologies for individual body armor systems. This procurement process will include extensive and comprehensive first article ballistic and environmental testing by the Army Test and Evaluation Command of articles submitted by all potential vendors. The conferees are satisfied that,

consistent with the intent of section 324 in the Senate amendment, the DDR&E and the DOT&E, as well as the Government Accountability Office, will provide procedural and technical oversight of the Army's tests. The conferees also acknowledge that an added benefit of this testing approach is that it will result in an authoritative procurement decision upon which the Army can act immediately, ensuring that the best possible individual body armor capability is qualified, produced, procured, and issued to our service members without delay.

*Additional requirements for annual report on public-private competitions*

The House bill contained a provision (sec. 327) that would add additional elements to the annual report on the results of public-private competitions conducted by the Department of Defense.

The Senate amendment contained no similar provision.

The House recedes.

*Sense of Senate on the Air Force logistics centers*

The Senate amendment contained a provision (sec. 344) that would express the sense of the Senate that the Air Force should work closely with Congress as they develop and implement the Global Logistics Support Center (GLSC) concept.

The House bill contained no similar provision.

The Senate recedes.

The conferees note that the Air Force is developing and implementing enterprise-wide reorganization and modernization of its logistics management systems and supporting technologies. This reorganization includes the creation of the Global Logistics Support Center that would consolidate several enterprise approaches to supply chain management. The conferees expect the Air Force to work closely with Congress to ensure that management changes enhance Air Logistics Centers' productivity, increase readiness, and reduce costs.

*Plan for optimal use of strategic ports by commander of surface distribution and deployment command*

The House bill contained a provision (sec. 353) that would require the commander of the Surface Distribution and Deployment Command (SDDC) to develop a plan to ensure optimal use of strategic ports.

The Senate amendment contained no similar provision.

The House recedes.

The conferees are encouraged that the SDDC has initiated a study to address many of the concerns raised in section 353. The conferees direct that the SDDC shall, not later than April 1, 2008, submit to the Committees on Armed Services of the House of Representatives and the Senate a plan to optimize the use of strategic ports. The conferees further direct that the SDDC's plan shall include:

- (1) the location, cost effectiveness, personnel and equipment requirements, and utilization of resources for each strategic port;

(2) an analysis of how each strategic port is selected and how the effect of limitations imposed by the Secretary of Defense on commercial shipping options for certain routes and cargo sizes impacts each port;

(3) provisions for consultation with local port authorities at strategic ports that do and do not have a permanent SDDC presence; and

(4) the effect of Department of Transportation policy initiatives to encourage international code sharing and alliances.

*Report on public-private partnerships*

The House bill contained a provision (sec. 357) that would require the Secretary of Defense to submit a report on the public-private partnerships at the Department of Defense Centers of Industrial and Technical Excellence (CITEs).

The Senate amendment contained no similar provision.

The House recedes.

The conferees direct the Secretary of Defense to submit a report to the Committees on Armed Services of the House of Representatives and the Senate by March 1, 2008, that describes:

(1) common approaches and procedures for Department of Defense CITEs to use in the implementation of public-private partnerships;

(2) consistent cost methodologies and reimbursement guidance applicable to maintenance and repair workload performed by Federal Government personnel participating in public-private partnerships;

(3) implementation procedures for completing contract negotiations for public-private partnerships within 12 months of initiating negotiations;

(4) the Secretary's use in a public-private partnership of commercial practices to replace existing inventory and component management, technical publication data, document management, and equipment maintenance and calibration requirements;

(5) delegation during a public-private partnership of Class 2 design authority based on commercial practices to maintain the form, fit, and function of a weapon system platform, major end item, component of a major end item, or article; and

(6) plans to expand core capabilities through the use of public-private partnerships at Department of Defense CITEs.

The conferees direct the Comptroller General to review the Department's report for completeness and submit the review to the Committees on Armed Services of the House of Representatives and Senate by May 1, 2008.

*Continuity of depot operations to reset combat equipment and vehicles in support of wars in Iraq and Afghanistan*

The Senate amendment contained a provision (sec. 360) that would require the Secretary of Defense to submit to the congressional defense committees a report on the challenges of implementing the transfer of depot supply, storage, and distribution functions and impacts on production, including parts reclamation and refurbishment.

The House bill contained no similar provision.

The Senate recedes.

The conferees note that the 2005 Base Realignment and Closure (BRAC) round consolidates depot level supply, storage, and distribution functions at the Defense Logistics Agency (DLA). A recent Government Accountability Office report raises questions about the Department of Defense's business plan to implement this consolidation indicating that there are depot management risks associated with the loss of control of parts needed within the depots' production processes.

The conferees direct that, not later than June 1, 2008, the Secretary of Defense shall submit to the congressional defense committees a report on the implementation of the consolidation of depot supply, storage, and distribution functions with the DLA as required by the 2005 BRAC.

This report shall describe:

- (1) the adequacy of the Department's business plan to:
  - (a) efficiently and effectively transfer depot supply, storage, and distribution functions to the DLA;
  - (b) reduce the risk of disrupting depot production and parts reclamation and refurbishment;
  - (c) ensure the availability and responsiveness of DLA supply personnel and facilities to meet depot throughput needs, including potential impact on depot turnaround time; and
  - (d) ensure the authority and control of depot commanders to manage supply, storage, and distribution personnel and facilities throughout the production process, particularly with respect to overtime scheduling and meeting surge requirements.
- (2) the current estimated costs and projected savings of implementing the transfer;
- (3) the estimated impact of the transfer on the hourly rates charged by the DLA and depots; and
- (4) the number of personnel positions affected by type and depot.

The conferees further direct that, not later than September 30, 2008, the Comptroller General of the United States shall review the report submitted by the Secretary of Defense and submit to the congressional defense committees an assessment of the matters addressed in such report.

*Sense of Congress on future use of synthetic fuels in military systems*

The Senate amendment contained a provision (sec. 363) that would express the sense of Congress on the future use of synthetic fuels in military systems.

The House bill contained no similar provision.

The Senate recedes.

The conferees agree that the Department of Defense should continue and, as appropriate, accelerate the testing and certification of alternative fuels including synthetically derived liquid petroleum, unconventional oil (including oil shale and tar sands), biologically derived fuels (including bio-jet fuel, ethanol, and bio-

diesel), and non-liquid fuels (including hydrogen and electricity) for use in all military air, ground, and sea systems.

*Limitation on the expenditure of funds for initial flight screening at Pueblo Memorial Airport*

The House bill contained a provision (sec. 368) that would prohibit the expenditure of funds for initial flight screening at Pueblo Memorial Airport in Pueblo, Colorado, until the Air Force and the City of Pueblo have developed a plan to meet the Air Force crash, fire, and rescue requirements to support Air Force flight training operations.

The Senate amendment contained no similar provision.

The House recedes.

The conferees note that the Air Force has reached an agreement with the Pueblo Memorial Airport that establishes responsibilities and proportional sharing of costs for the operation and maintenance of the flying facilities jointly used by military and non-military aircraft. The conferees expect that the Air Force will sign this agreement without delay.

## TITLE IV—MILITARY PERSONNEL AUTHORIZATIONS

### Subtitle A—Active Forces

*End strengths for active forces (sec. 401)*

The House bill contained a provision (sec. 401) that would authorize the following end strengths for active-duty personnel of the armed forces as of September 30, 2008: Army, 525,400; Navy, 329,098; Marine Corps, 189,000; and Air Force, 329,651. The House provision included increases of 36,000 and 9,000 for the Army and Marine Corps, respectively, to support those services' growth in ground forces. The House provision also included increases of 489 Navy personnel to restore a reduction in end strength in Navy medicine, and it restored 209 and 963 military positions in the Navy and Air Force, respectively, for military-to-civilian conversions programmed for fiscal year 2008 by the Department of Defense.

The Senate amendment contained a similar provision (sec. 401) that would authorize active-duty end strengths of 328,400 for the Navy and 328,600 for the Air Force, and identical end strengths for the Army and Marine Corps.

The Senate recedes with an amendment that would authorize an end strength of 329,563 for the Air Force.

The conferees recommend end strength levels for the active forces for fiscal year 2007 as set forth in the following table:

| Service            | FY 2007<br>authorized | FY 2008 |                            | Change from        |                       |
|--------------------|-----------------------|---------|----------------------------|--------------------|-----------------------|
|                    |                       | Request | Conferee<br>recommendation | FY 2008<br>request | FY 2007<br>authorized |
| Army .....         | 512,400               | 489,400 | 525,400                    | 36,000             | 13,000                |
| Navy .....         | 340,700               | 328,400 | 329,098                    | 698                | — 11,602              |
| Marine Corps ..... | 180,000               | 180,000 | 189,000                    | 9,000              | 9,000                 |
| Air Force .....    | 334,200               | 328,600 | 329,563                    | 963                | — 4,637               |

| Service         | FY 2007<br>authorized | FY 2008   |                            | Change from        |                       |
|-----------------|-----------------------|-----------|----------------------------|--------------------|-----------------------|
|                 |                       | Request   | Conferee<br>recommendation | FY 2008<br>request | FY 2007<br>authorized |
| DOD Total ..... | 1,367,300             | 1,326,400 | 1,373,061                  | 46,661             | — 5,761               |

*Revision in permanent active duty end strength minimum levels (sec. 402)*

The House bill contained a provision (sec. 402) that would establish the following minimum end strengths for active-duty personnel as of September 30, 2008: Army, 525,400; Navy, 329,098; Marine Corps, 189,000; and Air Force, 329,563.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would establish minimum end strengths for active-duty personnel of 328,400 and 328,600 for the Navy and the Air Force, respectively.

The conferees recommend minimum end strength levels for active forces as set forth in the following table:

| Service            | FY 2007<br>authorized | FY 2008                      | Change from |
|--------------------|-----------------------|------------------------------|-------------|
|                    |                       | Conferee rec-<br>ommendation | FY 2007     |
| Army .....         | 502,400               | 525,400                      | 23,000      |
| Navy .....         | 340,700               | 328,400                      | — 12,300    |
| Marine Corps ..... | 180,000               | 189,000                      | 9,000       |
| Air Force .....    | 334,200               | 328,600                      | — 5,600     |
| DOD Total .....    | 1,357,300             | 1,371,400                    | 14,100      |

*Additional authority for increases of Army and Marine Corps active duty end strengths for fiscal years 2009 and 2010 (sec. 403)*

The House bill contained a provision (sec. 403) that would authorize additional active-duty end strength for the Army and the Marine Corps in fiscal years 2009 and 2010 above the strengths authorized for those services in fiscal year 2008. Over the 2-year period, the Army and Marine Corps would be authorized to increase active-duty end strength above their fiscal year 2008 authorizations by 22,000 and 13,000, respectively.

The Senate amendment contained no similar provision.

The Senate recedes with a technical amendment.

*Increase in authorized strengths for Army officers on active duty in the grade of major (sec. 404)*

The House bill contained a provision (sec. 404) that would amend section 523(a)(1) of title 10, United States Code, to increase the number of Army officers authorized to serve in the grade of major.

The Senate amendment contained a similar provision (sec. 501).

The Senate recedes.

*Increase in authorized strengths for Navy officers on active duty in the grades of lieutenant commander, commander, and captain (sec. 405)*

The House bill contained a provision (sec. 405) that would amend the table in section 523(a)(2) of title 10, United States Code, to increase the number of Navy officers authorized to serve on active duty in the grades of lieutenant commander, commander, and captain.

The Senate amendment contained a similar provision (sec. 502).

The Senate recedes with a technical amendment.

*Increase in authorized daily average of number of members in pay grade E-9 (sec. 406)*

The Senate amendment contained a provision (sec. 521) that would amend section 517(a) of title 10, United States Code, to authorize an increase from 1 percent to 1.25 percent on the upper limit of the authorized daily average of active-duty enlisted members in pay grade E-9.

The House bill contained no similar provision.

The House recedes with a technical amendment.

Subtitle B—Reserve Forces

*End strengths for Selected Reserve (sec. 411)*

The House bill contained a provision (sec. 411) that would authorize the following end strengths for Selected Reserve personnel, including the end strengths for reserves on active duty in support of the reserves as of September 30, 2008: the Army National Guard of the United States, 351,300; the Army Reserve, 205,000; the Navy Reserve, 67,800; the Marine Corps Reserve, 39,600; the Air National Guard of the United States, 106,700; the Air Force Reserve, 67,500; and the Coast Guard Reserve, 10,000.

The Senate amendment contained a similar provision (sec. 411).

The Senate recedes with a technical amendment.

The conferees recommend end strength levels for the Selected Reserve for fiscal year 2008 as set forth in the following table:

| Service                    | FY 2007<br>authorized | FY 2008 |                            | Change from        |                       |
|----------------------------|-----------------------|---------|----------------------------|--------------------|-----------------------|
|                            |                       | Request | Conferee<br>recommendation | FY 2008<br>request | FY 2007<br>authorized |
| Army National Guard .....  | 350,000               | 351,300 | 351,300                    | 0                  | 1,300                 |

*End strengths for Reserves on active duty in support of the reserves (sec. 412)*

The House bill contained a provision (sec. 412) that would authorize the following end strengths for Reserves on active duty in support of the reserve components as of September 30, 2008: the Army National Guard of the United States, 29,240; the Army Reserve, 15,870; the Navy Reserve, 11,579; the Marine Corps Reserve, 2,261; the Air National Guard of the United States, 13,944; and the Air Force Reserve, 2,721.

The Senate amendment contained a similar provision (sec. 412) that would authorize end strengths of 29,204 for the Army National Guard of the United States; 13,936 for the Air National Guard of the United States; and identical end strengths for the other services.

The House recedes.

The conferees recommend end strength levels for Reserves on active duty in support of the reserves as set forth in the following table:

| Service                    | FY 2007<br>authorized | FY 2008 |                            | Change from        |                       |
|----------------------------|-----------------------|---------|----------------------------|--------------------|-----------------------|
|                            |                       | Request | Conferee<br>recommendation | FY 2008<br>request | FY 2007<br>authorized |
| Army National Guard .....  | 27,441                | 29,204  | 29,204                     | 0                  | 1,763                 |
| Army Reserve .....         | 15,416                | 15,870  | 15,870                     | 0                  | 454                   |
| Navy Reserve .....         | 12,564                | 11,579  | 11,579                     | 0                  | – 985                 |
| Marine Corps Reserve ..... | 2,261                 | 2,261   | 2,261                      | 0                  | 0                     |
| Air National Guard .....   | 13,291                | 13,936  | 13,936                     | 0                  | 645                   |
| Air Force Reserve .....    | 2,707                 | 2,721   | 2,721                      | 0                  | 14                    |
| DOD Total .....            | 73,680                | 75,571  | 75,571                     | 0                  | 1,891                 |

*End strengths for military technicians (dual status) (sec. 413)*

The House bill contained a provision (sec. 413) that would authorize the following end strengths for military technicians (dual status) as of September 30, 2008: the Army Reserve, 8,249; the Army National Guard of the United States, 26,502; the Air Force Reserve, 9,909; the Air National Guard of the United States, 22,553.

The Senate amendment contained an identical provision (sec. 413).

The conference agreement includes this provision.

The conferees recommend end strength levels for military technicians (dual status) as set forth in the following table:

| Service                   | FY 2007<br>authorized | FY 2008 |                            | Change from        |                       |
|---------------------------|-----------------------|---------|----------------------------|--------------------|-----------------------|
|                           |                       | Request | Conferee<br>recommendation | FY 2008<br>request | FY 2007<br>authorized |
| Army Reserve .....        | 7,912                 | 8,249   | 8,249                      | 0                  | 337                   |
| Army National Guard ..... | 26,050                | 26,502  | 26,502                     | 0                  | 452                   |
| Air Force Reserve .....   | 10,124                | 9,909   | 9,909                      | 0                  | – 215                 |
| Air National Guard .....  | 23,255                | 22,553  | 22,553                     | 0                  | – 702                 |
| DOD Total .....           | 67,341                | 67,213  | 67,213                     | 0                  | – 128                 |

*Fiscal year 2008 limitation on number of non-dual status technicians (sec. 414)*

The House bill contained a provision (sec. 414) that would establish the maximum end strengths for the reserve components of the Army and Air Force for non-dual status technicians as of September 30, 2008.

The Senate amendment contained an identical provision (sec. 414).

The conference agreement includes this provision.

*Maximum number of reserve personnel authorized to be on active duty for operational support (sec. 415)*

The House bill contained a provision (sec. 415) that would authorize the maximum number of reserve component personnel who may be on active duty or full-time National Guard duty under section 115(b) of title 10, United States Code, during fiscal year 2008 to provide operational support.

The Senate amendment contained an identical provision (sec. 415).

The conference agreement includes this provision.

*Future authorizations and accounting for certain reserve component personnel authorized to be on active duty or full-time National Guard duty to provide operational support (sec. 416)*

The House bill contained a provision (sec. 416) that would require the Secretary of Defense to review the long-term operational support missions performed by reserve component personnel under section 115(b) of title 10, United States Code, and to submit the results of that review to the congressional defense committees by March 1, 2008. The provision would also require that future budget justification materials provided to the Congress include data regarding the numbers of reservists projected to be on active-duty or full-time National Guard duty for operational support under section 115(b) and a summary of the missions they would be performing.

The Senate amendment contained no similar provision.

The Senate recedes.

*Revision of variances authorized for Selected Reserve end strengths (sec. 417)*

The House bill contained a provision (sec. 417) that would amend section 115(f)(3) of title 10, United States Code, to authorize the Secretary of Defense to vary the end strength for a fiscal year for the Selected Reserve of any of the reserve components by a number equal to not more than 3 percent of that end strength.

The Senate amendment contained a similar provision (sec. 416).

The Senate recedes.

Subtitle C—Authorization of Appropriations

*Military personnel (sec. 421)*

The House bill contained a provision (sec. 421) that would provide an overall limit on the amounts authorized to be appropriated

for the military personnel accounts of the Department of Defense for fiscal year 2008.

The Senate amendment contained a similar provision (sec. 421).

The conference agreement includes this provision.

The conferees agree to the following changes from the budget request for the military personnel accounts:

| [Additions in millions of dollars]                       |       |
|--|-------|
| Increased military pay raise .....                       | 308.6 |
| Reimburse travel expenses for specialty care .....       | 1.0   |
| Presumption of service-connected disabilities .....      | 17.0  |
| Increased retiree health care costs .....                | 6.0   |
| Increased accrual payments/increased retirements .....   | 2.0   |
| Enhanced disability severance pay .....                  | 30.0  |
| Transitional assistance .....                            | 5.0   |
| Restore Navy medical personnel cut of 498 .....          | 45.8  |
| Restore mil. to civ. medical conversions—Navy .....      | 45.5  |
| Restore mil. to civ. medical conversions—Air Force ..... | 67.7  |
| Control grade officers .....                             | 75.0  |
| Increase in monthly rate of Hardship Duty Pay .....      | 79.0  |
| Travel allowance for inactive-duty training .....        | 108.0 |
| Health Professional Scholarship accession bonus .....    | 15.0  |
| Loan repayment for reserves .....                        | 1.0   |
| Accumulated leave carryover .....                        | 5.0   |
| Total .....  | 811.5 |

#### LEGISLATIVE PROVISION NOT ADOPTED

##### *Offsetting transfers from the National Defense Stockpile Transaction Fund*

The House bill contained a provision (sec. 423) that would require the Secretary of Defense to transfer funds from the National Defense Stockpile Transaction Fund.

The Senate amendment contained no similar provision.

The House recedes.

## TITLE V—MILITARY PERSONNEL POLICY

### Subtitle A—Officer Personnel Policy

#### *Assignment of officers to designated positions of importance and responsibility (sec. 501)*

The House bill contained a provision (sec. 501) that would amend section 601(b) of title 10, United States Code, to authorize officers serving in the grades of lieutenant general or vice admiral and general or admiral to continue for up to 60 days to hold those grades following reassignment from positions authorized for those grades, unless sooner placed under orders to another position authorized for those grades.

The Senate amendment contained no similar provision.

The Senate recedes with a clarifying amendment.

#### *Enhanced authority for reserve general and flag officers to serve on active duty (sec. 502)*

The Senate amendment contained a provision (sec. 508) that would amend section 526(d) of title 10, United States Code, to ex-

clude from the limitations on the number of general and flag officers on active duty certain reserve general and flag officers serving on active duty for not more than 365 days. The total number of these officers could not exceed 10 percent of the number of reserve component general and flag officers authorized to be in an active status under section 12004 of title 10, United States Code.

The House bill contained no similar provision.

The House recedes.

*Increase in years of commissioned service threshold for discharge of probationary officers and for use of force shaping authority (sec. 503)*

The House bill contained a provision (sec. 502) that would amend sections 630, 647, and 14503 of title 10, United States Code, to provide that the secretaries of the military departments, under regulations prescribed by the Secretary of Defense, may discharge active or reserve component officers who have less than 6 years of active commissioned service or service in an active-status as a commissioned officer. The provision would also authorize discharge or transfer to the reserve active-status list for force restructuring purposes of officers with less than 6 years of service.

The Senate amendment contained no similar provision.

The Senate recedes.

*Mandatory retirement age for active-duty general and flag officers continued on active duty (sec. 504)*

The Senate amendment contained a provision (sec. 504) that would amend section 637(b)(3) of title 10, United States Code, relating to deferral of retirement and continuation on active duty of regular flag and general officers to conform with recently enacted extended age limits for mandatory retirement of general and flag officers serving on active duty that were included in section 502 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109-364).

The House bill contained no similar provision.

The House recedes with a technical amendment.

*Authority for reduced mandatory service obligation for initial appointments of officers in critically short health professional specialties (sec. 505)*

The House bill contained a provision (sec. 531) that would amend section 651 of title 10, United States Code, to authorize the Secretary of Defense to reduce the 8-year minimum service obligation to 2 years for initial appointment of a commissioned officer in a critically short health professional specialty.

The Senate amendment contained a similar provision (sec. 505) that would provide that the minimum period of service under such a waiver would be the greater of 2 years or the period of obligated service associated with receipt of an accession bonus or special pay.

The House recedes with a clarifying amendment.

*Expansion of authority for reenlistment of officers in their former enlisted grade (sec. 506)*

The House bill contained a provision (sec. 532) that would amend sections 3258 and 8258 of title 10, United States Code, to authorize Regular Army and Air Force officers to reenlist in their former enlisted grade when separation as an officer is under honorable conditions and the officer is otherwise qualified for reenlistment.

The Senate amendment contained a similar provision (sec. 507).

The House recedes.

*Increase in authorized number of permanent professors at the United States Military Academy (sec. 507)*

The Senate amendment contained a provision (sec. 506) that would amend section 4331(b) of title 10, United States Code, to increase from 22 to 28 the authorized number of permanent professors at the United States Military Academy.

The House bill contained no similar provision.

The House recedes.

*Promotion of career military professors of the Navy (sec. 508)*

The House bill contained a provision (sec. 503) that would amend section 641 of title 10, United States Code, to authorize the promotion of an officer of the Navy or Marine Corps serving as a permanent professor at the Naval Academy in the grade of commander or lieutenant colonel to the grade of captain or colonel upon completion of 6 years of service as a permanent military professor or career military professor.

The Senate amendment contained a provision (sec. 509) that would amend chapter 603 of title 10, United States Code, to authorize promotion of career military professors of the Navy to the grade of captain or colonel not earlier than 3 years after selection as a permanent professor, pursuant to regulations prescribed by the Secretary of the Navy, which must include a competitive selection board process.

The House recedes with an amendment that would require the Secretary of Defense to conduct an assessment of the effectiveness of the promotion system established by this section and report the results of the assessment to the congressional defense committees no later than December 31, 2009, and that would require the Secretary of the Navy to submit a report regarding the need for any additional grade limitation exemptions by March 31, 2008.

Subtitle B—Reserve Component Management

*Retention of military technicians who lose dual status in the Selected Reserve due to combat-related disability (sec. 511)*

The House bill contained a provision (sec. 514) that would amend section 10216 of title 10, United States Code, to authorize: (1) a military technician (dual status) to continue employment as a military technician when the technician loses military status as a result of a combat-related disability; (2) the secretary concerned to waive temporarily the requirement that a military technician

maintain membership in the Selected Reserve to fill the position of a military technician (dual status) while that position is vacant as a result of the mobilization of the technician normally assigned to that position; and (3) the secretary concerned to defer mandatory separation of a military technician (dual status) until the technician attains eligibility for an unreduced annuity, but not beyond age 62.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would authorize retention until age 60 of a military technician (dual status) as a military technician if the technician loses dual status as the result of a combat-related disability and is otherwise qualified for the position.

*Constructive service credit upon original appointment of reserve officers in certain health care professions (sec. 512)*

The House bill contained a provision (sec. 512) that would amend section 12207(b) of title 10, United States Code, to authorize the granting of sufficient constructive service credit to persons receiving original appointments as reserve officers in critically short health care professions to be appointed in the grade of captain, or in the Navy Reserve, lieutenant.

The Senate amendment contained no similar provision.

The Senate recedes.

*Mandatory separation of reserve officers in the grade of lieutenant general or vice admiral after completion of 38 years of commissioned service (sec. 513)*

The House bill contained a provision (sec. 511) that would amend section 14508 of title 10, United States Code, to require separation from active status of reserve component officers serving in the grades of lieutenant general or vice admiral 30 days after completion of 38 years of commissioned service.

The Senate amendment contained a similar provision (sec. 534) that would also require separation from active status of these officers on the fifth anniversary of the date of an officer's appointment in the grade of lieutenant general or vice admiral, whichever is later.

The Senate recedes with an amendment that would require separation from active status of these officers upon completion of 5 years of service in grade or 30 days after completion of 38 years of commissioned service, whichever is later.

*Maximum period of temporary federal recognition of person as Army National Guard officer or Air National Guard officer (sec. 514)*

The House bill contained a provision (sec. 513) that would amend section 308(a) of title 32, United States Code, to extend the period that members of the National Guard may be granted temporary federal recognition from 6 months to 1 year.

The Senate amendment contained a similar provision (sec. 535).

The Senate recedes with a technical amendment.

*Advance notice to members of reserve components of deployment in support of contingency operations (sec. 515)*

The House bill contained a provision (sec. 517) that would require a minimum of 30 days advance notice, with a goal of 90 days advance notice, to a member of a reserve component called or ordered to active duty for a period of more than 30 days in support of a contingency operation.

The Senate amendment contained no similar provision.

The Senate recedes with a clarifying amendment.

*Report on relief from professional licensure and certification requirements for reserve component members on long-term active duty (sec. 516)*

The Senate amendment contained a provision (sec. 536) that would amend sections 1819(b)(5) and 1919(b)(5) of the Social Security Act to allow certain National Guard and reserve nurse aides who are called to active duty extra time, beginning July 1, 2007 and ending on September 30, 2008, to complete training and competency evaluations required by law. In addition, the provision would require the Secretary of Defense to report on the need for legislation to provide for the exemption of professional or other licensure or certification requirements for National Guard and reserve members who are placed on active duty for an extended period of time.

The House bill contained no similar provision.

The House recedes with an amendment that would delete the authorization for additional time for certification as required by the Social Security Act. The amendment would require a study by the Comptroller General of the United States to: (1) identify the number and type of licensure or certification requirements that could be impacted by extended periods of active duty; and (2) determine means to provide relief from such requirements if necessary.

### Subtitle C—Education and Training

*Revisions to authority to pay tuition for off-duty training or education (sec. 521)*

The House bill contained a provision (sec. 523) that would authorize the secretaries of the military services, or the Secretary of Homeland Security with respect to the Coast Guard when it is not operating as a service in the Navy, to pay tuition and related expenses to certain members of the Ready Reserve.

The Senate amendment contained a similar provision (sec. 671).

The Senate recedes with a technical amendment.

*Reduction or elimination of service obligation in an Army Reserve or Army National Guard troop program unit for certain persons selected as medical students at Uniformed Services University of the Health Sciences (sec. 522)*

The House bill contained a provision (sec. 521) that would amend section 2107a(b) of title 10, United States Code, to authorize the Secretary of the Army to modify agreements entered into by cadets in the Reserve Officers' Training Scholarship Program who are

selected to be medical students at the Uniformed Services University of the Health Sciences or to participate in the Armed Forces Health Professions Scholarship and Financial Assistance program. Under this provision, the Secretary would be authorized to reduce or eliminate troop program unit service obligations and to establish, in lieu of that obligation, an active-duty service obligation upon a determination that it is in the best interests of the United States to modify the agreement and with the consent of the member involved.

The Senate amendment contained no similar provision.

The Senate recedes.

*Repeal of annual limit on number of ROTC scholarships under Army Reserve and Army National Guard financial assistance program (sec. 523)*

The House bill contained a provision (sec. 522) that would amend section 2107a(h) of title 10, United States Code, to increase from 416 to 424 the limit on the number of Reserve Officer Training Corps (ROTC) scholarships that may be awarded to cadets who agree to serve in the reserve components of the Army.

The Senate amendment contained a similar provision (sec. 557) that would amend section 2107a(h) of title 10, United States Code, to repeal the limit on the number of ROTC scholarships that may be awarded to cadets who agree to serve in the reserve components of the Army.

The House recedes.

*Treatment of prior active service of members in uniformed medical accession programs (sec. 524)*

The Senate amendment contained a provision (sec. 551) that would amend sections 2114(b) and 2121(c) of title 10, United States Code, to require that medical students at the Uniformed Services University of the Health Sciences and persons participating in the armed forces Health Professions Scholarship and Financial Assistance Programs who have prior commissioned service, serve, while on active duty, in pay grade O-1, or in pay grade O-2 if they meet specified promotion criteria prescribed by the service secretary. The provision would also amend section 2004a of title 10, United States Code, to impose the same limitations regarding the pay grade and service credit exclusion on officers on active duty with prior commissioned service who are detailed as students at medical schools under section 2004a.

The House bill contained no similar provision.

The House recedes with an amendment that would provide that medical students at the Uniformed Services University of the Health Sciences and persons participating in the armed forces Health Professions Scholarship and Financial Assistance Programs with prior active service would continue to receive basic pay based on their former grade and years of service if that pay would be greater than the rate of basic pay for regular officers in the grade of second lieutenant or ensign. The provision would also amend section 2004a of title 10, United States Code, to provide that any officer detailed under this section to attend medical school would be

required to revert to the grade of ensign or second lieutenant while receiving pay based on their prior grade or years of service.

*Repeal of post-2007–2008 academic year prohibition on phased increase in cadet strength limit at the United States Military Academy (sec. 525)*

The Senate amendment contained a provision (sec. 553) that would amend section 4342 of title 10, United States Code, to extend the authority of the Secretary of the Army to increase by up to 100 cadets per year the size of the Corps of Cadets at the United States Military Academy to a maximum of 4,400 cadets.

The House bill contained no similar provision.

The House recedes.

*National Defense University master's degree programs (sec. 526)*

The House bill contained a provision (sec. 524) that would amend section 2163 of title 10, United States Code, to authorize the President of the National Defense University to award a master of arts degree in strategic security studies to graduates of the School for National Security Executive Education.

The Senate amendment contained no similar provision.

The Senate recedes with a technical amendment.

*Authority of the Air University to confer degree of master of science in flight test engineering (sec. 527)*

The Senate amendment contained a provision (sec. 555) that would amend section 9317(a) of title 10, United States Code, to authorize the commander of the Air University to confer the degree of doctor of philosophy in strategic studies upon graduates of the School of Advanced Airpower Studies; the degree of master of air, space, and cyberspace studies upon graduates of Air University; and the degree of master of flight test engineering science upon graduates of the Air Force Test Pilot School.

The House bill contained no similar provision.

The House recedes with an amendment that would authorize the commander of the Air University to confer the degree of master of science in flight test engineering upon graduates of the Air Force Test Pilot School.

*Enhancement of education benefits for certain members of reserve components (sec. 528)*

The Senate amendment contained a provision (sec. 674) that would authorize an accelerated payment program for the educational benefits in chapters 1606 and 1607 of title 10, United States Code. The provision would also expand the eligibility criteria for attaining the maximum benefit for the education benefit under chapter 1607 of title 10, United States Code to 3 cumulative years of active service. Finally, the provision would create a buy-up program for service members eligible for the education benefit under chapter 1607 of title 10, United States Code.

The House bill contained no similar provision.

The House recedes with a technical amendment.

*Extension of period of entitlement to educational assistance for certain members of the Selected Reserve affected by force shaping initiatives (sec. 529)*

The Senate amendment contained a provision (sec. 675) that would eliminate the service requirement for continued eligibility for education benefits under chapter 1606 of title 10, United States Code, for service members who have been affected by base realignment and closure or other force shaping initiatives.

The House bill contained no similar provision.

The House recedes.

*Time limit for use of educational assistance benefit for certain members of reserve components and resumption of benefit (sec. 530)*

The House bill contained a provision (sec. 530) that would express the sense of Congress that the time limitation for use of education benefits under chapter 1607 of title 10, United States Code, should be extended to allow an individual entitled to such benefits to use those benefits for 10 years following separation from a reserve component.

The Senate amendment contained a similar provision (sec. 676) that would authorize a service member entitled to education benefits under chapter 1607 of title 10, United States Code, to use those benefits for 10 years after separation from a reserve component.

The House recedes with an amendment that would allow service members separated from a reserve component, who prior to separation were eligible for benefits under chapter 1607 of title 10, United States Code, to reclaim eligibility for those benefits upon rejoining a reserve component and to use those benefits for 10 years following any subsequent separation.

*Secretary of Defense evaluation of the adequacy of the degree-granting authorities of certain military universities and educational institutions (sec. 531)*

The House bill contained a provision (sec. 526) that would require the Secretary of Defense to evaluate the degree-granting authorities of certain military universities and educational institutions to assess whether the current process remains adequate, appropriate, and responsive to meet emerging military service education requirements. The Secretary would be required to submit a report on the evaluation to the Committees on Armed Services of the Senate and the House of Representatives no later than April 1, 2008.

The Senate amendment contained no similar provision.

The Senate recedes.

The conferees direct the Secretary of Defense, as part of the evaluation and report required under this section, to thoroughly review various proposals by the United States Air Force for expanded authority for the Commander of the Air University to grant degrees to attendees of the schools of the Air University. These proposals include, among others, authority to allow the Commander of the Air University to grant bachelor's and master's of arts degrees, and the degree of doctor of philosophy in strategic studies. The conferees believe that these Air Force initiatives raise important questions about the role of the services in providing advanced education

and that the Department must be more proactive in providing timely guidance and coordination in this key area affecting retention and career progression for both officer and enlisted personnel. The Secretary should provide an assessment of these proposals and recommendations for legislation, if required.

*Report on success of Army National Guard and Reserve Senior Reserve Officers' Training Corps financial assistance program (sec. 532)*

The House bill contained a provision (sec. 529) that would require the Secretary of Defense to ensure that Senior Reserve Officer's Training Corps (SROTC) scholarships are available to students attending historically Black colleges and universities, minority institutions, and Hispanic-serving institutions.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of the Army to submit a report to the Committees on Armed Services of the Senate and House of Representatives on the success of the financial assistance program of the SROTC in securing the appointment of second lieutenants in the Army Reserve and the Army National Guard. The report would include detailed information on the appointment of cadets enrolled in historically Black colleges or universities, minority institutions, and Hispanic-serving institutions and address efforts to increase awareness of the availability and advantages of appointment in the SROTC at these institutions and to increase the number of cadets at these institutions.

The conferees encourage the Secretary of the Army to expand the Army's outreach program to students attending historically Black colleges or universities, minority institutions, and Hispanic-serving institutions, and to ensure that SROTC scholarships are available to qualified students at these institutions.

*Report on utilization of tuition assistance by members of the armed forces (sec. 533)*

The Senate amendment contained a provision (sec. 673) that would require the secretary of each of the military departments to submit to the congressional defense committees by April 1, 2008 a report on the utilization of tuition assistance by members of the armed forces, both in the regular and reserve components, during fiscal year 2007.

The House bill contained no similar provision.

The House recedes with a technical amendment.

*Navy Junior Reserve Officers' Training Corps unit for Southold, Mattituck, and Greenport High Schools (sec. 534)*

The House bill contained a provision (sec. 527) that would authorize the Southold, Mattituck, and Greenport High Schools, located in Southold, New York, to be treated as a single institution for the purposes of maintaining a Navy Junior Reserve Officers' Training Corps unit.

The Senate amendment contained a similar provision (sec. 554).

The Senate recedes with a technical amendment.

*Report on transfer of administration of certain educational assistance programs for members of the reserve components (sec. 535)*

The House bill contained a provision (sec. 525) that would recodify the reserve educational assistance programs in chapters 1606 and 1607 of title 10, United States Code, from title 10 to title 38, United States Code, and transfer administration of those programs to the Department of Veterans Affairs.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of Defense, in cooperation with the Secretary of Veterans Affairs, to submit to the congressional defense and veterans affairs committees a report on the feasibility and merits of transferring the administration of the educational assistance programs for members of the reserve components contained in chapters 1606 and 1607 of title 10, United States Code, from the Department of Defense to the Department of Veterans Affairs, no later than September 1, 2008. The provision would further require both the Defense Business Board, in cooperation with the Reserve Forces Policy Board, and the Veterans Affairs Advisory Committee on Education to review the report, and provide their independent reviews. The provision would also require the Comptroller General of the United States to assess the study and to report to the congressional defense and veterans affairs committees the results of that assessment by November 1, 2008.

Subtitle D—Military Justice and Legal Assistance Matters

*Authority to designate civilian employees of the Federal Government and dependents of deceased members as eligible for legal assistance from Department of Defense legal staff resources (sec. 541)*

The House bill contained a provision (sec. 541) that would amend section 1044(a) of title 10, United States Code, to authorize the provision of legal assistance to certain civilian employees of the Federal Government serving with, or preparing to serve with, an armed force in support of a contingency operation.

The Senate amendment contained a similar provision (sec. 572) that would clarify the authority of the service secretaries to provide legal assistance to civilian employees of the Department of Defense in locations where legal assistance from non-military legal assistance providers is not reasonably available.

The Senate recedes with an amendment that would authorize the provision of legal assistance to survivors of deceased members or former members who were dependents of the member or former member at the time of the member's death and to civilian employees of the Federal Government serving in locations where legal assistance from non-military legal assistance providers is not reasonably available.

*Authority of judges of the United States Court of Appeals for the Armed Forces to administer oaths (sec. 542)*

The Senate amendment contained a provision (sec. 571) that would amend section 936 of title 10, United States Code, to authorize judges of the United States Court of Appeals for the Armed Forces to administer oaths.

The House bill contained no similar provision.  
The House recedes with a technical amendment.

*Modification of authorities on senior members of the Judge Advocate Generals' Corps (sec. 543)*

The Senate amendment contained a provision (sec. 573) that would require that the Judge Advocates General of the Army, Navy, and Air Force serve in the grade of lieutenant general or vice admiral, and would exclude them from the authorized number of officers serving in grades above major general or rear admiral. The provision would also authorize the position of Legal Counsel to the Chairman of the Joint Chiefs of Staff, and would require that the officer appointed to this position serve in the grade of brigadier general or rear admiral (lower half) and be recommended by a board of officers convened by the Secretary of Defense.

The House bill contained no similar amendment.

The House recedes with an amendment that would amend section 525(b) of title 10, United States Code, to increase from 15.7 to 16.3 the percentage of general officers or admirals in a military service that may be appointed above the grade of major general or rear admiral. The House amendment would also require the Secretary of Defense to develop a strategic plan linking the missions and requirements of the Department of Defense for general and flag officers to the statutory limits on the numbers of general and flag officers, and current assignment, promotion, and joint officer development policies for general and flag officers.

*Prohibition against members of the armed forces participating in criminal street gangs (sec. 544)*

The House bill contained a provision (sec. 579) that would require the Secretary of Defense to revise Department of Defense Directive 1325.6 to include membership in a criminal street gang among the list of prohibited activities by members of the armed forces.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of Defense to prescribe regulations to prohibit the active participation by members of the armed forces in a criminal street gang.

Subtitle E—Military Leave

*Temporary enhancement of carryover of accumulated leave for members of the armed forces (sec. 551)*

The Senate amendment contained a provision (sec. 591) that would increase for all service members the number of days of accumulated leave they may carry over from 1 fiscal year to the next from 60 to 90 days. The provision would also increase by 1 year the length of time available to use leave accumulated under the special leave accrual provisions of section 701(f) of title 10, United States Code. Finally, the provision would amend section 501(b) of title 37, United States Code, to authorize enlisted service members who have accumulated more than 120 days of leave under section 701(f)

of title 10, United States Code, to sell back, on a one-time basis, up to 30 days of such leave in excess of 120 days.

The House bill contained no similar provision.

The House recedes with an amendment that would reduce the enhanced leave carryover provision from 90 to 75 days, and would terminate this authority after December 31, 2010.

*Enhancement of rest and recuperation leave (sec. 552)*

The Senate amendment contained a provision (sec. 594) that would authorize an additional 5 days of rest and recuperation leave under section 705(b) of title 10, United States Code, for certain service members whose overseas tours of duty last longer than 12 months.

The House bill contained no similar provision.

The House recedes.

Subtitle F—Decorations and Awards

*Authorization and request for award of Medal of Honor to Leslie H. Sabo, Jr., for acts of valor during the Vietnam War (sec. 561)*

The House bill contained a provision (sec. 551) that would authorize the President to award the Medal of Honor to Leslie H. Sabo, Jr., who served in the U.S. Army during the Vietnam War.

The Senate amendment contained a similar provision (sec. 593(c)).

The Senate recedes.

*Authorization and request for award of Medal of Honor to Henry Svehla for acts of valor during the Korean War (sec. 562)*

The House bill contained a provision (sec. 552) that would authorize the President to award the Medal of Honor to Henry Svehla who served in the U.S. Army during the Korean War.

The Senate amendment contained a similar provision (sec. 593(e)).

The Senate recedes.

*Authorization and request for award of Medal of Honor to Woodrow W. Keeble for acts of valor during the Korean War (sec. 563)*

The House bill contained a provision (sec. 553) that would authorize the President to award the Medal of Honor to Woodrow W. Keeble who served in the U.S. Army during the Korean War.

The Senate amendment contained a similar provision (sec. 593(b)).

The Senate recedes.

*Authorization and request for award of Medal of Honor to Private Philip G. Shadrach for acts of valor as one of Andrews' Raiders during the Civil War (sec. 564)*

The House bill contained a provision (sec. 554) that would authorize the President to award the Medal of Honor to Private Philip G. Shadrach, who served in the U.S. Army during the Civil War.

The Senate amendment contained a similar provision (sec. 593(d)).

The Senate recedes with a technical amendment.

*Authorization and request for award of Medal of Honor to Private George D. Wilson for acts of valor as one of Andrews' Raiders during the Civil War (sec. 565)*

The House bill contained a provision (sec. 555) that would authorize the President to award the Medal of Honor to Private George D. Wilson, who served in the U.S. Army during the Civil War.

The Senate amendment contained a similar provision (sec. 593(f)).

The Senate recedes with a technical amendment.

Subtitle G—Impact Aid and Defense Dependents Education System

*Continuation of authority to assist local educational agencies that benefit dependents of members of the armed forces and Department of Defense civilian employees (sec. 571)*

The House bill contained a provision (sec. 562) that would authorize \$50.0 million for continuation of the Department of Defense (DOD) assistance program to local agencies that are impacted by enrollment of dependent children of military members and civilian employees of the Department of Defense. This provision would also authorize \$15.0 million for assistance to local educational agencies with significant changes in enrollment of military and civilian school-aged dependent children due to base closures, force structure changes, or force relocations.

The Senate amendment contained a similar provision (sec. 561) that would authorize \$35.0 million and \$10.0 million for each assistance program, respectively.

The Senate recedes with an amendment that would authorize \$30.0 million for continuation of assistance to agencies impacted by enrollment of DOD military and civilian employee dependents, and \$10.0 million for assistance to agencies with significant changes in enrollment of children due to base closures, force structure changes, or force relocations.

*Impact aid for children with severe disabilities (sec. 572)*

The Senate amendment contained a provision (sec. 562) that would authorize \$5.0 million for impact aid payments for children with disabilities for continuation of the Department of Defense's assistance to local educational agencies that benefit dependents with severe disabilities.

The House bill contained no similar provision.

The House recedes.

*Inclusion of dependents of non-Department of Defense employees employed on Federal property in plan relating to force structure changes, relocation of military units, or base closures and realignments (sec. 573)*

The Senate amendment contained a provision (sec. 563) that would amend section 574(e)(3) of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109-364) to include dependents of personnel who work on federal property but are not members of the armed forces or civilian employees of the Department of Defense in the plan and annual reports required

to identify and assist local educational agencies experiencing growth in enrollment due to force structure changes, relocation of military units, or base closure and realignments. The provision would make the definition of “military dependent students” consistent with the definition used for purposes of computation of payments under the Federal Impact Aid program authorized in section 7703 of title 20, United States Code.

The House bill contained no similar provision.

The House recedes.

*Payment of private boarding school tuition for military dependents in overseas areas not served by Defense Dependents’ Education System schools (sec. 574)*

The House bill contained a provision (sec. 561) that would amend section 1407(b)(1) of the Defense Dependents’ Education Act of 1978 (20 U.S.C. 926(b)(1)) to authorize the Secretary of Defense to pay tuition for attendance at private boarding schools in the United States for military dependents in overseas areas not served by Department of Defense schools.

The Senate amendment contained a similar provision (sec. 564).

The House recedes with a clarifying amendment.

Subtitle H—Military Families

*Department of Defense Military Family Readiness Council and policy and plans for military family readiness (sec. 581)*

The Senate amendment contained a provision (sec. 581) that would amend chapter 88 of title 10, United States Code, to establish a Department of Defense Military Family Readiness Council to review and make recommendations on Department of Defense policy requirements for the support of military family readiness; to monitor requirements for the support of military family readiness; and to evaluate and assess the effectiveness of military family readiness programs and activities of the Department of Defense.

The Senate amendment contained another provision (sec. 582) that would amend chapter 88 of title 10, United States Code, to require the Secretary of Defense to develop a policy and plans for the support of military family readiness.

The House bill contained no similar provisions.

The House recedes with a clarifying amendment that would combine the Senate provisions and include the senior enlisted advisors of the Army, Navy, Marine Corps, and Air Force, or the spouse of a senior enlisted member from each service as a member of the Department of Defense Military Family Readiness Council.

The conferees expect the council to meet not less often than twice each year, and that not more than one of these meetings will be in the National Capitol Region.

*Yellow Ribbon Reintegration Program (sec. 582)*

The House bill contained a provision (sec. 515) that would establish a Department of Defense working group to identify and assess the reintegration needs of members of the reserve components who return from overseas operational deployment.

The House bill also contained a provision (sec. 516) that would require the Secretary of Defense, in coordination with the Chief of the National Guard Bureau, to establish a national combat veteran reintegration program, to be known as the Yellow Ribbon Reintegration Program, to provide National Guard members and their families with sufficient information, services, referral, and proactive approach opportunities throughout the entire deployment cycle. The provision would designate the National Guard Bureau as the executive agent for this program, and would require establishment of a Center of Excellence for Reintegration Programs, appointment of an Advisory Board, and employment of personnel to implement the Yellow Ribbon program at the State level.

The Senate amendment contained a similar provision (sec. 683) that would require a Yellow Ribbon Reintegration Program to serve both National Guard and reserve members and their families, and would designate the Office of the Secretary of Defense for Personnel and Readiness as the executive agent.

The Senate amendment also contained a provision (sec. 587) that would require the Secretary of Defense to carry out a pilot program, to be known as the National Military Family Readiness and Servicemember Reintegration Outreach Program, to assess the feasibility and advisability of providing assistance and support to the Adjutant General of a State or territory for the purpose of creating comprehensive soldier and family preparedness and reintegration outreach programs.

The House recedes with an amendment that would authorize the Secretary to create State Deployment Cycle Support Teams to administer the Yellow Ribbon Reintegration Program at the State level and would authorize outreach programs to educate service members and their families about the Yellow Ribbon Reintegration Program.

The conferees acknowledge that the reserve component has changed from a strategic reserve to an operational reserve, fully engaged in the global war on terror, and that reserve component members face challenges that are inherently different from their counterparts in the active component. One such challenge is reintegration to civilian life. The Department of Defense has recognized the need for programs that address similar challenges for service members in active components returning from combat and has instituted such programs.

The conference outcome will ensure that members of the reserve components returning to their hometowns following demobilization have access to improved services and resources that allow them to successfully reintegrate back into society.

*Study to enhance and improve support services and programs for families of members of regular and reserve components undergoing deployment (sec. 583)*

The House bill contained a series of provisions that would address support to families of deployed service members:

The House bill contained a provision (sec. 580) that would require the Secretary of Defense to carry out a study to evaluate the feasibility and advisability of establishing a pilot program on fam-

ily-to-family support for families of members of the National Guard and reserves undergoing deployment.

The House bill contained a provision (sec. 581) that would require the Secretary of Defense to conduct a study to evaluate the feasibility and advisability of contracting with a private sector entity with expertise in the health and well-being of families and children, infants, and toddlers to enhance and develop support services for children of members of the National Guard and reserve who are deployed.

The House bill contained a provision (sec. 1034) that would require the Secretary of Defense to submit a report to Congress no later than 180 days after enactment of this Act regarding the impact on military family members of multiple deployments as part of Operation Iraqi Freedom and Operation Enduring Freedom.

The Senate amendment also contained a series of provisions that would address support to families of deployed military personnel:

The Senate amendment contained a provision (sec. 583) that would require the Secretary of Defense to enhance and improve current programs of the Department of Defense to provide family support for families of deployed members of the armed forces, including deployed members of the National Guard and reserve, before, during, and after their deployment cycle.

The Senate amendment contained a provision (sec. 584) that would require the Secretary of Defense to provide information to parents and other caretakers of children, including infants and toddlers, to assist the parents and caretakers in responding to the adverse implications of the deployment of a service member, including the death or injury of the service member, and to develop programs and activities to increase awareness in military and civilian communities of the adverse implications of deployment of service members.

The Senate amendment contained a provision (sec. 585) that would require the Secretary of Defense to conduct a study to evaluate the feasibility and advisability of contracting with a private sector entity with expertise in the health and well-being of families and children, infants, and toddlers to enhance and develop support services for children of deployed members of the active and reserve components.

The Senate amendment contained a provision (sec. 586) that would require the Secretary of Defense to carry out a study to evaluate the feasibility and advisability of establishing a pilot program on family-to-family support for families of deployed members of the active and reserve components.

The Senate recedes with an amendment that would combine the House and Senate provisions to require a study to determine the most effective means to enhance and improve family support programs for families of the regular and reserve components of the armed forces before, during, and after deployment.

In a separate provision contained elsewhere in this conference report, the conferees would require the establishment of a national combat veteran reintegration program, to be known as the Yellow Ribbon Reintegration Program, to provide families of deployed

service members with information, services, referrals, and proactive outreach throughout the entire deployment cycle.

The conferees are concerned about the adequacy of support available to families of deployed service members, particularly the support available to families of National Guard and reserve personnel who are not located in the vicinity of a military installation with extensive family support programs. The conferees strongly encourage the Secretary of Defense to expeditiously implement and improve programs that will enhance the support available to these families.

*Protection of child custody arrangements for parents who are members of the armed forces deployed in support of a contingency operation (sec. 584)*

The House bill contained a provision (sec. 577) that would amend title II of the Servicemembers Civil Relief Act (SCRA) (50 U.S.C. App. 521 et seq.) to limit the authority of a court to modify or amend a previous order or judgment regarding custody of a child of a service member while the service member is deployed in support of a contingency operation. The provision would also bar courts from considering the absence of the service member by reason of deployment in determining the best interests of a child.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would modify sections 201 and 202 of the SCRA to clarify that the act applies to child custody proceedings.

The conferees recognize that service members who have been awarded custody of minor children but who are required to deploy or be absent from their children as a result of their military duties are vulnerable to litigation initiated by non-custodial parents. The procedural protections of the SCRA apply in child custody cases and, in most cases, should prevent adverse judgments until members can be present to defend their interests. The modifications to the SCRA included in this provision underscore the importance of SCRA protections in child custody cases. While the facts in child custody disputes are central to determinations of the best interests of minor children, the conferees would urge judges who must decide such cases not to consider the mere absence of a service member who is performing military duty to constitute the sole or even a major factor in a court's determination about what is in the best interests of a child.

*Family leave in connection with injured members of the Armed Forces (sec. 585)*

The House bill contained a provision (sec. 675) that would amend the Family and Medical Leave Act (FMLA) of 1993 (29 U.S.C. 2611) to provide leave to an eligible employee in the case of any qualifying exigency, as determined in regulation by the Secretary of Labor, arising from the fact that the spouse, child, or parent of the employee is on active duty or has been notified of an impending call or order to active duty in support of a contingency operation.

The Senate amendment contained a provision (sec. 1093) that would authorize the Office of Personnel Management to establish

a program under which federal civilian employees designated as caregivers could use leave for the purpose of caring for a family member of a member of the armed forces serving on active duty in support of a contingency operation. The provision would authorize the Secretary of Labor to establish a similar voluntary private sector leave program.

The Senate recedes with an amendment that would also extend the FMLA to provide leave to eligible employees, including federal civilian employees, who are the spouse, son, daughter, parent, or next of kin of a seriously injured service member, in order to care for the service member. The amendment would also extend the amount of leave time available for caregivers of seriously injured service members from 12 workweeks to 26 workweeks.

The conferees note that this extension of the FMLA to cover caregivers of injured service members conforms with the recommendation made by The President's Commission on Care for America's Returning Wounded Warriors to allow up to 26 workweeks of leave to an eligible family member of a service member who has a combat-related injury.

*Family care plans and deferment of deployment of single parent or dual military couples with minor dependents (sec. 586)*

The House bill contained a provision (sec. 578) that would authorize a service member to request deferment from deployment to an area for which imminent danger pay is authorized if the member has minor dependents and a spouse who is a service member deployed to an area for which imminent danger pay is authorized.

The Senate amendment contained a provision (sec. 1072) that would express the sense of Congress that single parents who are members of the armed forces with minor dependents, and dual-military couples with minor dependents, should develop and maintain effective family care plans, and that the Secretary of Defense should establish procedures to ensure that if a single parent and both spouses in a dual-military couple are required to deploy to an area for which imminent danger pay is authorized, requests for deferment from deployment due to unforeseen circumstances are rapidly evaluated and that appropriate steps are taken to ensure adequate care for minor dependents.

The House recedes with an amendment that would require the Secretary of Defense to establish appropriate procedures to ensure that an adequate family care plan is in place for a member of the armed forces with minor dependents who is a single parent or whose spouse is also a member of the armed forces when the member may be deployed in an area for which imminent danger pay is authorized. The procedures should allow the member to request a deferment of deployment due to unforeseen circumstances, and the request should be considered and responded to promptly.

*Education and treatment services for military dependent children with autism (sec. 587)*

The Senate amendment contained a provision (sec. 595) that would require the Secretary of Defense to conduct one or more demonstration projects to evaluate improved approaches to the provision of education and treatment services to military dependent

children with autism. The amendment would also require the assignment of case managers for both medical and educational services and the voluntary development of individualized autism services plans.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary of Defense to conduct a comprehensive assessment of the availability of federal, State, and local education and treatment services on and in the vicinity of certain military installations for children of service members who are diagnosed with autism. The amendment would also require the service secretaries to ensure that, whenever practicable, eligible members are assigned only in geographic areas with educational services and facilities available on or in the vicinity of the military installation that provide special education and related services consistent with the Individuals with Disabilities Education Act (20 U.S.C. 1400 et seq.). The amendment would authorize one or more demonstration projects to evaluate the provision of educational services and treatment services to eligible dependents.

*Commendation of efforts of Project Compassion in paying tribute to members of the armed forces who have fallen in the service of the United States (sec. 588)*

The Senate amendment contained a provision (sec. 1077) that would express the sense of the Senate commending Kaziah M. Hancock, other Project Compassion volunteer professional portrait artists, and the entire Project Compassion organization for their tireless work in paying tribute to members of the armed forces who have fallen in the service of the United States.

The House bill contained no similar provision.

The House recedes with an amendment that would express a sense of Congress that the people of the United States owe the deepest gratitude to Kaziah M. Hancock and the members of Project Compassion.

#### Subtitle I—Other Matters

*Uniform performance policies for military bands and other musical units (sec. 590)*

The House bill contained a provision (sec. 572) that would amend chapter 49 of title 10, United States Code, to provide uniform policy for Department of Defense bands and musical units regarding when public performances are permitted, the conditions under which band members may perform in their personal capacities, and recording of music for distribution to the public.

The Senate amendment contained a similar provision (sec. 592).

The Senate recedes with a clarifying amendment.

*Transportation of remains of deceased members of the armed forces and certain other persons (sec. 591)*

The House bill contained a provision (sec. 1454) that would require the secretaries of the military services to provide for the delivery of the remains of deceased service members who die in a

combat theater of operations and whose remains are returned to the United States through the mortuary facility at Dover Air Force Base, Delaware, to the commercial, general aviation, or military airport, when air transportation is utilized, nearest to the place selected by the person designated to direct the disposition of the remains.

The Senate amendment contained a similar provision (sec. 657).

The Senate recedes.

*Expansion of number of academies supportable in any State under STARBASE program (sec. 592)*

The House bill contained a provision (sec. 573) that would amend section 2193b of title 10, United States Code, to repeal the limitation on the number of STARBASE academies in each State.

The Senate amendment contained a provision (sec. 552) that would increase from two to four the maximum number of STARBASE academies in a State that could be supported with Department of Defense funds.

The House recedes with a technical amendment.

*Gift acceptance authority (sec. 593)*

The House bill contained a provision (sec. 571) that would amend section 2601(b)(4) of title 10, United States Code, to extend from December 31, 2007 to December 31, 2010, the authority for the Secretary of Defense to accept gifts for the benefit of members of the armed forces, civilian employees of the Department of Defense (DOD), and dependents of such members or employees.

The Senate amendment contained a similar provision (sec. 1025) that would make this gift acceptance authority permanent and require the Secretary of Defense to prescribe regulations prohibiting the solicitation of any gift by any DOD employee if the nature or circumstances of the solicitation would compromise the integrity or the appearance of integrity of any DOD program or official.

The House recedes.

*Conduct by members of the Armed Forces and veterans out of uniform during hoisting, lowering, or passing of United States flag (sec. 594)*

The Senate amendment contained a provision (sec. 1073) that would amend section 9 of title 4, United States Code, to authorize members of the armed forces and veterans not wearing a uniform to render a salute during the ceremony of hoisting or lowering the flag, or when the flag is passing in a parade or in review.

The House bill contained no similar provision.

The House recedes with a technical amendment.

*Annual report on cases reviewed by National Committee for Employer Support of the Guard and Reserve (sec. 595)*

The Senate amendment contained a provision (sec. 1044) that would amend section 4332 of title 38, United States Code, to require the Secretary of Veterans Affairs to include in an annual report to Congress the number of cases regarding veterans' employ-

ment or reemployment rights reviewed by the Secretary of Defense under the National Committee for Employer Support of the Guard and Reserve of the Department of Defense during the fiscal year for which the report is made.

The House bill contained no similar provision.

The House recedes.

*Modification of Certificate of Release or Discharge from Active Duty (DD Form 214) (sec. 596)*

The Senate amendment contained a provision (sec. 596) that would require the Secretary of Defense, in consultation with the Secretary of Veterans Affairs, to modify the Certificate of Release or Discharge from Active Duty (DD Form 214) to permit a service member, upon discharge or release from active duty, to elect that the DD 214 be forwarded to the Central Office of the Department of Veterans Affairs or to the appropriate office of the Department of Veterans Affairs for the State or locality where the member will reside.

The House bill contained no similar provision.

The House recedes with a technical amendment.

The conferees direct the Secretary of Defense to assess the feasibility of issuing the DD Form 214 containing only the last four digits of a service member's Social Security account number. If the Secretary determines that it is feasible, the Secretary should also determine a timeline for implementing such a change. The Secretary should submit a report of the assessment to the Committees on Armed Services of the Senate and the House of Representatives no later than 180 days after the date of enactment of this Act.

*Reports on administrative separations of members of the Armed Forces for personality disorder (sec. 597)*

The Senate amendment contained a provision (sec. 597) that would require the Secretary of Defense to report to the congressional defense committees by April 1, 2008 on all cases of administrative separation from the armed forces of any service member who had served in Iraq or Afghanistan since October 2001 for personality disorder. Additionally, the provision would prohibit the administrative separation of any such service member until such time as the Secretary of Defense submits that report, unless a clinical review is first conducted in the office of the surgeon general of the military department concerned. The provision would also require the Comptroller General of the United States to report to the congressional defense committees by June 1, 2008 on the policies and procedures of the Department of Defense and the military departments relating to the separation of members of the armed forces for personality disorder.

The House bill contained no similar provision.

The House recedes with an amendment that would eliminate the prohibition against administrative separation for personality disorder without a review, but would retain the reports required of the Secretary of Defense and the Comptroller General.

*Program to commemorate 50th anniversary of the Vietnam War  
(sec. 598)*

The House bill included a provision (sec. 576) that would require the Secretary of Defense to conduct a program to commemorate the 50th anniversary of the Vietnam War and to coordinate and support programs of the federal, State, and local governments, and the activities of other persons and organizations, for this purpose. This provision would authorize the establishment of a fund to be administered by the Secretary of Defense and would authorize \$3.0 million to be appropriated for deposit in the fund in fiscal year 2008. The provision would also authorize acceptance of voluntary services in support of commemoration activities and direct the program to continue through 2025 with the Secretary determining the schedule of events and priority of efforts for the duration of the program.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would authorize the Secretary to carry out such a program and to determine the duration of the commemoration, and would authorize \$1.0 million for program planning and activities. The amendment would omit provisions relating to protections to be afforded to volunteers pending further study, planning, and evaluation of the appropriate functions to be performed by volunteers and the conditions under which their services would be accepted.

*Recognition of members of the Monuments, Fine Arts, and Archives program of the Civil Affairs and Military Government Sections of the Armed Forces during and following World War II (sec. 599)*

The House bill contained a provision (sec. 575) that would recognize the men and women who served in the Monuments, Fine Arts, and Archives program under the Civil Affairs and Military Government sections of the United States armed forces for their role in the preservation, protection, and restitution of monuments, works of art, and other artifacts of cultural importance in Europe and Asia during and following World War II.

The Senate amendment contained no similar provision.

The Senate recedes.

LEGISLATIVE PROVISIONS NOT ADOPTED

*Cold War Victory Medal*

The House bill contained a provision (sec. 556) that would require the service secretaries to issue a Cold War Victory Medal to former service members who served during the Cold War.

The Senate amendment contained no similar provision.

The House recedes.

*Combat veterans mentoring program for current members of the Armed Forces*

The House bill contained a provision (sec. 574) that would require the Secretary of Defense to establish a program that would provide combat veterans the opportunity to meet and mentor cur-

rent members of the Armed Forces before, during, and after deployments.

The Senate amendment contained no similar provision.  
The House recedes.

*Emergency assistance for local educational agencies enrolling military dependent children*

The Senate amendment contained a provision (sec. 566) that would authorize the Secretary of Defense to provide assistance to eligible local educational agencies for the additional education, counseling, and other needs of military dependent children who are affected by war-related action.

The House bill contained no similar provision.  
The Senate recedes.

*Establishment of Combat Medevac Badge*

The House bill contained a provision (sec. 557) that would amend chapter 537 of title 10, United States Code, to require the service secretaries to issue a badge to be known as the Combat Medevac Badge to service members who served in combat after June 25, 1950, as a pilot or crew member of a helicopter medical evacuation ambulance and who meet the requirements for the award of that badge, as prescribed by the secretary concerned.

The Senate amendment contained no similar provision.  
The House recedes.

*Expansion of exclusion of military permanent professors from strength limitations for officers below general and flag grades*

The Senate amendment contained a provision (sec. 503) that would amend section 523(b) of title 10, United States Code, to increase from 50 to 85 the number of permanent professors for each of the United States Military Academy, the United States Air Force Academy and professors of the United States Navy who are career military professors who may be excluded from the authorized number of commissioned officers who may be serving on active duty in that grade.

The House bill contained no similar provision.  
The Senate recedes.

*Heavily impacted local educational agencies*

The Senate amendment contained a provision (sec. 565) that would require the Secretary of Education to deem each local educational agency that was eligible to receive a fiscal year 2007 basic support payment for heavily impacted local educational agencies under section 8003(b)(2) of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 7703(b)(2)) as eligible to receive a basic support payment for heavily impacted local educational agencies for the fiscal year for which the determination is made.

The House bill contained no similar provision.  
The Senate recedes.

*Navy Senior Reserve Officers' Training Corps program at University of Miami, Coral Gables, Florida*

The House bill contained a provision (sec. 528) that would authorize the Secretary of the Navy to establish and maintain a Navy Senior Officers' Training Corps program at the University of Miami, Coral Gables, Florida.

The Senate amendment contained no similar provision.

The House recedes.

*Prohibition on the unauthorized use of names and images of members of the Armed Forces*

The House bill contained a provision (sec. 582) that would, except when authorized by an individual or the individual's survivor, prohibit the knowing use of the name or picture of a current or former service member in connection with any merchandise, retail product, impersonation, solicitation, or commercial activity in a manner reasonably calculated to connect the protected individual with that individual's service in the armed forces.

The Senate amendment contained no similar provision.

The House recedes.

The conferees direct the Secretary of Defense to conduct a study on the issue of protecting the use of names and images of current and former members of the armed services, both living and deceased. This study should include an analysis of the legal issues related to the limitations placed on the use of the names and images of these current and former military personnel by non-U.S. Government entities. This study should specifically address the use of these names and images on commercial products and merchandise as well as the privacy rights of the service members and their family and next of kin in association with this use. The study should also include options and recommendations for protecting service members' names and images. The Secretary shall submit to the Committees on Armed Services of the Senate and the House of Representatives a report on the results of this study not later than 90 days after the enactment of this Act. In addition, the conferees have asked the Congressional Research Service to do a similar study in order to obtain multiple legal viewpoints on this important topic.

It is the sense of the conferees that the commercial use of names and images of deceased service members should be treated with respect and dignity, and that individuals should take into account the feelings of the family and next-of-kin of those service members when using their names and images, especially if the family members have requested that their son or daughter's name and/or image not be used.

## TITLE VI—COMPENSATION AND OTHER PERSONNEL BENEFITS

### Subtitle A—Pay and Allowances

#### *Fiscal year 2008 increase in military basic pay (sec. 601)*

The House bill contained a provision (sec. 601) that would authorize a pay raise for the members of the uniformed services of 3.5 percent effective on January 1, 2008. This across-the-board pay raise is 0.5 percent above the budget request.

The Senate amendment contained a similar provision (sec. 601).

The House recedes.

#### *Basic allowance for housing for reserve component members without dependents who attend accession training while maintaining a primary residence (sec. 602)*

The House bill contained a provision (sec. 602) that would authorize unmarried reserve component members without dependents to receive basic allowance for housing while attending initial training following accession, provided that the member maintains a permanent residence.

The Senate amendment contained no similar provision.

The Senate recedes with a technical amendment.

#### *Extension and enhancement of authority for temporary lodging expenses for members of the armed forces in areas subject to major disaster declaration or for installations experiencing sudden increase in personnel levels (sec. 603)*

The Senate amendment contained a provision (sec. 605) that would increase from 20 to 60 the maximum number of days the secretary of a military department may pay temporary lodging expenses associated with changes of permanent station involving installations located in an area subject to a declaration of major disaster or experiencing a sudden increase in personnel moving to or from that installation.

The House bill contained no similar provision.

The House recedes with a technical amendment.

#### *Income replacement payments for reserve component members experiencing extended and frequent mobilization for active duty service (sec. 604)*

The House bill contained a provision (sec. 603) that would clarify the eligibility criteria for payments under the reserve income replacement program. The provision would change the method for measuring cumulative periods of qualifying service by counting cumulative days, rather than months. The provision would also authorize the continuation of income replacement payments in the case of service members who are retained on active duty to receive authorized medical care or to be evaluated for disability.

The Senate amendment contained a similar provision (sec. 681).

The Senate recedes with a technical amendment.

*Midmonth payment of basic pay for contributions of members of the uniformed services participating in Thrift Savings Plan (sec. 605)*

The House bill contained a provision (sec. 604) that would authorize the Department of Defense to make midmonth contributions to the Thrift Savings Fund on behalf of members of the uniformed services who participate in the Thrift Savings Plan.

The Senate amendment contained a similar provision (sec. 603).

The Senate recedes with a technical amendment.

Subtitle B—Bonuses and Special and Incentive Pays

*Extension of certain bonus and special pay authorities for reserve forces (sec. 611)*

The House bill contained a provision (sec. 611) that would extend for 2 years the authority to pay the Selected Reserve reenlistment bonus; the Selected Reserve affiliation or enlistment bonus; the special pay for enlisted members assigned to certain high priority units; the Ready Reserve enlistment bonus for persons without prior service; the Ready Reserve enlistment and reenlistment bonus for persons with prior service; and the Selected Reserve enlistment bonus for persons with prior service.

The Senate amendment contained a similar provision (sec. 611) that would extend for 1 year the authority to pay the same bonus and special pay authorities.

The House recedes.

*Extension of certain bonus and special pay authorities for health care professionals (sec. 612)*

The House bill contained a provision (sec. 612) that would extend for 2 years the authority to pay the nurse officer candidate accession bonus; the repayment of education loans for certain health professionals who serve in the Selected Reserve; the accession bonus for registered nurses; incentive special pay for nurse anesthetists; special pay for Selected Reserve health professionals in critically short wartime specialties; the accession bonus for dental officers; the accession bonus for pharmacy officers; the accession bonus for medical officers in critically short wartime specialties; and the accession bonus for dental specialist officers in critically short wartime specialties.

The Senate amendment contained a similar provision (sec. 612) that would extend for 1 year the authority to pay the same bonus and special pay authorities.

The House recedes.

*Extension of special pay and bonus authorities for nuclear officers (sec. 613)*

The House bill contained a provision (sec. 613) that would extend for 2 years the authority to pay the special pay for nuclear-qualified officers extending their period of active service; the nuclear career accession bonus; and the nuclear career annual incentive bonus.

The Senate amendment contained a similar provision (sec. 613) that would extend for 1 year the authority to pay the same special pay and bonus authorities.

The House recedes.

*Extension of authorities relating to payment of other bonuses and special pays (sec. 614)*

The House bill contained a provision (sec. 614) that would extend for 2 years the authority to pay the aviation officer retention bonus; the reenlistment bonus for active members; the enlistment bonus; the retention bonus for members with critical military skills or assigned to high priority units; the accession bonus for new officers in critical skills; the incentive bonus for conversion to military occupational speciality to ease personnel shortage; the accession bonus for officer candidates; and the Army referral bonus. The provision would extend for 1 year the authority to pay the assignment incentive pay and the incentive bonus for transfer between the armed forces.

The Senate amendment contained a similar provision (sec. 614) that would extend for 1 year the authority to pay the aviation officer retention bonus; the reenlistment bonus for active members; the enlistment bonus; the retention bonus for members with critical military skills or assigned to high priority units; the accession bonus for new officers in critical skills; the incentive bonus for conversion to military occupational speciality to ease personnel shortage; and the accession bonus for officer candidates. The Senate extended for 1 year the authority to pay the Army referral bonus in a separate provision (sec. 622).

The House recedes with an amendment that would extend for 1 year the prohibition against requiring certain injured service members to pay for meals provided by military treatment facilities.

*Increase in incentive special pay and multiyear retention bonus for medical officers (sec. 615)*

The House bill contained a provision (sec. 615) that would increase the maximum annual rate of incentive special pay and the multiyear retention bonus for medical officers from \$50,000 to \$75,000.

The Senate amendment contained a similar provision (sec. 615).

The Senate recedes with a technical amendment.

*Increase in dental officer additional special pay (sec. 616)*

The House bill contained a provision (sec. 616) that would increase the maximum annual amounts of additional special pay for dental officers to \$10,000 for officers with less than 3 years of creditable service and \$12,000 for officers with more than 3 but less than 10 years of creditable service.

The Senate amendment contained a similar provision (sec. 616).

The House recedes with a technical amendment.

*Increase in maximum monthly rate of hardship duty pay and authority to provide hardship duty pay in a lump sum (sec. 617)*

The House bill contained a provision (sec. 624) that would raise the maximum monthly amount of hardship duty pay to \$1500. The provision would also authorize the payment of hardship duty pay in a lump sum.

The Senate amendment contained a similar provision (sec. 617).

The House recedes with a technical amendment.

*Definition of sea duty for career sea pay to include service as off-cycle crewmembers of multi-crew ships (sec. 618)*

The House bill contained a provision (sec. 617) that would authorize off-cycle crewmembers of multi-crewed ships to be eligible for career sea pay.

The Senate amendment contained a similar provision (sec. 618).

The Senate recedes with a technical amendment.

*Reenlistment bonus for members of the Selected Reserve (sec. 619)*

The House bill contained a provision (sec. 618) that would provide the Department of Defense with more flexibility in administering the reenlistment bonus. The provision would eliminate the 3- and 6-year options currently in law and require only that the period of reenlistment be at least 3 years. Similarly, the provision would eliminate the tiered bonus structure and require only that the bonus not exceed \$15,000.

The Senate amendment contained a similar provision (sec. 619).

The Senate recedes with a technical amendment.

*Availability of Selected Reserve accession bonus for persons who previously served in the armed forces for a short period (sec. 620)*

The House bill contained a provision (sec. 619) that would authorize payment of a Selected Reserve enlistment bonus to persons who had enlisted previously, but were unable to complete basic training requirements due to circumstances beyond their control and were separated under conditions characterized as either honorable or uncharacterized.

The Senate amendment contained no similar provision.

The Senate recedes.

The conferees believe that the Department of Defense should limit its use of this authority to cases where the former service member was separated from the military through no fault of his or her own, such as an injury, family medical emergency, or other case of hardship that forced the service member to separate prematurely.

*Availability of nuclear officer continuation pay for officers with more than 26 years of commissioned service (sec. 621)*

The House bill contained a provision (sec. 620) that would extend eligibility for nuclear officer continuation pay from 26 to 30 years of commissioned service.

The Senate amendment contained a similar provision (sec. 620).

The Senate recedes with an amendment that would authorize revision of agreements for nuclear officer continuation pay that were entered into before the date of the enactment of this Act.

*Waiver of years-of-service limitation on receipt of critical skills retention bonus (sec. 622)*

The House bill contained a provision (sec. 621) that would authorize the Secretary of Defense, or the Secretary of Homeland Security with respect to the Coast Guard when it is not operating as a service in the Navy, to waive the 25-year service limitation on eligibility to receive the retention bonus for certain members with designated critical military skills.

The Senate amendment contained a similar provision (sec. 621).

The Senate recedes.

*Accession bonus for participants in the Armed Forces Health Professions Scholarship and Financial Assistance Program (sec. 623)*

The House bill contained a provision (sec. 622) that would authorize the Secretary of Defense to pay an accession bonus of not more than \$20,000 to participants in the Armed Forces Health Professions Scholarship and Financial Assistance Program (HPSP).

The Senate amendment contained a similar provision (sec. 624).

The House recedes with a technical amendment.

The conferees direct the Comptroller General of the United States to report to the congressional defense committees by April 1, 2008 on the number of HPSP participants who do not enter onto active duty following completion of the program of studies for which they were enrolled under HPSP, including the extent to which the military departments have sought and received reimbursement for stipends paid under section 2121(d) of title 10, United States Code, or annual grants paid for specialized training under section 2127(e) of title 10, United States Code.

*Payment of assignment incentive pay for reserve members serving in combat zone for more than 22 months (sec. 624)*

The House bill contained a provision (sec. 623) that would authorize the secretaries of the military departments to pay \$1,000 per month in assignment incentive pay to members of the reserve components serving in combat zones associated with Operations Enduring Freedom and Iraqi Freedom once the member exceeds 22 cumulative months of service on active duty under either a voluntary mobilization authority, the presidential Selected Reserve call-up authority, or the partial mobilization authority. Qualifying service under this provision would include cumulative mobilized service during the period beginning on January 1, 2003 through the end of the member's most recent period of mobilization to active duty beginning before January 19, 2007.

The Senate amendment contained no similar provision.

The Senate recedes.

Subtitle C—Travel and Transportation Allowances

*Payment of inactive duty training travel costs for certain Selected Reserve members (sec. 631)*

The House bill contained a provision (sec. 635) that would authorize the secretary of a military service to reimburse members of the Selected Reserve who occupy a specialty designated by the secretary concerned for travel expenses while performing inactive duty training outside the commuting limits of the member's station. The maximum rate would not exceed \$300.

The Senate amendment contained a similar provision (sec. 604) that would authorize reimbursement for travel expenses to an inactive duty training location outside of normal commuting distances for members of the Selected Reserve who are (1) qualified in a skill designated as critically short; (2) assigned to a unit of the Selected Reserve, or in a pay grade, with a critical manpower shortage; or (3) assigned to a unit or position that is disestablished or relocated as a result of defense base closure or realignment or other force structure allocation.

The House recedes with a technical amendment.

*Survivors of deceased members eligible for transportation to attend burial ceremonies (sec. 632)*

The Senate amendment contained a provision (sec. 656) that would extend the travel and transportation allowance to attend burial ceremonies of deceased service members under section 411f of title 37, United States Code, to minor siblings of deceased service members and the person who directs the disposition of the remains of the deceased service member.

The House bill contained no similar provision.

The House recedes with an amendment that would extend the travel and transportation allowance to the child or children of the deceased member and to the sibling or siblings of the deceased service member, regardless of age.

*Allowance for participation of reserves in electronic screening (sec. 633)*

The House bill contained a provision (sec. 631) that would authorize the secretaries of the military services to pay a member of the Individual Ready Reserve a stipend for participation in electronic screening performed pursuant to the continuous screening required by section 10149 of title 10, United States Code. The aggregate amount of the stipend paid to a member may not exceed \$50 in any calendar year.

The Senate amendment contained a similar provision (sec. 602).

The House recedes.

*Allowance for civilian clothing for members of the armed forces traveling in connection with medical evacuation (sec. 634)*

The House bill contained a provision (sec. 632) that would authorize service members to use some or all of the civilian clothing allowance authorized by section 1047 of title 10, United States

Code, to purchase luggage at government expense when traveling in connection with a medical evacuation.

The Senate amendment contained no similar provision.  
The Senate recedes.

*Payment of moving expenses for Junior Reserve Officers' Training Corps instructors in hard-to-fill positions (sec. 635)*

The House bill contained a provision (sec. 633) that would authorize the secretary of a military department to reimburse educational institutions for moving expenses paid to Junior Reserve Officers' Training Corps instructors when the secretary concerned determines the position is hard-to-fill for geographic or economic reasons, and the instructor agrees to serve in the position for 2 years.

The Senate amendment contained a similar provision (sec. 642).

The House recedes with a technical amendment.

Subtitle D—Retired Pay and Survivor Benefits

*Expansion of combat-related special compensation eligibility (sec. 641)*

The House bill contained a provision (sec. 645) that would authorize disabled military retirees with fewer than 20 years of service to receive combat-related special compensation under section 1413a of title 10, United States Code, provided they served a minimum of 15 years of creditable service and have a disability rated at least 60 percent disabling.

The Senate amendment contained a similar provision (sec. 653) that would expand eligibility of combat-related special compensation to all service members eligible for retirement pay who have a combat-related disability, including service members who were retired under chapter 61 of title 10, United States Code.

The House recedes with a technical amendment.

*Inclusion of veterans with service-connected disabilities rated as total by reason of unemployability under termination of phase-in of concurrent receipt of retired pay and veterans' disability compensation (sec. 642)*

The Senate amendment contained a provision (sec. 660) that would authorize veterans with service-connected disabilities rated as total due to unemployability to receive concurrent receipt of retired pay and veterans' disability compensation as of December 31, 2004.

The House bill contained no similar provision.

The House recedes with an amendment that would restrict payments under this provision until October 1, 2008.

*Recoupment of annuity amounts previously paid, but subject to offset for Dependency and Indemnity Compensation (sec. 643)*

The House bill contained a provision (sec. 643) that would require that any Survivor Benefit Plan (SBP) payments previously paid to a surviving spouse or former spouse that are subject to the mandatory offset associated with payments of Dependency and In-

demnity Compensation by the Department of Veterans Affairs be recouped only to the extent that the amount exceeds any SBP premiums to be refunded by the Department of Defense. In addition, the provision would specify a series of actions to protect the interests of surviving spouses who are subject to the offset, including: (1) a single written notice of the net amount to be recouped; (2) a written explanation of the statutory requirements for recoupment; (3) a detailed accounting of the calculations used to determine the amount to be recouped; and (4) contact information for a person who can provide information and respond to questions regarding the recoupment action.

The Senate amendment contained no similar provision.

The Senate recedes.

*Special survivor indemnity allowance for persons affected by required Survivor Benefit Plan annuity offset for Dependency and Indemnity Compensation (sec. 644)*

The House bill contained a provision (sec. 644) that would authorize a survivor indemnity allowance to surviving spouses or former spouses of deceased service members who are denied the full amount of their annuity under the Survivor Benefit Plan (SBP) due to the offset required by the receipt of Dependency and Indemnity Compensation (DIC) from the Department of Veterans Affairs. The provision would authorize monthly payments equal to the lesser amount of \$40 or the amount of the SBP annuity subject to the DIC offset. The House provision would take effect October 1, 2008.

The Senate amendment contained a provision (sec. 658) that would eliminate the offset of the SBP annuity by the amount of DIC.

The Senate recedes with an amendment that would limit the survivor indemnity allowance to survivors of service members who were entitled to retired pay, or would be entitled to reserve component retired pay but for the fact they were not yet 60 years of age, would increase the monthly allowance for fiscal year 2009 to \$50, and would increase the monthly allowance by \$10 every year through fiscal year 2013.

*Modification of authority of members of the armed forces to designate recipients for payment of death gratuity (sec. 645)*

The House bill contained a provision (sec. 642) that would amend section 1477 of title 10, United States Code, to allow a service member to designate any individual to receive up to 50 percent of the death gratuity benefit in 10 percent increments.

The Senate amendment contained a provision (sec. 651) that would allow a service member to designate in writing any individual to receive the death gratuity benefit. In the absence of such a designation, the death gratuity would be paid in accordance with the succession set forth in section 1970 of title 38, United States Code, relating to Servicemembers' Group Life Insurance (SGLI).

The House recedes with an amendment that would make the provision effective no later than July 1, 2008; provide for spousal notification if an election were made under this authority that would exclude a current spouse from any portion of the death gratuity benefit; provide for partial designations in 10 percent incre-

ments; and provide that elections made under section 1477 of title 10, United States Code, before the enactment of this provision, or before enactment of the amendments to that section by section 1316 of the U.S. Troop Readiness, Veterans' Care, Katrina Recovery, and Iraq Accountability Appropriations Act, 2007 (Public Law 110-28), would remain lawful and effectual.

The conferees believe that service members have the duty and should have the discretion to designate beneficiaries of their choosing for receipt of the death gratuity. The conferees view the SGLI and its statutory basis, as set forth in section 1970 of title 38, United States Code, as the appropriate model for the administration of the death gratuity benefit. The conferees expect the Department of Defense and the services to implement these changes swiftly and to use all appropriate measures to ensure that service members are informed about this important survivor benefit and receive the assistance necessary to make this important designation.

*Clarification of application of retired pay multiplier percentage to members of the uniformed services with over 30 years of service (sec. 646)*

The Senate amendment contained a provision (sec. 654) that would authorize, in the case of an individual who became a member of the armed services prior to September 8, 1980, and who was recalled to active duty for a period of more than 2 years, recomputation of that member's retired pay according to the provisions of section 1409 of title 10, United States Code. The provision would also amend section 6333 of title 10, United States Code, to conform that section to the provisions of section 1409 of title 10, United States Code.

The House bill contained no similar provision.

The House recedes with a technical amendment.

*Commencement of receipt of non-regular service retired pay by members of the Ready Reserve on active federal status or active duty for significant periods (sec. 647)*

The Senate amendment contained a provision (sec. 655) that would reduce the age at which a member of the Ready Reserve could draw retired pay below the age of 60 by 3 months for every aggregate 90 days of active duty performed since September 11, 2001 under certain mobilization authorities. Under this provision, a member of the Ready Reserve could not reduce the age at which they draw retired pay below the age of 50.

The House bill contained no similar provision.

The House recedes with an amendment that would limit the applicability of the provision to service performed after the date of enactment of this Act.

*Computation of years of service for purposes of retired pay for non-regular service (sec. 648)*

The Senate amendment contained a provision (sec. 661) that would increase to 130 the annual number of inactive duty points that may be credited toward the computation of retired pay for non-regular service.

The House bill contained no similar provision.

The House recedes.

Subtitle E—Commissary and Nonappropriated Fund  
Instrumentality Benefits

*Authority to continue commissary and exchange benefits for certain involuntarily separated members of the armed forces (sec. 651)*

The House bill contained a provision (sec. 652) that would authorize members involuntarily separated from active duty or the Selected Reserve to continue to use commissary and exchange stores for 2 years after separation. This authority would expire on December 31, 2012.

The Senate amendment contained no similar provision.

The Senate recedes.

*Authorization of installment deductions from pay of employees of nonappropriated fund instrumentalities to collect indebtedness to the United States (sec. 652)*

The House bill contained a provision (sec. 653) that would clarify that executive branch instrumentalities have the same access to procedures for collection of debts from federal civilian employees as do judicial and legislative branch instrumentalities under section 5514 of title 5, United States Code.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would clarify that nonappropriated fund instrumentalities have access to the debt collection procedures of section 5514 of title 5, United States Code, and that employees of nonappropriated fund instrumentalities are subject to those provisions.

Subtitle F—Consolidation of Special Pay, Incentive Pay, and Bonus  
Authorities

*Consolidation of special pay, incentive pay, and bonus authorities of the uniformed services (sec. 661)*

The House bill contained a provision (sec. 661) that would reform and consolidate over 60 special pays and incentive pays into the following eight categories: (1) bonuses for enlisted members; (2) bonuses for officers; (3) bonuses and incentive pays for nuclear officers; (4) bonuses and incentive pays for aviation officers; (5) bonuses and incentive pays for officers in health professions; (6) hazardous duty pays; (7) assignment pays and special duty pays; and (8) skill incentive pays and proficiency bonuses. The provision would also retain separate authorities for 15-year career status bonuses, critical skill retention bonuses, and the continuation of combat zone-related pays and allowances for members hospitalized as a result of combat-related wounds, injuries, or illnesses.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would set expiration dates of December 31, 2009 for all the new categories of pays and would clarify the maximum amounts allowable for the various pays under the new authority.

*Transitional provisions (sec. 662)*

The House bill contained a provision (sec. 662) that would require the Secretary of Defense to develop, in coordination with the Secretary of Homeland Security, the Secretary of Health and Human Services, and the Secretary of Commerce, a plan to implement the consolidation of special pays, incentive pays, and bonus authorities and to submit the plan to the congressional defense committees within 1 year of the date of enactment of this Act. The provision would also provide for an orderly transfer to the new authorities that would be implemented on a pace set by the Secretary of Defense with full implementation required within 10 years after the date of enactment of this Act.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of Defense to submit to the congressional defense committees a notice of the implementation of any new authority at least 30 days before the new authority is first used.

#### Subtitle G—Other Matters

*Referral bonus authorities (sec. 671)*

The House bill contained a provision (sec. 605) that would authorize an Army referral bonus to be paid to a service member or civilian employee of the Department of the Army who refers an officer candidate who is later appointed as an officer in a health profession designated by the Secretary of the Army.

The Senate amendment contained similar provisions (secs. 622 and 623) that would authorize the service secretaries to approve a referral bonus for officer candidates in the health professions for all the military services, codify existing authority for the Army to pay a referral bonus to a service member or civilian employee who refers a person to the Army who enlists in a regular or reserve component, and extend the authority to pay this bonus through December 31, 2008.

The House recedes with an amendment that would give the Secretary of Defense discretionary authority to approve payment by the Army, Navy, or Air Force of a bonus to encourage Department of Defense personnel to refer persons for appointment as officers to serve in a health profession.

*Expansion of education loan repayment program for members of the Selected Reserve (sec. 672)*

The House bill contained a provision (sec. 671) that would include additional types of loans incurred for educational purposes by members of the Selected Reserve that would be eligible for repayment by the Department of Defense. The provision would also make both officer and enlisted personnel eligible for loan repayment under this program.

The Senate amendment contained a similar provision (sec. 672).

The Senate recedes.

*Ensuring entry into United States after time abroad for permanent resident alien military spouses and children (sec. 673)*

The House bill contained a provision (sec. 672) that would allow permanent resident alien spouses and children of service members stationed abroad under official orders to gain readmission to the United States without their time overseas being treated under the Immigration and Nationality Act as abandonment or relinquishment of lawful permanent resident status or as an absence for the purposes of establishing citizenship.

The Senate amendment contained no similar provision.

The Senate recedes with a technical amendment.

*Overseas naturalization for military spouses and children (sec. 674)*

The House bill contained a provision (sec. 673) that would allow certain permanent-resident spouses and children of members of the armed forces who reside in foreign countries to be naturalized. Under the provision, upon compliance with other requirements of the Immigration and Nationality Act, the spouse or child's physical presence in a foreign country while accompanying the member would be treated as residence in the United States or any State for the purpose of satisfying the continuous presence requirements of the Act.

The Senate amendment contained a similar provision (sec. 682).

The Senate recedes with a technical amendment.

*Modification of amount of back pay for members of Navy and Marine Corps selected for promotion while interned as prisoners of war during World War II to take into account changes in Consumer Price Index (sec. 675)*

The Senate amendment contained a provision (sec. 686) that would amend section 667 of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 (Public Law 106-398) to modify the method by which the Secretary of the Navy calculates back pay owed to former service members who by reason of being interned as prisoners of war were unable to accept a promotion for which they had been selected. The provision would require the calculation to account for changes in the Consumer Price Index.

The House bill contained no similar amendment.

The House recedes.

#### LEGISLATIVE PROVISIONS NOT ADOPTED

*Access to defense commissary and exchange system by surviving spouse and dependents of certain disabled veterans*

The House bill contained a provision (sec. 651) that would require the Secretary of Defense to revise regulations to ensure access to the defense commissary and exchange system by the surviving spouse and dependents of a veteran who had a service-connected disability rated at 100 percent or total, although the disability rating was awarded posthumously.

The Senate amendment contained no similar provision.

The House recedes.

The conferees believe that the change in the regulations needed to appropriately recognize surviving spouses and dependents of veterans who are posthumously determined to have service-connected disabilities rated at 100 percent can be accomplished without legislation. Accordingly, the conferees direct the Secretary of Defense to revise the Department of Defense regulations to provide such family members access to the defense commissary and exchange system.

*Annuities for guardians or caretakers of dependent children under Survivor Benefit Plan*

The Senate amendment contained a provision (sec. 652) that would allow an unmarried service member with a dependent child or children to elect, at the time of retirement, a guardian or caretaker of that dependent child or children as the beneficiary of the service member's Survivor Benefit Plan annuity.

The House bill contained no similar provision.

The Senate recedes.

*Disregarding periods of confinement of member in determining benefits for dependents who are victims of abuse by the member*

The House bill contained a provision (sec. 641) that would amend section 1408 of title 10, United States Code, to require the secretary concerned to consider as credible service for purposes of determining retirement eligibility any periods of confinement served by a member before convening authority action on a record of trial regarding the member's conviction of an offense involving abuse of a spouse or dependent child.

The Senate amendment contained no similar provision.

The House recedes.

*Effective date of paid-up coverage under Survivor Benefit Plan*

The Senate amendment contained a provision (sec. 659) that would amend section 1452(j) of title 10, United States Code, to change the effective date for paid-up coverage under the Survivor Benefit Plan from October 1, 2008 to October 1, 2007.

The House bill contained no similar provision.

The Senate recedes.

*Guaranteed pay increase for members of the armed forces of one-half of one percentage point higher than Employment Cost Index*

The House bill contained a provision (sec. 606) that would mandate that pay raises for all service members during fiscal years 2009 through 2012 be one-half of 1 percent higher than the annual rise in the Employment Cost Index.

The Senate amendment contained no similar provision.

The House recedes.

*Payment of expenses of travel to the United States for obstetrical purposes of dependents located in very remote locations outside the United States*

The Senate amendment contained a provision (sec. 641) that would authorize the Secretary of Defense to pay travel expenses for

purposes of childbirth to a location in the United States of a pregnant dependent of a service member assigned to a very remote location outside the United States.

The House bill contained no similar provision.

The Senate recesses.

The conferees direct the Secretary of Defense to conduct a review, in consultation with the Chairman of the Joint Chiefs and the combatant commanders, of the quality of life challenges confronted by military families at remote overseas locations. The review should include a review of current policies and procedures regarding the delivery of obstetrical care provided to medical beneficiaries. In particular, the Secretary should compare and contrast the current policy of transporting pregnant women to centrally located government medical facilities with a policy of providing women the opportunity to return to the United States to give birth. The Secretary should report the findings and recommendations to the Committees on Armed Services of the Senate and the House of Representatives not later than June 30, 2008.

*Postal benefits program for members of the armed forces serving in Iraq or Afghanistan*

The House bill contained a provision (sec. 674) that would require the Secretary of Defense, in consultation with the United States Postal Service, to provide a postal benefits program to service members serving in Iraq or Afghanistan, or who are hospitalized in a Department of Defense facility as a result of service in Iraq or Afghanistan.

The Senate amendment contained no similar provision.

The House recesses.

*Transportation of additional motor vehicle of members on change of permanent station to or from nonforeign areas outside the continental United States*

The House bill contained a provision (sec. 634) that would authorize service members with at least one dependent of driving age to ship two privately owned vehicles during permanent change of station moves to nonforeign duty locations outside the continental United States.

The Senate amendment contained no similar provision.

The House recesses.

## TITLE VII—HEALTH CARE PROVISIONS

### Subtitle A—Improvements to Military Health Benefits

*One-year extension of prohibition on increases in certain health care costs for members of the uniformed services (sec. 701)*

The House bill contained a provision (sec. 701) that would extend the prohibition established by the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109-364) on the Department of Defense from increasing the premium, deductible, and copayment for TRICARE Prime; the charge for inpatient care for TRICARE Standard; and the premium for TRICARE Reserve Select and TRICARE Standard for members of the Se-

lected Reserve during the period from October 1, 2007, to September 30, 2008.

The Senate amendment contained a similar provision (sec. 713).

The House recedes with a technical amendment.

The conferees believe that the Department of Defense and the Nation have an obligation to provide health care benefits to active duty, National Guard, reserve, and retired members of the uniformed services and their families, disabled eligibles, and survivors. Additionally, the Department has options to constrain the growth of health care spending in ways that do not disadvantage retired members of the uniformed services who have faithfully fulfilled the demands of 20 to 30 year careers.

The conferees urge the Department to continue to identify opportunities to improve the quality and effectiveness of the military health care system through improved performance and health care outcomes. The conferees believe that any increase in TRICARE program cost sharing should be made only after implementation of improvements in the health care program, after consideration of the comprehensive reports mandated by Congress in sections 711 and 713 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109-364), and following consultation with military beneficiary advocates.

*Temporary prohibition on increase in copayments under retail pharmacy system of pharmacy benefits program (sec. 702)*

The House bill contained a provision (sec. 702) that would limit the cost sharing requirements for drugs provided through the TRICARE retail pharmacy program to amounts not more than \$3 for generic drugs, \$9 for formulary drugs, and \$22 for non-formulary drugs during fiscal year 2008.

The Senate amendment contained an identical provision (sec. 714). The conference agreement includes this provision.

*Inclusion of TRICARE retail pharmacy program in federal procurement of pharmaceuticals (sec. 703)*

The House bill contained a provision (sec. 703) that would authorize the Secretary of Defense to exclude from the pharmacy benefits program any pharmaceutical agent that is not priced consistent with the pricing set forth under section 8126 of title 38, United States Code.

The Senate amendment contained a provision (sec. 701) that would require that any prescription filled on or after October 1, 2007 through the TRICARE retail pharmacy network will be covered by the federal pricing limits applicable to covered drugs under section 8126 of title 38, United States Code.

The House recedes with an amendment that would change the implementation date from October 1, 2007 to the date of enactment of this Act.

*Stipend for members of reserve components for health care for certain dependents (sec. 704)*

The House bill contained a provision (sec. 708) that would authorize the Secretary of Defense to pay a stipend for continuing

health care coverage to reserve members called to active duty with a dependent possessing a special health care need that would best be met by remaining in the member's civilian health plan.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the program to be implemented pursuant to regulations issued by the Secretary.

The conferees intend that the stipend should be available to eligible dependents regardless of whether their civilian health plan is provided by private employers or the Federal Government.

*Authority for expansion of persons eligible for continued health benefits coverage (sec. 705)*

The Senate amendment contained a provision (sec. 706) that would authorize the Secretary of Defense to expand eligibility for continued health benefits coverage authorized in section 1078a of title 10, United States Code, for additional persons specified in regulations by the Secretary for not more than 36 months after such persons lose entitlement to Department of Defense health care benefits.

The House bill contained no similar provision.

The House recedes.

*Continuation of eligibility for TRICARE Standard coverage for certain members of the Selected Reserve (sec. 706)*

The Senate amendment contained a provision (sec. 707) that would allow federal employees already enrolled in TRICARE Reserve Select under an existing program to remain in TRICARE Reserve Select through the enrollment period for which they qualified under the program as in effect on October 16, 2006.

The House bill contained no similar provision.

The House recedes.

*Extension of pilot program for health care delivery (sec. 707)*

The House bill contained a provision (sec. 707) that would extend the pilot program established by the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108-375) to test initiatives that build cooperative health care arrangements and agreements between military installations and local, regional non-military health care systems.

The Senate amendment contained no similar provision.

The Senate recedes.

Two sites were selected to test the pilot program, the installations at Fort Drum, New York, and Yuma, Arizona. The Department of Defense provided the Committees on Armed Services of the Senate and the House of Representatives with an interim report on the status of these programs. The conferees are pleased that the results of the report are favorable and indicate that the collaborative relationships created through the pilots are benefitting both military and civilian health care beneficiaries and providers. The conferees expect the Department to share the lessons learned from these collaborative efforts with other installations and expand such programs where appropriate.

*Inclusion of mental health care in definition of health care and report on mental health care services (sec. 708)*

The Senate amendment contained a provision (sec. 708) that would clarify the Secretary of Defense's authority to determine the appropriate payment amounts for mental health services under the TRICARE program. This provision would also require the Secretary to report to the Committees on Armed Services of the Senate and the House of Representatives on the adequacy of access to mental health services under the TRICARE program.

The House bill contained no similar provision.

The House recedes with an amendment that would clarify that mental health care is in the definition of health care under section 1072 of title 10, United States Code.

The conferees intend that the Secretary will carefully examine the adequacy of mental health payments under contracts for care so as to ensure that TRICARE payment rates are not a barrier to access to mental health services for eligible Department of Defense beneficiaries.

Subtitle B—Studies and Reports

*Surveys on continued viability of TRICARE Standard and TRICARE Extra (sec. 711)*

The Senate amendment contained a provision (sec. 702) that would extend through 2011 the requirement for the Secretary of Defense to conduct surveys to determine health care and mental health care provider acceptance of the TRICARE Standard and TRICARE Extra benefit. The provision would require surveys of beneficiaries in addition to surveys of providers and would require the Secretary to establish benchmarks for primary and specialty care providers, to determine the adequacy of providers available. The provision would also require the Comptroller General of the United States to review the processes, procedures, and analyses used by the Department of Defense to determine the adequacy of the number of health care and mental health care providers available to beneficiaries, and to report on the results of this review to the Committees on Armed Services of the Senate and the House of Representatives on a biannual basis.

The House bill contained no similar provision.

The House recedes with an amendment that would delete the requirement for a supervising official to be designated to oversee the adequacy and accessibility of the TRICARE Standard and TRICARE Extra programs. The amendment would also require the Comptroller General to give a high priority to studying areas with high concentrations of members of the Selected Reserve.

The conferees note that TRICARE Regional Offices (TRO) are responsible for overseeing the adequacy and accessibility of health care and mental health care services to TRICARE beneficiaries in their areas. The conferees expect the TROs to perform these oversight duties, paying specific attention to the needs of beneficiaries in TRICARE Standard and TRICARE Reserve Select.

*Report on training in preservation of remains under combat or combat-related conditions (sec. 712)*

The House bill contained a provision (sec. 710) that would require the Secretary of Defense to submit to the Committees on Armed Services of the Senate and the House of Representatives a report on the training in preservation of remains in combat or combat-related conditions required by section 567 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109–364).

The Senate amendment contained no similar provision.

The Senate recesses.

*Report on patient satisfaction surveys (sec. 713)*

The Senate amendment contained a provision (sec. 703) that would require the Secretary of Defense to submit to the Committees on Armed Services of the Senate and the House of Representatives a report on the ongoing patient satisfaction surveys taking place in inpatient and outpatient settings at military treatment facilities.

The House bill contained no similar provision.

The House recesses with a technical amendment.

*Report on medical physical examinations of members of the armed forces before their deployment (sec. 714)*

The Senate amendment contained a provision (sec. 712) that would require the Secretary of Defense to report to the Committees on Armed Services of the Senate and the House of Representatives by April 1, 2008, on: (1) the results of a study of the frequency of medical examinations conducted by the armed forces prior to deployment; (2) a comparison of policies among the military departments of such medical examinations; and (3) a business case analysis for a single pre-deployment physical and single system for tracking medical examinations.

The House bill contained no similar provision.

The House recesses with an amendment that would delete the requirement to report on the frequency of medical examinations. The amendment would require an assessment of current policies and the feasibility of implementing a single examination and tracking system.

*Report and study on multiple vaccinations of members of the armed forces (sec. 715)*

The House bill contained a provision (sec. 713) that would require the Secretary of Defense to report to the Committees on Armed Services of the Senate and the House of Representatives on the Department's policies for administering and evaluating multiple vaccinations of members of the armed forces in a 24-hour period, including an assessment of procedures to provide current information on such immunizations to State Adjutants General. The provision would also require the Secretary to study the safety and efficacy of administering multiple vaccinations within a 24-hour period.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would delete the requirement for the Secretary to conduct a safety and efficacy study.

*Review of gender- and ethnic group-specific mental health services and treatment for members of the armed forces (sec. 716)*

The Senate amendment contained a provision (sec. 1634) that would require the Secretary of Defense and the Secretary of Veterans Affairs to jointly conduct a comprehensive review of: (1) the need for mental health treatment and services for female members of the armed forces and veterans; and (2) the efficacy and adequacy of existing mental health treatment programs and services for female members of the armed forces and veterans.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary of Defense to conduct a comprehensive review of: (1) the need for gender- and ethnic group-specific mental health treatment and services for members of the armed forces; and (2) the efficacy and adequacy of existing gender- and ethnic group-specific mental health treatment programs and services for members of the armed forces.

*Licensed mental health counselors and the TRICARE program (sec. 717)*

The House bill contained a provision (sec. 706) that would amend section 1079 of title 10, United States Code, to authorize licensed or certified mental health counselors to be reimbursed for services provided to TRICARE beneficiaries without prior physician referral or supervision.

The Senate amendment contained a provision (sec. 704) that would require the Secretary of Defense to enter into a contract with the Institute of Medicine of the National Academy of Sciences or a similar organization to conduct an independent study of individuals practicing as licensed mental health counselors, social workers, and marriage and family therapists under the TRICARE program and make recommendations for permitting such professionals to practice independently under the TRICARE program.

The Senate recedes with an amendment that would require a study of the credentials, preparation, and training of individuals practicing as licensed mental health counselors and would require the Secretary of Defense to establish criteria that licensed or certified mental health counselors would have to meet in order to be able to independently provide care to TRICARE beneficiaries and receive payment under the TRICARE program for such services.

The conferees are aware that mental health counselors, in contrast to the licensing practices of other health care disciplines, have multiple routes to licensure. While the conferees encourage the profession to work toward a single certifying body or joint certification agreement, the conference outcome would allow the Department of Defense to create opportunities for the independent practice of licensed mental health professionals who meet criteria established by the Department in order to meet the immediate mental health needs of service members and their families.

*Report on funding of the Department of Defense for health care (sec. 718)*

The Senate amendment contained a provision (sec. 1008) that would require the President to submit a report to Congress in any year that the armed forces are involved in a major conflict if the budget for the Department of Defense for health care is less than the amount provided by Congress for the preceding fiscal year or if the allocation from the Defense Health Program to any military department is less than the allocation in the preceding fiscal year. The report would include the reason for the lesser amount or allocation and the anticipated effects of the reduction.

The House bill contained no similar provision.

The House recedes with an amendment that would terminate this provision on December 31, 2017 and would remove the condition that the armed forces be involved in a major conflict.

Subtitle C—Other Matters

*Prohibition on conversion of military medical and dental positions to civilian medical and dental positions (sec. 721)*

The House bill contained a provision (sec. 704) that would establish a permanent prohibition on the secretaries of the military departments from converting any military medical or dental position to a civilian medical or dental position on or after October 1, 2007. This provision would also require a report to the congressional defense committees on such conversions made during fiscal year 2007.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the prohibition to end on September 30, 2012. The amendment would also require that any military medical or dental position that has been converted to a civilian medical or dental position from October 1, 2004 through September 30, 2008 be restored to a military medical or dental position if the position is not filled by a civilian by September 30, 2008.

The conferees are concerned that the military departments have not fully addressed the certification requirements contained in section 724 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109–364), and thus lack assurance that planned conversions will not increase costs, decrease access to care, decrease quality of care, or negatively impact recruitment and retention of military personnel.

In addition, the conferees have learned that military to civilian conversions have had a negative impact on the ability of the military health system to provide health care to service members and their families, have compounded the impact of multiple deployments on military medical personnel, and could impact adequate staffing of wounded warrior transition units. The conferees are concerned that, despite these concerns, the military departments have continued to convert military medical positions to civilian medical positions. Therefore, the conferees prohibit the conversion of military medical positions to civilian positions until September 30, 2012.

*Establishment of Joint Pathology Center (sec. 722)*

The House bill contained a provision (sec. 709) that would require the Secretary of Defense to establish a Joint Pathology Center located on the National Naval Medical Center in Bethesda, Maryland. The center would function as the reference center in pathology for the Department of Defense and the Department of Veterans Affairs, providing services in: diagnostic pathology consultation in medicine, dentistry, and veterinary sciences; pathology education, to include graduate medical education, including residency and fellowship programs, and continuing medical education; and diagnostic pathology research.

The Senate amendment contained a similar provision (sec. 1095) that would allow the Secretary to establish a Joint Pathology Center, to the extent that establishing such a center is consistent with the recommendations of the 2005 Defense Base Closure and Realignment Commission.

The Senate recedes with an amendment that would require the President to establish a Joint Pathology Center.

The conferees believe that having a Joint Pathology Center performing second opinion consults is integral to pathology education and residency programs and that the Federal Government should continue to perform this essential mission.

The conferees find that the recommendations of the 2005 Defense Base Closure and Realignment Commission Final Report provide the flexibility to establish a Joint Pathology Center as a Department of Defense or federal entity. The President would be required to make a determination as to whether to establish the Joint Pathology Center inside the Department of Defense or in another agency such as the Department of Health and Human Services. The conferees expect the President to consider, in making his determination, whether establishing the center within the Department of Defense is consistent with the recommendations of the 2005 Defense Base Closure and Realignment Commission.

## LEGISLATIVE PROVISIONS NOT ADOPTED

*Establishment of nurse practitioner program*

The House bill contained a provision (sec. 705) that would require the Secretary of Defense to establish a graduate education program for advanced-practice nursing at the Uniformed Services University of the Health Sciences.

The Senate amendment contained no similar provision.

The House recedes.

*Sense of Congress on fees and adjustments under the TRICARE program*

The Senate amendment contained a provision (sec. 715) that would state the sense of Congress on fees and adjustments under the TRICARE program.

The House bill contained no similar provision.

The Senate recedes.

The conferees note that portions of this provision have been included elsewhere in this report.

*Implementation of recommendations of Department of Defense Mental Health Task Force*

The Senate amendment contained a provision (sec. 709) that would require the Secretary of Defense to implement the recommendations of the Department of Defense Task Force on Mental Health (Task Force) as soon as practicable, but not later than May 31, 2008.

The House bill contained no similar provision.

The Senate recedes.

The conferees understand that the Secretary of Defense intends to implement nearly all of the 95 recommendations of the Task Force for improvements in the psychological health of members of the armed forces and their families.

The conferees will closely monitor the Department's efforts to implement these recommendations, especially those focused on access to mental health services for deployed members and their families and on ensuring an adequate supply of highly qualified uniformed mental health care providers.

The conferees direct the Secretary of Defense to submit to the congressional defense committees not later than March 1, 2008, a report on the implementation of each recommendation. The report will include: (1) the expected date of implementation of each recommendation that will be fully implemented; (2) a description of and reason for any modification of a recommendation and the expected date of implementation of the modified recommendation; and (3) the reason for not implementing any recommendation that will not be implemented.

## TITLE VIII—ACQUISITION POLICY, ACQUISITION MANAGEMENT, AND RELATED MATTERS

*Short title (sec. 800)*

The conferees agree to a provision that would provide that this title may be cited as the “Acquisition Improvement and Accountability Act of 2007”.

### Subtitle A—Acquisition Policy and Management

*Internal controls for procurements on behalf of the Department of Defense by certain non-defense agencies (sec.801)*

The House bill contained a provision (sec. 803) that would require the Under Secretary of Defense for Acquisition, Technology, and Logistics to issue guidelines on the use of interagency contracting by the Department of Defense.

The Senate amendment contained a provision (sec. 846) that would require inspector general reviews to determine whether procurements conducted by certain non-defense agencies on behalf of the Department have been conducted in compliance with defense procurement requirements.

The Senate recedes with an amendment that would combine the requirements of the two provisions.

*Lead systems integrators (sec. 802)*

The House bill contained a provision (sec. 806) that would prohibit the Department of Defense from awarding new contracts for lead systems integrator functions, effective October 1, 2011.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would prohibit the Department of Defense from awarding new contracts for lead systems integrator functions, effective October 1, 2010, to any entity that was not performing lead system integrator functions for the same system prior to the date of the enactment of this Act. The provision would also prohibit the award of any new contract for lead system integrator functions for a major system that has proceeded beyond low-rate initial production, effective upon the date of enactment of this Act, absent a written waiver by the Secretary of Defense that meets conditions specified in the provision.

*Reinvestment in domestic sources of strategic materials (sec. 803)*

The House bill contained a provision (sec. 808) that would require that all Department of Defense solicitations for major weapon systems include an evaluation criteria addressing the extent to which suppliers of strategic materials demonstrate a record of sustained reinvestment in domestic production of such materials.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Strategic Materials Protection Board established pursuant to section 187 of title 10, United States Code, to perform an assessment of the extent to which sources of strategic materials are reinvesting in domestic production of such materials.

*Clarification of the protection of strategic materials critical to national security (sec. 804)*

The House bill contained a provision (sec. 809) that would address the use of domestic non-availability determinations and commercial item exceptions with regard to the requirement to buy strategic materials from American sources pursuant to section 2533b of title 10, United States Code.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would revise section 2533b to address the availability and use of domestic non-availability determinations, commercial item exceptions, purchases of fasteners, purchases of high-performance magnets, purchases of electronic components, de minimis purchases, purchases of commercial derivative military articles, and national security waivers. The conferees intend the revised provision to ensure that defense contractors comply with requirements to purchase domestic specialty metals without impeding the ability of the Department of Defense to acquire weapon systems when and as needed.

The conferees agree that the term “electronic components”, as used in this provision, does not include any assembly, such as a radar, that incorporates structural or mechanical parts. In addition, the conferees agree that the term “high performance magnet”, as used in the provision, means permanent magnets containing 10 or more percent by weight of materials such as cobalt, samarium, or nickel. The conferees note that high performance magnets have

been fully or partially excluded from some of the exceptions added by this section. The conferees intend in doing so to ensure that the Department continues to procure such magnets from domestic sources whenever possible and consistent with this section.

Section 2533b, as amended, would authorize streamlined compliance for commercial derivative military articles, based on a contractor's certification that minimum threshold quantities are being purchased during the period of contract performance. The provision specifies that the speciality metal must be purchased for use during the period of contract performance in the production of the commercial derivative military article and the related commercial article. Domestically-melted specialty metal that is purchased for use in the production of commercial derivative military articles acquired under one contract may not be used as a basis for an exception to the requirements of this section for the acquisition of the same or other commercial derivative military articles under a different contract.

The conferees note that commercially available off-the-shelf fasteners would be exempt from the requirements of subsection (a) of section 2533b of title 10, United States Code, only to the limited extent provided in paragraph (h)(2)(D). However, nothing in this section precludes the use of other exceptions or waivers available to the Secretary with regard to such fasteners, to the extent that they are applicable.

The conferees direct the Secretary of Defense to ensure, in promulgating rules to implement the minimum threshold in subsection (j) of section 2533b, as amended, that such threshold applies to the specialty metals contained in an item delivered to the Department of Defense and may not be applied on a piecemeal basis to a subsystem or component of such item.

Finally, the conferees understand that the recently published rule regarding commercially available off-the-shelf items, and other recent domestic non-availability determinations that apply to multiple contracts and which were based on the availability of components, rather than speciality metals, will have to be reviewed and amended to comply with section 2533b of title 10, United States Code, as amended by this provision. The conferees encourage the Department to ensure that the exceptions provided by subsections (b) through (k) of the revised section 2533b are utilized through an open and transparent process, to the extent consistent with the protection of national security information and confidential business information.

*Procurement of commercial services (sec. 805)*

The House bill contained a provision (sec. 801) that would require the Administrator for Federal Procurement Policy to modify the Federal Acquisition Regulation to narrow the regulatory definition of commercial services.

The Senate amendment contained a provision (sec. 823) that would limit the use of time and materials contracts to purchase commercial services for or on behalf of the Department of Defense.

The Senate recedes with an amendment that would require the Secretary of Defense to modify the regulations of the Department of Defense to: (1) authorize the contracting officer in the procure-

ment of certain commercial services to require offerors to submit sufficient information to evaluate, through price analysis, the reasonableness of the proposed price; and (2) address the categories of services which may be purchased for or on behalf of the Department of Defense pursuant to commercial time and materials contracts.

*Specification of amounts requested for procurement of contract services (sec. 806)*

The Senate amendment contained a provision (sec. 843) that would require the Department of Defense (DOD) to clearly and separately identify in its budget justification materials the amounts requested in each budget account for the procurement of contract services.

The House bill contained no similar provision.

The House recedes with an amendment that would: (1) require that the materials submitted clearly identify amounts requested for each category of service for each DOD component, installation, or activity; and (2) provide that the provision takes effect for fiscal years after fiscal year 2009.

The conferees note that the military services currently identify certain categories of services—such as engineering and technical services and advisory and assistance services—in their budget justification documents. The conferees expect that these and other categories of services will be identified separately in the budget justification materials submitted in accordance with this provision. In addition, the conferees expect the budget justification materials to identify the total amount in each account for contract services for each DOD component, installation, or activity for which funding for such services is requested.

The conferees further note that section 2330a of title 10, United States Code requires the Secretary of Defense to establish a data collection system to provide management information on DOD purchases of contract services. The conferees encourage the Department to utilize the required data collection system and ensure that budget information is collected and reported in a manner that is consistent with the collection and reporting of information on expenditures.

*Inventories and reviews of contracts for services (sec. 807)*

The House bill contained a provision (sec. 326(b)) that would require the Secretary of Defense to establish an inventory of work performed by contractors.

The Senate amendment contained a provision (sec. 845) that would require the secretary of each military department and the head of each defense agency to maintain an inventory of activities performed pursuant to contracts for services based on cost or time of performance.

The House recedes with an amendment that would codify a requirement for the Secretary of Defense to maintain an annual inventory of activities performed pursuant to contracts for services for or on behalf of the Department of Defense. The provision would require the secretaries of the military departments and the heads

of defense agencies to conduct certain review and planning activities on the basis of the annual inventories.

*Independent management reviews of contracts for services (sec. 808)*

The Senate amendment contained a provision (sec. 847) that would require the Secretary of Defense to issue guidance to provide for independent management reviews of contracts for services.

The House bill contained no similar provision.

The House recedes with an amendment that would extend the amount of time for the Secretary to issue the required guidance and add additional matters to be addressed in the guidance. In addition to the matters required in the Senate provision, the independent management reviews would be required to specifically address issues raised by contracts under which an agency uses one contractor to perform program management and other acquisition services with regard to services performed by other contractors.

The conferees note the military services and defense agencies are beginning to rely on a single contractor to oversee program management of large services contracts, in a manner similar to that of the “lead systems integrator” concept on hardware programs.

For example, the conferees understand that the program structure for the Defense Logistics “tire privatization” program places extensive control for the management, supply, and distribution of military tires into the hands of a single contractor. Similarly, the Army’s Warfighter Field Operations Customer Support (Warfighter FOCUS) consolidates several existing contracts for training aids, simulators, and ranges used by the active, reserve, and Guard components of the Army into a single contract for life cycle support to be managed by a single large prime contractor over a 10 year period.

The conferees are concerned that the trend toward large single contracts for the procurement of services may undermine competition and result in unequal access to information about future government needs. The conferees expect the Department of Defense to review these issues and take appropriate action to ensure that, to the extent that the Department continues to rely upon such contracts, they do not result in the exclusion or unequal treatment of competing contractors.

*Implementation and enforcement of requirements applicable to undefinitized contractual actions (sec. 809)*

The Senate amendment contained a provision (sec. 848) that would require the Secretary of Defense to issue guidance, with detailed implementation instructions, for the Department of Defense (DOD) to ensure the implementation and enforcement of requirements applicable to undefinitized contractual actions (UCAs).

The House bill contained no similar provision.

The House recedes with an amendment clarifying the issues to be addressed in the guidance.

The conferees note that the DOD already has requirements in place regarding the use of UCAs. However, the Government Accountability Office (GAO) reported in June 2007 that DOD has frequently failed to comply with these requirements.

For example, the Defense Federal Acquisition Regulation Supplement (DFARS) states that when the final price of a UCA is negotiated after a substantial portion of the required performance has been completed, the negotiated profit rate should reflect any reduced cost risk to the contractor for costs incurred during contract performance before negotiation of the final price. Section 215.404–71–3(d)(2) of the DFARS states: “When costs have been incurred prior to definitization, generally regard the contract type risk to be in the low end of the designated range. If a substantial portion of the costs have been incurred prior to definitization, the contracting officer may assign a value as low as 0 percent, regardless of contract type.” However, GAO found no evidence that DOD contracting officers have been observing these requirements in the negotiation of contract fees. The conferees expect the guidance issued pursuant to this section to include procedures for ensuring compliance with these and other requirements regarding UCAs.

*Clarification of limited acquisition authority for Special Operations Command (sec. 810)*

The House bill contained a provision (sec. 817) that would clarify the authorities available to U.S. Special Operations Command (SOCOM) by codifying the position of acquisition executive and senior procurement executive, respectively, by amending section 167(e)(4) of title 10, United States Code.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that codifies the position of the SOCOM command acquisition executive, and deletes language stating that the acquisition executive shall have the same duties and authorities as the service acquisition executives. Furthermore, this provision states that the command acquisition executive is responsible for supervising all SOCOM acquisition matters regardless of whether or not such an activity is carried out by the command or by a military department (MILDEP) pursuant to a delegation of authority by the command. The provision further authorizes the command acquisition executive to negotiate acquisition-related memoranda of agreement with the MILDEPs, to ensure proper representation of the command in acquisition discussions, and to receive acquisition directives and instructions of the department.

**Subtitle B—Provisions Relating to Major Defense Acquisition Programs**

*Requirements applicable to multiyear contracts for the procurement of major systems of the Department of Defense (sec. 811)*

The Senate amendment contained a provision (sec. 801) that would define the term “substantial savings” for the purposes of authorizing multiyear contracts.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary of Defense to certify in writing by no later than March 1 of a year in which the Secretary requests legislative authority to enter into a multiyear contract for which such authority is required

that he has made certain determinations with regard to such contract.

The conferees agree that “substantial savings” under section 2306b(a)(1) of title 10, United States Code, means savings that exceed 10 percent of the total costs of carrying out the program through annual contracts, except that multiyear contracts for major systems providing savings estimated at less than 10 percent should only be considered if the Department presents an exceptionally strong case that the proposal meets the other requirements of section 2306b(a), as amended. The conferees agree with a Government Accountability Office finding that any major system that is at the end of its production line is unlikely to meet these standards and therefore would be a poor candidate for a multiyear procurement contract.

The conferees further agree that the Cost Analysis Improvement Group must be tasked and resourced to perform the cost estimates required by this section in a timely manner to ensure compliance with this section.

*Changes to Milestone B certifications (sec. 812)*

The Senate amendment contained a provision (sec. 802) that would: (1) require that the milestone decision authority (MDA) receive a business case analysis before making a Milestone B certification under section 2366a of title 10, United States Code; and (2) require the program manager for a major defense acquisition program (MDAP) to immediately notify the MDA of significant changes to the MDAP after a Milestone B certification is made.

The House bill contained no similar provision.

The House recedes with an amendment that would clarify the requirements for Milestone B certifications.

*Comptroller General report on Department of Defense organization and structure for major defense acquisition programs (sec. 813)*

The Senate amendment contained a provision (sec. 803) that would require the Comptroller General to report to the congressional defense committees on potential modifications to the Department of Defense organization and structure for major defense acquisition programs.

The House bill contained no similar provision.

The House recedes with an amendment striking two of the elements of the study and adding a new element: a review of whether, and how, the combatant commands should participate in long-term planning for future capabilities.

The conferees agree that the review of shorter, more frequent acquisition milestones should include appropriate consideration of: (1) separate milestones at the time of approval of a mission need statement, approval of a capability need definition, technology development and assessment, system development and demonstration, final design, production prototyping and testing, limited production, and full-rate production; and (2) a requirement that appropriate officials certify to the Milestone Decision Authority that exit criteria related to cost, schedule, technological maturity, and performance factors have been met prior to a program proceeding to the next milestone.

*Clarification of submission of cost or pricing data on noncommercial modifications of commercial items (sec. 814)*

The House bill contained a provision (sec. 812) that would clarify certain thresholds in the Truth in Negotiations Act (10 U.S.C. 2306a).

The Senate amendment contained a similar provision (sec. 822(c)).

The Senate recedes with a technical amendment.

*Clarification of rules regarding the procurement of commercial items (sec. 815)*

The House bill contained a provision (sec. 811) that would amend the Truth in Negotiations Act, section 2306a of title 10, United States Code, to require the submission of cost or pricing data for sole-source contracts for commercial items if needed to determine that a price is fair and reasonable.

The Senate amendment contained a provision (sec. 822) that would amend section 2379 of title 10, United States Code, to narrow the categories of subsystems, components, and spare parts of major weapon systems that may be purchased as commercial items.

The House recedes with an amendment that would authorize the contracting officer in the procurement of a major weapon system, or subsystems, components, or spare parts for a major weapon system to require offerors to submit sufficient information to evaluate, through price analysis, the reasonableness of the proposed price. The information required to be submitted may include information on prices paid for the same or similar items under comparable terms and conditions and, if the contracting officer determines that price information is not sufficient to determine the reasonableness of price, other relevant information regarding the basis of price or cost, including information on labor costs, material costs, and overhead rates.

The conferees expect that a contracting officer's written determination under this section will include an explanation of the basis for the contracting officer's determination that: (1) the item is a commercial item; and (2) the information provided by the contractor is sufficient to evaluate the reasonableness of price.

*Review of systemic deficiencies on major defense acquisition programs (sec. 816)*

The House bill contained a provision (sec. 847) that would require each component of the Department of Defense that has multiple programs experiencing excessive cost growth in any fiscal year to identify and report on systemic deficiencies in its acquisition policies and practices that may have contributed to such cost growth.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Under Secretary of Defense for Acquisition, Technology, and Logistics to conduct an annual review of systemic deficiencies in major defense acquisition programs that have led to critical cost threshold breaches or required recertification of programs by the Joint Requirements Oversight Council.

*Investment strategy for major defense acquisition programs (sec. 817)*

The Senate amendment contained a provision (sec. 804) that would require the Secretary of Defense to submit a report to the congressional defense committees on the strategies of the Department of Defense for balancing the allocation of funds and other resources among major defense acquisition programs. The report would also address the role of the Tri-Chair Committee of the Department of Defense in the resource allocation process for major defense acquisition programs.

The House bill contained no similar provision.

The House recedes with an amendment that would require that the report also address, to the maximum extent practicable, any changes to the budget, acquisition, and requirements processes of the Department of Defense that the Department has undertaken or plans to undertake as a result of changes in law made by provisions of this Act.

*Report on implementation of recommendations on total ownership cost for major weapon systems (sec. 818)*

The Senate amendment contained a provision (sec. 805) that would require the Secretary of Defense to report to the congressional defense committees on the implementation of recommendations by the Comptroller General regarding total ownership cost for major weapon systems.

The House bill contained no similar provision.

The House recedes.

Subtitle C—Amendments to General Contracting Authorities,  
Procedures, and Limitations

*Plan for restricting government-unique contract clauses on commercial contracts (sec. 821)*

The House bill contained a provision (sec. 813) that would require the Under Secretary of Defense for Acquisition, Technology, and Logistics to develop and implement a plan to minimize the number of government-unique contract clauses used in commercial contracts.

The Senate amendment contained no similar provision.

The Senate recedes.

*Extension of authority for use of simplified acquisition procedures for certain commercial items (sec. 822)*

The House bill contained a provision (sec. 814) that would extend the authority of the Department of Defense to use simplified acquisition procedures for the acquisition of certain commercial items.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require a report on the use of the authority.

*Five-year extension of authority to carry out certain prototype projects (sec. 823)*

The House bill contained a provision (sec. 816) that would extend for 5 years the authority of the Secretary of Defense to carry out certain prototype projects.

The Senate amendment contained an identical provision (sec. 825). The conference agreement includes this provision.

*Exemption of Special Operations Command from certain requirements for certain contracts relating to vessels, aircraft, and combat vehicles (sec. 824)*

The House bill contained a provision (sec. 818) that would exempt U.S. Special Operations Command from leasing limitations as required in section 2401 of title 10, United States Code.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would permit the Secretary of Defense to exempt U.S. Special Operations Command from leasing limitations regarding substantial termination liability, as required in section 2401 of title 10, United States Code, if he or she can certify that specified conditions have been met, and informs Congress in advance of the certification.

*Provision of authority to maintain equipment to Unified Combatant Command for Joint Warfighting (sec. 825)*

The House bill contained a provision (sec. 819) that would clarify the acquisition authority of the Unified Combatant Command for Joint Warfighting.

The Senate amendment contained a similar provision (sec. 874).

The Senate recedes with an amendment that would extend the authority for two years.

*Market research (sec. 826)*

The House bill contained a provision (sec. 820) that would require the Secretary of Defense to take certain steps to ensure that the Department of Defense and its prime contractors conduct appropriate market research before making purchases for or on behalf of the Department.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would provide additional flexibility to the Secretary in providing for market research.

The conference agreement directs the Secretary to work to develop market research tools to assist contracting officers and prime contractors in performing market research. In developing such tools, the conferees expect the Secretary to give appropriate consideration to the use of web-based tools such as search engines.

*Modification of competition requirements for purchases from Federal Prison Industries (sec. 827)*

The Senate amendment contained a provision (sec. 824) that would tighten requirements for competition in Department of Defense purchases from Federal Prison Industries.

The House bill contained no similar provision.

The House recedes.

*Multiyear contract authority for electricity from renewable energy sources (sec. 828)*

The Senate amendment contained a provision (sec. 826) that would authorize the Secretary of Defense to enter contracts for up to 10 years for the purchase of electricity from sources of renewable energy.

The House bill contained no similar provision.

The House recedes with an amendment clarifying that the authority provided in this provision does not preclude the use of any other multiyear contracting authority available to the Department of Defense for the purchase of electricity from renewable sources.

*Procurement of fire resistant rayon fiber for the production of uniforms from foreign sources (sec. 829)*

The Senate amendment contained a provision (sec. 827) that would authorize the continued procurement of fire resistant rayon fiber for the production of uniforms from foreign sources under certain conditions. The provision would expire 5 years after the date of the enactment of this Act.

The House bill contained no similar provision.

The House recedes.

*Comptroller General review of noncompetitive awards of congressional and executive branch interest items (sec. 830)*

The Senate amendment contained a provision (sec. 828) that would establish special competition rules for contracts awarded by the Department of Defense to implement new programs or projects pursuant to congressional initiatives.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Comptroller General of the United States to compare the procedures used by the Department of Defense for contracts to implement new programs or projects pursuant to congressional initiatives with the procedures used for contracts to implement new programs or projects of special interest to senior executive branch officials.

#### Subtitle D—Accountability in Contracting

*Commission on Wartime Contracting in Iraq and Afghanistan (sec. 841)*

The Senate amendment contained a provision (sec. 1539(a)) that would establish a Commission on Wartime Contracting to review federal contracting for the reconstruction of Iraq and Afghanistan, logistical support of coalition forces operating in Iraq and Afghanistan, and the performance of security and intelligence functions in Iraq and Afghanistan.

The House bill contained no similar provision.

The House recedes with an amendment deleting the review of contracting for intelligence functions from the Commission's responsibilities and making certain modifications to the structure of the Commission.

*Investigation of waste, fraud, and abuse in wartime contracts and contracting processes in Iraq and Afghanistan (sec. 842)*

The Senate amendment contained a provision (sec. 1539(b)) that would require the Special Inspector General for Iraq Reconstruction to conduct a series of audits of contracts for the logistical support of coalition forces in Iraq and Afghanistan and contracts for the performance of security and reconstruction functions in Iraq and Afghanistan.

The House bill contained no similar provision.

The House recedes with an amendment that would provide for the audits to be conducted by the inspectors general with jurisdiction over the relevant contracts. The audits would be conducted pursuant to audit plans developed by the Department of Defense Inspector General, the Special Inspector General for Iraq Reconstruction, and the Special Inspector General for Afghanistan Reconstruction, and would be coordinated through councils and working groups composed of the relevant inspectors general.

The conferees do not intend for the audits conducted pursuant to this section to duplicate audit work previously performed under other authority.

*Enhanced competition requirements for task and delivery order contracts (sec. 843)*

The House bill contained a provision (sec. 821) that would address the issue of competition in contracting on a government-wide basis.

The Senate amendment contained a provision (sec. 821) that would encourage the use of multiple-award task and delivery order contracts in lieu of single-award contracts, enhance requirements for the competition of task orders and delivery orders under multiple-award contracts, and authorize bid protests for task or delivery orders in excess of \$5.0 million under such contracts.

The House bill contained no similar provision.

The House recedes with an amendment that would address the competition issues in the Senate provision on a government-wide basis. The provision would raise the threshold for bid protests to \$10.0 million and sunset the authorization for bid protests after 3 years. The conferees expect that the sunset date will provide Congress with an opportunity to review the implementation of the provision and make any necessary adjustments.

*Public disclosure of justification and approval documents for non-competitive contracts (sec. 844)*

The House bill contained a provision (sec. 823) that would require public disclosure of justification and approval documents for noncompetitive contracts.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the disclosure of such documents through appropriate websites, rather than through the Federal Procurement Data System.

*Disclosure of government contractor audit findings (sec. 845)*

The House bill contained a provision (sec. 824) that would require the head of each federal agency to submit quarterly reports

to Congress on completed audits of contractors performed by the agency or department.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the inclusion of significant findings in final, completed audits of contractors in the semiannual reports submitted to Congress by Inspectors General pursuant to section 5 of the Inspector General Act (Public Law 95-452, as amended). The provision would provide for the redaction from such reports of information that is exempt from public disclosure under the Freedom of Information Act (section 552(b) of title 5, United States Code).

*Protection of contractor employees from reprisal for disclosure of certain information (sec. 846)*

The Senate amendment contained a provision (sec. 861) that would provide enhanced protection for contractor employees who disclose evidence of waste, fraud, or abuse on Department of Defense contracts.

The House bill contained no similar provision.

The House recedes with an amendment that would: expand the categories of government officials to whom a protected communication may be made; expand the categories of waste, fraud, and abuse about which a protected communication may be made; and establish a de novo right of action in federal district court for contractor employees who have exhausted their administrative remedies under the provision.

*Requirements for senior Department of Defense officials seeking employment with defense contractors (sec. 847)*

The Senate amendment contained a provision (sec. 862) that would require contractors that receive defense contracts in excess of \$10.0 million to report to the Department of Defense (DOD) on an annual basis on certain former senior DOD officials who receive compensation from the contractor.

The House bill contained no similar provision.

The House recedes with an amendment that would require certain former senior DOD officials to obtain written opinions from the appropriate DOD ethics officials before accepting compensation from DOD contractors.

The conferees encourage covered DOD officials to request the required written opinion from an ethics counselor regarding post-employment restrictions that may apply to the official prior to leaving the Department whenever possible.

*Report on contractor ethics programs of major defense contractors (sec. 848)*

The Senate amendment contained a provision (sec. 863) that would require the Comptroller General to report to the Committees on Armed Services of the Senate and the House of Representatives on the internal ethics programs of major defense contractors.

The House bill contained no similar provision.

The House recedes with a technical amendment.

In conducting the required review, the conferees direct the Comptroller General to report on the extent to which the internal

ethics programs of major defense contractors include: (1) disclosure of personal financial interests and outside employment by key personnel performing work for the government; (2) conflict mitigation measures for addressing any personal conflicts of interest of employees in connection with their work on Department of Defense contracts; and (3) procedures for reporting these personal conflicts of interest and any mitigation measures to the Department of Defense.

*Contingency contracting training for personnel outside the acquisition workforce and evaluations of Army Commission recommendations (sec. 849)*

The Senate amendment contained a provision (sec. 865) that would require the Secretary of Defense to provide for appropriate training of military personnel outside the acquisition workforce who are expected to have acquisition responsibilities during combat operations, post-conflict operations, and contingency operations.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary of Defense and the Secretary of the Army to review the recommendations of the Commission on Army Acquisition and Program Management in Expeditionary Operations and report to the congressional defense committees on steps that they have taken or plan to take to implement those recommendations. The conferees agree with the Commission's conclusion that acquisition failures in expeditionary operations urgently require a systemic fix of Army contracting and urge the Secretary of Defense and the Secretary of the Army to act on the Commission's recommendations as expeditiously as possible.

Subtitle E—Acquisition Workforce Provisions

*Requirement for section on defense acquisition workforce in strategic human capital plan (sec. 851)*

The House bill contained a provision (sec. 802(b)) that would require the Secretary of Defense to include a section on the acquisition workforce in annual updates of the strategic human capital plan required under section 1122 of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109–163).

The Senate amendment contained a similar provision (sec. 844(h)).

The Senate recedes with an amendment clarifying the issues to be addressed in the plan.

*Department of Defense acquisition workforce development fund (sec. 852)*

The Senate amendment contained a provision (sec. 844) that would establish an acquisition workforce development fund to ensure that the Department of Defense (DOD) has the capacity, in both personnel and skills, needed to properly perform its mission, provide appropriate oversight of contractor performance, and provide the best value for the expenditure of public resources in DOD acquisitions. The fund would be financed through quarterly remittances by the military departments and defense agencies.

The House bill contained no similar provision.

The House recedes with an amendment that would authorize the Secretary of Defense to reduce the percentages on which remittances to the fund are based, if the Secretary determined that credits to the fund would otherwise exceed amounts reasonably needed for the development of the DOD acquisition workforce. The provision would establish minimum levels, below which the Secretary would not be permitted to reduce annual remittances to the fund.

The conferees note that the final report of the Commission on Army Acquisition and Program Management in Expeditionary Operations, released on October 31, 2007, found that the Army has failed to recognize the importance of the contracts requirement development process, failed to allocate resources needed for contract management, and failed to provide defined clear paths for contracting professionals. The report concluded that “contracting, from requirements definition to contract management, is not an Army Core Competence. The Army has excellent, dedicated people, but they are understaffed, overworked, under-trained, under-supported and, most important, under-valued.”

Unfortunately, these shortcomings, which have increased the Army’s vulnerability to fraud, waste, and abuse, are not limited to the Department of the Army. The Acquisition Advisory Panel chartered pursuant to section 1423 of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108–136) reported that the failure of DOD and other federal agencies to adequately fund the acquisition workforce is “‘penny wise and pound foolish,’ as it seriously undermines the pursuit of good value for the expenditure of public resources.” The fund established by this provision is intended to address this problem by making the investments needed to reinvestigate the DOD acquisition workforce.

*Extension of authority to fill shortage category positions for certain federal acquisition positions (sec. 853)*

The House bill contained a provision (sec. 815) that would amend section 1413 of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108–136) to extend the authority of federal agencies to treat certain acquisition positions as shortage category positions.

The Senate amendment contained a provision (sec. 844(g)) that would have provided a similar extension, applicable only to the Department of Defense.

The Senate recedes.

*Repeal of sunset of acquisition workforce training fund (sec. 854)*

The House bill contained a provision (sec. 802(a)) that would repeal the sunset of the acquisition workforce training fund established pursuant to section 37(h) of the Office of Federal Procurement Policy Act (41 U.S.C. 433(h)).

The Senate amendment contained no similar provision.

The Senate recedes.

*Federal acquisition workforce improvements (sec. 855)*

The House bill contained a provision (sec. 825) that would require the Administrator for Federal Procurement Policy to conduct

a study of the composition, scope, and functions of the government-wide acquisition workforce and develop a comprehensive definition of, and method of measuring the size of, such workforce.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment directing the Administrator to: designate a member of the Senior Executive Service as Associate Administrator for Acquisition Workforce Programs; work with agency heads to establish acquisition training programs; develop performance standards for acquisition workforce training; ensure that agency heads collect and maintain standardized information on the acquisition workforce; work with agency heads to develop acquisition workforce human capital plans; and work with the Office of Personnel Management to encourage agencies to utilize existing personnel authorities to recruit and retain qualified acquisition personnel.

#### Subtitle F—Contracts in Iraq and Afghanistan

##### *Memorandum of understanding on matters relating to contracting (sec. 861)*

The House bill contained a provision (sec. 831) that would require the Secretary of Defense and other relevant agency heads to sign a memorandum of understanding (MOU) regarding matters relating to contracting in Iraq and Afghanistan and prohibit the award of any new contracts in Iraq and Afghanistan after January 1, 2008, until the MOU has been signed.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment eliminating the prohibition on the award of new contracts.

##### *Contractors performing private security functions in areas of combat operations (sec. 862)*

The Senate amendment contained a provision (sec. 871) that would: (1) require the Secretary of Defense to prescribe regulations on the selection, training, equipment, and conduct of personnel performing private security functions in an area of combat operations; and (2) ensure that contractors and subcontractors of all federal agencies are subject to such regulations and to directives issued by combatant commanders in accordance with such regulations.

The House bill contained no similar provision.

The House recedes with an amendment clarifying that the requirements of this provision do not apply to contracts entered into by the intelligence community in support of intelligence activities.

The conferees have agreed to provide the Secretary of Defense the authority to require contractors to comply with the regulations issued under this section in areas where there is the potential for combat operations. The conferees intend that the Secretary use this authority with discretion to designate areas with a high potential for combat operations with a commensurate likelihood that private security contractors in such areas would come into regular contact with members of the armed forces.

*Comptroller General reviews and reports on contracting in Iraq and Afghanistan (sec. 863)*

The House bill contained a provision (sec. 832) that would require the Comptroller General to report to review data on contracts in Iraq and Afghanistan and report to Congress every 6 months.

The Senate amendment contained a provision (sec. 878) that would require agency heads to report to Congress on similar issues.

The Senate recedes with an amendment that would require reports to Congress on an annual basis, instead of every 6 months.

*Definitions and other general provisions (sec. 864)*

The House bill contained a provision (sec. 833) that would define certain terms used in provisions on contracting in Iraq and Afghanistan.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would add definitions of the terms “covered contract” and “private security functions” and clarify that nothing in this subtitle shall be interpreted to require the handling of classified information or information relating to intelligence sources and methods in a manner inconsistent with the requirements of applicable provisions of law, regulation, executive order, or legislative branch rules.

Subtitle G—Defense Materiel Readiness Board

*Establishment of Defense Materiel Readiness Board (sec. 871)*

The House bill contained a provision (sec. 1702) that would require the Secretary of Defense to establish a Defense Readiness Production Board and define the membership and functions of the Board.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of Defense to establish a Defense Materiel Readiness Board. The Board would be required to provide independent assessments of materiel readiness, readiness shortfalls, and readiness plans to the Secretary of Defense and Congress.

*Critical materiel readiness shortfalls (sec. 872)*

The House bill contained a series of provisions (secs. 1705, 1706, and 1708) that would provide the Secretary of Defense with authorities to address critical materiel readiness shortfalls.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would consolidate the authorities provided to the Secretary into a single provision. The provision would authorize the Secretary to: designate certain requirements of the Department of Defense as critical materiel readiness shortfalls; ensure that relevant officials of the Department of Defense prioritize and address such shortfalls in requirements, budgets, and acquisition; authorize the transfer of up to \$2.0 billion in authorizations in fiscal year 2008, subject to established procedures, to address such shortfalls; establish a Strategic Readiness Fund to address such shortfalls; and provide for the secretaries of the military departments to report whether multiyear contracts should be used to address critical materiel readiness

shortfalls. The conferees note that nothing in this provision modifies existing statutory requirements regarding the use of multiyear contracts.

#### Subtitle H—Other Matters

##### *Clearinghouse for rapid identification and dissemination of commercial information technologies (sec. 881)*

The House bill contained a provision (sec. 841) that would require the Assistant Secretary of Defense for Networks and Information Integration to establish a demonstration project to identify, assess, stimulate investment in, rapidly acquire, and coordinate the use of information technologies (with an emphasis on commercial off-the-shelf information technologies).

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Assistant Secretary to establish a clearinghouse to identify, assess, and disseminate knowledge about commercial information technologies (with an emphasis on commercial off-the-shelf information technologies, but also including government off-the-shelf information technologies).

##### *Authority to license certain military designations and likenesses of weapons systems to toy and hobby manufacturers (sec. 882)*

The House bill contained a provision (sec. 843) that would require the secretaries of the military departments to license trademarks, service marks, certification marks, and collective marks relating to military designations and likenesses of military weapons systems to toy or hobby manufacturers.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would clarify that the licenses apply to trademarks owned or controlled by the Department of Defense, and give the secretaries of the military departments discretion over granting such licenses.

##### *Modifications to limitation on contracts to acquire military flight simulator (sec. 883)*

The House bill contained a provision (sec. 844) that would modify the waiver standard in section 832 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109–364), which placed limitations on the use of service contracts to acquire military flight simulators.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would limit the applicability of section 832 to contracts that were entered into prior to October 17, 2006.

##### *Requirements relating to waivers of certain domestic source limitations relating to specialty metals (sec. 884)*

The House bill contained a provision (sec. 846) that would require that any domestic non-availability determination pursuant to section 2533b(b) of title 10, United States Code, that would apply to more than one prime contract of the Department of Defense be made on the basis of a formal rulemaking process.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require that the Secretary of Defense solicit information from interested parties, including producers of specialty metal mill products, to the maximum extent practicable and in a manner consistent with the protection of national security information and confidential business information before making a domestic non-availability determination that would apply to more than one prime contract. The provision would also require that the Secretary's determination and the rationale for the determination be made publicly available to the maximum extent practicable consistent with the protection of national security information and confidential business information.

*Telephone services for military personnel serving in combat zones (sec. 885)*

The House bill contained a provision (sec. 848) that would require the Secretary of Defense to: (1) use competitive procedures in entering new contracts to provide morale, welfare, and recreation telephone service for personnel serving in combat zones; and (2) ensure that such contracts provide individual users the flexibility of using phone cards from multiple phone service providers.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary to use competitive procedures when contracting for morale, welfare, and recreation telephone services and to review and determine whether it is in the best interest of the Department of Defense (DOD) to provide individual users the flexibility of using multiple phone service providers under such contracts.

The conferees expect the Secretary to take appropriate steps to ensure that the cost of phone cards, both to DOD and to DOD personnel, is as low as possible under both existing and future contracts. In general, contracts for morale, welfare, and recreation phone services should recognize the contractor's demonstrable and reasonable costs of access when providing individual users the flexibility of using phone cards from providers other than the contractor.

*Enhanced authority to acquire products and services produced in Iraq and Afghanistan (sec. 886)*

The Senate amendment contained a provision (sec. 872) that would authorize the Secretary of Defense to establish a preference for the acquisition of products and services in Iraq and Afghanistan for the purpose of providing a stable source of jobs and employment in Iraq and Afghanistan in cases where the preference will not have an adverse effect on U.S. military operations or the U.S. industrial base.

The House bill contained no similar provision.

The House recedes.

The conferees direct the Secretary of Defense to report to the congressional defense committees on the use of this authority six months after the date of the enactment of this Act and every six months thereafter until the end of fiscal year 2009. Each such report should address the dollar amounts and purposes of procure-

ments made under the authority of this section during the preceding six-month period.

*Defense Science Board review of Department of Defense policies and procedures for the acquisition of information technology (sec. 887)*

The Senate amendment contained a provision (sec. 873) that would require the Secretary of Defense to direct the Defense Science Board to carry out a review of Department of Defense policies and procedures for the acquisition of information technology.

The House bill contained no similar provision.

The House recedes.

*Green procurement policy (sec. 888)*

The Senate amendment contained a provision (sec. 876) that would require the Secretary of Defense to report to Congress on plans to increase the usage of environmentally friendly products at Department of Defense facilities.

The House bill contained no similar provision.

The House recedes with an amendment that would delete the findings included in the Senate provision and would require the report to cover consideration of the budgetary impact of implementation of the plan.

The conferees support the efforts of the Department of Defense to purchase environmentally friendly products and urge the Department to take additional steps to increase the usage of these products, and to document and track such usage.

*Comptroller General review of use of authority under the Defense Production Act of 1950 (sec. 889)*

The Senate amendment contained a provision (sec. 877) that would require the Comptroller General to review the application of the Defense Production Act of 1950 over the last 5 years.

The House bill contained no similar provision.

The House recedes with an amendment that would clarify the issues to be addressed in the review.

*Prevention of export control violations (sec. 890)*

The House bill contained a provision (sec. 810) that would provide for the debarment of any contractor or prospective contractor who has been convicted of a criminal violation of any provision of the Arms Export Control Act (section 2751 of title 22, United States Code, et seq.).

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of Defense to promulgate regulations requiring Department of Defense contractors to comply with applicable export control laws and regulations, develop a contract clause enforcing such requirement, and ensure that contractors are made aware of resources available to assist in compliance with such requirements.

*Procurement goal for native Hawaiian-serving institutions and Alaska native-serving institutions (sec. 891)*

The House bill contained a provision (sec. 807) that would clarify that the minority-serving institutions covered by the goal established in section 2323 of title 10, United States Code, includes native Hawaiian-serving institutions and Alaska native-serving institutions.

The Senate amendment contained no similar provision.

The Senate recesses.

*Competition for procurement of small arms supplied to Iraq and Afghanistan (sec. 892)*

The House bill contained a provision (sec. 834) that would require competition for the procurement of small arms supplied to Iraq and Afghanistan.

The Senate amendment contained an identical provision (sec. 1534). The conference agreement includes this provision.

LEGISLATIVE PROVISIONS NOT ADOPTED

*Clarification of jurisdiction of the United States district courts to hear bid protest disputes involving maritime contracts*

The House bill contained a provision (sec. 850) that would limit bid protests arising out of maritime contracts to the U.S. Court of Federal Claims.

The Senate amendment contained no similar provision.

The House recesses.

*Defense Production Industry Advisory Council*

The House bill contained a provision (sec. 1703) that would require the Secretary of Defense to establish a Defense Production Industry Advisory Council.

The Senate amendment contained no similar provision.

The House recesses.

*Evaluation of cost of compliance with requirement to buy certain articles from American sources*

The House bill contained a provision (sec. 845) that would require that costs related to compliance with requirements related to the purchase of specialty metals from non-domestic sources be excluded from consideration in the evaluation of offers for Department of Defense contracts.

The Senate amendment contained no similar provision.

The House recesses.

*Jurisdiction under Contract Disputes Act of 1978 over claims, disputes, and appeals arising out of maritime contracts*

The House bill contained a provision (sec. 849) that would extend the coverage of the Contract Disputes Act of 1978 (41 U.S.C. 601 et seq.) to maritime contracts.

The Senate amendment contained no similar provision.

The House recesses.

*Management structure for the procurement of contract services*

The Senate amendment contained a provision (sec. 842) that would authorize the military departments to establish Contract Support Acquisition Centers.

The House bill contained no similar provision.

The Senate recesses.

*Maximizing fixed-price procurement contracts*

The House bill contained a provision (sec. 822) that would require the head of each executive branch agency to develop and implement a plan to maximize the use of fixed-price type contracts for the procurement of goods and services.

The Senate amendment contained no similar provision.

The House recesses.

*Prohibition on procurement from beneficiaries of foreign subsidies*

The House bill contained a provision (sec. 804) that would prohibit the Secretary of Defense from entering into a contract with a foreign person who has received a subsidy from the government of a foreign country, if the United States has requested a consultation with that foreign country on the basis that the subsidy is prohibited under the Agreement on Subsidies and Countervailing Measures.

The Senate amendment contained no similar provision.

The House recesses.

*Prohibition on procurement from companies in violation of the Iran and Syria Nonproliferation Act*

The House bill contained a provision (sec. 805) that would prohibit the use of funds for the procurement of goods or services at a prime contract or subcontract level from any source that is owned or controlled by an entity that is subject to sanctions for violations of the Iran and Syria Nonproliferation Act (Public Law 106-178).

The Senate amendment contained no similar provision.

The House recesses.

*Purpose*

The House bill contained a provision (sec. 1701) that would establish the purpose of the Defense Readiness Production Board.

The Senate amendment contained no similar provision.

The House recesses.

*Repeal of requirement for identification of essential military items and military system essential item breakout list*

The Senate amendment contained a provision (sec. 875) that would repeal the requirement for the Secretary of Defense to submit an annual report to the congressional defense committees listing essential items, assemblies, and components of military systems.

The House bill contained no similar provision.

The Senate recesses.

*Report on Department of Defense contracting with contractors or subcontractors employing members of the Selected Reserve*

The Senate amendment contained a provision (sec. 864) that would require the Secretary of Defense to conduct a study on contracting with the Department of Defense by contractors and subcontractors who employ members of the Selected Reserve.

The House bill contained no similar provision.

The Senate recesses.

*Report to Congress*

The House bill contained a provision (sec. 826) that would require the Director of the Office of Government Ethics to submit a report to Congress that contains the Director's recommendations on requiring certain government contractor employees to comply with restrictions relating to personal financial interests such as those that apply to federal employees.

The Senate amendment contained no similar provision.

The House recesses.

*Report to Congress required on delays in major phases of acquisition process for major automated information system programs*

The House bill contained a provision (sec. 842) that would require the Secretary of Defense to report to Congress if there is a delay in meeting any deadline for a phase of the acquisition process in the case of a major automated information system program.

The Senate amendment contained no similar provision.

The House recesses.

*Role of Chairman of Board in certain reporting processes*

The House bill contained a provision (sec. 1704) that would establish the role of the Chairman of the Defense Readiness Production Board in certain Department of Defense processes.

The Senate amendment contained no similar provision.

The House recesses.

*Special authority for use of working capital funds for critical readiness requirements*

The House bill contained a provision (sec. 1707) that would provide special authority for the Secretary of Defense to transfer funds from one working capital fund to another for the purpose of addressing critical readiness programs.

The Senate amendment contained no similar provision.

The House recesses.

## TITLE IX—DEPARTMENT OF DEFENSE ORGANIZATION AND MANAGEMENT

### ITEMS OF SPECIAL INTEREST

*Operationally responsive space*

The conferees continue to strongly support the concept of operationally responsive space (ORS) and note that the joint ORS program office was recently established with an Air Force director and

a deputy director that will rotate among the services or other federal agencies. There are many opportunities for work in the ORS office and the conferees believe that the Department of Defense (DOD) decision to categorize the potential work into three tiers is a good way to begin to establish priorities for the office. Tier 1 activities focus on utilizing existing assets in new ways; Tier 2 activities focus on payload and satellite bus work to support rapid replacement, reconstitution, and quick reaction capabilities that could be delivered in days to weeks. Tier 3 activities focus on the rapid development and deployment of capabilities that are capable of delivery within months to a year. Development of low-cost launch is embedded within these tiers.

The conferees urge the ORS office, working with the U.S. Strategic Command and the Joint Staff, to develop a balanced, integrated program that will include activities in all three tiers. The conferees are concerned that the balance at present may be too heavily focused in the direction of Tier 1. In the conference report accompanying the John Warner National Defense Authorization Act for Fiscal Year 2007 (Conf. Rpt. 109-702), the conferees directed the Secretary of Defense to establish the ORS office "to facilitate the development of low-cost, rapid reaction payloads, buses, space-lift, and launch control capabilities to fulfill joint military operational requirements for on-demand space support and reconstitution." Keeping in mind this guidance, the ORS office should work to find the right niche for small, low-cost satellites and launch vehicles that will deliver the most capability for the warfighter and focus activities in a few high pay-off areas.

#### *Space acquisition*

The conferees continue to be concerned about the high costs, the requirements process, and the priorities that have been established in the space acquisition process. In many instances capability decisions are made too quickly and on the basis of a specific technology rather than as a result of evaluating a range of technologies that could be used to provide a desired capability. Programs have been terminated early to free up funding for the next-generation satellite systems, and new programs have been started with immature technologies and without clear and feasible requirements. Programs often have overly aggressive schedules, insufficient funding, and inadequate personnel resources. When one or more of these elements are combined the result has been a national security space program plagued with schedule delays, technical difficulties, and cost overruns, many of which are quite large.

While the conferees share the desire of the Department of Defense (DOD) and the military services to provide the best space capabilities to the warfighter as quickly as possible, in many instances haste, inadequate planning, and overly optimistic assumptions have in fact delayed programs, and have made space system architectures fragile and vulnerable to capability gaps. On the other hand, the conferees recognize the challenge of designing, developing, and launching satellites.

In response to these programs the DOD, the Air Force, the intelligence community, and the Navy have recently taken steps to provide sufficient funding, focus on the requirements process, and

development of a sequential approach to improving capability. This back-to-basics approach is off to a good start, but more remains to be done to improve the acquisition of space systems.

The conferees believe the military and intelligence communities need to work together to identify opportunities for more joint programs that support both communities. In addition to the black-white space integration, the conferees stress the need for evolutionary acquisition strategies that leverage mature technology. The conferees support and urge the space community to carefully phase new programs and to manage scarce resources, including funding, people, and production capabilities.

#### LEGISLATIVE PROVISIONS ADOPTED

##### Subtitle A—Department of Defense Management

##### *Repeal of limitation on major Department of Defense headquarters activities personnel and related report (sec. 901)*

The House bill contained a provision (sec. 901) that would authorize the Secretary of Defense to waive the limitation in section 130a of title 10, United States Code, on the number of major Department of Defense headquarters activities personnel.

The Senate amendment contained a provision (sec. 901) that would repeal the limitation in section 130a.

The House recedes with an amendment that would require the Secretary of Defense to include information on military and civilian personnel assigned to major Department of Defense headquarters activities in the materials submitted to Congress by the Secretary of Defense in support of the budget request for each fiscal year.

##### *Flexibility to adjust the number of deputy chiefs and assistant chiefs (sec. 902)*

The House bill contained a provision (sec. 902) that would amend sections 3035(b), 5036(a), and 5037(a) of title 10, United States Code, to provide the service secretaries with greater flexibility to determine the number of Deputy Chiefs of Staff and Assistant Chiefs of Staff or, in the case of the Navy, Deputy Chiefs of Naval Operations and Assistant Chiefs of Naval Operations, not to exceed eight total positions for each service.

The Senate amendment contained a similar provision (sec. 906) that would provide this flexibility to the Secretary of the Army.

The Senate recedes.

##### *Change in eligibility requirements for appointment to Department of Defense leadership positions (sec. 903)*

The House bill contained a provision (sec. 903) that would amend sections 113, 132, and 134 of title 10, United States Code, to reduce from 10 years to 5 years the period of time following active duty military service before a commissioned officer of a regular component can be appointed as Secretary of Defense, Deputy Secretary of Defense, or Under Secretary of Defense for Policy.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would reduce from 10 years to 7 years the period of time following active duty

military service before a commissioned officer of a regular component could be appointed as Secretary of Defense, Deputy Secretary of Defense, or Under Secretary of Defense for Policy.

*Management of the Department of Defense (sec. 904)*

The House bill contained a provision (sec. 906) that would require the Secretary of Defense to adopt a management structure for the Department of Defense (DOD) and to assign duties for significant management issues to a senior official of a rank not lower than Under Secretary of Defense.

The Senate amendment contained a provision (sec. 902) that would: (1) designate the Deputy Secretary of Defense as the Chief Management Officer (CMO) of the Department; (2) establish a new position of Under Secretary of Defense for Management (Deputy Chief Management Officer); (3) designate the under secretaries of the military departments as the CMOs of those departments; and (4) assign specific duties to the CMOs of DOD and the military departments.

The House recedes with an amendment that would: (1) designate the Deputy Secretary of Defense as CMO of the Department; (2) establish a new position of Deputy Chief Management Officer of the Department of Defense; and (3) require the Secretary of Defense and the secretaries of the military departments to assign duties and authorities relating to the management of the business operations for DOD and the military departments.

The conferees note that their intent in establishing a Deputy CMO for DOD is to ensure that a senior official of the Department has formal responsibility, on a full-time basis, for assisting the CMO in accomplishing his or her duties in the development, approval, integration and oversight of policies, procedures, processes, and systems for the management of the Department. In the view of the conferees, the implementation of these policies, procedures, processes, and systems should be left to other officials and components of the Department.

This section codifies the position of Deputy CMO in title 10, United States Code, at a level on the Executive Schedule equivalent with the Under Secretaries of Defense for Policy, Personnel and Readiness, Comptroller, and Intelligence. However, the conferees do not intend for the Deputy CMO to have a staff or office structure of a size equivalent to that of an Under Secretary. Rather, the Deputy CMO's primary role should be to assist the CMO in planning and oversight of activities carried out by other offices. The conferees believe strongly that the Deputy CMO's office should not be of a size that could distract from that role.

*Revision in guidance relating to combatant command acquisition authority (sec. 905)*

The House bill contained a provision (sec. 907) that would modify existing law to eliminate the requirement that the acquisition programs of U.S. Special Operations Command support the acquisition priorities of the respective services. The House provision would also revise the consultation requirement between defense agencies and military departments.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would strike the revision in the consultation requirement contained in section 907(b).

*Department of Defense Board of Actuaries (sec. 906)*

The House bill contained a provision (sec. 908) that would consolidate the Department of Defense Retirement Board of Actuaries and the Department of Defense Education Benefits Board of Actuaries into the Department of Defense Board of Actuaries.

The Senate amendment contained a similar provision (sec. 904).

The House recedes.

*Modification of background requirement of individuals appointed as Under Secretary of Defense for Acquisition, Technology, and Logistics (sec. 907)*

The Senate amendment contained a provision (sec. 903) that would delete the requirement that a nominee for the position of Under Secretary of Defense for Acquisition, Technology, and Logistics have extensive management background “in the private sector.”

The House bill contained no similar provision.

The House recedes.

The conferees agree that management experience in the private sector can be an extremely valuable asset for an individual serving in the position of Under Secretary of Defense for Acquisition, Technology, and Logistics. However, the conferees conclude that other experience—including management experience in the public sector—may also be highly relevant to service in this position.

*Assistant secretaries of the military departments for acquisition matters; principal military deputies (sec. 908)*

The Senate amendment contained a provision (sec. 905) that would require the appointment of a three-star officer as the principal deputy to the service acquisition executive in each of the military departments. The provision would exclude the principal deputies from distribution limitations on flag and general officers.

The House bill contained no similar provision.

The House recedes with an amendment that would designate the three-star officers as principal military deputies, rather than principal deputies, to the service acquisition executives. The conferees recommend this change to preserve the option for the military departments to appoint principal civilian deputies to the service acquisition executives in addition to the principal military deputies.

The provision would not address the distribution limitations on flag and general officers. This issue is addressed by a provision elsewhere in the conference report that would amend section 525 of title 10, United States Code, to authorize an increase in the number of flag or general officers in each of the military services serving in a grade above rear admiral or major general.

*Sense of Congress on term of office of the Director of Operational Test and Evaluation (sec. 909)*

The Senate amendment contained a provision (sec. 907) that would express the sense of Congress that the term of office of the Director of Operational Test and Evaluation should be not less than five years.

The House bill contained no similar provision.

The House recedes.

Subtitle B—Space Activities

*Space Protection Strategy (sec. 911)*

The House bill contained a provision (sec. 911) that would set forth the policy of the United States with respect to the priority within the Nation's space programs on the protection of national security space systems. The provision would also require the Secretary of Defense to develop a Space Protection Strategy for four, 5-fiscal year periods beginning in fiscal year 2008, and continuing through fiscal year 2025. The first report on the strategy would be due March 15, 2008 with updated reports to be submitted biennially in every even-numbered year thereafter. The provision would also repeal section 911 of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109–163).

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would set forth the sense of Congress that the United States should place greater priority on the protection of national security space systems, direct that the strategy be developed in conjunction with the Director of National Intelligence (DNI), and change the due date of the first report on the strategy to no later than 6 months after the date of enactment of this Act. The report would also be prepared in conjunction with the DNI. In addition, the amendment would clarify the elements to be included in the strategy. The report on the strategy would be submitted to the congressional defense committees and the Committees on Intelligence in the Senate and the House of Representatives.

The conferees remain concerned about the growing threat to and vulnerability of our Nation's space capabilities, highlighted by the January 11, 2007 Chinese anti-satellite test and other counterspace developments. Key protection and space situational awareness (SSA) capabilities could mitigate such vulnerabilities but continue to be underfunded. Moreover, no clear strategy exists to guide SSA investments.

Furthermore, the conferees believe that better coordination of protection and SSA technology investments must occur and that the Defense Advanced Research Projects Agency should be consulted in the development of the strategy, to assist in the development of suitable protection technologies.

The committees with jurisdiction over the subject matter requested will work with the respective executive branch organizations to determine the proper recipients of all information requested by Congress. This determination will be made in accordance with House and Senate rules and with respect to proper protections of sources and methods.

*Biennial report on management of space cadre within the Department of Defense (sec. 912)*

The House bill contained a provision (sec. 912) that would require the Secretary of Defense and each secretary of a military department to develop and use metrics to identify, track, and manage space cadre personnel within the Department of Defense (DOD) and to ensure that there are enough people with the necessary expertise, training, and experience to meet current and future national security space needs. The provision would also require a detailed report and assessment on the management of the space cadre and DOD efforts to ensure that the space cadre is appropriate to meet current and future national security space needs.

The Senate amendment contained no similar provision.

The Senate recedes with a clarifying amendment.

The conferees note that many of the DOD and military service members of the space cadre serve, over the course of their careers, in a variety of space positions and in a variety of defense and intelligence agencies, such as the National Reconnaissance Office and other intelligence organizations with space-related responsibilities. The conferees believe that the report and assessment should also include the requirements of these entities and the ability of the space cadre to meet the current and future needs of these entities. Therefore, the conferees urge the Secretary to coordinate and consult with the Director of National Intelligence in the preparation of this report.

*Additional report on oversight of acquisition for defense space programs (sec. 913)*

The Senate amendment contained a provision (sec. 922) that would extend the due date for the report on the oversight of defense space acquisition programs required by section 911 of the Bob Stump National Defense Authorization Act for Fiscal Year 2003 (Public Law 107–314).

The House bill contained no similar provision.

The House recedes.

Subtitle C—Chemical Demilitarization Program

*Chemical demilitarization citizens advisory commissions (sec. 921)*

The House bill contained a provision (sec. 921) that would modify the termination requirements for the chemical demilitarization citizens advisory commissions to permit the commissions to remain in existence, at the discretion of the Governor of the respective State, until either the closure of that State's chemical agent destruction facility, or upon the request of the Governor, whichever comes first.

The Senate amendment contained a similar provision (sec. 1431).

The Senate recedes.

*Sense of Congress on completion of destruction of United States chemical weapons stockpile (sec. 922)*

The House bill contained a provision (sec. 922) that would express the sense of Congress that the Department of Defense should

continue to plan for on-site disposal of chemical stockpiles located at Pueblo Chemical Depot, Colorado, and Blue Grass Army Depot, Kentucky, and that the Department should ensure extensive consultation and notification processes between representatives of the Department and representatives of relevant States and local communities.

The Senate amendment contained a provision (sec. 1433) that would express the sense of Congress that the United States must remain committed to making every effort to safely destroy its chemical weapons stockpile by the Chemical Weapons Convention deadline of April 2012, or as soon thereafter as possible, and that the Secretary of Defense should make every effort to plan for and request adequate funding to complete such destruction in accordance with U.S. obligations under the Chemical Weapons Convention. The provision would also require biannual reports describing the status of chemical weapons destruction; the options and funding required for accelerating such destruction; and the actions being taken to accelerate such destruction.

The Senate amendment also contained a provision (sec. 2406) that would, among other things, require the completion of the destruction of the U.S. chemical weapons stockpile by no later than December 31, 2017, and would require biannual reports on progress to implement this destruction deadline.

The House recedes with an amendment that would add several findings and would add two elements to the required reports: a description of the options and funding required to complete chemical stockpile destruction by December 2017; and a life cycle cost estimate for each facility included in the descriptions of accelerated funding options.

*Repeal of certain qualifications requirement for director of chemical demilitarization management organization (sec. 923)*

The Senate amendment contained a provision (sec. 1432) that would repeal the requirement that the Army's Director of the Chemical Materials Agency must be trained in chemical warfare defense operations.

The House bill contained no similar provision.

The House recedes.

*Modification of termination of assistance to State and local governments after completion of the destruction of the United States chemical weapons stockpile (sec. 924)*

The Senate amendment contained a provision (sec. 1434) that would permit the Chemical Stockpile Emergency Preparedness Program to provide assistance to State and local governments until existing grants or cooperative agreements are completed, but not beyond 6 months after the date of completion of the destruction of lethal chemical agents and munitions at each chemical demilitarization installation or facility.

The House bill contained no similar provision.

The House recedes.

#### Subtitle D—Intelligence-Related Matters

*Technical amendments to title 10, United States Code, arising from enactment of the Intelligence Reform and Terrorism Prevention Act of 2004 (sec. 931)*

The House bill contained a provision (sec. 932) that would make technical corrections to title 10, United States Code, to reflect enactment of the Intelligence Reform and Terrorism Prevention Act of 2004.

The Senate amendment contained a similar provision (sec. 1068).

The Senate recedes.

#### Subtitle E—Roles and Missions Analysis

*Requirement for quadrennial roles and missions review (sec. 941)*

The House bill contained provisions (secs. 941–943) that would require the Secretary of Defense to conduct a quadrennial roles and missions review, to identify core competencies of the military departments and other entities within the Department of Defense, and to review the capabilities that such departments and entities are performing or developing.

The Senate amendment contained no similar provisions.

The Senate recedes with an amendment that would consolidate these provisions into a single section. This provision would require the Secretary to conduct a quadrennial roles and missions review after receiving an independent military assessment of roles and missions from the Chairman of the Joint Chiefs of Staff.

*Joint Requirements Oversight Council additional duties relating to core mission areas (sec. 942)*

The House bill contained a provision (sec. 944) that would amend section 181 of title 10, United States Code, to revise the mission of the Joint Requirements Oversight Council (JROC) and address the participation of senior civilian leaders of the Department of Defense in JROC proceedings.

The Senate amendment contained a provision (sec. 841) that would address the issue of participation by senior civilian leaders in JROC proceedings.

The Senate recedes with an amendment that would combine the requirements of the two provisions.

*Requirement for certification of major systems prior to technology development (sec. 943)*

The House bill contained a provision (sec. 945) that would require the Joint Requirements Oversight Council (JROC) to make certain certifications before the start of technology development for a major system.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment requiring that the Milestone Decision Authority for a major defense acquisition program (MDAP) make the required certifications, after consultation with the JROC, before the program may receive Milestone A approval. The provision would also direct the Secretary of Defense to

ensure that the Department of Defense does not commence a technology development program for a major weapon system without Milestone A approval.

*Presentation of future-years mission budget by core mission area (sec. 944)*

The House bill contained a provision (sec. 946) that would amend section 222 of title 10, United States Code, to require that the future-years mission budget of the Department of Defense be organized by core mission area.

The Senate amendment contained no similar provision.

The Senate recedes.

Subtitle F—Other Matters

*Department of Defense consideration of effect of climate change on department facilities, capabilities, and missions (sec. 951)*

The House bill contained a provision (sec. 951) that would require that the first national security strategy, national defense strategy, and quadrennial defense review prepared after the date of the enactment of this Act include consideration of the effect of climate change on Department of Defense facilities, capabilities, and missions.

The Senate amendment contained a similar provision (sec. 931).

The Senate recedes with an amendment that would clarify the conferees' expectation that this aspect of the national security strategy and the national defense strategy, like other aspects of those strategies, will be implemented in a manner that is consistent with the national security interests of the United States.

*Interagency policy coordination (sec. 952)*

The House bill contained a provision (sec. 952) that would require the Secretary of Defense to develop and submit, not later than 180 days after the date of enactment of this Act, a plan to Congress to improve and reform the interagency coordination process on national security issues.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would clarify that the plan required would be to improve the Department of Defense's participation and contribution to the interagency coordination process on national security issues.

The conferees urge the President to require other relevant agencies and departments to establish similar plans to improve the overall interagency process for national security, and to ensure that the Department of Defense, simply by virtue of having a plan, does not become the de facto dominant organization in the interagency coordination process.

*Expansion of employment creditable under service agreements under National Security Education Program (sec. 953)*

The House bill contained a provision (sec. 953) that would modify the David L. Boren National Security Education Act of 1991 (50 U.S.C. 1902) to allow a recipient of support under that Act to

repay that service by working in an educational area related to the discipline for which the support was provided. Such educational service would only be permitted if the Secretary of Defense were to determine that no position is available in departments, agencies, or offices covered by Act.

The Senate amendment contained no similar provision.

The Senate recedes.

*Board of Regents for the Uniformed Services University of the Health Sciences (sec. 954)*

The Senate amendment contained a provision (sec. 932) that would amend chapter 104 of title 10, United States Code, to authorize the Secretary of Defense to appoint the members of the Board of Regents for the Uniformed Services University of the Health Sciences (USUHS) without a requirement for the advice and consent of the Senate, and would redesignate the Dean of USUHS as the President of USUHS.

The House bill contained no similar provision.

The House recedes with a clarifying amendment that would require the Board to meet at least once a quarter.

The conferees believe that this provision should not alter the well-established role of the Board of Regents under its charter to assist the Secretary of Defense in an advisory capacity in carrying out the Secretary's responsibility to conduct the business of USUHS and to provide advice and recommendations to the Secretary of Defense on academic and administrative matters critical to the full accreditation and successful operation of the USUHS. The conferees value the contributions and voluntary service of the members of the Board and believe that the Board can best perform its functions in coordination with the President of USUHS and the Assistant Secretary of Defense for Health Affairs.

*Establishment of Department of Defense School of Nursing (sec. 955)*

The Senate amendment contained a provision (sec. 556) that would authorize the Secretary of Defense to create several programs to address a national shortage of nursing instructors at accredited nursing schools and aid in the recruiting and retention of military nurses. The programs could include: (1) authorizing active duty military nurse officers with a graduate degree in nursing or a related field to serve as full-time faculty at an accredited civilian school of nursing in exchange for a commitment to additional service in the armed forces; (2) authorizing active duty military nurse officers with a graduate degree in nursing or a related field to serve as full-time faculty at an accredited civilian school of nursing in exchange for scholarships provided by the nursing school to military nurse officer candidates; (3) providing scholarships to retirement-eligible active duty military nurse corps officers who agree to serve not less than 2 years as a full-time faculty member of an accredited civilian school of nursing; (4) providing career placement assistance, continuing education, and stipends to retirement-eligible active duty military nurse corps officers with a doctoral or master degree in nursing or a related field who agree, in return, to serve as a full-time faculty member of an accredited school of nurs-

ing; and (5) supplemental salary payments to a retired military nurse corps officer serving as a full-time faculty member of a civilian accredited school of nursing to compensate for any difference between base pay to which the retired officer was entitled immediately before retirement and the sum of the officer's retired pay and the salary received from the nursing school.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary to develop a detailed plan to establish a Department of Defense School of Nursing within the Uniformed Services University of Health Sciences (USUHS). The amendment would also authorize the Secretary to establish a school of nursing within USUHS that could lead to the award of a bachelor of science or graduate degree in nursing. The conferees note the shortage of nurses in the military, and encourage the Department to establish a Department of Defense school of nursing as soon as practicable.

The conferees direct the Secretary to conduct a study to determine whether a program to provide incentives to retired military nurse corps officers to serve as faculty at civilian nursing schools, sometimes referred to as "Retired Troops to Nurse Teachers," could help to alleviate the current and projected nursing shortage in the military services. The conferees believe that an essential part of any such program should ensure that the Department would receive a tangible benefit in exchange for partially funding the program. The study should include the following elements: (1) the number of retired military nurse corps officers who have at least 20 years of active federal commissioned service who would be eligible to participate in such a program; (2) whether colleges or universities at which retired military nurse instructors would serve would award and fund at least two full scholarships per academic year to military nurse corps candidates in return for a commitment to serve in the armed forces as a military nurse corps officer; (3) for each nursing student awarded such a scholarship that fails to access into the armed forces as a military nurse, the recourse that would be available to the Department; (4) whether the retired military nurse corps officer instructor should be paid by the college or university at a comparable rate, as determined by the Secretary, to other faculty at the school based upon their skills, experience, and certification(s); (5) when the sum of the comparable salary offered to the retired military nurse corps officer instructor and the instructor's retired pay is less than the amount that the member's base pay (based on grade and time in service) would be if the member was still on active duty, should the Secretary reimburse the retired military nurse corps officer for any difference; and (6) any other relevant factors, as determined by the Secretary. The Secretary should submit a report on the findings and recommendations of this study to the Committees on Armed Services of the Senate and the House of Representatives by March 1, 2008.

*Inclusion of commanders of Western Hemisphere combatant commands in Board of Visitors of Western Hemisphere Institute for Security Cooperation (sec. 956)*

The Senate amendment contained a provision (sec. 935) that would authorize all combatant commanders, or their directed des-

igneers, who have responsibility in the Western Hemisphere to be members of the Western Hemisphere Institute for Security Cooperation Board of Visitors.

The House bill contained no similar provision.

The House recesses.

*Comptroller General assessment of reorganization of the office of the Under Secretary of Defense for Policy (sec. 957)*

The Senate amendment contained a provision (sec. 936) that would require the Comptroller General to submit to the congressional defense committees, not later than March 1, 2008, a report assessing the most recent reorganization of the office of the Under Secretary of Defense for Policy (USDP).

The House bill contained no similar provision.

The House recesses with a clarifying amendment that, among other things, would require the report to be submitted by June 1, 2008.

The conferees note the concerns expressed in the report accompanying the Senate amendment (S. Rpt. 110–77). While the conferees understand that the office of the USDP plans on evaluating the reorganization in terms of stakeholder input, internal assessment, and performance metrics in February 2008, they also note that they have been made aware of other concerns, which that review may not address, including: (1) the possible absence of a dissent channel within the Department of Defense (DOD) and, in particular, the USDP's office that personnel may use to present alternative views, analyses, and policy recommendations at variance with those in place or being submitted to senior leadership for consideration; (2) the impact of the process, as conducted in November 2006 and implemented in early 2007, whereby career civil servants "bid" on positions within the USDP's office on overall levels of personnel morale, expertise, and effectiveness. Of specific concern are those positions that deal with policy towards Iraq, Afghanistan, Pakistan, and other regional and functional areas critical to national security; and (3) the fact that foreign affairs specialists (i.e., GS–130 series) from those field agencies and offices associated with the office of the USDP—i.e., the Defense Security Cooperation Agency, the Defense Technology Security Administration, and the Defense Prisoner of War/Missing Personnel Office—were not included in the personnel assignment bidding system, even though they are eligible to apply for vacancies in the office of the USDP. The conferees recommend that the Comptroller General also assess the impact of these issues on the overall effectiveness and efficiency of the office of the USDP.

*Reports on foreign language proficiency (sec. 958)*

The House bill contained a provision (sec. 931) that would require the Secretary of Defense and the secretaries of the military departments to submit annual reports on the foreign language proficiencies of the military departments and the Department of Defense.

The Senate amendment contained no similar provision.

The Senate recesses with a clarifying amendment that, among other things, terminates the reporting requirement on December 31, 2013.

#### LEGISLATIVE PROVISIONS NOT ADOPTED

##### *Future capability planning by Joint Requirements Oversight Council*

The House bill contained a provision (sec. 947) that would require that each operational and contingency plan of the Department of Defense include an extended planning annex assessing capabilities required to perform the planned missions.

The Senate amendment contained no similar provision.

The House recesses.

The issue of whether, and how, the combatant commands should participate in long-term planning for future capabilities is addressed in a separate provision.

##### *Redesignation of the Department of the Navy as the Department of the Navy and Marine Corps*

The House bill contained a provision (sec. 905) that would redesignate the Department of the Navy as the Department of the Navy and Marine Corps and the position of the Secretary of the Navy as the Secretary of the Navy and Marine Corps.

The Senate amendment contained no similar provision.

The House recesses.

##### *Revisions in functions and activities of special operations*

The House bill contained a provision (sec. 904) that would amend section 167(a) of title 10, United States Code, to modify the authorities governing U.S. Special Operations Command (SOCOM) to accurately reflect current mission requirements.

The Senate amendment contained no similar provision.

The House recesses.

The conferees will work with the Department of Defense and SOCOM to ensure that title 10 continues to accurately reflect the missions of SOCOM and the activities of special operations forces. In addition, the conferees remain concerned about the evolving requirements associated with the concepts of irregular and unconventional warfare, especially as they pertain to the Department's personnel management programs. The conferees support the concerns raised in House Report 110-146 calling for a full spectrum analysis on irregular warfare. The conferees direct the Secretary of Defense to initiate the requirements of this study and deliver the results to the congressional defense committees by June 1, 2008.

##### *Space posture review*

The Senate amendment contained a provision (sec. 921) that would direct the Secretary of Defense and the Director of National Intelligence to conduct a comprehensive review of the space posture of the United States.

The House bill contained no similar provision.

The Senate recesses.

The conferees note that the space posture review previously required was submitted.

*United States Military Cancer Institute*

The Senate amendment contained a provision (sec. 933) that would require the Secretary of Defense to establish a United States Military Cancer Institute in the Uniformed Services University of the Health Sciences.

The House bill contained no similar provision.

The Senate recesses.

*Western Hemisphere Center for Excellence in Human Rights*

The Senate amendment contained a provision (sec. 934) that would authorize the Secretary of Defense to establish a Western Hemisphere Human Rights Center to continue and expand the work that began under U.S. Southern Command's Human Rights Initiative.

The House bill contained no similar provision.

The Senate recesses.

The conferees support the U.S. Southern Command's activities on behalf of human rights in the Western Hemisphere. However, rather than authorize the creation of a new institution, the conferees prefer that the Southern Command work out an arrangement, with the Center for Hemispheric Defense Studies, which would provide for gifts and donations to be directed from the regional center to the human rights activities of Southern Command through the gift and donation authority that Congress has already provided to the regional centers.

## TITLE X—GENERAL PROVISIONS

### ITEMS OF SPECIAL INTEREST

*Ship disposal*

The Senate report (S. Rept. 110–77) accompanying the National Defense Authorization Act for Fiscal Year 2008 (S. 1547) contained direction for the Navy to maintain decommissioned LHA–1 class amphibious assault ships in a reduced operating status until such time that the active fleet could deliver 2.0 Marine Expeditionary Brigade forcible entry lift capability in response to a national emergency. Total forcible lift entry capability was to be assessed under the assumption that no less than 10 percent of the force will be unavailable due to extended duration maintenance availabilities.

The conferees agree with the intent of this provision. The conferees understand that the Navy's preferred method of meeting this intent would be to retain decommissioned LHA–1 class amphibious assault ships in a mobilization category B status.

The conferees agree to direct the Navy to: (1) maintain these ships in mobilization category B status until such time that the active fleet could deliver 2.0 Marine Expeditionary Brigade forcible entry lift capability in response to a national emergency; and (2) assess total forcible lift entry capability under the assumption that

no less than 10 percent of the force will be unavailable due to extended duration maintenance availabilities.

*Table of congressionally directed spending and related items*

In accordance with the requirements of Rule XLIV of the Standing Rules of the Senate and Rules XXI and XXIII of the Rules of the House of Representatives, this joint statement of managers includes a table listing congressionally-directed spending items, congressional earmarks, limited tax benefits, or limited tariff benefits requested by Senators and Members, regardless whether the expenditure is directed to a particular entity or targeted to a specific State, locality, or congressional district. By including this table in the statement of managers, the conferees do not take the position that all of the items meet the definitions of an earmark or a congressionally-directed spending item in the Rules of the Senate or the House of Representatives.

The conferees direct the Department of Defense to use all applicable competitive, merit-based procedures in the awarding of any new contract, grant, or other agreement which is entered into with funds that are authorized to be appropriated by this conference report and statement of managers. No provision in the conference report or statement of managers shall be construed to direct funds to any particular location or entity unless the provision expressly so provides.

Subtitle A—Financial Matters

*General transfer authority (sec. 1001)*

The House bill contained a provision (sec. 1001) that would provide for the transfer of up to \$4.5 billion of funds authorized in Division A of this Act to unforeseen higher priority needs in accordance with normal reprogramming procedures.

The Senate amendment contained a similar provision (sec. 1001) that would provide for the transfer of up to \$5.0 billion in authorizations and would exempt transfers of funds between military personnel authorizations from the dollar limitation in this provision.

The House recedes.

*United States contribution to NATO common-funded budgets in fiscal year 2008 (sec. 1002)*

The House bill contained a provision (sec. 1002) that would authorize the U.S. contribution to North Atlantic Treaty Organization (NATO) common-funded budgets for fiscal year 2008, including the use of unexpended balances.

The Senate amendment contained an identical provision (sec. 1004).

The conference agreement includes this provision.

The conferees note that this provision is necessary because the resolution of ratification for the Protocol to the North Atlantic Treaty of 1949 on the Accession of Poland, Hungary, and the Czech Republic contained a provision (section 3(2)(c)(ii)) requiring a specific authorization for U.S. payments to the common-funded budg-

ets of NATO for each fiscal year, beginning in fiscal year 1999, that payments exceed the fiscal year 1998 total.

*Authorization of additional emergency supplemental appropriations for fiscal year 2007 (sec. 1003)*

The Senate amendment contained a provision (sec. 1002) that would authorize the additional supplemental appropriations for operations in Iraq and Afghanistan, and for other purposes, for fiscal year 2007 that were enacted in Public Law 110–28.

The House bill contained no similar provision.

The House recedes.

*Modification of fiscal year 2007 general transfer authority (sec. 1004)*

The Senate amendment contained a provision (sec. 1003) that would modify the transfer authority provided in section 1001 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109–364) by exempting the transfer of funds previously approved by the committees in two reprogramming actions from the dollar limitation in that provision.

The House bill contained no similar provision.

The House recedes.

*Financial management transformation initiative for the Defense Agencies (sec. 1005)*

The Senate amendment contained a provision (sec. 1005) that would require the Director of the Business Transformation Agency of the Department of Defense to carry out an initiative for financial management transformation in the Defense Agencies.

The House bill contained no similar provision.

The House recedes with an amendment that would: (1) require the Director to consult with the Comptroller of the Department of Defense to ensure that the initiative is carried out in a manner that is consistent with the financial standards and requirements of the Department of Defense; and (2) provide greater specificity on the requirements for the plan on development and implementation of the initiative.

*Repeal of requirement for two-year budget cycle for the Department of Defense (sec. 1006)*

The Senate amendment contained a provision (sec. 1006) that would repeal the requirement enacted in the National Defense Authorization Act for Fiscal Year 1986 (Public Law 99–145) for the Department of Defense to submit a biennial budget as part of the President's budget request for even-numbered fiscal years.

The House bill contained no similar provision.

The House recedes.

Subtitle B—Policy Relating to Vessels and Shipyards

*Limitation on leasing of vessels (sec. 1011)*

The House bill contained a provision (sec. 1011) that would prohibit the secretary of a military department from entering into a contract for lease or charter of a vessel for a term of more than

24 months. This would include all options to renew or extend the contract, if the hull or superstructure of that vessel was constructed in a foreign shipyard.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the secretary of a military department to notify the congressional defense committees 30 days prior to making a contract for lease of a vessel, or for the provision of a service through use by a contractor of a vessel, if the term of the lease is for a period of greater than 2 years. The secretary's notification is to include a description of the terms of the lease, a justification for leasing rather than purchasing a vessel for such service, a determination that the lease contract provides the most cost-effective means for obtaining such service, and a plan for meeting the requirements provided by the leased vessel upon completion of the term of the lease.

*Policy relating to major combatant vessels of the strike forces of the United States Navy (sec. 1012)*

The House bill contained a provision (sec. 1012) that would require that all new ship classes of submarines, aircraft carriers and cruisers and large escorts for carrier strike groups, expeditionary strike groups, and vessels comprising a sea base have integrated nuclear power systems. The provision would allow a single exception to the requirement: if the Secretary of Defense were to submit, with the budget request for such a vessel, a notification that the inclusion of an integrated nuclear power system is not in the national interest.

The Senate amendment contained no similar provision.

The Senate recedes.

The Navy's next opportunity to apply this guidance will be the next generation cruiser, or "CG(X)". Under the current future-years defense program (FYDP), the Navy plans to award the construction contract for CG(X) in fiscal year 2011. Under this provision, the next cruiser would be identified as "CGN(X)" to designate the ship as nuclear powered. Under the Navy's normal shipbuilding schedule for the two programs that already have nuclear power systems (aircraft carriers and submarines), the Navy seeks authorization and appropriations for long lead time nuclear components for ships 2 years prior to full authorization and appropriation for construction.

The conferees recognize that the milestone decision for the Navy's CG(X) is only months away. After that milestone decision, the Navy and its contractors will begin a significant design effort, and, in that process, will be making significant tradeoff decisions and discarding major options (such as propulsion alternatives). This is the normal process for the Navy and the Department of Defense (DOD) to make choices that will lead to producing a contract design that will be the basis for awarding the construction contract for the lead ship in 2011.

In order for the Navy to live by the spirit of this guidance, the conferees agree that:

(1) the Navy would be required to proceed through the contract design phase of the program with a comprehensive effort to design a CGN(X) independent of the outcome of decisions that the Navy

or the DOD will make at the next milestone decision point regarding any preferred propulsion system for the next generation cruiser;

(2) if the Navy intends to maintain the schedule in the current FYDP and award a vessel in fiscal year 2011, the Navy would need to request advance procurement for nuclear components in the fiscal year 2009 budget request; and

(3) the Navy must consider options for:

(a) maintaining the segment of the industrial base that currently produces the conventionally powered destroyer and amphibious forces of the Navy;

(b) certifying yards which comprise that segment of the industrial base to build nuclear-powered vessels; or

(c) seeking other alternatives for building non-nuclear ships in the future if the Navy is only building nuclear-powered surface combatant ships for some period of time as it builds CGN(X) vessels; and

(d) identifying sources of funds to pay for the additional near-term costs of the integrated nuclear power system, either from offsets within the Navy's budget, from elsewhere within the Department's resources, or from gaining additional funds for DOD overall.

The conferees recognize that these considerations will require significant additional near-term investment by the Navy. Some in the Navy have asserted that, despite such added investment, the Navy would not be ready to award a shipbuilding contract for a CGN(X) in fiscal year 2011 as in the current FYDP.

Section 128 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109-364) required that the Navy include nuclear power in its Analysis of Alternatives (AOA) for the CG(X) propulsion system. The conferees are aware that the CG(X) AOA is nearing completion, in which case the Navy should have some indications of what it will require to design and construct a CGN(X) class.

Accordingly, the conferees direct the Secretary of the Navy to submit a report to the congressional defense committees with the budget request for fiscal year 2009 providing the following information:

(1) the set of next generation cruiser characteristics, such as displacement and manning, which would be affected by the requirement for including an integrated nuclear power system;

(2) the Navy's estimate for additional costs to develop, design, and construct a CGN(X) to fill the requirement for the next generation cruiser, and the optimal phasing of those costs in order to deliver CGN(X) most affordably;

(3) the Navy's assessment of any effects on the delivery schedule for the first ship of the next generation cruiser class that would be associated with shifting the design to incorporate an integrated nuclear propulsion system, options for reducing or eliminating those schedule effects, and alternatives for meeting next generation cruiser requirements during any intervening period if the cruiser's full operational capability were delayed;

(4) the Navy's estimate for the cost associated with certifying those shipyards that currently produce conventionally

powered surface combatants, to be capable of constructing and integrating a nuclear-powered combatant;

(5) any other potential effects on the Navy's 30-year ship-building plan as a result of implementing these factors;

(6) such other considerations that would need to be addressed in parallel with design and construction of a CGN(X) class, including any unique test and training facilities, facilities and infrastructure requirements for potential CGN(X) homeports, and environmental assessments that may require long-term coordination and planning; and

(7) an assessment of the highest risk areas associated with meeting this requirement, and the Navy's alternatives for mitigating such risk.

#### Subtitle C—Counter-Drug Activities

##### *Extension of authority for joint task forces to provide support to law enforcement agencies conducting counter-terrorism activities (sec. 1021)*

The House bill contained a provision (sec. 1021) that would amend section 1022(b) of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108–136) to extend the authority for joint task forces to provide support to law enforcement agencies conducting counterterrorism activities through fiscal year 2008.

The Senate amendment contained no similar provision.

The Senate recesses.

The conferees support the use of counternarcotics funds to concurrently conduct counterterrorist and counternarcotics activities, but urge the Department of Defense to be mindful of the original intent of the Counternarcotics Central Transfer Account, and to ensure that adequate resources continue to be available for counternarcotics activities where there is no nexus with counterterrorism. The conferees will closely scrutinize the use of this authority over the next fiscal year to determine whether it should be extended in future years.

##### *Expansion of authority to provide additional support for counterdrug activities in certain foreign countries (sec. 1022)*

The House bill contained a provision (sec. 1022) that would expand additional counterdrug support to the Government of Mexico and the Government of the Dominican Republic.

The Senate amendment contained a similar provision.

The Senate recesses with a technical amendment.

##### *Report on counternarcotics assistance for the Government of Haiti (sec. 1023)*

The Senate amendment contained a provision (sec. 1012) that would require the President to submit to Congress a report on counternarcotics assistance to the Government of Haiti.

The House bill contained no similar provision.

The House recesses with a clarifying amendment.

Subtitle D—Miscellaneous Authorities and Limitations

*Provision of Air Force support and services to foreign military and state aircraft (sec. 1031)*

The Senate amendment contained a provision (sec. 1028) that would provide permanent authority for the Secretary of the Air Force to furnish supplies and services to foreign military and other state aircraft.

The House bill contained no similar provision.

The House recedes with a clarifying amendment.

*Department of Defense participation in Strategic Airlift Capability Partnership (sec. 1032)*

The Senate amendment contained a provision (sec. 1029) that would permit the Secretary of Defense to enter into a multilateral memorandum of understanding authorizing the Strategic Airlift Capability Partnership for the purpose of acquiring, operating, and supporting strategic airlift aircraft. The provision would also provide the Secretary of Defense the authority to transfer one strategic airlift aircraft to the Strategic Airlift Capability Partnership.

The House bill contained no similar provision.

The House recedes with a technical amendment.

The conferees provide this authority with the expectation that in allocating use of this shared strategic airlift capability, the Partnership will give priority to airlift support for North Atlantic Treaty Organization (NATO) missions.

The conferees are concerned that they do not have sufficient visibility into the Department of Defense's plans for seeking these kinds of authorities in the future. If the Department is considering other similar multilateral arrangements for the acquisition or operation of aircraft under mutually beneficial relationships with foreign partners, the Department should consider, in consultation with Congress, whether it would be appropriate to develop an overarching legal structure for multilateral procurement and operations and how best to ensure appropriate transparency and congressional oversight.

*Improved authority to provide rewards for assistance in combating terrorism (sec. 1033)*

The House bill contained a provision (sec. 1043) that would amend section 127b of title 10, United States Code, to increase the size of payments allowed under the Department of Defense's combating terrorism rewards program and provide new authority for U.S. Government personnel to provide rewards through government personnel of coalition or partnered nations.

The Senate amendment contained a similar provision (sec. 1021).

The Senate recedes with an amendment that would: (1) permit the expansion of the authority to cover information provided to allied forces; and, (2) grant the authority for 2 years.

*Support for non-federal development and testing of material for chemical agent defense (sec. 1034)*

The House bill contained a provision (sec. 1045) that would authorize the Secretary of Defense, in coordination with the heads of other elements of the Federal Government, to provide small quantities of toxic chemicals or their precursors to a State or local government, or a private entity incorporated in the United States, for development or testing of material designed to be used for defensive purposes. The provision would require that any such transfer must be consistent with the provisions of the Chemical Weapons Convention, and subject to any terms and conditions required by the Secretary.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary to provide Congress with an annual report describing each use of the authority, including a description of what material was made available and to whom it was made available.

*Prohibition on sale of F-14 fighter aircraft and related parts (sec. 1035)*

The House bill contained a provision (sec. 1049) that would prohibit the Department of Defense from selling F-14 parts to any entity other than a museum or similar organization in the United States acquiring the parts to preserve aircraft for historical purposes. The provision would also prohibit the granting of an export license for any F-14 part.

The Senate amendment contained a similar provision (sec. 1031).

The House recedes with an amendment that would clarify that this provision applies to F-14 aircraft, parts unique to the F-14 aircraft, and tooling or dies used in the manufacture of F-14s or F-14-unique parts.

The conferees encourage the Department of Defense to consider destroying F-14s, F-14-unique parts, and the tooling and dies used in the manufacture of F-14s, except as noted in the legislative provision. Any contract for destruction should require the reduction of these items into scrap pieces, thereby rendering the parts and materials useless for the originally intended purpose and incapable of being duplicated, copied, or reverse engineered. If the Department chooses to destroy these items, the Department could then sell the resultant scrap as appropriate.

#### Subtitle E—Reports

*Extension and modification of report relating to hardened and deeply buried targets (sec. 1041)*

The House bill contained a provision (sec. 1031) that would extend the reporting requirement on weapons for hardened and deeply buried targets until 2013, change the nature of the report from an annual report to a biennial report, and modify the scope of the report to cover capabilities to defeat hardened and deeply buried targets rather than just weapons. In addition, the provision would direct that each report cover activities for 4 fiscal years rather than 1 fiscal year.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would retain the requirement to focus on weapons in the report.

*Report on joint modeling and simulation activities (sec. 1042)*

The House bill contained a provision (sec. 1033) that would require a report on a national joint modeling and simulation (M&S) development strategy.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would modify the reporting requirements and submission date. The conferees agree to require a report that would include a description of ongoing and planned joint M&S activities and a description of how they support defense missions, strategies, and goals; a description of the M&S capabilities of defense organizations and how they will be modernized or divested over time as appropriate; a description of how non-defense organizations can utilize joint M&S capabilities; budget and resource estimates for the M&S capabilities; and a description of coordination activities between the Department of Defense's M&S activities and other federal, non-federal, and private sector M&S activities.

Further, the conferees note the promise of M&S to enhance urban operations capabilities. The conferees believe that it is important for the Department to study and understand the effect of warfare and natural disasters on urban environments and to develop M&S capabilities to support consequence management missions in complex urban environments.

*Renewal of submittal of plans for prompt global strike capability (sec. 1043)*

The Senate amendment contained a provision (sec. 1041) that would amend section 1032(b) of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108–136) to extend the due dates for the annual report on prompt global strike capability through 2009.

The House bill contained no similar provision.

The House recesses.

The conferees note that the report required by section 1032 is a broad report covering both global and long-range strike plans as well as prompt global strike.

*Report on workforce required to support the nuclear missions of the Navy and the Department of Energy (sec. 1044)*

The Senate amendment contained a provision (sec. 1045) that would require the Secretary of Defense and the Secretary of Energy to each submit to Congress a report on the requirements for a workforce to support the nuclear missions of the Navy and the Department of Energy for a 10-year period beginning on the date of the report. The report would be due 1 year from the date of enactment of this Act.

The House bill contained no similar provision.

The House recesses with a clarifying amendment.

*Comptroller General report on Defense Finance and Accounting Service response to Butterbaugh v. Department of Justice (sec. 1045)*

The Senate amendment contained a provision (sec. 1046) that would require the Comptroller General of the United States to submit a report to the congressional defense committees assessing the response of the Defense Finance and Accounting Service to the 2003 decision in the case of *Butterbaugh v. Department of Justice*, 336 F.3d 1332 (Fed. Cir. 2003).

The House bill contained no similar amendment.  
The House recedes.

*Study on size and mix of airlift force (sec. 1046)*

The Senate amendment contained a provision (sec. 1049) that would require the Secretary of Defense to conduct a study on the size and mix of various assets for the Air Force intertheater airlift force, with a particular focus on current and planned capabilities and costs of the C-5 aircraft and the C-17 aircraft fleets.

The House bill contained no similar provision.

The House recedes with an amendment that would broaden the review to cover a review of alternatives on the size and mix of intertheater and intratheater airlift assets to meet the national military strategy. The provision would require that the study also evaluate the contribution of both organic and commercial assets, the latter coming primarily from the Civil Reserve Airlift Fleet.

Within the analysis of the optimal mix of the C-5 and C-17 aircraft for the strategic airlift, the conferees expect that the report will:

(1) Provide a thorough review of an internal Air Force briefing that posited a retirement of 30 C-5A aircraft, and a purchase of 30 more C-17 aircraft, sometimes called the "30/30 Plan."

(2) Include a full range of options for making C-5 upgrades and buying additional C-17 aircraft to include doing both (upgrading all C-5s and purchasing more C-17s) and doing neither (upgrading none of the C-5s and buying no more C-17s).

*Report on feasibility of establishing a domestic military aviation national training center (sec. 1047)*

The Senate amendment contained a provision (sec. 1096) that would require the Secretary of Defense to submit to the congressional defense committees a report to determine the feasibility of establishing a Border State Aviation Training Center to support the current and future requirements of the existing RC-26 training site for counterdrug activities located at the Fixed Wing Army National Guard Aviation Training Site.

The House bill contained no similar provision.

The House recedes with a clarifying amendment that would require the Secretary of Defense to assess the training requirements associated with a multitude of Guard and reserve missions.

*Limited field user evaluations for combat helmet pad suspension systems (sec. 1048)*

The House bill contained a provision (sec. 234) that would require the Secretary of Defense to carry out a test and evaluation

of combat helmet pad suspension systems that meet current military specifications by a certified and qualified independent laboratory as well as an operational user assessment of the qualified pad suspension systems that would consider key parameters of form, fit, function, cost, schedule, performance, and vendor production capacity.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would authorize the use of funds from the Operation and Maintenance, Army appropriation and would change the required test to a limited field user evaluation that compares form, fit, and function among the several pad suspension systems that are already qualified as part of combat helmet procurement for the military services.

The conferees note that the Army and Marine Corps have recently increased the technical performance standards of the combat helmet system to improve protection against blunt trauma and non-ballistic impacts in order to further reduce risk of traumatic brain injury. Pad suspension systems are a critical feature of the combat helmet related to this protection. The conferees also note anecdotal evidence that pad suspension systems vary with respect to comfort and function while worn that could influence service members' wearing habits. A limited field user evaluation would provide the Army and Marine Corps with valuable feedback on the different pad systems' relative advantages and disadvantages beyond their technical performance specifications and capability.

*Study on national security interagency system (sec. 1049)*

The House bill contained a provision (sec. 954) that would authorize the Secretary of Defense to enter into an agreement with an independent, nonpartisan, nonprofit organization to conduct a study on the national security interagency system.

The Senate amendment contained a similar provision (sec. 1043) that would require the Secretary to enter into an agreement for such a study.

The House recedes with an amendment that would require the Secretary of Defense to enter into an agreement for the study within 30 days of enactment of this Act, eliminate the requirement that the organization conducting the study secure matching funds from private sources, and set a reporting deadline of September 1, 2008.

The conferees believe that the interagency coordination and integration of the United States Government for the training for, planning of, support for, and execution of overseas post-conflict contingency relief and reconstruction operations requires reform and that recent operations, most notably in Iraq, lacked the necessary consistent and effective interagency coordination and integration in planning and execution. As a result, the conferees note that the study conducted under the authority of this section should include, but not be limited to, the following elements: a synthesis of past studies evaluating the successes and failures of previous interagency efforts at training for, planning, and executing post-conflict contingency relief and reconstruction operations, including relief and reconstruction operations in Iraq; an analysis of the division of authorities, duties, responsibilities, functions, and resources among executive branch agencies for such operations and rec-

ommendations for administrative and regulatory changes to enhance integration to include planning capabilities, personnel policies and systems, information-sharing policies and systems, and acquisition authorities; recommendations for legislation that would improve interagency cooperation and integration and the efficiency of the United States Government in the planning and execution of such operations; and recommendations for improvements in congressional, executive, and other oversight structures and procedures that would enhance accountability within such operations.

*Report on solid rocket motor industrial base (sec. 1050)*

The Senate amendment contained a provision (sec. 1086) that would direct the Secretary of Defense to submit a report to the congressional defense committees on the status, viability, and capacity of the solid rocket motor industrial base. The provision would also direct the Comptroller General of the United States to assess the report and set forth the Comptroller General's assessment of the matters contained in the report.

The House bill contained no similar provision.

The House recedes with an amendment that would delete the requirement for the Comptroller General to assess the matters in the report submitted by the Secretary of Defense and make clarifications in elements of the reporting requirement.

The conferees believe that the congressional defense committees should first receive and review the report submitted by the Secretary of Defense and make a determination at that time if there is a need for the Comptroller to review the report.

*Reports on establishment of a memorial for members of the armed forces who died in the air crash in Bakers Creek, Australia, and establishment of other memorials in Arlington National Cemetery (sec. 1051)*

The House bill included a provision (sec. 1055) that would express the sense of Congress that an appropriate site in Arlington National Cemetery (ANC) should be provided for a memorial marker to honor the memory of the 40 members of the armed forces of the United States who lost their lives in the air crash at Bakers Creek, Australia, on June 14, 1943.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of the Army, not later than April 1, 2008, to submit a report on locations outside of ANC that would serve as a suitable site for the establishment of a memorial to these service members. The amendment would also require the Secretary of the Army to provide a report and, if needed, proposed legislation by April 1, 2008, that would implement the Secretary's recommendations regarding the construction of new memorials or monuments at ANC.

Subtitle F—Other Matters

*Reimbursement for National Guard support provided to federal agencies (sec. 1061)*

The House bill contained a provision (sec. 1042) that would amend chapter 1 of title 32, United States Code, to authorize the

Governor of a State to employ units or members of the National Guard of that State to provide defense support of civil authorities when requested by a federal department or agency and authorized by the Secretary of Defense, and would require the Department of Defense to be reimbursed for costs incurred unless waived by the Secretary of Defense.

The Senate amendment contained a provision (sec. 352) that would amend section 377 of title 10, United States Code, to require federal agencies that receive law enforcement support or support to a national special security event provided by National Guard personnel under section 502(f) of title 32, United States Code, to reimburse the Department of Defense for the costs of that support.

The House recedes with a clarifying amendment that would authorize the Secretary of Defense to waive the requirement for reimbursement if the support is provided in the normal course of military training or operations or results in a benefit substantially equivalent to the benefit that would otherwise be obtained from military operations or training.

*Congressional commission on the strategic posture of the United States (sec. 1062)*

The House bill contained a provision (sec. 1046) that would establish a 12 member congressional commission on the strategic posture of the United States to examine and make recommendations with respect to the long-term strategic posture of the United States. The review and assessment to be conducted by the commission would include a threat assessment, a detailed review of nuclear weapons policy and strategy of the United States, and recommendations as to the most appropriate strategic posture and most effective nuclear weapons strategy. The commission's report would be due to Congress and the Executive Branch no later than December 1, 2008. The term of the commission would expire on June 1, 2009. In addition, the provision would repeal section 1051 of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109-163).

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would clarify that the vice chairman of the commission would be jointly appointed by the ranking minority members of the Committees on Armed Services of the House of Representatives and the Senate. In addition, the amendment would clarify that the commission should look at non-nuclear alternatives to nuclear weapons and systems in making recommendations with respect to the most appropriate strategic posture and most effective nuclear weapons policies of the United States.

The conferees urge the commission to look at the strategic posture of the United States in the broadest sense. Strategic policy and posture is not synonymous with nuclear policy. Conventional force structures, as well as nuclear force structures, must be included in the overall review and assessment of the strategic posture of the United States.

In addition, the conferees believe that many of the nuclear missions of the United States could be served by non-nuclear, conventional systems. In their examination of the strategic posture of the

United States, the conferees expect the commission to look not only at nuclear capabilities, but at the full array of non-nuclear capabilities, including kinetic and non-kinetic capabilities.

The conferees have included a separate provision addressing the repeal of section 1051 of the National Defense Authorization Act for Fiscal Year 2006 elsewhere in this Act.

*Technical and clerical amendments (sec. 1063)*

The House bill contained a provision (sec. 1047) that would make technical and clerical amendments to various provisions of law.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would make additional technical and clerical amendments.

*Repeal of certification requirement (sec. 1064)*

The House bill contained a provision (sec. 1048) that would repeal the certification requirement regarding an airport in Illinois contained in section 1063 of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109–163).

The Senate amendment contained no similar provision.

The Senate recedes.

*Maintenance of capability for space-based nuclear detection (sec. 1065)*

The House bill contained a provision (sec. 1050) that would require the Secretary of Defense to maintain the capability for space-based nuclear detection at a level that meets or exceeds the current level of capability.

The Senate amendment contained no similar provision.

The Senate recedes.

*Sense of Congress regarding detainees at Naval Station, Guantanamo Bay, Cuba (sec. 1066)*

The House bill contained a provision (sec. 1053) that would express the sense of Congress that: (1) the Nation extends its gratitude to the military personnel at Naval Station, Guantanamo Bay, Cuba; (2) the international community should work with the Department of Defense to facilitate and expedite the repatriation of detainees at Guantanamo; (3) Guantanamo detainees, to the maximum extent possible, should be charged and expeditiously prosecuted; and (4) operations at Guantanamo should be conducted in a way that upholds the U.S. national interest and the American people's core values.

The Senate amendment contained no similar provision.

The Senate recedes with a clarifying amendment.

*A report on transferring individuals detained at Naval Station, Guantanamo Bay, Cuba (sec. 1067)*

The House bill contained a provision (sec. 1057) that would require the Secretary of Defense to report to the congressional defense committees on the Secretary's plans for each detainee currently held by the Joint Task Force Guantanamo at Guantanamo Bay, Cuba.

The Senate amendment contained no similar provision.  
The Senate recedes with a clarifying amendment.

*Repeal of provisions in section 1076 of Public Law 109–364 relating to use of Armed Forces in major public emergencies (sec. 1068)*

The House bill contained a provision (sec. 1054) that would repeal section 1076 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109–364) and revive the provisions of sections 333 and 12304(c) of title 10, United States Code, as they were in effect prior to the effective date of that Act, and repeal section 2567 of title 10.

The Senate amendment contained a similar provision (sec. 1022).

The Senate recedes.

*Standards required for entry to military installations in United States (sec. 1069)*

The House bill contained a provision (sec. 1056) that would prohibit any unescorted civilian from entering a military installation or facility unless a background investigation has been conducted on such individual.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of Defense to establish standards for access to military installations, including screening standards appropriate to the type of installation, security level, category of individual seeking access, and level of access granted.

The conferees recognize that commanders of military installations must balance security concerns with the need to maintain rapid access to the installations for Department of Defense personnel, employees, and other authorized visitors, including commercial vendors. While commanders are in the best position to assess and respond to local threat conditions, the conferees believe that the Secretary should establish standards to assist military commanders in taking such actions.

The conferees believe the Secretary should work toward fielding Department-wide technologies that will allow base commanders to check installation visitors against an updated database containing relevant information provided by the Federal Bureau of Investigation, the terrorist watch list, and other pertinent law enforcement records. The conferees understand that technology has been developed and fielded at several military installations that will identify individuals with outstanding warrants for their arrest, felony convictions, and similar issues. Further, the conferees understand that available commercial technology may be able to perform instant background checks in fewer than 10 seconds per individual, be deployed at multiple military entry control points, and record entry information into an electronic log. The conferees direct the Secretary to give full consideration to the availability of such technologies in developing standards under this provision.

The conferees believe that base security is a government responsibility and that, for that reason, identity checks should be carried out at no cost to vendors or other visitors to military installations.

*Revised nuclear posture review (sec. 1070)*

The Senate amendment contained a provision (sec. 1061) that would require the Secretary of Defense to conduct a comprehensive review of the nuclear posture of the United States for the next 5 to 10 years. The Secretary shall conduct the review in consultation with the Secretary of Energy and the Secretary of State. The review would be submitted concurrently with the quadrennial defense review required to be submitted under section 118 of title 10, United States Code.

The House bill contained no similar provision.  
The House recedes.

*Termination of Commission on the Implementation of the New Strategic Posture of the United States (sec. 1071)*

The Senate amendment contained a provision (sec. 1062) that would repeal section 1051 of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109-163), (2006 NDAA), which established a Commission on the Implementation of the New Strategic Posture of the United States.

The House bill contained a provision (sec. 1046) that would establish a congressional Commission on the Strategic Posture of the United States. Section 1046(h) would also repeal section 1051 of the 2006 NDAA. Section 1062 in the Senate amendment and section 1046(h) of the House bill are identical.

The conference agreement includes this provision.

*Security clearances; limitations (sec. 1072)*

The Senate amendment contained a provision (sec. 1064) that would: (1) repeal section 986 of title 10, United States Code, which establishes mandatory standards for the disqualification of individuals from the issuance of security clearances; (2) substitute a new government-wide provision establishing standards for such disqualifications; and (3) increase the flexibility available to executive branch officials in administering these standards.

The House bill contained no similar provision.

The House recedes with an amendment that would provide agency heads the same flexibility with regard to individuals who are determined to be mentally incompetent that the Senate bill would provide with regard to individuals who have been convicted of crimes or discharged from the Armed Forces under dishonorable conditions. This change should address concerns about the potential disqualification of disabled individuals working for the Federal Government under the Javits Wagner O'Day (JWOD) Act, section 48 of title 41, United States Code.

The conferees understand that under current law and Department of Defense practice, if an individual who possesses a security clearance cannot meet the statutory criteria, the security clearance is revoked pending a waiver decision. Unless a position can be identified that does not require a security clearance during the waiver process, the individual cannot work and is separated.

The conferees direct the Secretary of Defense and other agency heads to implement the new provision in a manner that does not result in the unnecessary loss of employment to individuals during the waiver process. A current employee who has received a clear-

ance, and may even have undergone subsequent reinvestigation and renewal, should not be separated simply because he or she must now undergo a waiver process. Such uninterrupted employment may be particularly important in the case of disabled individuals working for the Federal Government under the JWOD Act. The conferees agree that the Department of Defense has a commendable track record of employing the disabled and that this provision should not be applied in a manner that would undermine that record.

*Improvements in the process for the issuance of security clearances (sec. 1073)*

The Senate amendment contained a provision (sec. 1065) that would require the Secretary of Defense and the Director of National Intelligence to conduct a demonstration project using new and innovative approaches to improve the processing of requests for security clearances.

The House bill contained no similar provision.

The House recedes.

The conferees are encouraged that the Secretary and the Director have designated the United States Air Force to lead a task force that will review initiatives to develop a process to deliver high-assurance security clearance determinations in a shorter period of time. The Air Force expects to have a new system in place by December 31, 2008. The conferees note that improving the clearance process is critical to our national security.

*Protection of certain individuals (sec. 1074)*

The Senate amendment contained a provision (sec. 1075) that would authorize the Secretary of Defense to provide physical protection and personal security within the United States to certain persons.

The House bill contained no similar provision.

The House recedes with an amendment that would modify the application of the provision to former or retired officials of the Department of Defense and foreign visitors to the United States, require the Secretary to provide additional information to the congressional defense committees, and make additional clarifying changes.

*Modification of authorities on Commission to Assess the Threat to the United States from Electromagnetic Pulse Attack (sec. 1075)*

The Senate amendment contained a provision (sec. 1076) that would extend the due date of the final report of the Commission to Assess the Threat to the United States from Electromagnetic Pulse Attack (EMP) to November 30, 2008. The provision would also direct the Commission and the Secretary of Homeland Security to ensure that the work of the Commission with respect to EMP attacks on electricity infrastructure is coordinated with the infrastructure protection work of the Department of Homeland Security. The provision would also provide that the amount of funds provided to the Commission to prepare and submit the final report shall not exceed \$5.6 million.

The House bill contained no similar provision.

The House recedes.

The conferees note that the \$5.6 million is in addition to funding previously provided to the Commission. This is the second deadline extension granted to the Commission for delivery of a final report. The conferees urge the Commission to submit its final report by the November 30, 2008 deadline.

*Sense of Congress on Small Business Innovation Research program (sec. 1076)*

The Senate amendment contained a provision (sec. 1088) that would reauthorize the Small Business Innovation Research program for an additional 2 years.

The House bill contained no similar provision.

The House recedes with an amendment that would eliminate the reauthorization of the program, and include a sense of Congress expressing views on the value of the program to the Department of Defense and on the need to reauthorize the program to ensure its seamless execution.

*Revision of proficiency flying definition (sec. 1077)*

The House bill contained a provision (sec. 1044) that would modify the definition of proficiency flying within the Department of Defense (DOD).

The Senate amendment contained no similar provision.

The Senate recedes.

The conferees do not intend this language to prohibit the Department from cancelling outdated guidance on flying proficiency and its related elements for participating rated personnel, and believe the Department should proceed with cancelling DOD Directive 1340.4, dated July 17, 1972.

*Qualifications for public aircraft status of aircraft under contract with the Armed Forces (sec. 1078)*

The Senate amendment contained a provision (sec. 1070) that would provide the Secretary of Defense the flexibility to determine whether an operational support mission can be conducted as a civil operation in compliance with the Federal Aviation Regulations. The Secretary of Defense would have the authority to determine whether a chartered aircraft performing operational support missions is performing a civil or public aircraft operation.

The House bill contained no similar provision.

The House recedes with an amendment that would further clarify the definition of "public aircraft," such that the term 'other commercial air service' would be limited to an aircraft operation that:

- (1) is within the United States territorial airspace;
- (2) the Administrator of the Federal Aviation Administration determines is available for compensation or hire to the public; and
- (3) must comply with all applicable civil aircraft rules under title 14, Code of Federal Regulations.

*Communications with the Committees on Armed Services of the Senate and the House of Representatives (sec. 1079)*

The Senate amendment contained a provision (sec. 1063) that would require that offices within the intelligence community respond to requests by the Committees on Armed Services of the Senate and the House of Representatives for intelligence assessments, reports, estimates, legal opinions, or other information within 15 days, unless the President were to certify that he was asserting privilege pursuant to the Constitution of the United States. The provision would also require that intelligence officials be able to provide testimony before these committees without having to seek approval or clearance of such testimony as a way of ensuring that Congress receives the independent views of such officials.

The House bill contained no similar provision.

The House recedes with an amendment that would make several changes:

(1) The provision would exclude "other information" to make it clear that the requests would be for existing assessments, reports, estimates, or legal opinions;

(2) The provision would require that the request be in writing from the Chair or Ranking Member of the committee;

(3) The time limit for providing the information would be extended to 45 days;

(4) Any decision of the President to assert privilege would have to be conveyed to Congress in writing by the Counsel to the President; and

(5) The requirements regarding review of testimony would be deleted.

*Retention of reimbursement for provision of reciprocal fire protection services (sec. 1080)*

The Senate amendment contained a provision (sec. 1090) that would permit Department of Defense entities that provide fire protection services to local entities to retain the proceeds of any reimbursement for such services.

The House bill contained no similar provision.

The House recedes.

*Pilot program on commercial fee-for-service air refueling support for the Air Force (sec. 1081)*

The Senate amendment contained a provision (sec. 1094) that would require the Secretary of the Air Force to conduct a pilot program to assess the feasibility and advisability of utilizing commercial fee-for-service air refueling tanker aircraft for Air Force operations.

The House bill contained no similar provision.

The House recedes with an amendment that would authorize the pilot program, but would not mandate the scope or scale of the program and would add an annual reporting requirement by the Air Force, along with reviews by the Comptroller General.

The conferees support the timely modernization of the Air Force aerial refueling tanker fleet. In furtherance of this, the Secretary of the Air Force initiated, and Congress approves of, a com-

prehensive strategy for replacing the aerial refueling tanker aircraft fleet, which includes the following elements:

(1) replacement of the aging tanker aircraft fleet with newer and improved capabilities under the KC-X program of record which supports the tanker replacement strategy, through the purchase of new commercial derivative aircraft;

(2) sustainment and extension of the legacy tanker aircraft fleet until replacement through depot-type modifications and upgrades of KC-135R and KC-10 aircraft; and

(3) augmentation of the aerial refueling capability through aerial refueling fee-for-service.

The conferees note that several studies have been conducted that indicate a potential for cost savings and other benefits of a fee-for-service air refueling program. Executing a pilot program for fee-for-service air refueling should be given full and fair consideration in order to test the costs, benefits, and appropriateness of such actions. To ensure the viability of such a program, it should be based on an appropriate business model, utilizing sufficient aircraft and flying hours to support a program that will meet the needs and best interests of the Air Force to meet air refueling requirements. The conferees direct that the pilot program be enacted as soon as practicable, and be incorporated into the operations of the Air Mobility Command.

*Advisory panel on Department of Defense capabilities for support of civil authorities after certain incidents (sec. 1082)*

The Senate amendment contained a provision (sec. 1066) that would establish an advisory panel to assess and make recommendations on Department of Defense capabilities to support civil authorities in the event of a chemical, biological, radiological, nuclear, or high-yield explosive incident.

The House bill contained no similar provision.

The House recedes with an amendment that would add a requirement for the advisory panel to assess and make recommendations on whether there should be additional Weapons of Mass Destruction Civil Support Teams (WMD-CSTs) and, if so, how many and where they should be located. It would also require the advisory panel to assess and make recommendations on what criteria and considerations are appropriate for determining whether additional WMD-CSTs are needed and, if so, where they should be located.

*Terrorism exception to immunity (sec. 1083)*

The Senate amendment contained a provision (sec. 1087) that would amend the Foreign Sovereign Immunities Act (FSIA) to allow victims of terrorism to seek redress in U.S. courts against foreign states that commit or provide material support to acts of terrorism, by clarifying subject matter jurisdiction over these claims and establishing a private cause of action under the exception for state sponsors of terrorism to sovereign immunity.

The provision would consolidate provisions relating to the exception to sovereign immunity for state sponsors of terrorism in a new section 1605A to the FSIA, and repeal the previous exception set out in section 1605(a)(7). The provision would permit claims to

be brought for money damages, including punitive damages, against a foreign state designated as a state sponsor of terrorism, for acts of torture, extrajudicial killing, aircraft sabotage, hostage taking, or providing material support or resources for these acts, committed by any official, employee, or agent of that state acting within the scope of his or her office, employment, or agency. The provision would also expand the ability of claimants to seek recourse against the property of that foreign state, both by permitting a lien to be placed on the foreign state's property during litigation and, once a judgment has been obtained, by permitting any property in which the foreign state has a beneficial ownership to be subject to execution of that judgment. The provision would allow any case previously brought under the state sponsor of terrorism exception to the FSIA under section 1605(a)(7), or under section 101(c) of Public Law 104-208, and which is still before a court, to be refiled as if the original claim had been filed under the provisions of this section.

The House bill contained no similar provision.

The House recedes with an amendment that would establish a private cause of action under the state sponsor of terrorism exception to the FSIA. Courts would have jurisdiction to hear a claim brought against a foreign state that was designated as a state sponsor of terrorism at the time of the terrorist act, or was so designated as a result of the act, and which remains designated as a state sponsor of terrorism at the time a claim is filed. Claims brought prior to the enactment of this Act against a foreign state that at the time was designated as a state sponsor of terrorism, or an action related to such a claim, would still be heard under this section. The conferees intend that the amendments made under this section shall apply to any claim filed or refiled under the new section 1605A of the FSIA, and any execution or attachment in aid of execution of a judgment relating to such a claim under section 1610(g) of the FSIA.

The provision would also provide for courts to hear a claim under this section if the terrorist act is related to Case Number 1:00CV03110 (EGS) in the United States District Court for the District of Columbia. The conferees intend that nothing in this section would prejudice the claimants or their representatives in that case.

The provision would allow claimants to establish a lien of *lis pendens*, upon the filing of a notice that an action is pending, on a foreign state's real property or tangible personal property that is subject to execution or attachment in aid of execution under the FSIA. The conferees intend that property used for purposes of maintaining a diplomatic or consular mission or the residence of the Chief of Mission, which is not subject to execution or attachment in aid of execution of a judgment, should not be subject to a lien of *lis pendens* under this provision.

The provision would also give claimants who obtain a judgment against a foreign state recourse to property of the foreign state in execution or attachment in aid of execution of the judgment. While the provision is written to subject any property interest in which the foreign state enjoys a beneficial ownership to attachment and execution, the provision would not supersede the court's authority to appropriately prevent impairment of interests

in property held by other persons who are not liable to the claimants in connection with the terrorist act. The court would fully retain its authority to take whatever steps it finds warranted to preserve the value of an ongoing business enterprise in which a third party may be a joint venture partner, for example. The conferees encourage the courts to protect the property interests of such innocent third parties by using their inherent authority, on a case-by-case basis, under the applicable procedures governing execution on judgment and attachment in anticipation of judgment.

The provision would further provide that a foreign state's property would not be immune from execution upon a judgment due to the property being regulated by the United States Government under the Trading With the Enemy Act or the International Emergency Economic Powers Act due to the sovereign immunity of the United States.

The provision would clarify that nothing in section 1503 of the Emergency Supplemental Appropriations Act, 2003 (Public Law 108–11) has ever authorized making any provision of the Foreign Sovereign Immunities Act inapplicable, or the removal of the jurisdiction of any court of the United States. The conferees stress that this provision should not be construed in any way as support for the use of United States appropriated funds to satisfy a claim brought under this section.

#### LEGISLATIVE PROVISIONS NOT ADOPTED

##### *Hate crimes*

The Senate amendment contained a provision (sec. 1023) that would address hate crimes.

The House bill contained no similar provision.

The Senate recedes.

##### *Comprehensive study and support for criminal investigations and prosecutions by State and local law enforcement officials*

The Senate amendment contained a provision (sec. 1024) that would require a comprehensive study and support for certain criminal investigations and prosecutions by State and local law enforcement officials.

The House bill contained no similar provision.

The Senate recedes.

##### *Extension of period for transfer of funds to Foreign Currency Fluctuations, Defense account*

The Senate amendment contained a provision (sec. 1007) that would extend from 2 to 4 fiscal years the length of time after the end of the period of availability of obligation in which funds can be transferred back to the "Foreign Currency Fluctuations, Defense" (FCFD) appropriation account to offset losses caused by fluctuations in foreign currency exchange rates.

The House bill contained no similar provision.

The Senate recedes.

*Minimum annual purchase amounts for airlift from carriers participating in the Civil Reserve Air Fleet*

The Senate amendment contained a provision (sec. 1027) that would allow the Department of Defense to guarantee higher minimum levels of business for all air carriers participating in the Civil Reserve Air Fleet (CRAF) program of up to 80 percent of the average annual expenditure of the Department of Defense for airlift during the preceding 5 years.

The House bill contained no similar provision.

The Senate recedes.

The voluntary agreements between the U.S. Government and the commercial air carriers in the CRAF program provide the Nation with a large reserve of airlift capacity to move troops and cargo within a few hours of activation. The conferees recognize the importance of the CRAF program to the national military strategy since the overall airlift capability of the Department of Defense depends on a significant contribution by the CRAF program.

Therefore, the conferees fully support the CRAF program. The conferees also recognize that there may be problems for CRAF participants when airlift demands shift from wartime to peacetime levels. However, the conferees agree that, before establishing any type of assured business model, a full assessment of the CRAF program should be performed. The conferees have adopted a provision in title III of this Act directing such an assessment. The conferees expect that the Department's assessment will provide the analysis necessary to guide any changes to current relationships with the CRAF participants.

*Comptroller General review of the Joint Improvised Explosive Device Defeat Organization*

The House bill contained a provision (sec. 1032) that would require the Comptroller General to conduct a review of the Joint Improvised Explosive Device Defeat Organization (JIEDDO).

The Senate amendment contained no similar provision.

The House recedes.

The conferees direct the Comptroller General to provide the congressional defense committees, not later than 180 days after the date of the enactment of this Act, with an assessment of the JIEDDO to include the following items: (1) the tools and processes in place to enable the Organization to determine the appropriateness and efficacy of its efforts to achieve its mission, including strategy, plans, technologies developed, and programs funded; (2) the process used by the Organization to select appropriate and effective technologies and other solutions to achieve its mission; (3) the ability of the Organization to respond to rapidly changing threats and to anticipate future threats; (4) the performance of the Organization in leading, advocating, and coordinating all of the activities of the Department of Defense to defeat improvised explosive devices and an assessment of the Organization's authority to do so; (5) the efforts of the Organization to target enemy networks and how the Organization is leveraging and coordinating such efforts with the efforts of other elements of the Department and other elements of the United States Government; (6) the feedback from the warfighter with respect to the efforts of the Organization; (7) the

oversight and direction over the activities of the Organization by the Office of the Secretary of Defense; and (8) other matters as appropriate.

The conferees remain concerned about the effectiveness of JIEDDO and its ability to effectively coordinate the Department's and intelligence community's response to the improvised explosive device and asymmetric threats faced by the warfighter in Iraq and Afghanistan.

*Commercial aviation technologies*

The House bill contained a provision (sec. 1035) that would require the Secretary of Defense to conduct a study to examine the methods by which air carriers and aviation technology companies research, develop, and deploy commercial aviation technologies.

The Senate amendment contained no similar provision.

The House recedes.

The conferees note that the Department of Defense provides substantial funding for independent research and development conducted by major aerospace contractors. Contractors leverage this investment to advance aviation technology that is useful for both commercial and defense purposes. In addition, the Department routinely leverages its science and technology budget to take advantage of promising technologies developed in the commercial sector. This effort is furthered by the National Aeronautics Research and Development policy, issued in December 2006, which provides improved coordination for aeronautics research and development across the Federal Government. The conferees applaud these efforts and encourage the Department to continue to seek opportunities to improve synergy in the development of military and commercial aviation technologies.

*Review of Department of Defense procedures to classify excess defense articles and defense services with military technology components*

The House bill contained a provision (sec. 1036) that would require the Secretary of Defense, with the concurrence of the Secretary of State, to conduct a review of, and report on: (1) the procedures by which the Department of Defense classifies defense articles and defense services with military technology components as excess to the needs of the Department; and, (2) the extent to which any of the classification procedures led to the transfer of defense article or services with military technology components to terrorists or unfriendly states or groups.

The Senate amendment contained no similar provision.

The House recedes.

The conferees urge the Department to take all measures necessary to ensure adequate controls over surplus defense materials.

*Additional Weapons of Mass Destruction Civil Support Teams*

The House bill contained a provision (sec. 1051) that would authorize two additional Weapons of Mass Destruction Civil Support Teams.

The Senate amendment contained no similar provision.

The House recedes.

*Study and report on use of power management software*

The House bill contained a provision (sec. 1058) that would require a report on the use of power management software.

The Senate amendment contained no similar provision.

The House recedes.

The conferees recommend that the Secretary of Defense undertake an analysis of the cost and environmental benefits of adopting energy efficient information technologies and computing practices, including, but not limited to, energy-efficient data centers, servers and workstations; power management software for computers and monitors; and telecommuting for appropriate personnel. The conferees further recommend that the Secretary of Defense keep Congress and the public aware of progress to achieve these potential energy savings and environmental benefits and of opportunities for industry and academia to support efforts in this area.

*Establishment of National Foreign Language Coordination Council*

The Senate amendment contained a provision (sec. 1069) that would establish a National Foreign Language Coordination Council to develop and monitor the implementation of a comprehensive national foreign language strategy.

The House bill contained no similar provision.

The Senate recedes.

The conferees direct the President to report to the conferees, no later than 90 days after the enactment of this Act, on the extent to which the executive branch has developed a strategy for developing foreign language capability in the United States, and a plan for implementing it. The report should also contain a description of the goals and achievements of the National Security Language Initiative, and indicate what additional steps, if any, the President intends to take to address the need for greater foreign language capability in the United States. The conferees expect that the report will include a description of any additional authorities that the executive branch would require from Congress in order to implement future plans.

*Grant of federal charter to Korean War Veterans Association, Incorporated*

The Senate amendment contained a provision (sec. 1078) that would amend part B of subtitle II of title 36, United States Code, to grant a federal charter to the Korean War Veterans Association, Incorporated.

The House bill contained no similar provision.

The Senate recedes.

*Sense of Senate on General David Petraeus*

The Senate amendment contained a provision (sec. 1079) expressing that it is the sense of the Senate to reaffirm its support for all the men and women of the United States armed forces, including General David H. Petraeus, Commanding General, Multi-National Force—Iraq; to strongly condemn any effort to attack the honor and integrity of General Petraeus and all the members of the United States armed forces; and to specifically repudiate the un-

warranted personal attack on General Petraeus by the liberal activist group Moveon.org.

The House bill contained no similar provision.

The Senate recesses.

The conferees note that a similar provision was contained in House Joint Resolution 52, making continuing appropriations for fiscal year 2008, which was subsequently passed by the Senate without amendment and signed into law by the President as Public Law 110–92 on September 29, 2007.

*Sense of Congress on equipment for the National Guard to defend the homeland*

The Senate amendment contained a provision (sec. 1081) that would express the sense of Congress that the National Guard should have sufficient equipment available to accomplish their missions inside the United States and defend the homeland.

The House bill contained no similar provision.

The Senate recesses.

The conferees remain concerned that the overall readiness of the National Guard to respond to domestic emergencies has been undermined by equipment shortages resulting from inadequate funding and extended commitments to operations in Iraq and Afghanistan. Equipment shortages and poor existing equipment readiness increases the risk for States that Guard units will not have the necessary equipment on-hand and fully operational to meet the mission requirements of homeland defense, domestic support, crisis response, and consequence management. The conferees are aware that the Army National Guard has only 40 percent of its required equipment in the United States; and, that the Chief, National Guard Bureau has submitted to Congress a fiscal year 2008 unfunded equipment list of \$2.0 billion.

The conferees recommend elsewhere in this report provisions that would authorize appropriation of an additional \$980.0 million for the procurement of high-priority equipment to address National Guard and reserve component unfunded shortfalls. These additional funds would procure items particularly relevant and necessary to the National Guard's domestic support missions, such as aircraft, wheeled and tracked combat vehicles, tactical wheeled vehicles, communications equipment, ammunition, and other weapons.

The conferees also expect that the Secretary of Defense will take the actions necessary, including determination of requirements and prioritization of equipment repair, procurement, and fielding, to improve National Guard readiness for its domestic support missions and reduce risks to public safety within the United States.

*Sense of the Senate on Air Force use of towbarless aircraft ground equipment*

The Senate amendment contained a provision (sec. 1083) that would express the sense of the Senate encouraging the Air Force to consider towbarless ground support equipment for towing aircraft.

The House bill contained no similar provision.

The Senate recesses.

The conferees note the potential operational utility, cost savings, and increased safety afforded by the utilization of towbarless aircraft ground equipment, and encourage the Air Force to consider their use.

*Designation of Charlie Norwood Department of Veterans Affairs Medical Center*

The Senate amendment contained a provision (sec. 1084) that would designate the Department of Veterans Affairs Medical Center in Augusta, Georgia as the “Charlie Norwood Department of Veterans Affairs Medical Center”.

The House bill contained no similar provision.

The Senate recesses.

The conferees note that separate legislation making this designation was signed into law (Public Law 110–112) on November 8, 2007.

*Commercialization pilot program*

The Senate amendment contained a provision (sec. 1085) that would extend the Small Business Innovation Research (SBIR) program commercialization pilot program that was originally established by section 252 of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109–163), that would authorize the Secretary of Defense to establish insertion incentives for SBIR technologies; and would authorize the Secretary of Defense to establish goals for the insertion of SBIR technologies into programs of record or fielded systems.

The House bill contained no similar provision.

The Senate recesses.

*National center for human performance*

The Senate amendment contained a provision (sec. 1091) that would designate a scientific institute at the Texas Medical Center as the National Center for Human Performance.

The House bill contained no similar provision.

The Senate recesses.

*Veteran small business*

The Senate amendment contained a division (Division D) that would provide for the Small Business Administration to provide assistance to military reservist and veteran small business.

The House bill contained no similar provision.

The Senate recesses.

## TITLE XI—CIVILIAN PERSONNEL MATTERS

*Extension of authority to waive annual limitation on total compensation paid to federal civilian employees working overseas under areas of United States Central Command (sec. 1101)*

The Senate amendment contained a provision (sec. 1105) that would authorize the head of an executive agency to waive limitations on total compensation to an employee who performs certain

work while in an overseas location within the area of responsibility of the United States Central Command. The total compensation would be limited to \$212,100 per calendar year.

The House bill contained no similar provision.

The House recedes with a technical amendment.

*Continuation of life insurance coverage for federal employees called to active duty (sec. 1102)*

The Senate amendment contained a provision (sec. 1103) that would authorize federal civilian employees who are members of a reserve component of the armed forces called or ordered to active duty to continue coverage under Federal Employees Group Life Insurance for a period not to exceed 24 months.

The House bill contained no similar provision.

The House recedes with an amendment that would clarify that an eligible employee who elects to continue this life insurance coverage would be responsible for the premium payments after the initial 12 months of coverage.

*Transportation of dependents, household effects, and personal property to former home following death of federal employee where death resulted from disease or injury incurred in the Central Command area of responsibility (sec. 1103)*

The House bill contained a provision (sec. 1109) that would allow the dependents of a federal civilian employee who dies while on deployment in a combat zone to be relocated to their home of record at the government's expense, whether the dependents are living overseas or in the continental United States.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would narrow the scope to cover dependents of a federal civilian employee who dies while performing duties within the area of responsibility of the Commander of the United States Central Command. The amendment would also clarify that the provision would apply to an employee who was a party to a mandatory mobility agreement that was in effect when the employee died.

*Special benefits for civilian employees assigned on deployment temporary change of station (sec. 1104)*

The House bill contained a provision (sec. 1102) that would authorize the head of an agency to provide quarters, rations, and storage of a personal motor vehicle without charge to a civilian employee of an executive agency of a military department who is assigned on a temporary change of station in support of a contingency operation.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would clarify that the time period during which a personal motor vehicle may be stored cannot exceed the period of the employee's temporary assignment.

*Death gratuity authorized for federal employees (sec. 1105)*

The House bill contained a provision (sec. 1105) that would require the United States to pay a death gratuity of \$100,000 to civil-

ian employees of the Department of Defense who died as a result of wounds, injuries, or illness while on duty in a combat zone or from a terrorist incident.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would authorize the payment of the death gratuity in the amount of up to \$100,000, and would limit the condition of receipt of this gratuity to duty in a contingency operation. In addition, the amendment would require that the death gratuity would be offset by any amount received from any other federally provided death gratuity.

*Modifications to the National Security Personnel System (sec. 1106)*

The House bill contained a provision (sec. 1106) that would modify the authority of the Secretary of Defense to establish a National Security Personnel System (NSPS) pursuant to section 9902 of title 5, United States Code.

The Senate amendment contained several provisions (secs. 684, 1074, and 1104) that would make similar changes to NSPS.

The Senate recedes with an amendment that would restore the collective bargaining and appeal rights of employees of the Department of Defense, while preserving the ability of the Department to implement a pay-for-performance system. The provision would prohibit the Secretary from adding more than 100,000 civilian employees to the system in any calendar year and require periodic reviews by the Comptroller General during the implementation period. The phased implementation and regular reviews should ensure that Congress has an opportunity to make any additional adjustments that may be needed to ensure that NSPS is implemented in a manner that is transparent, accountable, and fair to the civilian employees of the Department of Defense.

*Requirement for full implementation of personnel demonstration project (sec. 1107)*

The House bill contained a provision (sec. 1111) that would require the Secretary of Defense to fully implement the authorities provided under section 342(b) of the National Defense Authorization Act for Fiscal Year 1995 (Public Law 103-337), as amended by section 1114 of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 (Public Law 106-398) to carry out personnel management demonstration projects at certain Department of Defense laboratories.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would modify the requirement for the Secretary to implement a process and implementation plan to fully utilize the authorities provided under the sections noted above in order to enhance the performance of the missions of the laboratories.

The conferees believe that it is essential that defense laboratories have personnel systems that allow them to attract, hire, and retain the top quality scientists and engineers necessary to discharge their unique missions efficiently and effectively.

The conferees believe that the authorities established under the sections noted above, if fully utilized, would enable laboratories to experiment with and demonstrate novel personnel management

flexibilities which may enhance their performance and capabilities. The conferees anticipate that if these demonstrations are successful, the authorities may then be adopted by other laboratories or organizations within the Department of Defense, if appropriate to support their missions.

*Authority for inclusion of certain Office of Defense Research and Engineering positions in experimental personnel program for scientific and technical personnel (sec. 1108)*

The Senate amendment contained a provision (sec. 1106) that would authorize the inclusion of 20 technical positions in the Office of the Director of Defense Research and Engineering (DDR&E) in the experimental personnel program for scientific and technical personnel established by section 1101 of the Strom Thurmond National Defense Authorization Act for Fiscal Year 1999 (Public Law 105-261).

The House bill contained no similar provision.

The House recedes with an amendment that would reduce the total number of authorized positions to 10.

The conferees note that the DDR&E's technical staff plays an important role in the oversight and coordination of the Department of Defense's science and technology program. This involves initiatives in rapidly developing scientific areas such as hypersonics, societal and behavioral modeling, and nanotechnology. The conferees believe that the utilization of the personnel authority provided by the provision can enhance the ability of the DDR&E to recruit and retain a staff with the diverse technical competencies necessary to oversee these initiatives.

*Pilot program for the temporary assignment of information technology personnel to private sector organizations (sec. 1109)*

The House bill contained a provision (sec. 1112) that would extend the Information Technology Exchange Program (ITEP) established in chapter 37 of the E-Government Act of 2002 (Public Law 107-347). ITEP allows employees from federal and private sector information technology (IT) organizations to participate in temporary assignments to another organization. The authorization for the program ends on December 17, 2007. This provision would extend the program only in relation to the Department of Defense for an additional 3 years.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would create a 3-year pilot program for the temporary assignment of Department of Defense IT personnel in private sector organizations. The amendment would also require the Secretary of Defense to report to the Committees on Armed Services of the Senate and the House of Representatives on the potential benefits of a similar exchange program in which IT personnel from the private sector are assigned to the Department of Defense, as well as any recommendations for legislation that may be necessary to create such a program.

The conferees acknowledge that legislation is pending before congressional committees that would extend authority for the E-Government Act of 2002 beyond its current expiration date.

*Compensation for federal wage system employees for certain travel hours (sec. 1110)*

The House bill contained a provision (sec. 1101) that would amend section 5544(a) of title 5, United States Code, to authorize compensation of federal wage system employees for hours spent traveling while returning from an event that cannot be scheduled or controlled administratively.

The Senate amendment contained a similar provision (sec. 1101).

The Senate recedes with a technical amendment.

*Travel compensation for wage grade personnel (sec. 1111)*

The House bill contained a provision (sec. 1104) that would amend section 5550b(a) of title 5, United States Code, to allow wage grade employees to receive compensatory time off for each hour spent on official travel, provided the time is not otherwise compensable.

The Senate amendment contained no similar provision.

The Senate recedes.

*Accumulation of annual leave by senior level employees (sec. 1112)*

The House bill contained a provision (sec. 1103) that would authorize employees classified above the GS-15 level and Intelligence Senior Level positions in the Department of Defense to accrue annual leave accrual in the same manner currently authorized for certain other senior government officials, including members of the Senior Executive Service and the Defense Intelligence Senior Executive Service.

The Senate amendment contained no similar provision.

The Senate recedes with a technical amendment.

*Uniform allowances for civilian employees (sec. 1113)*

The Senate amendment contained a provision (sec. 1107) that would repeal section 1593 of title 10, United States Code, in order to remove the \$400 limitation on uniform allowances for civilian employees.

The House bill contained no similar provision.

The House recedes with an amendment that would authorize the Secretary of Defense to prescribe by regulation an amount higher than \$400.

*Flexibility in setting pay for employees who move from a Department of Defense or Coast Guard nonappropriated fund instrumentality position to a position in the general schedule pay system (sec. 1114)*

The House bill contained a provision (sec. 1108) that would authorize flexibility in setting pay for an employee of a Department of Defense (DOD) or U.S. Coast Guard nonappropriated fund instrumentality who voluntarily transfers to a DOD or Coast Guard civil service appropriated fund position without a break in service of more than 3 days.

The Senate amendment contained no similar provision.

The Senate recedes with a technical amendment.

*Retirement service credit for service as cadet or midshipman at a military service academy (sec. 1115)*

The Senate amendment contained a provision (sec. 1102) that would amend sections 8331(13) and 8401(31) of title 5, United States Code, to clarify an existing practice of awarding retirement service credit for time in service as a cadet or midshipman at a military service academy.

The House bill contained no similar provision.

The House recedes.

*Authorization for increased compensation for faculty and staff of the Uniformed Services University of the Health Sciences (sec. 1116)*

The Senate amendment contained a provision (sec. 1108) that would provide the Secretary of Defense greater flexibility in setting salary levels for faculty and staff at the Uniformed Services University of the Health Sciences. In no event would the total amount of compensation exceed the amount specified in section 102 of title 3, United States Code.

The House bill contained no similar provision.

The House recedes with a technical amendment.

*Report on establishment of a scholarship program for civilian mental health professionals (sec. 1117)*

The Senate amendment contained a provision (sec. 711) that would require the Secretary of Defense, in consultation with the Assistant Secretary of Defense for Health Affairs and each of the surgeons general of the armed forces, to submit to Congress a report on the feasibility and advisability of establishing a scholarship program for civilian mental health professionals. This report would be due not later than 180 days after the date of enactment of this Act.

The House bill contained no similar provision.

The House recedes.

LEGISLATIVE PROVISIONS NOT ADOPTED

*Annuity commencing dates*

The House bill contained a provision (sec. 1107) that would allow federal retirement annuities to commence either on the day after retirement or the day after age and service requirements are met.

The Senate amendment contained no similar provision.

The House recedes.

*Physicians and health care professionals comparability allowances*

The Senate amendment contained a provision (sec. 937) that would increase the amount of allowance the Secretary of Defense is authorized to give to current or new Department of Defense physicians or health care professionals under service agreements. The provision would also require the Secretary of Defense to report to the appropriate committees of Congress annually on the operation of this section with regards to recruiting and retention problems and other issues.

The House bill contained no similar provision.

The Senate recesses.

The conferees direct the Secretary of Defense, in consultation with the Director, Office of Personnel Management, to report to the Committees on Armed Services of the Senate and the House of Representatives by February 1, 2008, on the utilization of all bonus authorities for purposes of recruitment and retention of Department of Defense civilian health care professionals from fiscal year 2002 through fiscal year 2007.

## TITLE XII—MATTERS RELATING TO FOREIGN NATIONS

### Subtitle A—Assistance and Training

#### *Military-to-military contacts and comparable activities (sec. 1201)*

The House bill contained a provision (sec. 1201) that would allow personnel exchange programs with foreign governments to be conducted on a non-reciprocal basis if the Secretary of Defense determines that it would be in the interests of the United States to do so.

The Senate amendment contained no similar provision.

The Senate recesses.

#### *Authority for support of military operations to combat terrorism (sec. 1202)*

The House bill contained a provision (sec. 1202) that would extend the authority provided in section 1208 of the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108–375), and amend the annual reporting requirements contained in subsection (f) of section 1208.

The Senate amendment contained no similar provision.

The Senate recesses.

#### *Medical care and temporary duty travel expenses for liaison officers of certain foreign nations (sec. 1203)*

The House bill contained a provision (sec. 1203) that would authorize the Secretary of Defense to pay medical and temporary duty travel expenses incurred by a liaison officer from a developing country who is temporarily assigned to a headquarters of a combatant command, component command, or subordinate operational command in connection with the planning for, or conduct of, a military operation.

The Senate amendment contained no similar provision.

The Senate recesses.

#### *Extension and expansion of Department of Defense authority to participate in multinational military centers of excellence (sec. 1204)*

The House bill contained a provision (sec. 1204) that would extend the authority provided under section 1205 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109–364) for the Department of Defense to participate in multinational military centers of excellence. The provision would ex-

pand the definition of multinational military centers of excellence in which Department personnel may participate beyond those entities accredited or approved by the North Atlantic Treaty Organization (NATO), to include centers accredited or approved by the Secretary of Defense. The provision would also raise the limitation on expenditures for the U.S. share of the operating expenses of multinational military centers of excellence under this section from \$3.0 million to \$5.0 million.

The Senate amendment contained a provision (sec. 1214) that would extend, but not expand, the authority for Department of Defense participation in multinational military centers of excellence.

The Senate recedes with an amendment that would maintain the current definition of a multinational military center of excellence as an entity accredited and approved by NATO. The conferees note the Department's stated interest in participating in multinational military centers of excellence beyond the NATO context. To aid consideration of this proposal, the conferees urge the Department to provide additional information on how expanded authority under this section would be implemented, including how it would define a "military center of excellence" outside the NATO context; where such centers are or would be located; the purposes of such centers; and the costs associated with U.S. participation in such centers.

*Reauthorization of Commanders' Emergency Response Program (sec. 1205)*

The House bill contained a provision (sec. 1205) that would extend the authority provided in section 1202 of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109-163) for the Commanders' Emergency Response Program (CERP) through fiscal years 2008 and 2009. The CERP is intended to provide commanders in Iraq and Afghanistan funds for use in small humanitarian and reconstruction projects in their area of responsibility that provide immediate assistance to the local population.

The Senate amendment contained a provision (sec. 1203) that would authorize the CERP through fiscal year 2008 and increase the authorized level for CERP funding up to \$977,441,000.

The Senate recedes with an amendment that would authorize up to \$977,441,000 to be used for CERP during each of fiscal years 2008 and 2009.

The conferees note that the Under Secretary of Defense (Comptroller) issued revised guidance for the CERP on May 9, 2007. The conferees are concerned by the failure of the Department of Defense to comply with the requirement of section 1202 that the Secretary of Defense submit to the congressional defense committees any modification to the guidance regarding the allocation of CERP funds not later than 15 days after the guidance is issued. The conferees strongly urge the Department to comply with this requirement of section 1202 in the future.

The conferees also highlight that the revised May 2007 CERP guidance expands the listed uses of CERP funds, to include making payments, sometimes called "martyr payments," to the family members of Iraqi or Afghan "defense or police personnel who were killed as a result of U.S., coalition or supporting military oper-

ations” in Iraq or Afghanistan. The conferees question the Department’s characterization of martyr payments as a subset of condolence payments—payments made to civilians for death or physical injury resulting from U.S., coalition, or supporting military operations. Further, the conferees have concerns over whether martyr payments are an appropriate expansion of the uses of CERP funds on both policy and legal grounds.

The conferees direct the Department to review its decision to expand the use of CERP to include martyr payments and submit a report on the results of that review to the congressional defense committees not later than 60 days after enactment of this Act. The report should include: a review of the relevant policy considerations, including whether such payments should be the responsibility of the Government of Iraq or Afghanistan, respectively, rather than U.S. commanders; the legal considerations associated with making martyr payments, including whether such payments are consistent with the prohibition in the CERP guidance on using CERP funds to provide services or funds to national security forces in Iraq and Afghanistan; and whether other funding accounts, such as the Iraq Security Forces Fund or the Afghanistan Security Forces Fund, would be a more appropriate source of funds for making martyr payments. The report should also include information on the amount of CERP funds used for martyr payments in each of fiscal years 2006, 2007, and 2008 up to the date of the report. The conferees direct the Department to specify in the quarterly reports required under section 1202 the amount of CERP funds used for martyr payments separate from the amount specified for condolence payments.

*Authority to build the capacity of the Pakistan Frontier Corps (sec. 1206)*

The House bill contained a provision (sec. 1206) that would expand the authority provided under section 1206 of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109–163) for training and equipping foreign military forces to allow the Secretary of Defense, with the concurrence of the Secretary of State, to build the capacity of Pakistan security forces, other than its military forces, to conduct counterterrorist operations.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would authorize the Secretary of Defense, with the concurrence of the Secretary of State, to use up to \$75.0 million of funds available for operation and maintenance during fiscal year 2008 to enhance the ability of the Pakistan Frontier Corps to conduct counterterrorist operations along the border between Pakistan and Afghanistan. Authorized assistance may include equipment, supplies, and training. The amendment would require the Secretary of Defense to notify the congressional defense committees and the Committee on Foreign Affairs of the House of Representatives and the Committee on Foreign Relations of the Senate not less than 15 days prior to providing assistance under this section.

*Authority to equip and train foreign personnel to assist in accounting for missing United States Government personnel (sec. 1207)*

The House bill contained a provision (sec. 1207) that would authorize the Secretary of Defense to provide assistance to foreign nations to aid/help in recovery and accounting activities for missing U.S. Government personnel. The Secretary of Defense would be required to submit an annual report on the assistance provided under this authority.

The Senate amendment contained a similar provision (sec. 1201).

The House recedes with a clarifying amendment.

*Authority to provide automatic identification system data on maritime shipping to foreign countries and international organizations (sec. 1208)*

The House bill contained a provision (sec. 1208) that would permit the Secretary of Defense to authorize secretaries of the military departments and geographic combatant commanders to provide foreign nations and international organizations with information on the location of merchant vessels.

The Senate amendment contained no similar provision.

The Senate recedes.

*Report on foreign-assistance related programs carried out by the Department of Defense (sec. 1209)*

The House bill contained a provision (sec. 1209) that would require the Secretary of Defense to submit a report not later than 180 days after enactment of this Act describing, on a country-by-country basis, all foreign-assistance related programs, projects, and activities of the Department of Defense during the prior fiscal year.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of Defense to submit a report specifying, on a country-by-country basis, each program carried out by the Department of Defense during the prior fiscal year under the foreign-assistance related authorities specified in the provision. The report would be unclassified, but may include a classified annex. The report would be submitted to the congressional defense committees, and the Committee on Foreign Affairs of the House of Representatives and the Committee on Foreign Relations of the Senate.

*Extension and enhancement of authority for security and stabilization assistance (sec. 1210)*

The Senate amendment contained a provision (sec. 1202) that would extend until September 30, 2008, the authority provided under section 1207 of the National Defense Authorization Act of Fiscal Year 2006 (Public Law 109–163) for the Secretary of Defense to provide the Secretary of State services, defense articles, or funding to support Department of State programs for reconstruction, security, or stabilization assistance. The provision would also increase the total amount of all services, defense articles, and funding that may be provided under section 1207 from \$100.0 million to \$200.0 million. The provision would require the Department of State (DOS) to coordinate with the Department of Defense (DOD)

in the formulation and implementation of any program of reconstruction, security, or stabilization assistance that involves the provision of services, defense articles, or funds by the DOD to the DOS under this section.

The House bill contained no similar provision.

The House recedes with an amendment that would delete the increase under the Senate provision in the aggregate value of all services, defense articles, and funding that may be provided under this section, thereby keeping the funding limitation under section 1207 at \$100.0 million during fiscal year 2008.

*Government Accountability Office report on Global Peace Operations Initiative (sec. 1211)*

The Senate amendment contained a provision (sec. 1204) that would direct the Government Accountability Office to submit a report not later than March 1, 2008, to the congressional defense committees, the Committee on Foreign Relations of the Senate, and the Committee on Foreign Affairs of the House of Representatives, assessing the President's Global Peace Operations Initiative.

The House bill contained no similar provision.

The House recedes with a clarifying amendment that would stipulate that the report be unclassified to the maximum extent possible, and would require it to be submitted by June 1, 2008.

*Repeal of limitations on military assistance under the American Servicemembers' Protection Act of 2002 (sec. 1212)*

The Senate amendment contained a provision (sec. 1205) that would repeal some of the remaining limitations on providing military assistance under the American Servicemembers' Protection Act of 2002 (22 U.S.C. 7426).

The House bill contained no similar provision.

The House recedes.

Subtitle B—Matters Relating to Iraq and Afghanistan

*Modification of authorities relating to the office of the Special Inspector General for Iraq Reconstruction (sec. 1221)*

The House bill contained a provision (sec. 1221) that would extend the authority for the office of the Special Inspector General for Iraq Reconstruction and clarify certain authorities of the office.

The Senate amendment contained a similar provision (sec. 1540).

The House recedes with an amendment that would extend the authority for the office and combine the authorities provided in the House and Senate provisions.

*Limitation on availability of funds for certain purposes relating to Iraq (sec. 1222)*

The House bill contained a provision (sec. 1222) that would prohibit the obligation of funds authorized in this or any other act to establish permanent bases in Iraq or exercise United States control over Iraq's oil resources.

The Senate amendment contained a provision (sec. 1531) that would continue such a prohibition for fiscal year 2008 only.

The House recedes.

*Report on United States policy and military operations in Iraq (sec. 1223)*

The House bill contained a provision (sec. 1224) that would require a report on the implementation of the Multi-National Forces-Iraq/United States Embassy Baghdad Joint Campaign Plan and efforts to achieve political reform in Iraq.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment to the United States Policy in Iraq Act, section 1227(c) of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109-163), that would require a detailed description of the Joint Campaign Plan, including those conditions which could prompt changes to levels of United States armed forces or missions, and the status of planning for those changes.

*Report on a comprehensive set of performance indicators and measures for progress toward military and political stability in Iraq (sec. 1224)*

The House bill contained a provision (sec. 1225) that would require a report on training of the Iraqi Security Forces.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment to section 9010 of the Department of Defense Appropriations Act for Fiscal Year 2007 (Public Law 109-289) that would require additional information on the Iraqi Security Forces in the report required by that Act.

*Report on support from Iran for attacks against coalition forces in Iraq (sec. 1225)*

The Senate amendment contained a provision (sec. 1535) that would require, not later than 30 days after the date of enactment of this Act and every 60 days thereafter, that the Commander, Multi-National Forces, Iraq, and the U.S. Ambassador to Iraq, in coordination with the Director of National Intelligence, submit a report to Congress on: any support provided to anti-coalition forces in Iraq by Iran or its agents; Iran's strategy in Iraq; and any strategy or efforts by the United States to counter the activities of Iran in Iraq. The provision also contained a rule of construction that nothing in this section would authorize or speak to the use of armed forces against Iran.

The House bill contained no similar provision.

The House recedes with an amendment that would require that the report be submitted by the Secretary of Defense, in coordination with the Director of National Intelligence, not later than 60 days after the date of enactment of this Act and every 180 days thereafter. The amendment would also provide that the reporting requirement would terminate when the Secretary of Defense, in coordination with the Director of National Intelligence, certifies to the congressional defense committees that Iran has ceased to provide military support to anti-coalition forces in Iraq.

The conferees are deeply concerned by reports of Iranian activity in Iraq, including that the Iranian Qods Force is providing training and support to anti-coalition forces in Iraq. The conferees

call on Iran to cease any training, equipping, funding, advising, or any other support that it or its agents are providing to Iraqi militia and insurgents and that is counter to Iraqi and coalition interests. The conferees strongly support U.S. diplomatic efforts with Iran to stop any actions by Iran or its agents against U.S. or other coalition forces in Iraq.

*Sense of Congress on the consequences of a failed state in Iraq (sec. 1226)*

The Senate amendment contained a provision (sec. 1536) that would express the sense of the Senate that the Senate should commit itself to a strategy that will not leave a failed state in Iraq, and the Senate should not pass legislation that will undermine our military's ability to prevent a failed state in Iraq.

The House bill contained no similar provision.

The House recedes with an amendment that would express the sense of Congress that a failed state in Iraq will have a negative impact on the Middle East and American interests in the region, and that the United States should pursue strategies to prevent a failed state in Iraq or contain the negative effects of a failed state in Iraq.

*Sense of Congress on federalism in Iraq (sec. 1227)*

The Senate amendment contained a provision (sec. 1537) that would express the sense of Congress that the United States should actively support a political settlement in Iraq based on the final provisions of the Constitution of Iraq that create a federal system of government and allow for the creation of federal regions, consistent with the wishes of the Iraqi people and their elected leaders. This provision would also express the sense of Congress on other steps the United States should take in that regard.

The House bill contained no similar provision.

The House recedes with an amendment that would express the sense of Congress that policies supported by the United States in the pursuit of a political settlement in Iraq should be consistent with the wishes of the Iraqi people and should not violate the sovereignty of the nation of Iraq.

*Tracking and monitoring of defense articles provided to the Government of Iraq and other individuals and groups in Iraq (sec. 1228)*

The Senate amendment contained a provision (sec. 1541) that would require the President to implement a policy to control the export and transfer of defense articles into Iraq, including implementation of a registration and monitoring system.

The House bill contained no similar provision.

The House recedes with an amendment that would make clarifying changes, and would also require the provision to take effect 180 days after the enactment of this Act, with one 90-day waiver option, and does not direct enhanced end-use monitoring.

The conferees fully expect the President to delegate this authority.

The conferees urge the relevant Secretaries to consider whether enhanced end-use monitoring may be desirable in the cases of some of the lethal defense articles provided to Iraq.

The conferees understand, based on information provided by the Departments of State and Defense, that this provision will not have the effect of slowing the delivery of defense articles and services to Iraq under the Foreign Military Sales program. The conferees urge the Department of Defense to inform the conferees immediately in the event that implementation of this provision would have such an unintended and undesired effect.

*Special Inspector General for Afghanistan Reconstruction (sec. 1229)*

The House bill contained a provision (sec. 1231) that would establish an office of the Special Inspector General for Afghanistan Reconstruction (SIGAR) to conduct independent and objective audits and investigations of programs and operations funded by the Department of Defense for Afghanistan reconstruction. The President would appoint the SIGAR. The provision would require the SIGAR to provide quarterly and semiannual reports to the congressional defense committees. The Office of the SIGAR would terminate 10 months after 80 percent of the Department of Defense funds for Afghanistan reconstruction have been expended.

The Senate amendment contained a provision (sec. 1542) that would establish an office of the SIGAR to conduct audits and investigations of United States Government programs and operations for Afghanistan reconstruction.

The Senate recedes with an amendment that would establish an office of the SIGAR to conduct independent and objective audits and investigations of United States Government programs and operations for Afghanistan reconstruction. The President would appoint the SIGAR and may appoint the Special Inspector General for Iraq Reconstruction (SIGIR) to serve as the SIGAR. The SIGAR would report on a quarterly basis to the congressional defense committees and the Committee on Foreign Affairs of the House of Representatives and the Committee on Foreign Relations of the Senate. The provision would provide \$20.0 million from the Afghanistan Security Forces Fund to carry out this section during fiscal year 2008. The Office of the SIGAR would terminate 180 days after the amount of unexpended funds appropriated or otherwise made available for Afghanistan is less than \$250.0 million.

*Report on progress toward security and stability in Afghanistan (sec. 1230)*

The House bill contained a provision (sec. 1232) that would require the Secretary of Defense, in coordination with the relevant U.S. Government agencies and departments, to report not later than 90 days after enactment of this Act on progress toward security and stability in Afghanistan. The report would include a description of the strategic direction of U.S. activities related to security and stability in Afghanistan. The report would also include a comprehensive set of performance indicators and measures of progress toward long-term security and stability in Afghanistan.

The Secretary of Defense would be required to provide updates of the report every 90 days.

The Senate amendment contained a provision (sec. 1231) that would require the President to report to the congressional defense committees semiannually through fiscal year 2009 on U.S. policy and military operations in Afghanistan. The provision would require each report to contain a comprehensive, interagency-coordinated strategy in support of U.S. policy and military operations in Afghanistan, and detailed information on key elements of that strategy.

The Senate recedes with an amendment that would require the President, acting through the Secretary of Defense, to submit a report not later than 90 days after enactment of this Act, and every 180 days thereafter through the end of fiscal year 2010, on progress toward security and stability in Afghanistan. The provision would require the Secretary of Defense to coordinate with the relevant U.S. Government agencies and departments in preparing the report. The report would include a description of a comprehensive U.S. strategy for security and stability in Afghanistan, and detailed information on key elements of that strategy, including U.S. efforts to: strengthen the North Atlantic Treaty Organization International Security Assistance Forces; build the capacity of the Afghanistan National Security Forces; promote the reconstruction and development of Afghanistan, including through U.S.-led Provincial Reconstruction Teams; define the overall strategy and activities of the Department of Defense counternarcotics program; aid the Government of Afghanistan in fighting public corruption and promoting the rule of law; and increase cooperation with Afghanistan's neighboring countries. The provision would also require that the report include a comprehensive set of performance indicators and measures of progress toward long-term security and stability in Afghanistan. The report would be provided to the congressional defense committees, and the Committee on Foreign Affairs of the House of Representatives and the Committee on Foreign Relations of the Senate.

*United States plan for sustaining the Afghanistan National Security Forces (sec. 1231)*

The House bill contained a provision (sec. 1234) that would require the Secretary of Defense, in coordination with the Secretary of State and the Attorney General, to submit a report detailing a long-term plan for sustaining the Afghanistan National Security Forces (ANSF). The provision would require the Secretary of Defense to update the plan every 90 days. The initial report and the updates would be submitted to the congressional defense committees, and the Committee on Foreign Affairs and the Committee on the Judiciary of the House of Representatives and the Committee on Foreign Relations and the Committee on the Judiciary of the Senate.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of Defense, in coordination with the Secretary of State, to submit not later than 90 days after enactment of this Act and annually thereafter through fiscal year 2010, a report detailing a

long-term plan for sustaining the ANSF, with the objective of ensuring that the ANSF will be able to conduct operations independently and effectively and maintain long-term security and stability in Afghanistan. The report would include: a comprehensive strategy and budget, with defined objectives; mechanisms for tracking funding, equipment, training, and services provided to the ANSF; and any actions necessary to assist the Government of Afghanistan to achieve a number of specified goals, and the results of such actions. The report would be submitted to the congressional defense committees, and the Committee on Foreign Affairs of the House of Representatives and the Committee on Foreign Relations of the Senate.

*United States strategy for enhancing security and stability in the border region between Afghanistan and Pakistan (sec. 1232)*

The Senate amendment contained a provision (sec. 1232) that would require the President to report to the congressional defense committees on the U.S. strategy for working with Pakistan to prevent the movement of violent extremist forces across the Pakistan border into Afghanistan and to eliminate safe havens for extremist forces on the territory of Pakistan. The provision would also restrict reimbursements to Pakistan, using Coalition Support Funds, for logistical, military, or other support provided by Pakistan to U.S. military operations unless the President determined that Pakistan was making substantial and sustained efforts to eliminate any safe havens for extremists on its territory.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary of Defense, in consultation with the Secretary of State, to submit a report not later than March 31, 2008, on enhancing security and stability in the region along the border of Afghanistan and Pakistan. The report would include a detailed description of the efforts by Pakistan to eliminate safe havens for the Taliban, Al Qaeda, or other violent extremist forces on its territory and prevent the movement of those forces across Pakistan's border into Afghanistan, and an assessment by the Secretary of Defense regarding whether Pakistan is making substantial and sustained efforts to achieve these objectives.

The provision would also require the Secretary of Defense to provide a notification to the congressional defense committees not less than 15 days before making any reimbursement to Pakistan using Coalition Support Funds for logistical, military, or other support provided by Pakistan to U.S. military operations. The notification would include an itemized description of the logistical, military, or other support to be reimbursed. The notification would be required with respect to reimbursements for support provided by Pakistan during the period beginning on February 1, 2008 and ending on September 30, 2009. The notification would be submitted in unclassified form, but may include a classified annex if necessary.

The conferees are concerned by the lack of transparency regarding the kinds of logistical, military, or other support provided by Pakistan to U.S. military operations and being reimbursed using Coalition Support Funds. The conferees expect that the notifications provided under this section would itemize in detail the

logistical support that the Department of Defense has approved for reimbursement using Coalition Support Funds. The conferees note that for the purposes of this section, the term “logistic support, supplies and services” as defined in section 2350 of title 10, United States Code, means “food, billeting, transportation (including air-lift), petroleum, oils, lubricants, clothing, communications services, medical services, ammunition, base operations support (and construction incident to base operations support), storage services, use of facilities, training services, spare parts and components, repair and maintenance services, calibration services, and port services.” The conferees also expect that the notifications would itemize the military support and equipment, if any, and any other support or services that the Department has approved for reimbursement using Coalition Support Funds.

*Reimbursement of certain coalition nations for support provided to United States military operations (sec. 1233)*

The Senate amendment contained a provision (sec. 1532) that would authorize the Secretary of Defense to reimburse any key cooperating nation for logistical and military support provided by that nation to United States military operations in Operation Iraqi Freedom or Operation Enduring Freedom. The total amount of reimbursements made under this authority during fiscal year 2008 may not exceed \$1.2 billion. Not later than 30 days after the date of enactment of this Act, the Secretary of Defense would be required to prescribe standards for determining what kinds of logistical and military support may be considered reimbursable under this section. The prescribed standards would not take effect until 15 days after the Secretary reports the standards to the congressional defense committees. The Secretary would be required to notify the congressional defense committees not less than 15 days before making any reimbursement under this section.

The House bill contained no similar provision.  
The House recedes.

*Logistical support for coalition forces supporting operations in Iraq and Afghanistan (sec. 1234)*

The Senate amendment contained a provision (sec. 1533) that would authorize the Secretary of Defense to provide up to \$400.0 million in supplies, services, and other logistical support to coalition forces supporting U.S. military and stabilization operations in Iraq and Afghanistan.

The House bill contained no similar provision.  
The House recedes.

Subtitle C—Iraq Refugee Crisis

*Refugee Crisis in Iraq Act (sec. 1241–1249)*

The Senate amendment contained a series of provisions that would: name the subtitle the Iraq Refugee Crisis Act of 2007 (sec. 1571); require the Secretary of State to establish a refugee processing program in Iraq and in countries in the region for Iraqis threatened because of their association with the United States Government (sec. 1572); create a Priority 2 category under the refugee

resettlement program for Iraqi refugees of special humanitarian concern (sec. 1573); expand the current special immigrant visa program (sec. 1574); require the Secretary of State to designate a Minister Counselor in the U.S. Embassy in Iraq and in U.S. embassies in certain other countries in the region to oversee processing of Priority 2 refugees and refugees of special humanitarian concern (sec. 1575); require the Secretary of State to consult with countries with significant populations of Iraqi refugees throughout the implementation of this Act (sec. 1576); allow Iraqis who were denied asylum or had their asylum status terminated after March 1, 2003, solely based on changed country conditions to file a motion to reopen their claim (sec. 1577); require several reports from the executive branch on the implementation of this Act (sec. 1578); and authorize the appropriation of funds necessary to carry out this Act (sec. 1579).

The House bill contained no similar provisions.

The House recedes with an amendment which would consolidate these provisions into one subtitle and would make several technical and clarifying amendments. The two most significant amendments are: (1) a provision which would provide 8 months of resettlement assistance to those individuals granted special immigrant visas; and (2) a modification that would require the Secretary of State to designate a Senior Coordinator, rather than a Minister Counselor, in the U.S. Embassy in Iraq and in U.S. embassies in certain other countries in the region to oversee the processing of Priority 2 refugees and refugees of special humanitarian concern.

The conferees note that they do not intend implementation of this subtitle to have an adverse impact on the quantity or quality of skilled local Iraqi personnel available to support those operations. However, they also recognize that working for the U.S. Government can prove to be a dangerous decision for Iraqi nationals, and express appreciation to those Iraqis for their contributions to the U.S. mission in that country. Therefore, the conferees urge executive branch officials to: consider the length and capacity of service when providing preference in awarding special immigrant visas to Iraqi citizens and nationals who have been working for the U.S. Government; and consider giving higher priority in the processing of refugee status to qualified applicants facing the most immediate or severe risk of harm and Iraqi nationals whose contracts with the U.S. Government constitute a significant portion of their income since June 2003.

The conferees believe that the Secretary of State should conduct the processing of refugees in Iraq with reasonable consideration of the security situation. In addition, the conferees recognize that the security situation might at times adversely affect the ability of the U.S. Government to carry out the necessary vetting requirements of Iraqi nationals seeking entry into the United States under this subtitle. Nonetheless, it remains critical that U.S. Government officials perform the appropriate level of background checks and fulfill other necessary vetting requirements for each Iraqi national processed.

The conferees believe that the United States has a moral responsibility to help those Iraqis who have helped the United States

and believe these provisions take a step toward meeting that responsibility.

Finally, the conferees note that no assistance authorized under this subtitle shall be provided to any person, agent, instrumentality, representative, or official of a country that is found to support international terrorism pursuant to the Export Administration Act, the Arms Export Control Act, the Foreign Assistance Act, or any other provision of law.

#### Subtitle D—Other Authorities and Limitations

*Cooperative opportunities documents under cooperative research and development agreements with NATO organizations and other allied and friendly foreign countries (sec. 1251)*

The House bill contained a provision (sec. 1241) that would modify the timing of the preparation of cooperative opportunities documents for acquisition programs and update the terminology used in statute to describe the documents.

The Senate amendment contained a similar provision (sec. 1211).

The House recedes.

*Extension and expansion of temporary authority to use acquisition and cross-servicing agreements to lend military equipment for personnel protection and survivability (sec. 1252)*

The Senate amendment contained a provision (sec. 1212) that would extend through September 30, 2008, the temporary authority provided under section 1202 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109–364) for the Secretary of Defense to loan under acquisition and cross-servicing agreements equipment for personnel protection and survivability to foreign military forces participating in combined operations with the United States in Iraq and Afghanistan. The provision would also expand to whom these loans of equipment may be made, to include foreign military forces participating in combined operations with the United States as part of a peacekeeping operation under the United Nations Charter or another international agreement.

The House bill contained no similar provision.

The House recedes.

The conferees emphasize that the authority for section 1202 is intended to permit the temporary loan of equipment to foreign military forces that are participating in a specified combined operation with the United States armed forces, for the purpose of providing personnel protection or aiding in the personnel survivability of such foreign military forces during those operations. The conferees note that equipment loaned under this authority may be used by the military forces of the recipient country for not longer than 1 year, at which time the equipment will be returned to the United States under the terms of the acquisition and cross-servicing agreement between the United States and the recipient country.

*Acceptance of funds from the Government of Palau to defray expenditures attendant to the operation of United States military Civic Action Team in Palau (sec. 1253)*

The Senate amendment contained a provision (sec. 1213) that would amend section 1933(a) of title 48, United States Code, to allow the Secretary of Defense to accept funds from the Government of Palau to defray expenditures that the Department of Defense makes in connection with the United States military Civic Action Team in Palau.

The House bill contained no similar provision.

The House recedes with a technical amendment.

*Repeal of requirement relating to North Korea (sec. 1254)*

The Senate amendment contained a provision (sec. 1217) that would prohibit the Secretary of Defense from obligating or expending any funds authorized to be appropriated under section 1207 of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109-163) until the administration has fully implemented section 1211 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109-364).

The House bill contained no similar provision.

The House recedes with an amendment that would repeal subsection (a) of section 1211 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109-364).

The conferees note that section (a) of section 1211 mandated the appointment of a North Korea Policy Coordinator because of the conferees' concern that the administration lacked a coordinated approach to addressing the North Korean nuclear threat. However, more recently, the conferees have noted progress in the Six-Party Talks with North Korea, and are satisfied that the Assistant Secretary of State for East Asian and Pacific Affairs has sufficient authority in these negotiations. Therefore, the conferees deem that the intent of section 1211 (a) has been met.

*Justice for Osama bin Laden and other leaders of al Qaeda (sec. 1255)*

The Senate amendment contained a provision (sec. 1219) that would authorize the Secretary of State to offer a reward of \$50.0 million for the capture, death, or information leading to the capture or death of Osama bin Laden.

The Secretary of State and the Secretary of Defense, in coordination with the Director of National Intelligence, shall jointly submit to Congress, not later than 90 days after enactment of this Act, and every 90 days thereafter, a report on the progress made in bringing Osama bin Laden and other leaders of al Qaeda to justice.

The House bill contained no similar provision.

The House recedes with an amendment that would limit the report requirement to two reports: (1) the initial report due 90 days after enactment of this Act; and, (2) a report a year later.

The conferees believe that a foremost objective of U.S. counterterrorist policy should be protecting U.S. persons and property by capturing or killing Osama bin Laden, and other leaders of the al Qaeda network, and destroying the al Qaeda network.

*Extension of Counterproliferation Program Review Committee (sec. 1256)*

The House bill contained a provision (sec. 1242) that would extend the Counterproliferation Program Review Committee (CPRC) established by section 1605 of the National Defense Authorization Act for Fiscal Year 1994 (Public Law 108–136) through 2013. This provision would also add additional members to the committee and change the requirement that the committee submit a report annually to a biennial reporting requirement with the first biennial report due on March 1, 2009 and each odd-numbered year thereafter through 2013.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would limit the new members of the CPRC to the Department of State and the Department of Homeland Security and would require the first biennial report to be submitted on May 1, 2009.

*Sense of Congress on the Western Hemisphere Institute for Security Cooperation (sec. 1257)*

The House bill contained a provision (sec. 1243) that would express the sense of Congress supporting the Department of Defense's education and training facility, the Western Hemisphere Institute for Security Cooperation.

The Senate amendment (sec. 1067) contained a similar provision.

The Senate recedes with a technical amendment.

*Sense of Congress on Iran (sec. 1258)*

The Senate amendment contained a provision (sec. 1538) that would state the sense of the Senate that Iran's Islamic Revolutionary Guards Corps (IRGC) should be designated as a foreign terrorist organization and placed on the list of Specially Designated Global Terrorists established by the International Emergency Economic Powers Act.

The House bill contained no similar provision.

The House recedes with an amendment that would clarify that it is in the U.S. national interest that the Government of Iran not use extremists in Iraq to subvert or co-opt the institutions of the legitimate Government of Iraq.

The conferees are concerned by reports, including the testimony to Congress in September 2007 of General David Petraeus, Commander, Multi-National Forces, Iraq, and Ambassador Ryan Crocker, U.S. Ambassador to Iraq, regarding Iranian activity in Iraq that is harmful to the Iraqi state and coalition forces in Iraq. The conferees strongly endorse the administration's pursuit of a diplomatic approach to address this Iranian threat. The conferees note that on October 25, 2007, the Department of State announced that it designated the IRGC an entity of proliferation concern under Executive Order 13382, and the Department of the Treasury designated the IRGC's Qods Force under Executive Order 13224 for providing material support to the Taliban and other terrorist organizations.

## Subtitle E—Reports

*One-year extension of update on report on claims relating to the bombing of the Labelle Discotheque (sec. 1261)*

The Senate amendment contained a provision (sec. 1233) that would provide for a 1-year extension of the requirement to provide an update on the report on claims related to the bombing of the Labelle Discotheque.

The House bill contained no similar provision.

The House recedes with a technical amendment.

*Report on United States policy toward Darfur, Sudan (sec. 1262)*

The House bill contained a provision (sec. 1235) that would require the Secretary of Defense to submit a report on the operational status of the airfield located in Abeche, Chad.

The Senate amendment contained a similar provision (sec. 1235).

The House recedes with an amendment that would incorporate elements of a report on U.S. policy toward Darfur, Sudan that was in the Senate amendment (sec. 1234). The amendment would also make other clarifying and technical changes, and would repeal a similar reporting requirement on the situation in Darfur, Sudan required by section 1227 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109–364).

*Inclusion of information on asymmetric capabilities in annual report on military power of the People's Republic of China (sec. 1263)*

The Senate amendment contained a provision (sec. 1236) that would amend section 1202(b) of the National Defense Authorization Act for Fiscal Year 2000 (Public Law 106–65) to include information on asymmetric capabilities in the annual report on the military power of the People's Republic of China.

The House bill contained no similar provision.

The House recedes with a clarifying amendment.

*Report on application of the Uniform Code of Military Justice to civilians accompanying the armed forces during a time of declared war or contingency operation (sec. 1264)*

The Senate amendment contained a provision (sec. 1237) that would require the Secretary of Defense to report to Congress on the status of implementing a requirement to make the Uniform Code of Military Justice applicable to military contractors during a time of war or a contingency operation.

The House bill contained no similar provision.

The House recedes with an amendment that would specify matters to be addressed in the report.

*Report on family reunions between United States citizens and their relatives in North Korea (sec. 1265)*

The Senate amendment contained a provision (sec. 1238) that would require the President to submit to Congress, not later than 180 days after the date of enactment of this Act, a report on family

reunions between United States citizens and their relatives in North Korea.

The House bill contained no similar provision.

The Senate recedes with an amendment that would modify elements of the required report.

The conferees expect the report to include information regarding what additional actions, if any, the President considers desirable and feasible in order to facilitate safe and transparent reunions of U.S. citizens and their relatives in North Korea, wherever those reunions may take place.

The conferees support the ongoing Six-Party Talks with North Korea and placing the priority on the de-nuclearization of the Korean peninsula, but note that normalization, which would encompass a number of issues, is also being addressed within the talks.

*Reports on prevention of mass atrocities (sec. 1266)*

The Senate amendment contained a provision (sec. 1239) that would require both the Secretary of State and the Secretary of Defense to submit a report not later than 120 days after the date of enactment of this Act, to the congressional defense committees, the Committee on Foreign Relations of the Senate, and the Committee on Foreign Affairs of the House of Representatives assessing their respective capabilities to provide training and guidance to the command of an international intervention force that seeks to prevent mass atrocities.

The House bill contained no similar provision.

The House recedes with an amendment that would require the report to be due 180 days after the date of enactment of this Act.

*Report on threats to the United States from ungoverned areas (sec. 1267)*

The Senate amendment contained a provision (sec. 1042) that would require the Secretary of Defense and the Secretary of State, in coordination with the Director of National Intelligence, to report on the threat posed to the United States by ungoverned areas, especially as they relate to terrorist groups and individuals who aim their activities at the United States and its allies.

The House bill contained no similar provision.

The House recedes with a clarifying amendment.

LEGISLATIVE PROVISIONS NOT ADOPTED

*Limitation on assistance to the Government of Thailand*

The Senate amendment contained a provision (sec. 1215) that would require the Secretary of Defense to notify the Committees on Armed Services of the Senate and the House of Representatives, the Senate Foreign Relations Committee, and the House Foreign Affairs Committee 15 days prior to obligating or expending funds to initiate any new types of military assistance activities with Thailand.

The House bill contained no similar provision.

The Senate recedes.

The conferees note that the administration appears to have conducted a judicious review of all ongoing assistance to the Gov-

ernment of Thailand, and urge the administration to apply a uniform standard when considering the provision of military and other types of foreign assistance to that Government.

The conferees also note that Thailand appears to be making progress towards restoring civilian democracy in the country via elections scheduled for December 2007, and urge the current Government of Thailand to lift martial law countrywide and take all necessary measures to ensure that the elections are free and fair.

*Presidential report on policy objectives and United States strategy regarding Iran*

The Senate amendment contained a provision (sec. 1216) that would prohibit not more than 75 percent of the amount authorized for the Office of the Under Secretary of Defense for Policy from being obligated until the report required by section 1213(b) of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109-364) is submitted to Congress.

The House bill contained no similar provision.

The Senate recesses.

The conferees note that the report was submitted.

*Report on Department of Defense efforts to build the capacity of the Government of Iraq to carry out reconstruction activities in Iraq*

The House bill contained a provision (sec. 1223) requiring the Secretary of Defense to submit a report to Congress on efforts of the Department of Defense to build the capacity of the Government of Iraq to carry out reconstruction activities in Iraq.

The Senate amendment contained no similar provision.

The House recesses.

*Sense of Congress on responsibilities of the Iraqi Council of Ministers to enact laws to achieve political reform and diminish support for the insurgency in Iraq*

The House bill contained a provision (sec. 1226) expressing the sense of Congress that the Iraqi Council of Representatives should not recess for an extended period of time without first making substantial progress toward enacting certain laws, other legislation, and constitutional amendments.

The Senate amendment contained no similar provision.

The House recesses.

*Report on planning and implementation of the United States engagement and policy toward Darfur*

The Senate amendment contained a provision (sec. 1234) that would require a report on planning and implementation of the United States engagement and policy toward Darfur.

The House bill contained no similar provision.

The Senate recesses.

The conferees note that this reporting requirement has been incorporated into another provision in title XII of this act.

*Report on progress of the Department of Defense's counternarcotics program for Afghanistan*

The House bill contained a provision (sec. 1233) that would require the Secretary of Defense to submit to Congress, not later than 90 days after the date of enactment of this Act, a report on the progress of the Department of Defense's counternarcotics program for Afghanistan.

The Senate amendment contained no similar provision.

The House recedes.

The conferees note that House section 1233 and the counternarcotics component of Senate section 1231 were reconciled and incorporated in a larger report on U.S. policy in Afghanistan that is included in another provision of this Act.

The conferees note with concern the administration's renewed focus on aerial spraying as an option to be considered by the Government of Afghanistan for non-negotiated forced eradication of opium poppies. The conferees recommend that the Secretary of Defense evaluate the potential consequences of aerial spraying, including the impact on perceptions of the Afghan population, and on achieving the larger strategic goals of the U.S. military in Afghanistan.

*Sense of Congress concerning the strategic military capabilities and intentions of the People's Republic of China*

The House bill contained a provision (sec. 1244) that would express the sense of Congress concerning the strategic military capabilities and intentions of the People's Republic of China.

The Senate amendment contained no similar provision.

The House recedes.

The conferees note China's continued investment in strategic military capabilities that could be used to support power projection and access denial operations beyond the Asia Pacific region, and the lack of transparency surrounding the strategic military capabilities and intentions relating to China's military modernization. The Pentagon's 2006 Quadrennial Defense Review Report (QDR) found that China is at a strategic crossroads and that, "of the major and emerging powers, China has the greatest potential to compete militarily with the United States." The conferees note that during the last year, China demonstrated such potential, including the October 2006 broach of a Chinese SONG-class diesel-electric submarine in close proximity to the USS *Kitty Hawk* aircraft carrier in international waters and the January 2007 test of a direct ascent anti-satellite missile against a Chinese weather satellite in low-earth orbit.

The conferees encourage the Secretary of Defense to expand efforts to develop an accurate assessment and understanding of China's strategic military modernization and strategic intentions, particularly with regard to its sea- and space-based strategic capabilities.

*Sense of Congress on the capture of Osama bin Laden and the al Qaeda leadership*

The Senate amendment contained a provision (sec. 1544) that would express the sense of Congress that it should be the policy of

the United States Government that the foremost objective of United States counterterrorist operations is to protect United States persons and property from terrorist attacks by capturing or killing Osama bin Laden, Ayman al-Zawahiri, and other leaders of al Qaeda and destroying the al Qaeda network.

The House bill contained no similar provision.

The Senate recedes.

The conferees note that the underlying concern motivating this provision is addressed by another provision elsewhere in this Act, and that the statement of managers accompanying that provision contains the concerns expressed in the Senate amendment.

### TITLE XIII—COOPERATIVE THREAT REDUCTION WITH STATES OF THE FORMER SOVIET UNION

#### *Specification of Cooperative Threat Reduction programs and funds (sec. 1301)*

The Senate amendment contained a provision (sec. 1301) that would specify the Cooperative Threat Reduction programs and funds.

The House bill contained a similar provision (sec. 1301).

The House recedes.

#### *Funding allocations (sec. 1302)*

The House bill contained a provision (sec. 1302) that would authorize \$398.0 million for the Cooperative Threat Reduction (CTR) program. The provision would also authorize a specific amount for each CTR program element, require notification to Congress 30 days before the Secretary of Defense obligates and expends fiscal year 2008 funds for purposes other than those specifically authorized, and provide limited authority to vary the individual CTR program amounts. The authority to vary the amount of funds for three of the program elements would be limited to increases of no more than 125 percent of the specific amount authorized. The Secretary would be required to notify Congress 15 days in advance of varying the amounts for any CTR program.

The Senate amendment contained a similar provision (sec. 1302) that would authorize \$448.0 million for the CTR program; would not include the 125 percent limit on the authority of the Secretary to vary the amounts in the CTR program elements; and would include the 15 day notification requirement.

The House recedes with an amendment that would authorize \$428.0 million for the CTR program, an increase of \$80.0 million above the budget request. The conferees agree to provide \$10.0 million for new CTR initiatives outside the former Soviet Union to support the new authority for such initiatives provided elsewhere in this Act. The conferees agree to provide \$5.0 million for chemical weapons destruction in Libya, and \$1.0 million for chemical weapons destruction in Shchuch'ye, Russia. In the event the Secretary is unable to use all or part of the authorized funding in furtherance of this new authority, the Secretary may use such funds for any other CTR program elements after the required 15 day notification period.

*Specification of Cooperative Threat Reduction programs in states outside the former Soviet Union (sec. 1303)*

The Senate amendment contained a provision (sec. 1303) that would amend section 1501 of the National Defense Authorization Act for Fiscal Year 1997 (Public Law 104–201) to permit the Department of Defense to conduct Cooperative Threat Reduction programs outside the former Soviet Union (FSU). The provision would specify the nature of the programs that could be carried out.

The House bill contained no similar provision.

The House recedes with an amendment that would modify the nature of the programs that could be carried out outside the FSU and would include programs to facilitate safe and secure transportation and storage of nuclear weapons, weapons components and their delivery vehicles, and programs to expand military-to-military and other defense contacts.

*Repeal of restrictions on assistance to states of the former Soviet Union for Cooperative Threat Reduction (sec. 1304)*

The Senate amendment contained a provision (sec. 1305) that would repeal certain provisions of the Soviet Nuclear Threat Reduction Act of 1991 (Public Law 102–228), the Cooperative Threat Reduction Act of 1993 (Public Law 103–160), and section 1305 of the National Defense Authorization Act for Fiscal Year 2000 (Public Law 106–65) that require a number of annual certifications before any Cooperative Threat Reduction funds may be obligated in any fiscal year. In addition, the provision would repeal section 1303 of the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108–375), which authorized the President to waive the annual certification requirements. The provision would also clarify application of certain other provisions of law.

The House bill contained a similar provision (sec. 1305).

The House recedes.

*Modification of authority to use Cooperative Threat Reduction funds outside the former Soviet Union (sec. 1305)*

The House bill contained a provision (sec. 1306) that would amend section 1308 of the National Defense Authorization Act for Fiscal Year 2004 (2004 NDAA) (Public Law 108–136). Section 1308 authorizes the President to utilize the Cooperative Threat Reduction (CTR) program funds for emergency or other short-term projects outside the former Soviet Union (FSU). The House provision would amend section 1308 to allow the Secretary of Defense, with the concurrence of the Secretary of State, to: utilize the CTR program funds for an emergency; repeal the \$50.0 million funding limitation on the amount that could be obligated for an emergency; and require the Secretary of Defense to notify Congress 15 days prior to exercising this authority, unless such advance notification would severely undermine the national security of the United States, in which case the notification would be made within 10 days of obligating CTR funds.

The Senate amendment contained a similar provision (sec. 1304) but would not repeal the \$50.0 million funding limitation and would not modify the notification requirements.

The Senate recedes with an amendment that would make clarifying changes and would permit the Secretary of Defense and the Secretary of State to notify Congress no later than 10 days after the funds were obligated.

The conferees note that prior to the enactment of the 2004 NDAA, CTR authority was limited to programs conducted in the states of the FSU. Section 1308 of the 2004 NDAA provided authority for the CTR program to address emergency or other short-term projects outside the FSU. Elsewhere in this Act, the conferees have included a provision that would provide new authority for the CTR program to expand its programmatic authority on a regular, non-emergency basis to states outside the FSU. With this new authority, the utility of the section 1308 emergency authority may diminish. The conferees direct the Secretary of Defense to submit, with the budget request for the CTR program for fiscal year 2010, an assessment as to whether there is a continued need for the emergency authority provided by section 1308 of the 2004 NDAA.

*New initiatives for the Cooperative Threat Reduction program (sec. 1306)*

The House bill contained a provision (sec. 1303) that would set forth the sense of Congress that the Department of Defense (DOD) should expand and strengthen the Cooperative Threat Reduction (CTR) program. This would include expansion of the scope of CTR program activities within Russia and the former Soviet Union (FSU) as well as in states outside the FSU, including those in Asia and the Middle East, and specifically on the Korean Peninsula. In addition, the provision would require the Secretary of Defense to enter into an arrangement with the National Academy of Sciences (NAS) under which the NAS would conduct a study that would analyze possible options for strengthening and expanding the CTR program and make related recommendations. The provision would also require the Secretary to develop and submit to Congress by March 31, 2008, a report on the NAS study including the Secretary's assessment of the study together with a specific action plan for new CTR initiatives.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would make clarifying changes and would focus the scope of the NAS study on identification of threats that are most appropriately addressed by the CTR program. In addition, the amendment would allow additional time for both the NAS study and the report to be prepared by the Secretary.

To ensure timely delivery of the study described in this section, the conferees strongly urge all U.S. Government departments or agencies that provide the NAS with access to classified material for use in the study to complete promptly any necessary classification reviews of the study or related documents.

The conferees recognize that there are a wide variety of global threats arising from the proliferation of nuclear, chemical, and biological weapons and weapons-related materials, technologies, and expertise. The conferees emphasize that addressing these threats will require the resources of many agencies of the United States Government, which in turn must be well coordinated with other

states and international entities working in broad partnerships. The partnerships should also focus on national programs that can be sustained in the long-term.

The conferees expect that the NAS study and the Secretary's report will provide an analysis of the threats that could be addressed by the CTR program both within and outside the FSU. The conferees hope that the NAS study will identify potential opportunities for Russia and other states to work together with the United States to establish deeper partnerships to address these threats.

The conferees support strengthening and expanding, as much as possible, the programs designed to address these threats, including the CTR program. The CTR program is critical to U.S. national security and should be a top priority. Significant progress has been made over the last 10 years, but much remains to be done. The conferees believe the CTR program would benefit from additional funding to support new and expanded activities both within and outside the FSU. Elsewhere in this Act, the conferees have included a number of provisions and additional funding for the CTR program to ensure that wherever possible, actions are taken to address threats involving nuclear, chemical, and biological weapons and weapons-related materials, technologies, and expertise.

*Report relating to chemical weapons destruction at Shchuch'ye, Russia (sec. 1307)*

The House bill contained a provision (sec. 1304) that would require the Secretary of Defense to notify the congressional defense committees within 30 days of the commencement of negotiations on, or the signing or finalization of, an agreement with the Russian Federation that would change implementation of the Shchuch'ye chemical weapons destruction project, under the Cooperative Threat Reduction (CTR) program, in any manner inconsistent with the purpose and intent of the amounts authorized and appropriated for the project. The provision would also require the Secretary to submit a report to the congressional defense committees on the Shchuch'ye chemical weapons destruction project, setting forth a current and detailed cost estimate for project completion and a specific strategic and operating plan for project completion, which includes contractual arrangements, plans for project management and oversight, quality assurance and sustainability measures, metrics for measuring project progress, coordination plans, and a project completion date. In addition, the provision would prohibit the Secretary from implementing any new or modified agreement with Russia relating to the Shchuch'ye project, as described in the provision, until 90 days after the report and the signed and finalized agreement have been submitted to the congressional defense committees, and the Secretary makes a series of certifications with respect to the project.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary to submit a report to the congressional defense committees only on the Shchuch'ye chemical weapons destruction project. This report would include: a current and detailed cost estimate for project completion; and a specific strategic and operating plan for project completion setting forth plans for project management and

oversight, quality assurance and sustainability measures, metrics for measuring project progress, and a projected project completion date. This report would be due no later than 90 days after the date of enactment of this Act.

The conferees believe that completion of the chemical weapons destruction project at Shchuch'ye, Russia, should be a high priority for the CTR program and urge the Secretary to take necessary steps to ensure that the facility is adequately supported so that it can begin to destroy the stockpile of Russian chemical weapons as soon as possible.

*National Academy of Sciences study of prevention of proliferation of biological weapons (sec. 1308)*

The Senate amendment contained a provision (sec. 1306) that would require the Secretary of Defense to enter into an arrangement with the National Academy of Sciences (NAS) under which the NAS would carry out a study to identify areas for cooperation with states outside the former Soviet Union under the Cooperative Threat Reduction program to prevent the proliferation of biological weapons and dual-use materials. The provision would also require the Secretary to submit a report on the NAS study, including the Secretary's assessment of the NAS report and any actions the Secretary plans to take to implement its recommendations, to the Committees on Armed Services of the Senate and the House of Representatives on December 31, 2008.

The House bill contained no similar provision.

The House recedes with an amendment that would make clarifying changes and would modify the reporting requirement so that the Secretary's report would be provided to Congress 90 days after receipt of the NAS report.

To ensure timely delivery of the study described in this section, the conferees strongly urge all U.S. Government departments or agencies that provide the NAS with access to classified material for use in the study to complete promptly any necessary classification reviews of the study or related documents.

LEGISLATIVE PROVISION NOT ADOPTED

*Clarification of amounts for Cooperative Threat Reduction programs*

The House bill contained a provision (sec. 1307) that would increase the amounts for the Cooperative Threat Reduction program by \$480,000.

The Senate amendment contained no similar provision.

The House recedes.

## TITLE XIV—OTHER AUTHORIZATIONS

### Subtitle A—Military Programs

*Summary and explanation of tables*

This title contains funding authorizations for working capital and revolving funds, the National Defense Sealift Fund, the Defense Health Program, the destruction of chemical munitions, drug

interdiction and counterdrug activities, and funding for the Department of Defense Inspector General and other programs which contain elements of more than one type of traditional funding account (such as procurement or operation and maintenance) inside a single account.

The conference agreement also includes funding for a Strategic Readiness Fund which was included in title XVII of the House bill and is included in title XIV of the conference agreement.

This title includes legislative proposals regarding the national defense stockpile, and authorizes trust fund expenditures for the Armed Forces Retirement Home, which is a Department of Defense civil program funded outside the national defense budget function.

The following tables provide the program-level detailed guidance for the funding authorized in title XIV of this Act. The tables also display the funding requested by the administration in the fiscal year 2008 budget request for these programs, and indicate those programs for which the conferees either increased or decreased the requested amounts. Unless noted in this report, funding changes to the budget request are made without prejudice.

*Working capital funds (sec. 1401)*

The House bill contained a provision (sec. 302) that would authorize fiscal year 2008 funds for Defense Working Capital Funds and the National Defense Sealift Fund.

The Senate amendment contained a similar provision for working capital funds (sec. 1401).

The conference agreement includes this provision.

*National Defense Sealift Fund (sec. 1402)*

The House bill contained a provision (sec. 302) that would authorize fiscal year 2008 funds for the National Defense Sealift Fund and for working capital funds.

The Senate amendment contained a similar provision authorizing appropriations for the National Defense Sealift Fund (sec. 1402).

The conference agreement includes this provision.

*Defense Health Program (sec. 1403)*

The House bill contained a provision (sec. 303) that would authorize fiscal year 2008 funds for the Defense Health Program and other programs.

The Senate amendment contained a similar provision authorizing appropriations for the Defense Health Program (sec. 1403).

The conference agreement includes this provision.

*Chemical agents and munitions destruction, Defense (sec. 1404)*

The House bill contained a provision (sec. 303) that would authorize fiscal year 2008 funds for chemical agents and munitions destruction and other programs.

The Senate amendment contained a similar provision authorizing appropriations for chemical agents and munitions destruction (sec. 1404).

The conference agreement includes this provision.

*Drug Interdiction and Counter-Drug Activities, Defense-wide (sec. 1405)*

The House bill contained a provision (sec. 303) that would authorize fiscal year 2008 funds for drug interdiction and counterdrug activities and other programs.

The Senate amendment contained a similar provision authorizing appropriations for drug interdiction and counterdrug activities (sec. 1405).

The conference agreement includes this provision.

*Defense Inspector General (sec. 1406)*

The House bill contained a provision (sec. 303) that would authorize fiscal year 2008 funds for the Department of Defense Inspector General and other programs.

The Senate amendment contained a similar provision authorizing appropriations for the Inspector General (sec. 1406).

The conference agreement includes this provision.

Subtitle B—National Defense Stockpile

*Authorized uses of National Defense Stockpile funds (sec. 1411)*

The House bill contained a provision (sec. 3301) that would authorize the use of funds from the National Defense Stockpile Transaction Fund for the operation and maintenance of the National Defense Stockpile for fiscal year 2008.

The Senate amendment contained no similar provision.  
The Senate recedes.

*Revisions to required receipt objectives for previously authorized disposals from the National Defense Stockpile (sec. 1412)*

The House bill contained a provision (sec. 3302) that would authorize revisions on limitations in asset sales from the National Defense Stockpile.

The Senate amendment contained a similar provision (sec. 1413).

The Senate recedes with an amendment that would amend section 3402(b) of the National Defense Authorization Act for Fiscal Year 2000 (Public Law 106–65) to increase the Department of Defense's stockpile commodity disposal authority from \$600.0 million to \$710.0 million. The Senate amendment would further amend section 3303(a) of the Strom Thurmond National Defense Authorization Act for Fiscal Year 1999 (Public Law 105–261), as amended by section 3302 of the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108–375), and section 3302(a) of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109–163) to increase the Department's disposal authority from \$1,016.0 million to \$1,066.0 million.

*Disposal of ferromanganese (sec. 1413)*

The Senate amendment contained a provision (sec. 1411) that would require the Secretary of Defense to certify that disposal of ferromanganese from the National Defense Stockpile above 50,000 and 75,000 tons in fiscal year 2008 is in the national defense interest, will not disrupt markets, and is consistent with stockpile requirements. The Senate amendment would also require the Department of Defense to wait 30 days after certification before disposing of additional ferromangangese.

The House bill contained no similar provision.

The House recedes with an amendment that would allow for certification when the Department has contracts for 50,000 and 75,000 tons and would eliminate the 30-day wait period.

*Disposal of chrome metal (sec. 1414)*

The Senate amendment contained a provision (sec. 1412) that would require the Secretary of Defense to certify that disposal of chrome metal from the National Defense Stockpile above 500 and 750 short tons in fiscal year 2008 is in the national defense interest, will not disrupt markets, and is consistent with stockpile requirements. The Senate amendment would also require the Department of Defense to wait 30 days after certification before disposing of additional chrome metal.

The House bill contained no similar provision.

The House recedes.

Subtitle C—Armed Forces Retirement Home

*Authorization of appropriations for Armed Forces Retirement Home*  
(sec. 1421)

The House bill contained a provision (sec. 422) that would authorize \$61.6 million to be appropriated for fiscal year 2008 from the Armed Forces Retirement Home Trust Fund for operation of the Armed Forces Retirement Home.

The Senate amendment contained an identical provision (sec. 1421).

The conference agreement includes this provision.

*Administration and oversight of the Armed Forces Retirement Home*  
(sec. 1422)

The Senate amendment contained a provision (sec. 1422) that would amend the Armed Forces Retirement Home Act of 1991 to require: (1) treatment of the Armed Forces Retirement Home as a military facility of the Department of Defense for the purpose of entering into contracts, agreements, or transactions regarding real property; (2) accreditation by a nationally recognized civilian accrediting organization for each aspect of each facility of the Retirement Home; (3) appointment of a Chief Medical Officer of the Retirement Home; and (4) the Inspector General of the Department of Defense to inspect the Retirement Home every 2 years.

The House bill contained no similar provision.

The House recedes with an amendment that would: (1) provide that the administration of the Retirement Home remains under the direct authority, control, and administration of the Secretary of Defense, (2) require the Secretary of Defense to designate the Deputy Director of the TRICARE Management Activity to serve as the senior medical advisor for the Retirement Home; and (3) require the Inspector General of the Department of Defense to inspect the Retirement Home in any year in which a facility of the Retirement Home is not inspected by a nationally recognized civilian accrediting organization. The amendment deleted the requirement that the Retirement Home be treated as a military facility of the Department of Defense for the purpose of entering into contracts, agreements, or transactions regarding real property.

LEGISLATIVE PROVISIONS NOT ADOPTED

*Additional amount for drug interdiction and counterdrug activities with respect to Afghanistan*

The Senate amendment contained a provision (sec. 1405A) that would transfer funding for drug interdiction and counterdrug activities in Afghanistan between titles of this Act.

The House bill contained no similar provision.

The Senate recedes.

The conference outcome is reflected in the tables of this report.

*Reduction in certain authorizations due to savings from lower inflation*

The Senate amendment contained a provision (sec. 1407) that would reduce the amounts authorized in Division A of this Act by \$1.6 billion to bring the inflation assumptions applicable to purchases by the Department of Defense for fiscal year 2008 in line with the economic assumptions previously adopted by Congress in the budget resolution for fiscal year 2008.

The House bill contained no similar provision.

The Senate recesses.

*Pilot program to establish an Army Wounded Warrior battalion at an appropriate active duty base*

The House bill contained a provision (sec. 1419) that would require the Secretary of the Army to establish a pilot program, known as the Army Wounded Warrior Program, based on the Wounded Warrior Regiment program of the Marine Corps.

The Senate amendment contained no similar provision.

The House recesses.

The conferees are aware that the Army has already established Warrior Transition Units that are similar in function to the Marine Wounded Warrior Regiment program.

*Establishment of medical support fund for support of members of the armed forces returning to military service or civilian life*

The House bill contained a provision (sec. 1422) that would require the establishment of a medical support fund on the books of the Treasury to support programs and activities relating to the medical treatment, care, rehabilitation, recovery, and support of wounded and injured service members and their families, and authorized \$50.0 million for the fund.

The Senate amendment contained no similar provision.

The House recesses.

*Oversight Board for Wounded Warriors*

The House bill contained a provision (sec. 1423) that would require the establishment of a 12 member board to be known as the Oversight Board for Wounded Warriors to provide oversight of medical care, quality of life, administrative processing, and family programs supporting wounded warriors and to provide advice and counsel to Congress and the Department of Defense about how the programs can be made more efficient and effective.

The Senate amendment contained no similar provision.

The House recesses.

*Study and report of waiting periods for appointments at Department of Veterans Affairs medical facilities*

The House bill contained a provision (sec. 1438) that would require the Secretary of Veterans Affairs to conduct a study on the average length of time between the desired date for which a veteran seeks to schedule an appointment for health care at a Department of Veterans Affairs medical facility and the date on which such appointment is completed.

The Senate amendment contained no similar provision.

The House recesses.

*Increase in physicians at hospitals of the Department of Veterans Affairs*

The House bill contained a provision (sec. 1453) that would require the Secretary of Veterans Affairs to increase the number of resident physicians at hospitals of the Department of Veterans Affairs.

The Senate amendment contained no similar provision.

The House recesses.

**TITLE XV—AUTHORIZATION OF ADDITIONAL APPROPRIATIONS FOR OPERATION IRAQI FREEDOM AND OPERATION ENDURING FREEDOM**

*Overview*

The President's budget as submitted in February requested \$141.7 billion in emergency funding for the Department of Defense for Operation Iraqi Freedom (OIF), Operation Enduring Freedom (OEF), and for other purposes, including some of the "grow the force" costs of increasing Army and Marine Corps active-duty personnel levels. The Concurrent Resolution on the Budget for Fiscal Year 2008 fully funded this amount.

After the House and Senate bills had been reported, and the Concurrent Resolution on the Budget had been adopted, the President submitted two additional budget amendments. On July 31, 2007, the President requested an additional \$5.3 billion for Mine-Resistant Ambush Protected (MRAP) vehicles. On October 22, 2007, the President requested an additional \$42.3 billion for operations in Iraq and Afghanistan and for other purposes, bringing the total requested for war-related purposes for fiscal year 2008 to \$189.3 billion.

The summary table and detailed tables that follow summarize the funding requested in February, July, and October as emergency spending for these operations, together with the conferee's actions on these requests. Funding for Department of Defense operations in Iraq and Afghanistan, with the exception of funding for military construction projects to support these operations, is included in title XV of this Act. Funding for military construction projects in Iraq and Afghanistan is included in title XXIX of this Act.

EXPLANATION OF TABLES

*Explanation of tables*

The following tables provide the program-level detailed guidance for the funding authorized in title XV of this Act. The tables also display the funding requested by the administration in the fiscal year 2008 budget request for war-related programs, and indicate those programs for which the conferees either increased or decreased the requested amounts. Unless noted in this report, funding changes to the budget request are made without prejudice.

## LEGISLATIVE PROVISIONS ADOPTED

*Purpose (sec. 1501)*

The House bill contained a provision (sec. 1501) that would state the purpose of the funds provided in this title and would also state a policy with respect to the provision of such funds.

The Senate amendment contained a similar provision (sec. 1521).

The Senate recedes with an amendment to delete the statement of policy.

*Army procurement (sec. 1502)*

The House bill contained a provision (sec. 1502) that would authorize additional fiscal year 2008 funds for Army procurement to support operations in Iraq and Afghanistan.

The Senate amendment contained a similar provision (sec. 1501).

The conference agreement includes this provision.

Unless noted explicitly in the statement of managers, all changes are made without prejudice.

*Navy and Marine Corps procurement (sec. 1503)*

The House bill contained a provision (sec. 1503) that would authorize additional fiscal year 2008 funds for Navy and Marine Corps procurement to support operations in Iraq and Afghanistan.

The Senate amendment contained a similar provision (sec. 1502).

The conference agreement includes this provision.

Unless noted explicitly in the statement of managers, all changes are made without prejudice.

*Air Force procurement (sec. 1504)*

The House bill contained a provision (sec. 1504) that would authorize additional fiscal year 2008 funds for Air Force procurement to support operations in Iraq and Afghanistan.

The Senate amendment contained a similar provision (sec. 1503).

The conference agreement includes this provision.

Unless noted explicitly in the statement of managers, all changes are made without prejudice.

*Joint Improvised Explosive Device Defeat Fund (sec. 1505)*

The House bill contained a provision (sec. 1505) that would authorize additional fiscal year 2008 funds for the Joint Improvised Explosive Device Defeat Fund to support operations in Iraq and Afghanistan.

The Senate amendment contained a similar provision (sec. 1510).

The conference agreement includes this provision.

Unless noted explicitly in the statement of managers, all changes are made without prejudice.

*Defense-wide activities procurement (sec. 1506)*

The House bill contained a provision (sec. 1506) that would authorize additional fiscal year 2008 funds for defense-wide procurement to support operations in Iraq and Afghanistan.

The Senate amendment contained a similar provision (sec. 1504).

The conference agreement includes this provision.

Unless noted explicitly in the statement of managers, all changes are made without prejudice.

*Research, Development, Test, and Evaluation (sec. 1507)*

The House bill contained a provision (sec. 1507) that would authorize additional fiscal year 2008 funds for Research, Development, Test, and Evaluation to support operations in Iraq and Afghanistan.

The Senate amendment contained a similar provision (sec. 1505).

The conference agreement includes this provision.

Unless noted explicitly in the statement of managers, all changes are made without prejudice.

*Operation and maintenance (sec. 1508)*

The House bill contained a provision (sec. 1508) that would authorize additional fiscal year 2008 funds for operation and maintenance programs.

The Senate amendment contained a similar provision (sec. 1506).

The conference agreement includes this provision.

Unless noted explicitly in the statement of managers, all changes are made without prejudice.

*Working capital funds (sec. 1509)*

The House bill contained a provision (sec. 1509) that would authorize additional fiscal year 2008 funds for Defense Working Capital Funds and the National Defense Sealift Fund to support operations in Iraq and Afghanistan.

The Senate amendment contained a similar provision for working capital funds (sec. 1514) and for the National Defense Sealift Fund (sec. 1515).

The conference agreement includes this provision.

Unless noted explicitly in the statement of managers, all changes are made without prejudice.

*Other Department of Defense programs (sec. 1510)*

The House bill contained a provision (sec. 1510) that would authorize additional fiscal year 2008 funds for the Defense Health Program, drug interdiction and counterdrug activities, and the Inspector General to support operations in Iraq and Afghanistan.

The Senate amendment contained similar separate provisions (secs. 1508, 1509, and 1516) for these programs.

The conference agreement includes this provision.

Unless noted explicitly in the statement of managers, all changes are made without prejudice.

*Iraq Freedom Fund (sec. 1511)*

The House bill contained a provision (sec. 1511) that would authorize additional fiscal year 2008 funds for the Iraq Freedom Fund.

The Senate amendment contained a similar provision (sec. 1513).

The conference agreement includes this provision.

Unless noted explicitly in the statement of managers, all changes are made without prejudice.

*Iraq Security Forces Fund (sec. 1512)*

The House bill contained a provision (sec. 1512) that would authorize additional fiscal year 2008 funds for the Iraq Security Forces Fund.

The Senate amendment contained a similar provision (sec. 1511).

The House recedes with an amendment that would require notification to the Committee on Foreign Relations of the Senate and the Committee on Foreign Affairs of the House of Representatives of any contributions to this fund from foreign governments or other outside entities.

*Afghanistan Security Forces Fund (sec. 1513)*

The House bill contained a provision (sec. 1513) that would authorize additional fiscal year 2008 funds for the Iraq Security Forces Fund.

The Senate amendment contained a similar provision (sec. 1512).

The House recedes with an amendment that would require notification to the Committee on Foreign Relations of the Senate and the Committee on Foreign Affairs of the House of Representatives of any contributions to this fund from foreign governments or other outside entities.

*Military personnel (sec. 1514)*

The House bill contained a provision (sec. 1514) that would authorize additional fiscal year 2008 funds for active and reserve component military personnel programs to support operations in Iraq and Afghanistan.

The Senate amendment contained a similar provision (sec. 1507).

The conference agreement includes this provision.

Unless noted explicitly in the statement of managers, all changes are made without prejudice.

[Addition in millions of dollars]

|-------------------------------------|------|
| Yellow Ribbon Reintegration Program | 73.0 |
|-------------------------------------|------|

*Strategic Readiness Fund (sec. 1515)*

The House bill contained a provision (sec. 1708) that would authorize \$1.0 billion for a Strategic Readiness Fund.

The Senate amendment contained no similar provision.

The Senate recedes.

*Treatment as additional authorizations (sec. 1516)*

The House bill contained a provision (sec. 1518) that would state that the amounts authorized to be appropriated in title XV of this Act are in addition to any other amounts authorized in this Act.

The Senate amendment contained an identical provision (sec. 1522).

The conference agreement includes this provision.

*Special transfer authority (sec. 1517)*

The Senate amendment included a provision (sec. 1523) that would authorize the transfer of up to \$3.5 billion of war-related funding authorizations in this title among the accounts in this title. This special transfer authority is in addition to the general transfer authority contained in section 1001 of this Act, but the same reprogramming procedures applicable to transfers under section 1001 would also apply to transfers under this section.

The House bill contained no similar provision.

The House recedes.

## BUDGET ITEMS

*Army tactical radio modernization plans*

The budget request included \$2.3 billion in Other Procurement, Army for single channel ground and airborne radios (SINCGARS).

The House bill would decrease this amount by \$754.0 million.

The Senate bill would decrease this amount by \$375.0 million.

The conference outcome is reflected in the tables of this report in Other Procurement, Army, line 34.

The conferees strongly support the goal of providing more communications capability to all echelons of the Army. Based on current operational experience, it is clear to the conferees that in order to maintain the Army's current dominance in land warfare, the Army must significantly increase its tactical communications capability.

While the conferees are supportive of the overall effort to improve Army communications and properly equip near-term deploying units, the conferees believe that the Army's long-term tactical modernization plan lacks sufficient analysis of future Army communications needs, is not synchronized with other Army and Department of Defense programs, and does not account for future Army modernization funding projections.

Specifically, the conferees are concerned that the Army's continued desire to procure thousands more SINCGARS radios is not consistent with the Army's plan for a future battlefield network that requires: dramatic increases in bandwidth for data transmission; significantly better network security; more flexible systems that can operate across a wider electronic spectrum; and systems that increase joint and coalition interoperability.

In addition, the conferees note that the Army continues to request funding for SINCGARS radios in spite of an Army Science Board study that recommended the Army stop SINCGARS procurement and that the Army cannot execute the full amount of SINCGARS funding requested due to limited production capacity.

Further, the conferees are concerned that the Army's plans for continued SINCGARS radio procurement do not fully address the National Security Agency's goals for encryption modernization and are inconsistent with the Marine Corps decision to cease procurement of SINCGARS radios.

The conferees also believe that the Army's plan to acquire additional legacy tactical radios is not aligned with the goals of the Joint Tactical Radio System (JTRS) program. The conferees are concerned that the acquisition of thousands more SINCGARS radios will seriously undermine the Army's investment in the JTRS program. By reducing its future demand for the more capable JTRS radio, the Army will significantly increase the unit cost of JTRS systems for the Army and other services. Finally, the conferees note that the Army's plan to continue procurement of thousands of SINCGARS radios will impede efforts of the JTRS program to move the military services toward a standards-based acquisition model for tactical radios that encourages competition and avoids sole-source production dependency.

The conferees urge the Army and the Assistant Secretary of Defense for Networks and Information Integration (ASD(NII)) to reexamine the Army's current tactical radio modernization plan. Specifically, the conferees strongly encourage the Army and ASD (NII) to develop a strategy for tactical radio modernization that focuses on the future. The conferees strongly support continued research and development investments in the JTRS program. However, the conferees understand that JTRS will not be available in large numbers for several more years and that the Army's plan for procurement of JTRS radios is not fully defined.

In the interim, the conferees agree that the Army should invest in a limited number of tactical radio systems that meet JTRS Software Communications Architecture (SCA) standards, and provide improvements in bandwidth capacity, programmable encryption, spectrum flexibility, and interoperability necessary for the Army to realize its future battlefield network plan. The conferees believe that over-investment in legacy systems will not give the Army flexibility to properly integrate JTRS radios and build its future network. If the Army procures any additional legacy radio systems prior to the fielding of the JTRS radio, it should only procure the minimum number needed to fill urgent short-term needs for deploying units. As it makes these limited investments, the conferees encourage the Army to avoid new or extended, long-term sole-source tactical radio procurement contracts that may limit the Army's options in the future.

#### *Blast injury research*

Blast injury from improvised explosive devices (IEDs) continues to be the most significant cause of American casualties in Iraq. The conferees are concerned that the Department of Defense has not appropriately allocated resources provided for the defeat of IEDs to the full range of efforts necessary to defeat the IED threat, including much needed research and training on the prevention, mitigation, and treatment of blast injuries. Section 256 of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109-163) established a Department of Defense-wide program to

prevent, mitigate, and treat blast injuries. The conferees expect that the Joint Improvised Explosive Device Defeat Office (JIEDDO), in accordance with the 2006 Act, will be a partner in the Department-wide efforts to coordinate, manage, and fund research efforts for medical blast research.

To support these efforts, the conferees direct that JIEDDO fund, through interagency transfer of resources as appropriate, blast-related research, training, and programmatic activities which have been identified as high priorities by the DOD executive agent and the centers of excellence established under section 1621 of this Act, at a level of not less than \$50.0 million in fiscal year 2008. These include, but are not limited to: research and development of diagnostics, training, and treatment for traumatic brain injury and post-traumatic stress disorder; collection, storage, and integration of operational, medical, and protective equipment performance data associated with wounding and non-wounding events; body surface wound mapping for investigation of wounding patterns to be included in body armor design; research and training to prevent traumatic eye injury and cranial-facial injury; research to enhance prevention, healing, and quality of life relating to burns; advanced prosthetics; and enhanced research on hemorrhage control.

Further, the conferees direct JIEDDO to report to the congressional defense committees on the actions taken, including funding, to fulfill these requirements, no later than March 1, 2008.

#### *Grow the force transfer*

The budget request for the global war on terror included \$689.4 million in Operation and Maintenance, Army (OMA) to fund the planned growth of the Army's end strength for fiscal year 2008.

The House bill would authorize \$689.4 million in OMA of title XV.

The Senate amendment would authorize \$689.4 million in OMA of title III.

The conferees agree to authorize \$689.4 for growth of the Army's end strength in OMA of title XV of this Act.

#### ITEMS OF SPECIAL INTEREST

##### *Reactive armor for EFP protection*

The amended budget request for the war-related budget includes \$27.5 million in PE 62618A for ballistics technology. Of that amount, \$20.0 million is for development of armor capable of countering explosively formed projectiles (EFPs).

The conferees understand that reactive armor technology may provide an effective solution at lower weight than existing designs. Furthermore, modeling and design tools are available that would allow a candidate reactive armor system to be designed and evaluated rapidly, followed by fabrication and testing. The conferees direct that the Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(AT&L)) ensure that the Army and the Joint Improvised Explosive Defeat Organization conduct a robust technology analysis as rapidly as possible to determine whether reactive armor would provide superior protection against EFPs and to determine the potential for weight reduction with a longer-term

effort to optimize the reactive armor system. The conferees direct the USD(AT&L) to inform the congressional defense committees by letter within 60 days of enactment of this Act of his findings and plans on this matter.

#### LEGISLATIVE PROVISION NOT ADOPTED

##### *Improvised explosive device protection for military vehicles*

The Senate amendment contained a provision (sec. 1543) that would authorize \$23.6 billion for the procurement of mine resistant ambush protected military vehicles.

The House bill contained no similar provision.

The Senate recedes.

The conference outcome is reflected in the tables of this report in Other Procurement, Army, line 9a.

##### *Reports on mitigation of effects of explosively formed projectiles and mines*

The Senate amendment contained a provision (sec. 1517) that would require the Secretary of Defense to submit to the congressional defense committees reports on four items: (1) explosively formed projectiles (EFPs); (2) Mine Resistant Ambush Protected (MRAP) vehicles; (3) tactical wheeled vehicle strategy; and (4) long-term armoring strategy.

The House bill contained no similar provision.

The Senate recedes.

The conferees direct the Under Secretary of Defense for Acquisition, Technology, and Logistics to report to the congressional defense committees no later than 120 days after enactment of this Act, on the following items: (1) a plan for improving capabilities to mitigate the effects of EFPs; (2) plans for armor upgrades, and their impact on system performance and sustainment; (3) the impact of the MRAP vehicle program on the current acquisition strategies and procurement plans of the Army and Marine Corps for the tactical wheeled vehicle fleet, including inventory mix, overall sustainment cost, and logistical and industrial base issues; and (4) plans for the Joint Light Tactical Vehicle program, including an assessment of the continued validity of previously adopted key performance parameters.

The conferees note that the MRAP has been designated the Department's highest acquisition priority by the Secretary of Defense. The conferees believe this designation is appropriate and will continue to work with the Department to ensure this critical force protection program is adequately funded. The conferees urge the Department to protect to the maximum extent possible the current engineering and technology of the MRAP vehicle, as well as subsequent improvements to the survivability of MRAP vehicles. Further, the conferees note that the MRAP is not the final solution to combat the improvised explosive devices and other asymmetric threats to tactical vehicles faced by the warfighter in Iraq and Afghanistan, and the conferees urge the Department to be ready to respond quickly as these threats evolve.

## TITLE XVI—WOUNDED WARRIOR MATTERS

*Wounded Warrior Act—Overview*

“The willingness with which our young people are likely to serve in any war, no matter how justified, shall be directly proportional as to how they perceive the Veterans of earlier wars were treated and appreciated by their country.”—General and President George Washington 1789

In fulfillment of President Washington’s vision, American soldiers, sailors, airmen, and marines receive the finest medical care available in the world. Through advances in medicine and battlefield care, the U.S. military has achieved the lowest war mortality rate in history in Operation Iraqi Freedom and Operation Enduring Freedom. An Independent Review Group appointed by Secretary of Defense Robert Gates to investigate inadequacies at Walter Reed Army Medical Center in February 2007 confirmed that, “. . . the evolution of rapid joint battlefield medical response, rapid evacuation with intensive care, quality air transportation, and unsurpassed trauma care have yielded unprecedented survival rates for our combat forces.”

Yet despite this remarkable record of accomplishment, reports beginning on February 18, 2007 by the Washington Post illuminated inadequacies and failures at Walter Reed Army Medical Center. Subsequent independent investigations and hearings by congressional committees revealed the need for system-wide improvements in outpatient care, transition of recovering service members between the Department of Defense and Department of Veterans Affairs health care systems, and performance of the Departments’ physical disability evaluation systems. In addition, as a consequence of improved battlefield care, increasing numbers of service members are surviving with complex, multiple injuries, traumatic brain injury, post-traumatic stress disorder, and other mental health conditions.

Following the revelations at Walter Reed, both the House of Representatives and the Senate adopted bills to improve the management of medical care, disability evaluations, personnel actions, and quality of life for members of the armed forces recovering from illness or injury received during the war. On March 28, 2007, the House of Representatives adopted the “Wounded Warrior Assistance Act of 2007”. The Senate adopted the “Dignified Treatment of Wounded Warriors Act” on July 25, 2007.

This conference report includes provisions from each bill. Taken as a whole, it advances the care, management, and transition of recovering service members, enhances health care and benefits for families, and begins the process of fundamental reform of the Department of Defense and Department of Veterans Affairs disability evaluation systems. The conference report is the result of bipartisan efforts in the Senate and the House of Representatives by both the Committees on Armed Services and the Committees on Veterans Affairs. It also includes, in particular, many recommendations of the President’s Commission on Care for America’s Returning Wounded Warriors.

In completing its work on the National Defense Authorization Act for 2008, the conferees express deep gratitude to U.S. service members and their families for their sacrifice and courage in service to their country. We are grateful for the work of outstanding medical personnel whose skill and dedication have saved or prolonged the lives of more than 30,000 service members who, as of this date, have benefitted from their care.

The conferees acknowledge that additional work remains to be done in order to achieve permanent improvements for wounded and ill service members. The conferees are committed to continued progress toward that goal, through oversight of actions now underway within the executive branch, consideration of findings of public and independent organizations, dialogue with recovering service members and their families, and enactment of additional laws as they are needed.

Together with all who share the goal of improving care for ill and injured service members and veterans, we will work to achieve the vision of our Nation's founders—to manifest not only appreciation and gratitude toward those who have borne the battle, but also to provide the highest quality care to U.S. service members and their families.

*Short title (sec. 1601)*

The Senate amendment contained a provision (sec. 1601) that would provide that this title may be cited as the “Dignified Treatment of Wounded Warriors Act”.

The House bill contained no similar provision.

The House recedes with an amendment that would provide that this title may be cited as the “Wounded Warrior Act”.

*General definitions (sec. 1602)*

The House bill contained a provision (sec. 1401) that would define terms used in the title on wounded warrior assistance.

The Senate amendment contained a provision (sec. 1602) that would define the terms used in the Dignified Treatment of Wounded Warriors Act.

The House recedes with an amendment that would define terms used in the Wounded Warrior Act.

*Consideration of gender-specific needs of recovering service members and veterans (sec. 1603)*

The Senate amendment contained a provision (sec. 1612) that would require the Secretary of Defense and the Secretary of Veterans Affairs to take into account and fully address any unique specific needs of women members of the armed forces and women veterans in developing and implementing a comprehensive policy on care, management, and transition of members of the armed forces with serious injuries or illnesses.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary of Defense and the Secretary of Veterans Affairs to take into account and fully address any unique gender-specific needs of recovering service members and veterans when developing and implementing the policy required by the Wounded Warrior Act.

Subtitle A—Policy on Improvements to Care, Management, and  
Transition of Recovering Service Members

*Comprehensive policy on improvements to care, management, and  
transition of recovering service members (sec. 1611)*

The House bill contained a series of provisions that would make improvements to medical and dental care for members of the armed forces assigned to hospitals in an outpatient basis.

The House bill contained a provision (sec. 1411) that would amend chapter 55 of title 10, United States Code, to establish requirements for the duties, training, supervision, and workload of medical care case managers and service member advocates. The provision would also require the secretary concerned to conduct semiannual surveys of members in an outpatient status.

The House bill contained a provision (sec. 1418) that would require the Secretary of Defense to report to appropriate congressional committees on recommendations to improve training provided to health care professionals, medical care case managers, and service member advocates, in particular to ensure that such personnel were adequately trained to detect the early warning signs of post-traumatic stress disorder, suicidal or homicidal thoughts or behaviors, and other behavioral health conditions. The provision would require an annual review of such training, and development of a system to track any notifications made by care managers regarding the early warning signs of post-traumatic stress disorder.

The House bill contained a provision (sec. 1424) that would require the Secretary of Defense to expand the opportunities for recovering service members of the reserve components in an outpatient status to receive care at a military treatment facility closest to the member's home, rather than closest to the base from which the member was deployed.

The House bill contained a provision (sec. 1437) that would require the Secretary of Defense to conduct a study on the feasibility of developing a joint soldier patient tracking system that would provide transparency at all times on the location and status of recovering service members.

The House bill contained a provision (sec. 1439) that would require the Secretary of Defense to conduct a study on the feasibility of measuring family members' satisfaction with health care services.

The Senate amendment contained a provision (sec. 1611) that would require the Secretary of Defense and the Secretary of Veterans Affairs to develop and implement, by January 1, 2008, a comprehensive policy on the care, management, and transition of members of the armed forces with serious injuries or illnesses. The provision would require that the policy address detailed requirements concerning: (1) the care and management of covered service members in a medical hold status or on the temporary disability retired list (including specific standards for access to medical care services); (2) the medical evaluation and disability evaluation systems for severely injured and ill service members; (3) the return of recovered service members to active duty when appropriate; and (4) the transition of service members from the Department of Defense to the Department of Veterans Affairs.

The provision also would require that the Secretaries complete a review of all applicable policies and procedures of the Departments to identify potential shortfalls in those policies, and to consider the findings and recommendations of numerous commissions established to examine Department of Defense and veterans health care and compensation. The provision also would require a report on any reduction in disability ratings by the Department of Defense.

The Senate amendment contained a provision (sec. 257) that would require a study of a standard soldier tracking system in conjunction with pilot projects to be conducted to improve the disability evaluation systems of the Departments of Defense and Veterans Affairs.

The Senate amendment contained a provision (sec. 705) that would express the sense of the Senate that the Department of Defense should encourage continuing collaboration between the Army and the Department of Veterans Affairs in treating America's wounded warriors and, when appropriate and available, provide additional support and resources for the development of such collaborations.

The conference agreement includes a provision that would integrate these provisions into a single requirement to develop and implement a comprehensive policy by July 1, 2008, on improvements to the care, management, and transition of recovering service members. The agreement would add a requirement for recovery plans and recovery coordinators, and require the Secretary of Defense to establish maximum workload amounts for recovery coordinators, medical and non-medical care managers, and minimum standards for access to health care services. The conference agreement would also add a requirement for policy on the relocation of any military personnel found to be housed in substandard outpatient facilities. Other areas included in the conference report would require procedures for referral of recovering service members to appropriate public and private entities for needed health care services, and care and job placement services for family members of recovering service members. The conference agreement would authorize the Secretary of Defense to apply policies for the care, management, and transition of members on the temporary disability retired list to those members as the Secretary deems appropriate.

The conferees acknowledge that the Secretaries of Defense and Veterans Affairs have established a Senior Oversight Committee and specific subgroups to address many of the policy improvements required by this section. The conferees intend that the improvements identified be established in consistent policies throughout the Department of Defense, and to the extent feasible, with the Department of Veterans Affairs. The conferees intend that this policy will be established and implemented in the near future, and expect that it will be periodically updated as best practices and improved approaches are discovered.

The conferees direct that the Secretary of Defense provide a report to the Committees on Armed Services of the Senate and the House of Representatives within 30 days of enactment of this Act, and every 90 days thereafter, which describes:

(1) the standards for maximum case workloads for recovery coordinators, and medical and non-medical managers which are in effect for recovering service members;

(2) the standards in effect for the frequency of periodic face-to-face reviews of the medical status of recovering service members;

(3) the standards in effect setting forth minimum periods of time for access to health care services for recovering service members;

(4) the performance of the Department in maintaining all such standards; and

(5) any deviation from the standard and the reasons for such deviation.

The conferees will closely monitor the performance of the Departments in achieving improvements in policy and practices related to recovering service members and will take into consideration such performance in development of future legislative requirements.

*Medical evaluations and physical disability evaluations of recovering service members (sec. 1612)*

The House bill contained a provision (sec. 1415) that would add a requirement to section 1222 of title 10, United States Code, to require the secretary of each military department to appoint an independent medical advocate for members before a medical evaluation board to serve as an advocate for the best interests of the member and to advise the member regarding the member's medical condition and recommendations of the medical evaluation board.

The House bill contained a provision (sec. 1416) that would amend section 1222 of title 10, United States Code, to require the Secretary of Defense to establish the maximum workload that could be assigned to physical evaluation board liaison officers, and would require a standardized training program for such officers.

The House bill contained a provision (sec. 1417) that would amend section 1216 of title 10, United States Code, to require the Secretary of Defense to establish a standardized training program and curriculum for the Department's disability evaluation system for commanders, enlisted members, health care professionals, and others involved in the disability evaluation system.

The House bill contained a provision (sec. 1433) that would require the Secretary of Defense and the Secretary of Veterans Affairs to conduct a joint evaluation of the disability evaluation systems used by the Departments in order to improve the consistency of the two systems, and to evaluate the feasibility of consolidating them into a single system.

The Senate amendment contained a provision (sec. 1611(d)(2)) that would require that the comprehensive policy on the care and management of covered members provide processes, procedures, and standards for medical evaluations and physical disability evaluations of covered service members.

The House recedes with an amendment that would require the Secretary of Defense to develop a policy on: improvements for the conduct by the military departments of medical evaluations of recovering service members that include uniform processes; standard

criteria and definitions for determining achievement of the maximum medical benefit from treatment and rehabilitation; standard timelines for determinations of fitness for duty, specialty care consultations, preparation of medical documents, and appeals of medical evaluation determinations; review of the findings and recommendations of the medical evaluation board upon request of the member by a health care professional independent of the medical evaluation board; standards for qualifications and training of medical evaluation board personnel; and standards for information for recovering service members and their families on the medical evaluation board process.

The amendment would require a similar policy on improvements for the conduct of physical disability evaluations that include: a clearly defined process for disability determinations; procedures to eliminate unacceptable discrepancies and improve consistency of disability ratings; uniform timelines for appeals of disability determinations; uniform standards for qualifications and training of physical disability evaluation board personnel; uniform standards for the number of cases pending before a disability evaluation board; uniform standards and procedures for provision of legal counsel to recovering service members; and uniform standards on the roles and responsibilities of non-medical care managers. The amendment would also require the Secretary of Defense and the Secretary of Veterans Affairs to report to Congress on the feasibility and advisability of consolidating the disability evaluation systems of the military departments and of the Department of Veterans Affairs into a single disability evaluation system.

*Return of recovering service members to active duty in the Armed Forces (sec. 1613)*

The Senate amendment contained a provision (sec. 1611(d)(2)(C)) that would require that the comprehensive policy on the care and management of covered members provide standards for determinations by the military departments on the return of covered service members to active duty.

The House bill contained no similar provision.

The House recedes with a clarifying amendment.

*Transition of recovering service members from care and treatment through the Department of Defense to care, treatment, and rehabilitation through the Department of Veterans Affairs (sec. 1614)*

The House bill contained a provision (sec. 1421) that would amend chapter 58 of title 10, United States Code, to require the Secretary of Defense to provide each service member being separated or retired for physical disability with a written plan for transition to programs operated by the Department of Veterans Affairs. The provision would amend section 1145 of title 10, United States Code, to require establishment of a joint separation and evaluation physical examination for use by both Departments, and would require establishment and implementation of a process to ensure an interoperable, bi-directional, real time exchange of critical medical information.

The Senate amendment contained a provision (sec. 685) that would require the Secretary of Defense and the Secretary of Veterans Affairs to submit to Congress a plan to maximize access to the benefits delivery at discharge program for members of the reserve components who have been ordered to active duty since September 11, 2001.

The Senate amendment contained a provision (sec. 1032) that would require the Secretary of Defense to provide for each service member separating from the armed forces or who detaches from the member's regular unit while awaiting medical separation or retirement, upon the request of the member, the address and other appropriate contact information of the member to the State veterans agency in the State in which the member will first reside after separation or the State in which the member resides while awaiting medical separation or retirement.

The Senate amendment contained a provision (sec. 1611(d)(2)(D)) that would require that the comprehensive policy on the care and management of covered service members provide processes, procedures, and standards for the transition of covered service members from care and treatment by the Department of Defense to care and treatment by the Department of Veterans Affairs before, during, and after separation from the armed forces.

The Senate amendment also contained a provision (sec. 1662) that would require the Secretary of Defense and the Secretary of Veterans Affairs to jointly develop and implement a mechanism to provide for the electronic transfer from the Department of Defense to the Department of Veterans Affairs of any Department of Defense documents (including Department of Defense form DD 214) necessary to establish or support the eligibility of a service member for benefits administered by the Department of Veterans Affairs.

The House recedes with an amendment that would require the Secretary of Defense and the Secretary of Veterans Affairs to jointly develop and implement processes, procedures, and standards for the transition of recovering service members from care and treatment through the Department of Defense to care, treatment, and rehabilitation through the Department of Veterans Affairs. These processes, procedures, and standards would require the provision for the electronic transfer of documents and the member's address and contact information to the Department of Veterans Affairs.

*Reports (sec. 1615)*

The Senate amendment contained a provision (sec. 1611(e)) that would require the Secretary of Defense and the Secretary of Veterans Affairs to jointly submit to Congress a report on the comprehensive policy on the care and management of covered service members not later than January 1, 2008.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary of Defense and the Secretary of Veterans Affairs to jointly submit to the appropriate committees of Congress a report on the comprehensive policy upon completion of the policy, but not later than July 1, 2008, and an interim report not later than February 1, 2008. The amendment would also require the Comptroller General of the United States to submit to the appropriate commit-

tees of Congress not later than 6 months after the date of enactment of this Act, and every year thereafter through 2010, a report setting forth the Comptroller General's assessment of the progress of the Secretary of Defense and the Secretary of Veterans Affairs in developing and implementing the policy.

*Establishment of a wounded warrior resource center (sec. 1616)*

The House bill contained a provision (sec. 1412) that would establish a Department of Defense-wide Ombudsman Office within the office of the Secretary of Defense to provide policy guidance to, and oversight of, the ombudsman offices in the military departments.

The House bill also contained a provision (sec. 1413) that would amend chapter 80 of title 10, United States Code, to require the Secretary of Defense to establish and maintain a toll-free hot line to collect, maintain, and update information regarding possible deficiencies in the adequacy, quality, and state of repair of medical-related support facilities.

The Senate amendment contained a provision (sec. 1611 (d)(1)(Q)) that would require the Secretary of Defense to include establishment of a Department of Defense-wide Ombudsman Office within a comprehensive policy on responsibility for members in a medical hold status.

The Senate recedes with an amendment that would require the Secretary of Defense to establish a wounded warrior resource center to provide wounded warriors, their families, and their primary caregivers with a single point of contact for assistance with reporting deficiencies in certain military facilities, obtaining health care services, receiving benefits information, and any other difficulties encountered while supporting wounded warriors. The center would provide multiple methods of access, including at a minimum an Internet website and a toll-free telephone number. Individuals who provide information to the center would be informed of their option to have their identity remain confidential.

The conferences intend that the resources of the Wounded Warrior Resource Center shall also be available to residents of the Armed Forces Retirement Home.

*Notification to Congress of hospitalization of combat wounded service members (sec. 1617)*

The House bill contained a provision (sec. 1414) that would amend chapter 55 of title 10, United States Code, to require the service secretaries, if the member consents, to notify appropriate members of Congress of the hospitalization of any member of the armed forces evacuated from a theater of combat.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require notification to appropriate members of Congress of the hospitalization of any member of the armed forces evacuated from a theater of combat and admitted to a military treatment facility within the United States.

*Comprehensive plan on prevention, diagnosis, mitigation, treatment, and rehabilitation of, and research on, traumatic brain injury, post-traumatic stress disorder, and other mental health conditions in members of the armed forces (sec. 1618)*

The House bill contained a provision (sec. 1425) that would require the Secretary of Defense to develop a plan to incorporate into training, combat theater operations, and post-deployment service evidence-based preventive and early-intervention measures, practices, or procedures that reduce the likelihood that personnel in combat will develop post-traumatic stress disorder (PTSD) or other stress-related psychopathologies.

The Senate amendment contained a provision (sec. 1631) that would require the Secretary of Defense, in consultation with the Secretary of Veterans Affairs, to submit to the congressional defense committees comprehensive plans for programs and activities of the Department of Defense to prevent, diagnose, mitigate, treat, and otherwise respond to traumatic brain injury and PTSD in members of the armed forces.

The House recedes with a clarifying amendment that would include in the plan a requirement to incorporate into training, combat theater operations, and post-deployment service evidence-based preventive and early-intervention measures, practices, or procedures that reduce the likelihood that personnel in combat will develop PTSD or other stress-related conditions.

Subtitle B—Centers of Excellence in the Prevention, Diagnosis, Mitigation, Treatment, and Rehabilitation of Traumatic Brain Injury, Post-Traumatic Stress Disorder, and Eye Injuries

*Center of excellence in the prevention, diagnosis, mitigation, treatment, and rehabilitation of traumatic brain injury (sec. 1621)*

The Senate amendment contained a provision (sec. 1633(a)) that would require the Secretary of Defense to establish a center of excellence in the prevention, diagnosis, mitigation, treatment, and rehabilitation of traumatic brain injury (TBI), including mild, moderate, and severe TBI. The amendment would ensure collaboration to the maximum extent practicable with the Department of Veterans Affairs and other appropriate public and private entities.

The House bill contained no similar provision.

The House recedes with an amendment that would clarify that the center would be responsible for implementation of the elements of the comprehensive plan required by section 1631 of this Act that relate to traumatic brain injury.

*Center of excellence in prevention, diagnosis, mitigation, treatment, and rehabilitation of post-traumatic stress disorder and other mental health conditions (sec. 1622)*

The Senate amendment contained a provision (sec. 1633(b)) that would require the Secretary of Defense to establish a center of excellence in the prevention, diagnosis, mitigation, treatment, and rehabilitation of post-traumatic stress disorder (PTSD), including mild, moderate, and severe PTSD. The amendment would require collaboration with the National Center for Post-Traumatic Stress Disorder of the Department of Veterans Affairs, institutions

of higher learning, and other appropriate public and private entities.

The House bill contained no similar provision.

The House recedes with an amendment that would clarify that the center shall also address other mental health conditions and would be responsible for implementation of elements of the comprehensive plan required by section 1631 of this Act that relate to PTSD and other mental health conditions.

*Center of excellence in prevention, diagnosis, mitigation, treatment, and rehabilitation of military eye injuries (sec. 1623)*

The Senate amendment contained a provision (sec. 710) that would require the Secretary of Defense to establish a center of excellence in the prevention, diagnosis, mitigation, treatment, and rehabilitation of military eye injuries. The amendment would require collaboration with the Department of Veterans Affairs and establishment of a military eye injury registry.

The House bill contained no similar provision.

The House recedes with several clarifying amendments.

*Report on establishment of centers of excellence (sec. 1624)*

The Senate amendment contained two provisions (secs. 710 and 1633) that would require the Secretary of Defense to establish centers of excellence for traumatic brain injury, post-traumatic stress disorder, and military eye injuries.

The House bill contained no similar provisions.

The House recedes with an amendment that would require the Secretary of Defense to submit a report to Congress no later than 180 days after the date of enactment of this Act on the establishment of the centers of excellence as required elsewhere in this conference report.

Subtitle C—Health Care Matters

*Medical care and other benefits for members and former members of the armed forces with severe injuries or illnesses (sec. 1631)*

The Senate amendment contained a provision (sec. 1621) that would authorize medical benefits equivalent to those available to members on active duty for members and former members of the armed forces with severe injuries or illnesses and who may also be eligible for health and disability benefits from the Department of Veterans Affairs (VA) during the 3 years from the date of injury or illness or date of enactment of this Act, whichever is later. The amendment would also authorize a service member with a severe injury or illness to receive rehabilitation and vocational benefits from the VA in the same manner that the Secretary of Veterans Affairs provides medical care to members of the armed forces receiving care in medical facilities of the VA.

The House bill contained no similar provision.

The House recedes with an amendment that would authorize the Secretary of Defense to provide any former service member with a severe injury or illness the same medical and dental care as an active duty service member when such care is not reasonably available from the VA. The amendment would also authorize a

member of the armed forces with a severe injury or illness to receive benefits (including rehabilitation and vocational benefits, but not compensation) from the VA. Both authorities would expire on December 31, 2012.

Senior Department of Defense officials have acknowledged that the health care benefit for service members on active duty includes limited health care benefits that are not available to service members in a retired status. This has created an incentive for some seriously wounded service members to remain on active duty solely for the increased medical benefit. The conferees intend that this provision would be implemented by the Secretary of Defense in a manner that will ensure that severely wounded or ill service members who are medically retired experience no gap in health care coverage due to lack of reasonably available capacity of the Veterans Health Administration or any limitation in current health care benefits required by the member.

*Reimbursement of travel expenses of retired members with combat-related disabilities for follow-on specialty care, services, and supplies (sec. 1632)*

The Senate amendment contained a provision (sec. 1622) that would require the Secretary of Defense to provide reimbursement for reasonable travel expenses for follow-on specialty care at a military treatment facility more than 100 miles from where the member resides for a service member and any eligible accompanying family member when the member has incurred a combat-related disability and is entitled to retired or retainer pay, or equivalent pay.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary to implement an outreach program for such members in order to ensure that eligible members are medically monitored and receiving travel reimbursement for specialty care when necessary.

*Respite care and other extended care benefits for members of the uniformed services who incur a serious injury or illness on active duty (sec. 1633)*

The Senate amendment contained a provision (sec. 1627) that would amend section 1079(d) of title 10, United States Code, to provide that the program of extended benefits would include extended benefits, including respite care, for the primary caregivers of members of the uniformed services who incur a serious injury or illness on active duty.

The House bill contained no similar provision.

The House recedes with an amendment that would amend section 1074(c) of title 10, United States Code, to authorize extended benefits to members of the uniformed services who incur a serious injury or illness on active duty in a manner consistent with extended health care benefits authorized for eligible dependents in sections 1079(d) and (c) of title 10, United States Code.

*Reports (sec. 1634)*

The Senate amendment contained a provision (sec. 1636) that would require the Secretary of Defense, not later than 90 days

after the date of enactment of this Act, to submit to the congressional defense committees a report describing the progress in completing studies and reports on: (1) a longitudinal study on traumatic brain injury incurred by members of the armed forces in Operation Iraqi Freedom and Operation Enduring Freedom; (2) enhanced mental health screening and services for members of the armed forces; and (3) pilot projects on early diagnosis and treatment of post-traumatic stress disorder and other mental health conditions. The provision would also require annual reports on expenditures for activities on traumatic brain injury and post-traumatic stress disorder.

The House bill contained no similar provision.

The House recedes with an amendment that would require a report on the longitudinal study on traumatic brain injury and the pilot projects on early diagnosis and treatment of post-traumatic stress disorder and other mental health conditions, and would require annual reports on expenditures for activities on traumatic brain injury and post-traumatic stress disorder.

*Fully interoperable electronic personal health information for the Department of Defense and Department of Veterans Affairs (sec. 1635)*

The House bill contained a provision (sec. 1421(c)) that would require the Secretary of Defense and the Secretary of Veterans Affairs to jointly establish and implement a process to ensure an interoperable, bi-directional, real-time exchange of critical medical information.

The Senate amendment contained a provision (sec. 1641) that would require the Secretary of Defense and the Secretary of Veterans Affairs to jointly develop and implement a joint electronic health record and accelerate the exchange of health care information between the Department of Defense and the Department of Veterans Affairs. The amendment would also establish a Department of Defense-Department of Veterans Affairs interagency program office for a joint electronic health record.

The House recedes with an amendment that would require the Secretary of Defense and the Secretary of Veterans Affairs to jointly develop and implement electronic health record systems or capabilities that would allow for full interoperability of personal health care information between the Department of Defense and the Department of Veterans Affairs, and would modify elements of the Department of Defense-Department of Veterans Affairs interagency program office.

*Enhanced personnel authorities for the Department of Defense for health care professionals for care and treatment of wounded and injured members of the armed forces (sec. 1636)*

The Senate amendment contained a provision (sec. 1642) that would amend section 1599c of title 10, United States Code, to authorize the Secretary of Defense to exercise any authority for the appointment and pay of health care personnel under chapter 74 of title 38, United States Code, for purposes of recruitment, employment, and retention of civilian health care professionals for the Department of Defense, and to require the service secretaries to de-

velop and implement a strategy to disseminate the authorities and best practices for the recruitment of medical and health professionals.

The House bill contained no similar provision.

The House recedes with an amendment that would terminate the authority of the Secretary of Defense to exercise the authorities available under chapter 74 of title 38 on September 30, 2010.

*Continuation of transitional health benefits for members of the armed forces pending resolution of service-related medical conditions (sec. 1637)*

The Senate amendment contained a provision (sec. 716) that would authorize a service member entitled to transitional health care benefits under section 1145 of title 10, United States Code, to receive medical and dental care for a specific medical condition related to the member's military service as if the member were an active duty member until the condition is resolved.

The House bill contained no similar provision.

The House recedes with an amendment that would require the service-related medical condition to be identified during the member's 6-month transition period, and would provide health care for such condition as if the member were still on active duty for 6 months following the diagnosis of the condition.

Subtitle D—Disability Matters

*Utilization of veterans' presumption of sound condition in establishing eligibility of members of the armed forces for retirement for disability (sec. 1641)*

The Senate amendment contained a provision (sec. 1651) that would amend sections 1201 and 1203 of title 10, United States Code, to establish a presumption that a disability is incurred while on active duty for a service member with 6 months or more of active military service whose disability was not noted at the time of the member's entrance on active duty, unless compelling evidence or medical judgment is such to warrant a finding that the disability existed before the member's entrance on active duty.

The House bill contained no similar provision.

The House recedes.

The conferees note that section 1207a of title 10, United States Code, which provides that disabilities of service members with at least 8 years of active service will be deemed to have been incurred while on active duty, remains in effect.

*Requirements and limitations on Department of Defense determinations of disability with respect to members of the armed forces (sec. 1642)*

The Senate amendment contained a provision (sec. 1652) that would amend chapter 61 of title 10, United States Code, to require the Secretary of Defense to utilize, to the extent feasible, the schedule for rating disabilities in use by the Department of Veterans Affairs, including any applicable interpretation of the schedule by the United States Court for Veterans Claims and would require the Secretary, when making a determination of a disability rating, to

take into account all medical conditions, whether individually or collectively, that render a member unfit to perform the duties of the member's office, grade, rank, or rating.

The House bill contained no similar provision.

The House recedes.

*Review of separation of members of the armed forces separated from service with a disability rating of 20 percent disabled or less (sec. 1643)*

The Senate amendment contained a provision (sec. 1653) that would amend chapter 79 of title 10, United States Code, to require the Secretary of Defense to establish a board to review the cases of former service members who were separated with disability ratings of 20 percent or less and to authorize the secretary concerned to correct the military records of the former member in accordance with the recommendation of the board.

The House bill contained no similar provision.

The House recedes with an amendment that would require the board to notify the former member, or the former member's surviving spouse, next of kin, or legal representative, that consideration of the former member's case by the board, whether in response to a request or self-generated by the board, will preclude further consideration of the former member's case by the Board for Correction of Military Records.

The conferees believe that the recommendation of the Veterans' Disability Benefits Commission in its report of October 3, 2007, to reassess the ratings of service members who were discharged as unfit but given low ratings should be implemented. The Commission's analysis of service disability ratings from 2000 to 2006 set forth in chapter V of its report reflected disturbing and "counterintuitive" differences between the Army and Marine Corps and the Navy and Air Force that must be addressed. The conferees expect the Secretary of Defense to ensure that cases before the Physical Disability Board of Review receive equitable ratings as recommended by the Commission.

*Authorization of pilot programs to improve disability evaluation system for members of the armed forces (sec. 1644)*

The Senate amendment contained a provision (sec. 1654) that would require the Secretary of Defense to carry out three pilot programs and authorize the Secretary to carry out additional pilot programs with respect to the disability evaluation system of the Department of Defense (DOD). The required pilot programs would include use of a disability rating assigned by the Department of Veterans Affairs (VA), use of a joint DOD/VA assigned disability rating, and use of a single Internet Web site for the DOD disability system.

The House bill contained no similar provision.

The House recedes with an amendment that would authorize the Secretary of Defense to establish and conduct pilot programs with respect to the disability evaluation system of the Department of Defense for the evaluation of the disabilities of members of the armed forces who are being separated or retired from the armed forces for disability under chapter 61, United States Code.

*Reports on Army Medical Action Plan in response to deficiencies in the Army physical disability evaluation system (sec. 1645)*

The Senate amendment contained a provision (sec. 1655) that would require the Secretary of Defense to report to the congressional defense committees on the implementation of corrective measures by the Department of Defense with respect to the Physical Disability Evaluation System in response to several different reports.

The House bill contained no similar provision.

The House recedes with an amendment that would require the reports to be submitted by June 1, 2008 and June 1, 2009.

*Enhancement of disability severance pay for Members of the armed forces (sec. 1646)*

The Senate amendment contained a provision (sec. 1661) that would amend section 1212 of title 10, United States Code, to increase the minimum severance pay to 12 months' basic pay for service members separated for a disability incurred in a combat zone and 6 months' basic pay for other members, and increasing the maximum severance pay from 24 months' basic pay to 38 months' basic pay. The provision would also remove the requirement that severance pay received by members for a disability incurred in a combat zone be deducted from disability compensation received from the Department of Veterans Affairs.

The House bill contained no similar provision.

The House recedes.

*Assessments of continuing utility and future role of temporary disability retired list (sec. 1647)*

The House bill contained a provision (sec. 1420) that would amend section 1210(e) of title 10, United States Code, to require that a service member's medical condition be permanent and stable before the service member can be removed from the temporary disabled retired list (TDRL).

The Senate amendment contained a provision (sec. 1663) that would require the Secretary of Defense and the Comptroller General of the United States to submit a report to the congressional defense committees assessing the continuing utility of the TDRL.

The House recedes with an amendment that would require the Secretary of Defense to submit to the congressional defense committees, no later than 180 days after the date of enactment of this Act, a report containing a statistical history regarding the TDRL and an assessment of: (1) the continuing utility of the TDRL; (2) the need to require that the condition of a member be permanent and stable before the member is separated with less than a 30 percent disability rating; and (3) the future role of the TDRL in the disability evaluation system of the Department of Defense and the changes in policy and law required to fulfill the future role of the TDRL.

*Standards for military medical treatment facilities, specialty medical care facilities, and military quarters housing patients and annual report on such facilities (sec. 1648)*

The House bill contained a provision (sec. 1431) that would require the Secretary of Defense to submit an annual report beginning with the budget submission for fiscal year 2009 on the adequacy, suitability, and quality of military medical facilities and medical-related support facilities. This section would also require that the report include any facility deficiencies and accompanying response plans identified through the toll-free hot line made available to service members and families residing in medical-related support facilities.

The Senate amendment contained a provision (sec. 1671) that would require the Secretary to establish standards for medical treatment facilities and quarters or leased housing for patients, and to set a deadline for compliance with such standards. The amendment would also require a report to the congressional defense committees on actions taken to meet these standards.

The House recedes with an amendment that would combine the annual report and the requirement to establish standards.

*Reports on Army Medical Action Plan in response to deficiencies identified at Walter Reed Army Medical Center (sec. 1649)*

The Senate amendment contained a provision (sec. 1672) that would require the Secretary of Defense to submit reports to the congressional defense committees on the implementation of the action plan of the Army to correct deficiencies identified in the condition of facilities, and in the administration of outpatients in medical hold or medical holdover status, at Walter Reed Army Medical Center and at other applicable Army installations.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary of Defense to submit to the congressional defense committees a report no later than 30 days after the date of enactment of this Act, and every 180 days thereafter until March 1, 2009, on the implementation of the Army Medical Action Plan to correct deficiencies identified in the condition of facilities and patient administration.

*Required certifications in connection with closure of Walter Reed Army Medical Center, District of Columbia (sec. 1650)*

The Senate amendment contained a provision (sec. 1673) that would require the Secretary of Defense to submit to the congressional defense committees no later than 90 days after enactment of this Act certain certifications regarding the closure of Walter Reed Army Medical Center, District of Columbia. The House bill contained no similar provision.

The House recedes with a technical amendment.

*Handbook for members of the armed forces on compensation and benefits available for serious injuries and illnesses (sec. 1651)*

The Senate amendment contained a provision (sec. 1681) that would require the Secretary of Defense to develop and maintain, in handbook and electronic form, a comprehensive description of the

compensation and other benefits to which a service member and their family would be entitled when the member separates or retires from the armed forces. The Secretary of Defense would be required to do this in consultation with the Secretary of Veterans Affairs, the Secretary of Health and Human Services, and the Commissioner of Social Security.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary to develop the handbook and electronic form no later than October 1, 2008.

#### Subtitle E—Studies and Reports

##### *Study on physical and mental health and other readjustment needs of members and former members of the armed forces who deployed in Operation Iraqi Freedom and Operation Enduring Freedom and their families (sec. 1661)*

The Senate amendment contained a provision (sec. 1691) that would require the Secretary of Defense, in consultation with the Secretary of Veterans Affairs, to enter into an agreement with the National Academy of Sciences for a study on the physical and mental health and other readjustment needs of members and former members of the armed forces who deployed in Operation Iraqi Freedom or Operation Enduring Freedom and their families as a result of such deployment. The amendment would require the Secretary of Defense and the Secretary of Veterans Affairs to develop a joint plan to address the findings and recommendations of the National Academy of Sciences study within 90 days of receiving the report. The amendment would also require the Comptroller General of the United States to submit to Congress a report assessing the Department of Defense-Department of Veterans Affairs plan.

The House bill contained no similar provision.

The House recedes with an amendment that would require the preliminary phase of the study to be completed not later than 1 year after the date of enactment of this Act, and an assessment of gender- and ethnic group-specific needs and concerns. The amendment would also remove the requirement for the review by the Comptroller General of the United States of the Department of Defense-Department of Veterans Affairs plan.

##### *Access of recovering service members to adequate outpatient residential facilities (sec. 1662)*

The House bill contained a provision (sec. 1432) that would require the Inspectors General of the regional medical commands to conduct semi-annual inspections of facilities housing recovering service members for the first two years following the date of enactment of this Act and annually thereafter. This section would require the inspection results to be coordinated with local and service medical and civilian leadership, reported to the Congress, and posted on the Internet website of the regional medical command.

The Senate amendment contained no similar provision.

The Senate recedes with a technical amendment.

*Study and report on support services for families of recovering service members (sec. 1663)*

The House bill contained a provision (sec. 1434) that would require the Secretary of Defense to conduct a study of the provision of support services for families of recovering service members. The study would include a determination of the types of support services currently provided, a determination of additional types of support services that would be feasible, an estimate of the number of family members to whom the support services would be provided, and a determination of discrimination in employment that family members experience.

The Senate amendment contained no similar provision.

The Senate recedes with a clarifying amendment that would include job placement services as an element of the determination of additional types of support services that would be feasible.

*Report on traumatic brain injury classifications (sec. 1664)*

The House bill contained a provision (sec. 1435) that would require the Secretary of Defense to submit to the Committees on Armed Services of the Senate and the House of Representatives an interim report not later than 90 days after enactment of this Act describing the changes undertaken within the Department of Defense to ensure that traumatic brain injury victims receive a proper medical designation concomitant with their injury, and a final report not later than 180 days after the date of enactment of this Act concerning traumatic brain injury classification.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of Defense and the Secretary of Veterans Affairs to jointly submit to the Committees on Armed Services of the Senate and the House of Representatives a report describing the changes undertaken within the Department of Defense and the Department of Veterans Affairs to ensure that traumatic brain injury victims receive a medical designation concomitant with their injury rather than a medical designation that assigns a generic classification (such as "organic psychiatric disorder"). The report would be due not later than 90 days after the date of enactment of this Act.

*Evaluation of the Polytrauma Liaison Officer/Non-Commissioned Officer Program (sec. 1665)*

The House bill contained a provision (sec. 1436) that would require the Secretary of Defense to conduct an evaluation of the Polytrauma Liaison Officer/Non-Commissioned Officer program, operated by the military departments and the Department of Veterans Affairs, to assist the transition of members from the Department of Defense health care system to the Department of Veterans Affairs system. The Secretary of Defense would be required to submit a report to Congress containing the results of the evaluation and recommendations for improvement not later than 90 days after the date of enactment of this Act.

The Senate amendment contained no similar provision.

The Senate recedes.

## Subtitle F—Other Matters

*Prohibition on transfer of resources from medical care (sec. 1671)*

The House bill contained a provision (sec. 1452) that would prohibit the transfer of funds or personnel from medical care functions within the Department of Defense to support the administrative requirements imposed by this Act.

The Senate amendment contained no similar provision.

The Senate recesses.

*Medical care for families of members of the armed forces recovering from serious injuries or illnesses (sec. 1672)*

The Senate amendment contained a provision (sec. 1626) that would authorize medical care on a space available basis at military medical treatment facilities or medical facilities of the Department of Veterans Affairs for certain family members caring for service members in a medical hold or holdover status or on the temporary disability retired list. Family members must be on invitational travel orders, a non-medical attendee caring for certain injured service members, or receiving per diem while caring for certain injured service members. The provision would also authorize job placement services for family members on invitational travel orders or non-medical attendees caring for certain injured service members for more than 45 days during a 1-year period, and require the Secretary of Defense to submit to the congressional defense committees a report on the need for additional employment services and protections for certain family members who are placed on leave from employment or otherwise displaced from employment while caring for an injured service member.

The House bill contained no similar provision.

The House recesses with a clarifying amendment that would authorize medical care on a space available basis at military medical treatment facilities or medical facilities of the Department of Veterans Affairs for certain family members not otherwise eligible for medical care who are caring for a recovering service member. Job placement services and the report on the need for additional services are contained elsewhere in this conference report.

*Improvement of medical tracking system for members of the armed forces deployed overseas (sec. 1673)*

The House bill contained a provision (sec. 711) that would require the Secretary of Defense to establish a computer-based program that assesses the cognitive functioning, in a pre- and post-deployment environment, of all members of the armed forces who are deployed in support of the global war on terror, including Operation Iraqi Freedom and Operation Enduring Freedom.

The Senate amendment contained a provision (sec. 1632) that would amend section 1074f of title 10, United States Code, to require the Secretary of Defense to establish a protocol for the pre-deployment assessment and documentation of the cognitive functioning of a member who is deployed outside the United States in order to facilitate the assessment of the post-deployment cognitive functioning of the member. The amendment would require the Secretary to conduct up to three pilot projects to evaluate various

mechanisms for use in the protocol, and to establish a means to implement any mechanism that is selected for incorporation in the protocol not later than 180 days after completion of the pilot projects.

The House recedes with an amendment to clarify the characteristics of a computer-based assessment tool to be evaluated under the pilot projects.

*Guaranteed funding for Walter Reed Army Medical Center, District of Columbia (sec. 1674)*

The House bill contained a provision (sec. 712) that would require that the amount of funds available for the commander of Walter Reed Army Medical Center shall not be less than the amount expended in fiscal year 2006 until the first fiscal year beginning after the date on which the Secretary of Defense certifies to the Committees on Armed Services of the Senate and the House of Representatives that the expanded facilities at the National Naval Medical Center and DeWitt Army Community Hospital are completed, equipped, and staffed with sufficient capacity to accept and provide at least the same level of care as patients received at Walter Reed Army Medical Center during fiscal year 2006.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require that the amount of funds available shall not be less than the amount expended by the commander of Walter Reed Army Medical Center in fiscal year 2006 until the first fiscal year beginning after the date on which the Secretary of Defense submits to the congressional defense committees a plan for the provision of health care for military beneficiaries and their dependents in the National Capital Region. After submission of this plan, the amendment would require the Secretary to certify to the congressional defense committees on a quarterly basis that patients, staff, bed capacity, functions, or parts of functions at Walter Reed Army Medical Center have not been moved or disestablished until the expanded facilities at the National Naval Medical Center and DeWitt Army Community Hospital are completed, equipped, and staffed with sufficient capacity to accept and provide, at a minimum, the same level of and access to care as patients received at Walter Reed Army Medical Center during fiscal year 2006.

*Use of leave transfer program by wounded veterans who are federal employees (sec. 1675)*

The House bill contained a provision (sec. 1110) that would allow federal employees who sustain a combat-related injury while on active duty to accept donated leave without having to deplete their own leave allocations while they are undergoing medical treatment for the disability, for up to 5 years.

The Senate amendment contained no similar provision.

The Senate recedes with a technical amendment.

*Moratorium on conversion to contractor performance of Department of Defense functions at military medical facilities (sec. 1676)*

The House bill contained a provision (sec. 1451) that would: (1) prohibit the Department of Defense from initiating any new public-

private competitions for the performance of functions at military medical facilities for a period of 1 year; and (2) require the Secretary of Defense to report to the Committees on Armed Services of the Senate and the House of Representatives on public-private competitions currently being carried out at such facilities.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment prohibiting the Department of Defense from initiating any new public-private competitions for the performance of functions at military medical facilities until the Secretary: (1) certifies that appropriate steps have been taken to ensure that such competitions will not have an adverse impact on the quality of military medical care; and (2) submits the required report.

#### LEGISLATIVE PROVISIONS NOT ADOPTED

##### *Establishment of medical support fund for support of members of the armed forces returning to military service or civilian life*

The House bill contained a provision (sec. 1422) that would require the establishment of a medical support fund on the books of the Treasury to support programs and activities relating to the medical treatment, care, rehabilitation, recovery, and support of wounded and injured service members and their families, and authorized \$50.0 million for the fund.

The Senate amendment contained no similar provision.

The House recedes.

##### *Funding for improved diagnosis, treatment, and rehabilitation of members of the armed forces with traumatic brain injury or post-traumatic stress disorder*

The Senate amendment contained a provision (sec. 1635) that would authorize \$50.0 million for activities relating to the improved diagnosis, treatment, and rehabilitation of members of the armed forces with traumatic brain injury or post-traumatic stress disorder. Of that amount, \$17.0 million would be available for the Defense and Veterans Brain Injury Center of the Department of Defense.

The Senate recedes.

The conference outcome is reflected in the tables of this report.

##### *Personnel shortages in the mental health workforce of the Department of Defense, including personnel in the mental health workforce*

The Senate amendment contained a provision (sec. 1643) that would require the Secretary of Defense to submit to the Committees on Armed Services of the Senate and the House of Representatives a report setting forth the recommendations of the Secretary for such legislative or administrative actions as the Secretary considers appropriate to address shortages in health care professionals within the Department of Defense, including personnel in the mental health workforce. The amendment would also require the Secretary to implement, not later than 180 days after the date of enactment of this Act, programs to recruit qualified individuals in

health care fields (including mental health) to serve in the armed forces.

The House bill contained no similar provision.

The Senate recesses.

The conference agreement includes a requirement for the Secretary of Defense to report on implementation of the recommendations of the Department of Defense Task Force on Mental Health, which include improving access to mental health services by increasing the number of mental health personnel.

*Pilot program to establish an Army Wounded Warrior battalion at an appropriate active duty base*

The House bill contained a provision (sec. 1419) that would require the Secretary of the Army to establish a pilot program, known as the Army Wounded Warrior Program, based on the Wounded Warrior Regiment program of the Marine Corps.

The Senate amendment contained no similar provision.

The House recesses.

The conferees are aware that the Army has already established Warrior Transition Units that are similar in function to the Marine Wounded Warrior Regiment program.

*Oversight Board for Wounded Warriors*

The House bill contained a provision (sec. 1423) that would require the establishment of a 12 member board to be known as the Oversight Board for Wounded Warriors to provide oversight of medical care, quality of life, administrative processing, and family programs supporting wounded warriors and to provide advice and counsel to Congress and the Department of Defense about how the programs can be made more efficient and effective.

The Senate amendment contained no similar provision.

The House recesses.

## TITLE XVII—VETERANS MATTERS

### LEGISLATIVE PROVISIONS ADOPTED

*Sense of Congress on Department of Veterans Affairs efforts in the rehabilitation and reintegration of veterans with traumatic brain injury (sec. 1701)*

The Senate amendment contained a provision (sec. 1701) that would express the sense of Congress that:

(1) the Department of Veterans Affairs is a leader in the field of traumatic brain injury and coordination of such care;

(2) the Department of Veterans Affairs should have the capacity and expertise to provide veterans who have traumatic brain injury with patient-centered health care, rehabilitation, and community integration services that are comparable to or exceed similar care and services available to persons with such injuries in the academic and private sector;

(3) rehabilitation for veterans who have a traumatic brain injury should be individualized, comprehensive, and interdisciplinary with the goals of optimizing the independence of such veterans and reintegrating them into their communities;

(4) family support is integral to the rehabilitation and community reintegration of veterans who have sustained a traumatic brain injury, and the Department should provide the families of such veterans with education and support;

(5) the Department of Defense and the Department of Veterans Affairs have made efforts to provide a smooth transition of medical care and rehabilitative services to individuals as they transition from the health care system of the Department of Defense to that of the Department of Veterans Affairs, but more can be done to assist veterans and their families in the continuum of the rehabilitation, recovery, and reintegration of wounded or injured veterans into their communities;

(6) in planning for rehabilitation and community reintegration of veterans who have a traumatic brain injury, it is necessary for the Department of Veterans Affairs to provide a system for life-long case management for such veterans; and

(7) in such a system for life-long case management, it is necessary to conduct outreach and to tailor specialized traumatic brain injury case management and outreach for the unique needs of veterans with traumatic brain injury who reside in urban and non-urban settings.

The House bill contained no similar provision.

The House recedes.

*Individual rehabilitation and community reintegration plans for veterans and others with traumatic brain injury (sec. 1702)*

The Senate amendment contained a provision (sec. 1702) that would amend subchapter II of chapter 17 of title 38, United States Code, to require the Secretary of Veterans Affairs to develop an individualized rehabilitation and reintegration plan for each veteran or member of the armed forces who receives inpatient or outpatient rehabilitation care from the Department of Veterans Affairs (VA) for a traumatic brain injury and to provide the plan in writing to the veteran or service member before discharge from inpatient care.

The House bill contained no similar provision.

The House recedes with an amendment that would add a requirement for the Secretary to develop and carry out a comprehensive program of long-term care for post-acute traumatic brain injury rehabilitation at each VA polytrauma center. The program would include residential, community, and home-based components utilizing interdisciplinary treatment teams.

*Use of non-Department of Veterans Affairs facilities for implementation of rehabilitation and community reintegration plans for traumatic brain injury (sec. 1703)*

The Senate amendment contained a provision (sec. 1703) that would amend subchapter II of chapter 17 of title 38, United States Code, to require the Secretary of Veterans Affairs to provide rehabilitative treatment or services at non-Department of Veterans Affairs facilities to veterans or members of the armed forces who receive inpatient or outpatient care from the Department of Veterans Affairs (VA) for a traumatic brain injury when the VA is unable to provide treatment or services at the frequency or for the dura-

tion prescribed in the individual treatment plans or for whom the Secretary determines that it is optimal with respect to the recovery and rehabilitation of such individual.

The House bill contained no similar provision.

The House recedes with an amendment that would authorize the Secretary to provide health care and services through cooperative agreements with appropriate public or private entities with expertise in neurobehavioral rehabilitation and recovery programs.

*Research, education, and clinical care program on traumatic brain injury (sec. 1704)*

The Senate amendment contained a provision (sec. 1704) that would amend subchapter II of chapter 73 of title 38, United States Code, to require the Secretary of Veterans Affairs to establish a program on research, education, and clinical care to provide neuro-rehabilitation to veterans with a severe traumatic brain injury, including veterans in a minimally conscious state who would otherwise receive only long-term residential care.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary to establish and maintain a registry of names of each individual who: (1) served as a member of the armed forces in Operation Enduring Freedom or Operation Iraqi Freedom; (2) exhibits symptoms associated with traumatic brain injury; (3) applies for care and services from the Department of Veterans Affairs or files a claim for compensation for disability associated with such service; and (4) grants permission to the Secretary to include such information in the registry.

*Pilot program on assisted living services for veterans with traumatic brain injury (sec. 1705)*

The Senate amendment contained a provision (sec. 1705) that would require the Secretary of Veterans Affairs, in collaboration with the Defense and Veterans Brain Injury Center, to carry out a pilot program to assess the effectiveness of providing assisted living services to eligible veterans to enhance the rehabilitation, quality of life, and community integration of such veterans.

The House bill contained no similar provision.

The House recedes with a clarifying amendment.

*Provision of age-appropriate nursing home care (sec. 1706)*

The Senate amendment contained a provision (sec. 1707) that would require the Secretary of Veterans Affairs to ensure that nursing home care provided to young veterans who are injured or disabled through military service and require long-term care is provided in an age-appropriate manner.

The House bill contained no similar provision.

The House recedes with a technical amendment.

*Extension of period of eligibility for health care for veterans of combat service during certain periods of hostilities and war (sec. 1707)*

The Senate amendment contained a provision (sec. 1708) that would amend section 1710 of title 38, United States Code, to ex-

tend from 2 to 5 years the period of automatic eligibility for health care benefits from the Department of Veterans Affairs (VA) for veterans who served in a combat theater of operations.

The House bill contained no similar provision.

The House recedes with an amendment that would authorize 3 years of automatic eligibility for health care from the VA for veterans who served in a combat theater of operations and were discharged after 1998, but more than 5 years before the date of enactment of this Act, and who have not enrolled in the health care program of the VA.

*Service-connection and assessments for mental health conditions in veterans (sec. 1708)*

The Senate amendment contained a provision (sec. 1709) that would amend section 1702 of title 38, United States Code, to require the Secretary of Veterans Affairs to provide a preliminary general mental health assessment to certain veterans within 30 days of such a request.

The House recedes with an amendment that would clarify that an eligible veteran is one who served on active duty in a theater of combat operations during a period of war after the Persian Gulf War, or in combat against a hostile force during a period of hostilities after November 11, 1998.

*Modification of requirements for furnishing outpatient dental services to veterans with service-connected dental conditions or disabilities (sec. 1709)*

The Senate amendment contained a provision (sec. 1710) that would amend section 1712 of title 38, United States Code, to extend from 90 to 180 days after discharge or release from active duty the application period for dental benefits for veterans.

The House bill contained no similar provision.

The House recedes with a technical amendment.

*Clarification of purpose of outreach services program of Department of Veterans Affairs (sec. 1710)*

The Senate amendment contained a provision (sec. 1712) that would amend section 6301 of title 38, United States Code, to clarify that the outreach services program of the Department of Veterans Affairs includes members of the reserve components.

The House bill contained no similar provision.

The House recedes with a clarifying amendment.

*Designation of fiduciary or trustee for purposes of Traumatic Servicemembers' Group Life Insurance (sec. 1711)*

The Senate amendment contained a provision (sec. 1071) that would require the Secretary of Defense, in consultation with the Secretary of Veterans Affairs, to develop a form for the designation of a fiduciary to receive the funds distributed under section 1980A of title 38, United States Code, in the case of a service member who is medically incapacitated or experiencing an extended loss of consciousness.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary of Veterans Affairs, in consultation with the military service secretaries, to develop a process for the designation of a fiduciary or trustee of a member of the uniformed services insured against traumatic injury under section 1980A of title 38, United States Code.

#### LEGISLATIVE PROVISIONS NOT ADOPTED

##### *Demonstration program on preventing veterans at risk of homelessness from becoming homeless*

The Senate amendment contained a provision (sec. 1711) that would require the Secretary of Veterans Affairs to carry out a demonstration program for the purpose of: (1) identifying members of the armed forces on active duty who are at risk of becoming homeless after they are discharged or released from active duty; and (2) providing referral, counseling, and supportive services, as appropriate, to help prevent such members, upon becoming veterans, from becoming homeless.

The House bill contained no similar provision.

The Senate recedes.

##### *Increase in physicians at hospitals of the Department of Veterans Affairs*

The House bill contained a provision (sec. 1453) that would require the Secretary of Veterans Affairs to increase the number of resident physicians at hospitals of the Department of Veterans Affairs.

The Senate amendment contained no similar provision.

The House recedes.

##### *Research on traumatic brain injury*

The Senate amendment contained a provision (sec. 1706) that would require the Secretary of Veterans Affairs, when carrying out certain research programs and activities, to ensure that such programs and activities include research on the sequelae of mild to severe forms of traumatic brain injury.

The House bill contained no similar provision.

The Senate recedes.

##### *Study and report of waiting periods for appointments at Department of Veterans Affairs medical facilities*

The House bill contained a provision (sec. 1438) that would require the Secretary of Veterans Affairs to conduct a study on the average length of time between the desired date for which a veteran seeks to schedule an appointment for health care at a Department of Veterans Affairs medical facility and the date on which such appointment is completed.

The Senate amendment contained no similar provision.

The House recedes.

## TITLE XVIII—NATIONAL GUARD BUREAU MATTERS AND RELATED MATTERS

### *Short title (sec. 1801)*

The House bill contained a provision (sec. 1601) that would provide that this title may be cited as the “National Guard Empowerment Act”.

The Senate amendment contained a provision (sec. 1801) that would provide that this title may be cited as the “National Guard Empowerment Act of 2007”.

The House recedes.

### Subtitle A—National Guard Bureau

#### *Appointment, grade, duties, and retirement of the Chief of the National Guard Bureau (sec. 1811)*

The House bill contained a provision (sec. 1611) that would amend section 10502 of title 10, United States Code, to require that an officer appointed as the Chief of the National Guard Bureau (CNGB) serve in the grade of general and be the principal advisor to the Secretary of Defense, through the Chairman of the Joint Chiefs of Staff (CJCS), on National Guard matters. The provision would also designate the CNGB as an advisor on National Guard matters to the commanders of the United States Northern Command and to the Secretary of Homeland Security. Additionally, the provision would describe the appointment process by which officers would be recommended to the President for appointment as CNGB.

The Senate amendment contained similar provisions (secs. 533 and 1802(b)) that would establish additional criteria for appointment of CNGB in the grade of general, repeal the age 64 limitation on service of an officer serving as CNGB, designate the CNGB as an advisor to the Secretary of Defense through the CJCS on matters involving non-federalized National Guard forces and on other matters as determined by the Secretary of Defense, and authorize the President to defer the retirement of an officer serving as CNGB until the first day of the month following the month in which the officer becomes 68 years of age.

The House recedes with an amendment that would designate the CNGB as a principal advisor to the Secretary of Defense, through CJCS, on matters involving non-federalized National Guard forces and on other matters as determined by the Secretary of Defense. The CNGB would also serve as principal advisor to the Secretary and Chief of Staff of the Army and the Secretary and Chief of Staff of the Air Force on matters relating to the National Guard, the Army National Guard of the United States, and the Air National Guard of the United States. The amendment would also delete as unnecessary the provision relating to the deferral of retirement by the CNGB in view of the revisions contained elsewhere in this conference report.

*Establishment of National Guard Bureau as joint activity of Department of Defense (sec. 1812)*

The House bill contained a provision (sec. 1612) that would amend section 10501 of title 10, United States Code, to establish the National Guard Bureau (NGB) as a joint activity of the Department of Defense, and would amend chapter 1011 of title 10, United States Code, to require that the manpower requirements of the NGB as a joint activity of the Department of Defense be determined in accordance with regulations prescribed by the Secretary of Defense, in consultation with the Chairman of the Joint Chiefs of Staff.

The Senate amendment contained a similar provision (sec 1802(a)).

The Senate recedes.

The conferees concur with the views and recommendations of the Commission on the National Guard and Reserves as set forth in its report of March 1, 2007, with respect to the designation of the NGB as a joint activity. Specifically, this statutory amendment is intended to reflect the structure of the NGB and should not result in any change in the day-to-day relationship between the Chief of the NGB and the Secretaries of the Army and Air Force and their respective staffs. The conferees encourage the Secretary of Defense to modify the charter of the NGB accordingly and to consult with the Secretary of the Army and the Secretary of the Air Force, as well as the Chairman of the Joint Chiefs of Staff, in developing regulations to determine the manpower requirements of the NGB.

*Enhancement of functions of National Guard Bureau (sec. 1813)*

The House bill contained a provision (sec. 1613) that would amend section 10503 of title 10, United States Code, to expand the National Guard Bureau (NGB) charter to include facilitation and coordination with other federal agencies, the adjutants general of the States, United States Northern Command, and United States Joint Forces Command on the use of National Guard personnel and resources in the conduct of operations under title 32 of the United States Code, or in support of State missions, and would require the Secretary of Defense, in consultation with the Secretary of the Army and Secretary of the Air Force, to develop the charter for the NGB.

The House bill contained another provision (sec. 1616) that would make conforming and clerical amendments regarding section 10503 of title 10, United States Code.

The Senate amendment contained similar provisions (secs. 532 and 1802(c)).

The Senate recedes with an amendment that would expand the NGB charter to include assisting the Secretary of Defense in facilitating and coordinating with other federal agencies, the adjutants general of the States, United States Northern Command, and United States Joint Forces Command on the use of National Guard personnel and resources in the conduct of operations under title 32 of the United States Code, or in support of State missions.

The conferees agree with the view of the Commission on the National Guard and Reserves that the charter of the NGB does not

reflect some of the NGB's key roles and responsibilities and needs to be updated. The conferees also concur with the Commission that the NGB should continue to report to and work with the Secretaries and Chiefs of Staff of the Army and Air Force in coordinating the use of National Guard units.

*Requirement for Secretary of Defense to prepare plan for response to natural disasters and terrorist events (sec. 1814)*

The House bill contained a provision (sec. 1614) that would require the Secretary of Defense to prepare and submit to Congress an annual plan for coordinating the use of the National Guard and members of the armed forces on active duty when responding to natural disasters, acts of terrorism, and other man-made disasters. The Secretary of Defense would be required to prepare and submit the plan to Congress not later than March 1, 2008, and each March 1 thereafter.

The Senate amendment contained a similar provision (sec. 1806).

The Senate recedes with an amendment that would require the Secretary of Defense to consult with the Secretary of Homeland Security, the Chairman of the Joint Chiefs of Staff, the Commander of the United States Northern Command, and the Chief of the National Guard Bureau in the preparation of the plan, and would require the Secretary of Defense to submit an update of the plan no later than June 1, 2010.

The conferees urge the Secretary of Defense, as part of the response planning required by this provision, to address the nature of command relationships under which troops will operate during particular contingencies and ensure, as recommended by the Commission on the National Guard and Reserves, that necessary agreements are entered into as soon as practicable.

*Determination of Department of Defense civil support requirements (sec. 1815)*

The House bill contained a provision (sec. 1615) that would require the Secretary of Defense to determine the military-unique capabilities needed to be provided by the Department of Defense to support civil authorities in an incident of national significance or a catastrophic incident, and, in coordination with the secretaries of the military departments and the Chairman of the Joint Chiefs of Staff, to develop and implement a plan for providing the necessary funds and resources.

The Senate amendment contained a provision (sec. 1802(b)(3)) that would amend section 10504 of title 10, United States Code, to require the Chief of the National Guard Bureau to submit a report to Congress on the validated requirements for military assistance to civil authorities.

The Senate recedes with an amendment that would require the Secretary of Defense to consult with the Secretary of Homeland Security in determining the required military-unique capabilities.

Subtitle B—Additional Reserve Component Enhancement

*United States Northern Command (sec. 1821)*

The House bill contained a provision (sec. 1621) that would require the Chairman of the Joint Chiefs of Staff to review the civilian and military positions, job descriptions, and assignments within the United States Northern Command (NORTHCOM). The provision would also require the Secretary of Defense to establish procedures under which an officer who is on active duty or an officer who is on full-time National Guard duty may command mixed-status forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Chairman of the Joint Chiefs of Staff to conduct the manpower review of NORTHCOM with a goal of assessing the feasibility of significantly increasing the number of reserve component members assigned to, and civilians employed by, NORTHCOM who have experience in the planning, training, and employment of forces for homeland defense missions, domestic emergency response, and providing military support to civil authorities.

*Council of Governors (sec. 1822)*

The House bill contained a provision (sec. 1622) that would require the President to establish a bipartisan Council of Governors to advise the Secretary of Defense, the Secretary of Homeland Security, and the White House Homeland Security Council on matters related to the National Guard and civil support missions.

The Senate amendment contained no similar provision.

The Senate recedes.

*Plan for Reserve Forces Policy Board (sec. 1823)*

The House bill contained a provision (sec. 1623) that would amend section 10301 of title 10, United States Code, to replace the Reserve Forces Policy Board with a Reserve Components Policy Board consisting of 15 members appointed from civilian life by the Secretary of Defense to provide independent advice and recommendations on strategies, policies, and practices designed to improve and enhance the capabilities, efficiency, and effectiveness of the reserve components of the United States.

The Senate amendment contained a similar provision (sec 531).

The House recedes with an amendment that would require the Secretary of Defense to develop a plan to implement revisions that the Secretary determines necessary in the designation, organization, membership, functions, procedures, and legislative framework of the Reserve Forces Policy Board. The plan must be consistent with the findings, conclusions, and recommendations included in the report of the Commission on the National Guard and Reserves of March 1, 2007, and, to the extent possible, take into account the views and recommendations of civilian and military leaders, past chairmen of the Reserve Forces Policy Board, private organizations with expertise and interest in Department of Defense organization, and other individuals or groups in the discretion of the Secretary.

*High-level positions authorized or required to be held by reserve component general or flag officers (sec. 1824)*

The House bill contained a provision (sec. 1624) that would amend section 526(b)(2) of title 10, United States Code, to increase from 10 to 15 the number of general and flag officer positions on the staffs of the commanders of combatant commands that may be held by reserve component officers. The provision would also require the Chairman of the Joint Chiefs of Staff to designate up to three general and flag officer positions in the grade of lieutenant general or vice admiral that must be held by reserve component officers and provide that one of these positions must be the deputy commander of the combatant command whose geographic area of responsibility includes the United States.

The Senate amendment contained a provision (sec. 1803) that would express the sense of Congress that, whenever officers are considered for promotion to lieutenant general or vice admiral, qualified officers in the reserve components should be considered for promotion to that grade. The Senate amendment also contained a provision (sec. 1805) that would require that a position of Deputy Commander of United States Northern Command (NORTHCOM) be filled by a qualified officer of the National Guard eligible for promotion to the grade of lieutenant general.

The Senate recedes with an amendment that would: (1) express the sense of Congress that whenever officers are considered for promotion to lieutenant general or vice admiral, qualified officers in the reserve components should be considered for promotion to that grade; (2) amend section 164(e) of title 10, United States Code, to require that at least one deputy commander of NORTHCOM be a National Guard officer who is eligible for promotion to the grade of O-9 unless a National Guard officer is the commander of NORTHCOM; and (3) increase from 10 to 15 the number of general and flag officer positions on the staffs of the commanders of combatant commands that may be held by reserve component officers below the grade of lieutenant general or vice admiral.

*Retirement age and years of service limitations on certain reserve general and flag officers (sec. 1825)*

The House bill contained a provision (sec. 1625) that would amend section 14511 of title 10, United States Code, to specify the age at which reserve officers in the rank of general or admiral would be required to retire and limit their total service to 40 years. The provision would also amend section 14512 of title 10, United States Code, to exclude the Chief of the National Guard Bureau from its coverage and to require waiver by the President to allow the Chief of the Navy Reserve or the Commander of the Marine Forces Reserve to serve beyond age 64.

The Senate amendment contained a provision (sec. 533(e)) that would amend section 14512(a) of title 10, United States Code, to authorize the President to defer until age 68 the retirement of a reserve officer of the Army or Air Force serving as Chief of the National Guard Bureau, Chief of the Army Reserve, Chief of the Air Force Reserve, Director of the Army National Guard, Director of

the Air National Guard, an adjutant general, or the commanding general of the troops of a State.

The Senate recedes with an amendment that would modify section 14511 of title 10, United States Code, to provide that reserve officers in the grade of major general or rear admiral and above must retire at age 64 unless waivers to age 66 or 68 are authorized by the Secretary of Defense or the President respectively. The amendment would also modify section 14512 to authorize the Secretary of Defense to defer the retirement until age 66 of the Chief of the Navy Reserve and the Commander of the Marine Forces Reserve.

*Additional reporting requirements relating to National Guard equipment (sec. 1826)*

The House bill contained a provision (sec. 1626) that would amend section 10541 of title 10, United States Code, to add two additional reporting requirements to the annual report to Congress on National Guard and reserve component equipment: (1) a statement of the accuracy of the previous inventory projection, and if the projection was not met, an explanation of why it was not met, and (2) a certification from the Chief of the National Guard Bureau setting forth an inventory for the preceding fiscal year of each item of equipment for which funds were appropriated and which was due to be procured during that fiscal year which has not been received by a National Guard unit as of the close of that fiscal year.

The Senate amendment contained an identical provision (sec. 1807).

The conference agreement includes this provision.

LEGISLATIVE PROVISION NOT ADOPTED

*Promotion of reserve officers to lieutenant general grade*

The Senate amendment contained a provision (sec. 1804) that would amend section 10506(a)(3) of title 10, United States Code, to require that service of an officer as adjutant general be treated as joint duty experience, and would require the Secretaries of the Army and Air Force to review and report to the congressional defense committees on the promotion practices of their military departments for the promotion of reserve officers from major general to lieutenant general.

The House bill contained no similar provision.

The Senate recedes.

Division B—Military Construction Authorizations

BUDGET ITEMS

*Summary and explanation of funding tables*

Division B of this Act authorizes funding for military construction projects of the Department of Defense. It includes funding authorizations for the construction and operation of military family housing as well as military construction for the reserve components, the defense agencies, and the North Atlantic Treaty Organization (NATO) Security Investment program. It also provides au-

thorization for the base closure accounts that fund military construction, environmental cleanup, and other activities required to implement the decisions in base closure rounds.

The following tables provide the project-level authorizations for the military construction funding authorized in Division B of this Act and summarize that funding by account. Funding for base closure projects is explained in additional detail in the table included in title XXVII of this report.

The budget request for fiscal year 2008 included authorization of appropriations for military construction and housing programs totaling \$21.2 billion. Of this amount: \$9.8 billion was requested for military construction; \$2.9 billion for the construction and operation of family housing; and \$8.4 for base closure activities, including \$8.2 billion to implement the results of the 2005 Base Realignment and Closure (BRAC) round.

The original budget request also proposed an additional \$907.9 million in emergency spending for Army military construction projects in Iraq and Afghanistan and Navy military construction projects in the United States related to the administration's proposal to grow the size of the Marine Corps. The President's October budget amendment requested an additional \$1.5 billion in emergency funding for military construction and base closure, for a total emergency request of \$2.4 billion in addition to the \$21.2 billion request in the base budget, bringing the total military construction request to \$23.6 billion.

Authorizations for which emergency funding was requested and additional appropriations for domestic and overseas projects are contained in title XXIX of this Act.

Including all funding in Division B of this Act, the conferees recommend authorization of appropriations for military construction and housing programs totaling \$23.7 billion. The total amount authorized for appropriations reflects the continuing commitment of Congress to invest in the recapitalization of Department of Defense facilities and infrastructure to improve the quality of life and quality of work of our service members and their families.

Included in this conference report are projects not contained in either bill which were not included in the normal authorization and appropriation legislation as a result of a decision by the Committee on Appropriations of the House of Representatives to modify their traditional procedures. These projects were eventually voted on and approved by the House of Representatives in appropriations legislation on November 6, 2007, approximately 5 weeks after the Senate requested a conference and appointed conferees on this legislation. Because these projects have been approved by the House of Representatives, and as a matter of comity, the conferees agreed to consider and authorize them in this legislation. But the conferees consider the process that was followed in this case to be an exception and by authorizing these projects do not intend to establish a precedent or commit to following such a process in the future.

## SUMMARY OF FY 2008 MILITARY CONSTRUCTION AUTHORIZATION OF APPROPRIATIONS

## LEGISLATIVE PROVISIONS ADOPTED

*Short title (sec. 2001)*

The House bill contained a provision (sec. 2001) that would designate Division B of this Act as the Military Construction Authorization Act for Fiscal Year 2008.

The Senate amendment contained an identical provision (sec. 2001).

The conference agreement includes this provision.

*Expiration of authorizations and amounts required to be specified by law (sec. 2002)*

The House bill contained a provision (sec. 2701) that would establish the expiration date for authorizations in this Act for military construction projects, repair of real property, land acquisition, family housing projects, and contributions to the North Atlantic Treaty Organization infrastructure program, as of October 1, 2010, or the date of enactment of an act authorizing funds for military construction for fiscal year 2011, whichever is later.

The Senate amendment contained a similar provision (sec. 2802).

The House recedes.

## LEGISLATIVE PROVISION NOT ADOPTED

*Effective date*

The House bill contained a provision (sec. 2704) that would provide that titles XXI, XXII, XXIII, XXIV, XXV, and XXVI of this Act shall take effect on October 1, 2007, or the date of enactment of this Act, whichever is later.

The Senate amendment contained an identical provision (sec. 2801).

Because the conference report was not adopted prior to October 1, 2007, this provision is no longer required and was not included in the conference agreement.

## TITLE XXI—ARMY

## BUDGET ITEMS

*Summary*

The fiscal year 2008 budget request for Army military construction included “placeholders” of \$2.4 billion related to facilities to support the administration’s “Grow the Force” proposal to increase the size of the Army. On March 30, 2007, the Army provided a detailed breakout and supporting budget justification materials to Congress requesting a specific allocation of these funds. While this was not an official administration budget amendment, the conferees have reviewed this request and included these proposed changes in the conference agreement. These projects are identified in the State list table included in this report.

The conferees have reduced the amounts authorized to be appropriated for fiscal year 2008 for projects for which a substantial amount of the full cost of the project cannot be executed in fiscal

year 2008, including projects to support the stationing of a full brigade complex at Vicenza, Italy, and the funding requested for a new headquarters facility for the U.S. Southern Command in Miami, Florida. The conferees have provided full project authorizations for these projects, and these reductions to the authorization of appropriations were made without prejudice to the projects. The conferees encourage the Army to request the balance of the funding for these projects in the fiscal year 2009 budget.

Funding for a project at Eglin Air Force Base, Florida was eliminated because the project could not be executed in fiscal year 2008 based on the current schedule for the required environmental analysis.

The congressional defense committees and the Department of Defense have traditionally analyzed requirements and funding for mission projects and quality of life projects as important and distinct categories. Two projects requested by the Army blur these distinctions. The first is a headquarters facility for the U.S. Southern Command in Miami, which included funding for a child development center inside the overall project cost for the headquarters. The second is a brigade complex maintenance facility at Fort Drum, New York that combined funding for a dining facility with funding for mission-oriented projects such as vehicle maintenance shops. The conferees have authorized the mission and quality of life elements as separate projects in these cases. However, the conferees direct the Army, and the other elements of the Department of Defense, to refrain from combining mission facilities and quality of life facilities into single project requests in future budget submissions.

The conferees also separately authorized funding requested within a project for Vicenza that is actually intended for a separate installation. The conferees also direct the Department to refrain from including projects at disparate installations in a single project line in the future.

#### ITEM OF SPECIAL INTEREST

##### *Unspecified minor construction, Army*

The conferees agree that of the funds authorized for appropriation for unspecified minor construction for the Army, the following amounts may be made available: Hawthorne Army Depot, Nevada-Wabuska rail spur, \$1.4 million; and Camp Rudder, Eglin Air Force Base, Florida, dining facility, \$1.5 million.

#### LEGISLATIVE PROVISIONS ADOPTED

##### *Authorized Army construction and land acquisition projects (sec. 2101)*

The House bill contained a provision (sec. 2101) that would authorize military construction projects for the active component of the Army for fiscal year 2008.

The Senate amendment contained a similar provision (sec. 2101).

The conference agreement includes this provision.

The authorized amounts are listed in this provision on an installation-by-installation basis. A State list of projects contained in the table at the beginning of the statement of managers of Division B of this conference report provides the binding list of specific construction projects authorized at each location.

*Family housing (sec. 2102)*

The House bill contained a provision (sec. 2102) that would authorize new construction and planning and design of family housing units for the Army for fiscal year 2008. It would also authorize funds for facilities that support family housing, including housing management offices and housing maintenance and storage facilities.

The Senate amendment contained a similar provision (sec. 2102).

The Senate recesses.

*Improvements to military family housing units (sec. 2103)*

The House bill contained a provision (sec. 2103) that would authorize funding for fiscal year 2008 to improve existing Army family housing units.

The Senate amendment contained an identical provision (sec. 2103).

The conference agreement includes this provision.

*Authorization of appropriations, Army (sec. 2104)*

The House bill contained a provision (sec. 2104) that would authorize appropriations for the active component military construction and family housing projects of the Army for fiscal year 2008. This provision would also provide an overall limit on the cost of the fiscal year 2008 military construction and family housing projects authorized for the active-duty component of the Army.

The Senate amendment contained a similar provision (sec. 2204).

The conference agreement includes this provision.

*Termination of authority to carry out fiscal year 2007 Army projects for which funds were not appropriated (sec. 2105)*

The Senate amendment contained a provision (sec. 2105) that would repeal the project authorizations and authorization of appropriations for Army military construction projects authorized in fiscal year 2007 for which no funds were appropriated. No appropriations were provided in fiscal year 2007 for projects that were authorized but were not included in the President's original budget request.

The House bill contained no similar provision.

The House recesses.

The entire list of fiscal year 2007 active-component Army projects for which the authorizations would be repealed follows. The conferees have provided new authorizations for some of these projects for fiscal year 2008. Those projects that received new fiscal year 2008 authorizations can be found in the State list of fiscal year 2008 projects contained in this report.

The conferees urge the Department of Defense and the military departments to review any projects on this list that are not authorized and appropriated in fiscal year 2008 and re-insert those projects, if the requirements are still valid, in the fiscal year 2009 future-years defense program.

*Technical amendments to Military Construction Authorization Act for Fiscal Year 2007 (sec. 2106)*

The Senate amendment contained a provision (sec. 2108) that would make two corrections to the table of project authorizations in section 2101 of the Military Construction Authorization Act for Fiscal Year 2007 (Division B of Public Law 109–364). One amendment would modify the name of a specific location of a project in Romania to reflect a modification of the original plan. This modification was proposed by the Army and understood by the conferees prior to the adoption of the fiscal year 2007 legislation. The second amendment would correct an enrolling error and align the text of the public law with the text of the conference report.

The House bill contained no similar provision.

The House recedes with a technical amendment.

*Modification of authority to carry out certain fiscal year 2006 projects (sec. 2107)*

The House bill contained a provision (sec. 2105) that would amend section 2101 of the Military Construction Authorization Act for Fiscal Year 2006 (Division B of Public Law 109–163) to increase the project authorizations for Fort Bragg, North Carolina by \$7.0 million. This increase was requested by the Department of Defense in its legislative proposal to Congress.

The Senate amendment contained an identical provision (sec. 2106).

The conference agreement includes this provision.

*Extension of authorization of certain fiscal year 2005 project (sec. 2108)*

The Senate amendment contained a provision (sec. 2107) that would extend the authorization for an Army fiscal year 2005 military construction project at Schofield Barracks, Hawaii, until October 1, 2008, or the date of enactment of an act authorizing funds for military construction for fiscal year 2009, whichever is later.

The House bill contained this extension in a broader provision extending authorizations for certain fiscal year 2005 projects across the Department of Defense (sec. 2702).

The House recedes with a technical amendment.

The conferees note that this extension was requested by the Department of Defense in their legislative proposal to Congress.

*Ground lease, SOUTHCOM headquarters facility, Miami-Doral, Florida (sec. 2109)*

The Senate amendment contained a provision (sec. 2109) that would require amendments to the existing ground lease agreement between the United States Government and the State of Florida for the land proposed as the site of a new headquarters for the U.S. Southern Command (SOUTHCOM) before the Secretary of the Army could begin construction of the headquarters. The amendment would allow flexibility for the use of this facility by other federal agencies in the event future requirements change, and would require the lease term to extend to 2055 rather than for 20 years.

The House bill contained a similar provision (sec. 2834).

The House recedes.

The conferees understand the State of Florida is willing to make these modifications to the lease agreement.

## TITLE XXII—NAVY

### BUDGET ITEMS

#### *Summary*

The budget request for Navy military construction included “placeholders” of \$382.9 million related to facilities to support the administration’s “Grow the Force” proposal to increase the size of the Marine Corps. On April 20, 2007, the Navy provided a detailed breakout and supporting budget justification materials to Congress requesting a specific allocation of these funds. While this was not an official administration budget amendment, the conferees have reviewed this request and included these proposed changes in the conference agreement. These projects are identified in the State list table included in this report.

The conferees have reduced the amounts authorized to be appropriated for fiscal year 2008 for projects for which a substantial amount of the full cost of the project cannot be executed in fiscal year 2008, including a submarine magnetic silencing facility at Pearl Harbor, Hawaii, and the Kilo Wharf project in Guam. The conferees have provided full project authorizations for these projects, and these reductions to the authorization of appropriations were made without prejudice to the projects. The conferees encourage the Navy to request the balance of the funding for these projects in the fiscal year 2009 budget.

### LEGISLATIVE PROVISIONS ADOPTED

#### *Authorized Navy construction and land acquisition projects (sec. 2201)*

The House bill contained a provision (sec. 2201) that would authorize military construction projects for the active component of the Navy and Marine Corps for fiscal year 2008.

The Senate amendment contained a similar provision (sec. 2201).

The conference agreement includes this provision.

The authorized amounts are listed in this provision on an installation-by-installation basis. A State list of projects contained in the table at the beginning of the statement of managers of Division B of this conference report provides the binding list of specific construction projects authorized at each location.

#### *Family housing (sec. 2202)*

The House bill contained a provision (sec. 2202) that would authorize new construction and planning and design of family housing units for the Navy for fiscal year 2008. It would also authorize funds for facilities that support family housing, including housing management offices and housing maintenance and storage facilities.

The Senate amendment contained a similar provision (sec. 2202).

The conference agreement includes this provision.

*Improvements to military family housing units (sec. 2203)*

The House bill contained a provision (sec. 2203) that would authorize funding for fiscal year 2008 to improve existing Navy and Marine Corps family housing units.

The Senate amendment contained an identical provision (sec. 2203).

The conference agreement includes this provision.

*Authorization of appropriations, Navy (sec. 2204)*

The House bill contained a provision (sec. 2204) that would authorize appropriations for the active component military construction and family housing projects of the Department of the Navy for fiscal year 2008. This provision would also provide an overall limit on the cost of the fiscal year 2008 military construction and family housing projects authorized for the active-duty component of the Navy and Marine Corps.

The Senate amendment contained a similar provision (sec. 2204).

The conference agreement includes this provision.

*Termination of authority to carry out fiscal year 2007 Navy projects for which funds were not appropriated (sec. 2205)*

The Senate amendment contained a provision (sec. 2205) that would repeal the project authorizations and authorization of appropriations for Navy military construction projects authorized in fiscal year 2007 for which no funds were appropriated. No appropriations were provided in fiscal year 2007 for projects that were authorized but were not included in the President's original budget request.

The House bill contained no similar provision.

The House recedes.

The entire list of fiscal year 2007 active-component Navy projects for which the authorizations would be repealed follows. The conferees have provided new authorizations for some of these projects for fiscal year 2008. Those projects that received new fiscal year 2008 authorizations can be found in the State list of fiscal year 2008 projects contained in this report.

The conferees urge the Department of Defense and the military departments to review any projects on this list that are not authorized and appropriated in fiscal year 2008 and re-insert those projects, if the requirements are still valid, in the fiscal year 2009 future-years defense program.

*Modification of authority to carry out certain fiscal year 2005 project (sec. 2206)*

The Senate amendment contained a provision (sec. 2206) that would amend section 2201(a) of the Military Construction Authorization Act for Fiscal Year 2005 (Public Law 108–375) as amended by section 2201(a) of the Military Construction Authorization Act for Fiscal Year 2006 (Public Law 109–163), and further amended by section 2201(a) of the Military Construction Authorization Act for Fiscal Year 2007 (Public Law 109–364), to increase the authorized cost for a project at the Strategic Weapons Facility, Bangor, Washington.

The House bill contained no similar provision.

The House recedes.

The conferees note that this increase was requested by the Department of the Navy.

*Repeal of authorization for construction of Navy outlying landing field, Washington County, North Carolina (sec. 2207)*

The House bill contained a provision (sec. 2205) that would amend section 2201(a) of the Military Construction Authorization Act for Fiscal Year 2004 (Public Law 108–136), as amended, and section 2201(a) of the Military Construction Authorization Act for Fiscal Year 2005 (Public Law 108–375), as amended, to repeal the authority for construction of an outlying landing field at Washington County, North Carolina.

The Senate amendment contained no similar provision.

The Senate recedes.

The conferees expect the Department of the Navy to request new authorization for an outlying field once a study of the impact to the environment is completed and a site is selected.

## TITLE XXIII—AIR FORCE

### LEGISLATIVE PROVISIONS ADOPTED

*Authorized Air Force construction and land acquisition projects (sec. 2301)*

The House bill contained a provision (sec. 2301) that would authorize Air Force military construction projects for fiscal year 2008.

The Senate amendment contained a similar provision (sec. 2301).

The conference agreement includes this provision.

The authorized amounts are listed in this provision on an installation-by-installation basis. A State list of projects contained in the table at the beginning of the statement of managers of Division B of this conference report provides the binding list of specific construction projects authorized at each location.

*Family housing (sec. 2302)*

The House bill contained a provision (sec. 2302) that would authorize new construction and planning and design of family housing units for the Air Force for fiscal year 2008. It would also authorize funds for facilities that support family housing, including

housing management offices and housing maintenance and storage facilities.

The Senate amendment contained an identical provision (sec. 2302).

The conference agreement includes this provision.

*Improvements to military family housing units (sec. 2303)*

The House bill contained a provision (sec. 2303) that would authorize funding for fiscal year 2008 to improve existing Air Force family housing units.

The Senate amendment contained an identical provision (sec. 2303).

The conference agreement includes this provision.

*Authorization of appropriations, Air Force (sec. 2304)*

The House bill contained a provision (sec. 2304) that would authorize appropriations for the active component military construction and family housing projects of the Air Force for fiscal year 2008. This provision would also provide an overall limit on the cost of the fiscal year 2008 military construction and family housing projects authorized for the active-duty component of the Air Force.

The Senate amendment contained a similar provision (sec. 2304).

The conference agreement includes this provision.

*Termination of authority to carry out fiscal year 2007 Air Force projects for which funds were not appropriated (sec. 2305)*

The Senate amendment contained a provision (sec. 2305) that would repeal the project authorizations and authorization of appropriations for Air Force military construction projects authorized in fiscal year 2007 for which no funds were appropriated. No appropriations were provided in fiscal year 2007 for projects that were authorized but were not included in the President's original budget request.

The House bill contained no similar provision.

The House recedes with an amendment that would provide an exception for projects for which a contract was awarded during fiscal year 2007. The conferees note that this would apply only to a project at Robins Air Force Base, Georgia.

The entire list of fiscal year 2007 active-component Air Force projects for which the authorizations would be repealed follows. The conferees have provided new authorizations for some of these projects for fiscal year 2008. Those projects that received new fiscal year 2008 authorizations can be found in the State list of fiscal year 2008 projects contained in this report.

The conferees urge the Department of Defense and the military departments to review any projects on this list that are not authorized and appropriated in fiscal year 2008 and re-insert those projects, if the requirements are still valid, in the fiscal year 2009 future-years defense program.

## TERMINATION OF FY2007 AUTHORIZATIONS

*Modification of authority to carry out certain fiscal year 2006 project (sec. 2306)*

The House bill contained a provision (sec. 2305) that would amend section 2301 of the Military Construction Authorization Act for Fiscal Year 2006 (Division B of Public Law 109–163) to increase project authorizations for MacDill Air Force Base, Florida by \$25.0 million.

The Senate amendment contained a similar provision (sec. 2306).

The Senate recedes.

The conferees note that this increase was requested by the Department of Defense in its legislative proposal to Congress.

*Extension of authorizations of certain fiscal year 2005 projects (sec. 2307)*

The Senate amendment contained a provision (sec. 2307) that would extend the authorization for several fiscal year 2005 Air Force military construction projects until October 1, 2008, or the date of enactment of an act authorizing funds for military construction for fiscal year 2009, whichever is later.

The House bill contained a similar list of extensions in a broader provision extending authorizations for certain fiscal year 2005 projects across the Department of Defense (sec. 2702).

The House recedes with a technical amendment.

The conferees note that these extensions were requested by the Air Force.

*Extension of authorizations of certain fiscal year 2004 projects (sec. 2308)*

The Senate amendment contained a provision (sec. 2308) that would extend the authorization for certain fiscal year 2005 Air Force military construction projects until October 1, 2008, or the date of enactment of an act authorizing funds for military construction for fiscal year 2009, whichever is later.

The House bill contained an identical list of extensions in a broader provision extending authorizations for certain fiscal year 2004 projects across the Department of Defense (sec. 2703).

The House recedes with a technical amendment.

The conferees note that these extensions were requested by the Department of Defense in their legislative proposal to Congress.

## TITLE XXIV—DEFENSE AGENCIES

### BUDGET ITEMS

#### *Summary*

The Department of Defense requested funding for chemical demilitarization as a new separate funding title. The conference agreement continues to fund this program in title XXIV, as in previous years.

The conferees have reduced the amounts authorized to be appropriated for fiscal year 2008 for projects for which a substantial amount of the full cost of the project cannot be executed in fiscal

year 2008, including a Special Operations facility at Dam Neck, Virginia, and a Defense Logistics Agency project at Point Loma, California. The conferees have provided full project authorizations for these projects, and these reductions to the authorization of appropriations were made without prejudice to the projects. The conferees encourage the Department to request the balance of the funding for these projects in the fiscal year 2009 budget.

No authorization was provided for a Special Operations Forces headquarters facility at Little Creek, Virginia, based on information from the Commander, United States Special Operations Command, that this project is not required at this time.

#### LEGISLATIVE PROVISIONS ADOPTED

##### *Authorized defense agencies construction and land acquisition projects (sec. 2401)*

The House bill contained a provision (sec. 2401) that would authorize military construction projects for the defense agencies for fiscal year 2008.

The Senate amendment contained a similar provision (sec. 2401).

The conference agreement includes this provision.

The authorized amounts are listed in this provision on an installation-by-installation basis. A State list of projects contained in the table at the beginning of the statement of managers of Division B of this conference report provides the binding list of specific construction projects authorized at each location.

##### *Energy conservation projects (sec. 2402)*

The House bill contained a provision (sec. 2402) that would authorize the Secretary of Defense to carry out energy conservation projects.

The Senate amendment contained a similar provision (sec. 2402).

The House recedes with a technical amendment.

##### *Authorization of appropriations, defense agencies (sec. 2403)*

The House bill contained a provision (sec. 2404) that would authorize appropriations for the military construction projects of the defense agencies for fiscal year 2008. This provision would also provide an overall limit on the cost of the fiscal year 2008 military construction projects authorized for the defense agencies.

The Senate amendment contained a similar provision (sec. 2403).

The conference agreement includes this provision.

##### *Termination or modification of authority to carry out fiscal year 2007 defense agencies projects (sec. 2404)*

The Senate amendment contained a provision (sec. 2404) that would repeal the project authorizations and authorization of appropriations for defense agency military construction projects authorized in fiscal year 2007 for which no funds were appropriated. No appropriations were provided in fiscal year 2007 for projects that

were authorized but were not included in the President's original budget request.

The House bill contained no similar provision.

The House recedes with a technical amendment.

The entire list of fiscal year 2007 defense agency projects for which the authorizations would be repealed follows. The conferees have provided new authorizations for some of these projects for fiscal year 2008. Those projects that received new fiscal year 2008 authorizations can be found in the State list of fiscal year 2008 projects contained in this report.

The conferees urge the Department of Defense to review any projects on this list that are not authorized and appropriated in fiscal year 2008 and re-insert those projects, if the requirements are still valid, in the fiscal year 2009 future-years defense program.

## TERMINATION OF FY2007 AUTHORIZATIONS

| Account                       | Location | Installation        | Project Title                                 | FY2007<br>Budget<br>Request | FY 2007<br>Conference<br>Authorization | Authorization<br>Amount<br>Terminated |
|-------------------------------|----------|---------------------|---|-----------------------------|--|---------------------------------------|
| Defense Agency Mississippi    |          | Sierra Space Center | Riverine and Combat Craft Operations Facility |                             | 10,200                                 | 10,200                                |
| Defense Agency North Carolina |          | Fort Bragg          | SOF Communications Training Facility          |                             | 6,800                                  | 6,800                                 |
| Defense Agency Kentucky       |          | Blue Grass Depot    | Ammunition Demilitarization Facility, Phase 7 | 89,157                      | 99,157                                 | 10,000                                |
|                               |          |                     | Defense Agency Authorization Terminations     |                             |  | 27,100                                |

*Munitions demilitarization facilities, Blue Grass Army Depot, Kentucky, and Pueblo Chemical Activity, Colorado (sec. 2405)*

The Senate amendment contained a provision (sec. 2406) that would permit the Secretary of Defense to transfer, subject to certain certifications, authorizations in this Act for military construction for the defense agencies in order to provide additional funds to accelerate the construction of previously authorized facilities for the destruction of chemical weapons at Blue Grass Army Depot, Kentucky, and Pueblo Chemical Activity, Colorado. The amendment would set forth a maximum amount that could be transferred for each facility.

The House bill contained no similar provision.

The House recedes with a technical amendment. The conferees expect any authorizations transferred under the authority of this section to be derived from bid savings, not from the cancellation of other projects.

*Extension of authorizations of certain fiscal year 2005 projects (sec. 2406)*

The Senate amendment contained a provision (sec. 2405) that would extend the authorization for certain fiscal year 2005 military construction projects until October 1, 2008, or the date of enactment of an act authorizing funds for military construction for fiscal year 2009, whichever is later.

The House bill contained an identical list of extensions in a broader provision extending authorizations for certain fiscal year 2005 projects across the Department of Defense (sec. 2702).

The House recedes with a technical amendment.

#### LEGISLATIVE PROVISION NOT ADOPTED

*Wounded warrior facility support*

The House bill contained a provision (sec. 2405) that would reallocate funding in the base closure account to accelerate or enhance medical care facilities related to the establishment of the Walter Reed National Medical Center.

The Senate amendment contained no similar provision.

The House recedes.

The conference outcome is reflected in the tables in this conference report. The conferees note that the elements of this provision were incorporated in the budget amendment submitted by the President on October 22, 2007, and are authorized in title XXIX of this Act.

### TITLE XXV—NORTH ATLANTIC TREATY ORGANIZATION SECURITY INVESTMENT PROGRAM

#### LEGISLATIVE PROVISIONS ADOPTED

*Authorized NATO construction and land acquisition projects (sec. 2501)*

The House bill contained a provision (sec. 2501) that would authorize the Secretary of Defense to make contributions to the North

Atlantic Treaty Organization (NATO) Security Investment Program in an amount equal to the sum of the amount specifically authorized in section 2502 of this title and the amount of recoupment due to the United States for construction previously financed by the United States.

The Senate amendment contained an identical provision (sec. 2501).

The conference agreement includes this provision.

*Authorization of appropriations, NATO (sec. 2502)*

The House bill contained a provision (sec. 2502) that would authorize appropriations of \$201.4 million for the United States' contribution to the North Atlantic Treaty Organization (NATO) Security Investment Program for fiscal year 2008.

The Senate amendment contained an identical provision (sec. 2502).

The conference agreement includes this provision.

## TITLE XXVI—GUARD AND RESERVE FORCES FACILITIES

### BUDGET ITEMS

The conference agreement includes specific project authorizations for Guard and reserve projects, in accordance with the long-standing process used for active component construction projects, in addition to the traditional authorization of appropriations for Guard and reserve projects.

### ITEMS OF SPECIAL INTEREST

*Unspecified minor construction, Army National Guard*

The conferees agree that of the funds authorized for appropriation for unspecified minor construction for the Army National Guard, the following amounts may be made available: Marana, Arizona, fire station, Silverbell Army Heliport, \$2.0 million; Camp Dodge, Iowa, main entrance, \$1.5 million; Camp Perry, Ohio, base engineering, operations, and classroom facility, \$1.5 million; Newton Falls, Ohio, training building (#813) alteration, Ravenna Training and Logistics Site, \$1.5 million; Kenai, Alaska, add/alter readiness center, \$1.4 million; and Northfield, Vermont, billeting, regional readiness tech center, \$1.5 million.

*Unspecified minor construction, Air National Guard*

The conferees agree that of the funds authorized for appropriation for unspecified minor construction for the Air National Guard, the following amounts may be made available: Duluth, Minnesota, replace storage facilities, \$1.5 million; and Rapid City, South Dakota, joint force headquarters, \$900,000.

## LEGISLATIVE PROVISIONS ADOPTED

*Authorized Army National Guard construction and land acquisition projects (sec. 2601)*

The Senate amendment contained a provision (sec. 2601) that would authorize military construction projects for the Army National Guard for fiscal year 2008.

The House bill contained no similar provision.

The House recedes with an amendment modifying the list of projects authorized in this Act.

The authorized amounts are listed in this provision on an installation-by-installation basis. A State list of projects contained in the table at the beginning of the statement of managers of Division B of this conference report provides the binding list of specific construction projects authorized at each location.

*Authorized Army Reserve construction and land acquisition projects (sec. 2602)*

The Senate amendment contained a provision (sec. 2602) that would authorize military construction projects for the Army Reserve for fiscal year 2008.

The House bill contained no similar provision.

The House recedes with an amendment modifying the list of projects authorized in this Act.

The authorized amounts are listed in this provision on an installation-by-installation basis. A State list of projects contained in the table at the beginning of the statement of managers of Division B of this conference report provides the binding list of specific construction projects authorized at each location.

*Authorized Navy Reserve and Marine Corps Reserve construction and land acquisition projects (sec. 2603)*

The Senate amendment contained a provision (sec. 2603) that would authorize military construction projects for the Navy Reserve and Marine Corps Reserve for fiscal year 2008.

The House bill contained no similar provision.

The House recedes with an amendment modifying the list of projects authorized in this Act.

The authorized amounts are listed in this provision on an installation-by-installation basis. A State list of projects contained in the table at the beginning of the statement of managers of Division B of this conference report provides the binding list of specific construction projects authorized at each location.

*Authorized Air National Guard construction and land acquisition projects (sec. 2604)*

The Senate amendment contained a provision (sec. 2604) that would authorize military construction projects for the Air National Guard for fiscal year 2008.

The House bill contained no similar provision.

The House recedes with an amendment modifying the list of projects authorized in this Act.

The authorized amounts are listed in this provision on an installation-by-installation basis. A State list of projects contained in

the table at the beginning of the statement of managers of Division B of this conference report provides the binding list of specific construction projects authorized at each location.

*Authorized Air Force Reserve construction and land acquisition projects (sec. 2605)*

The Senate amendment contained a provision (sec. 2605) that would authorize military construction projects for the Air Force Reserve for fiscal year 2008.

The House bill contained no similar provision.

The House recedes.

The authorized amounts are listed in this provision on an installation-by-installation basis. A State list of projects contained in the table at the beginning of the statement of managers of Division B of this conference report provides the binding list of specific construction projects authorized at each location.

*Authorization of appropriations, National Guard and Reserve (sec. 2606)*

The House bill contained a provision (sec. 2601) that would authorize appropriations for reserve component military construction projects for fiscal year 2008.

The Senate amendment contained a similar provision (sec. 2606).

The conference agreement includes this provision.

*Termination of authority to carry out fiscal year 2007 Guard and Reserve projects for which funds were not appropriated (sec. 2607)*

The Senate amendment contained a provision (sec. 2607) that would repeal the project authorizations and authorization of appropriations for reserve component military construction projects authorized in fiscal year 2007 for which no funds were appropriated. No appropriations were provided in fiscal year 2007 for projects that were authorized but were not included in the President's original budget request.

The House bill contained no similar provision.

The House recedes.

The entire list of fiscal year 2007 reserve component projects for which the authorizations would be repealed follows. The conferees have provided new authorizations for some of these projects for fiscal year 2008. Those projects that received new fiscal year 2008 authorizations can be found in the State list of fiscal year 2008 projects contained in this report.

The conferees urge the Department of Defense and the military departments to review any projects on this list that are not authorized and appropriated in fiscal year 2008 and re-insert those projects, if the requirements are still valid, in the fiscal year 2009 future-years defense program.

*Modification of authority to carry out fiscal year 2006 Air Force Reserve construction and acquisition projects (sec. 2608)*

The Senate amendment contained a provision (sec. 2608) that would reduce the authorization of appropriations for fiscal year 2006 Air Force Reserve projects. The provision would eliminate the authorization to convert a hanger into a headquarters for a C-17 unit at Elmendorf Air Force Base, Alaska.

The House bill included no similar provision.

The House recedes.

*Extension of authorizations of certain fiscal year 2005 projects (sec. 2609)*

The Senate amendment contained a provision (sec. 2609) that would extend the authorization of certain fiscal year 2005 military construction projects until October 1, 2008, or the date of enactment of an act authorizing funds for military construction for fiscal year 2009, whichever is later.

The House bill contained an identical list of extensions in a broader provision extending authorizations for certain fiscal year 2005 projects across the Department of Defense (sec. 2702).

The House recedes with a technical amendment.

*Extension of authorizations of certain fiscal year 2004 projects (sec. 2610)*

The Senate amendment contained a provision (sec. 2610) that would extend the authorization for certain fiscal year 2005 Army National Guard military construction projects until October 1, 2008, or the date of enactment of an act authorizing funds for military construction for fiscal year 2009, whichever is later.

The House bill contained an identical list of extensions in a broader provision extending authorizations for certain fiscal year 2004 projects across the Department of Defense (sec. 2703).

The House recedes with a technical amendment.

The conferees note that these extensions were requested by the Department of Defense in their legislative proposal to Congress.

## TITLE XXVII—BASE CLOSURE AND REALIGNMENT ACTIVITIES

### BUDGET ITEMS

*Summary and explanation of tables*

The budget request included \$220.7 million for the ongoing cost of environmental remediation and other activities necessary to continue implementation of the 1988, 1991, 1993, and 1995 Base Realignment and Closure (BRAC) rounds. The conference agreement authorizes funding for these activities in section 2701 of this Act, including an increase of \$75.0 million to accelerate the cleanup of BRAC properties.

In addition, the budget requested an authorization of appropriations of \$8.2 billion for implementation of the 2005 BRAC round. Section 2703 of this Act authorizes appropriations requested for BRAC activities in fiscal year 2008. Included in the \$8.2 billion

requested for BRAC is an authorization of appropriations for \$6.4 billion in military construction projects that would be initiated in fiscal year 2008. The full project authorization amount of these projects is \$8.7 billion. Section 2702 of this Act provides the authorization for these projects.

The conference agreement includes a general reduction to the BRAC 2005 account that does not reduce the amount authorized for any specific project.

The following table provides the specific amount authorized for each BRAC military construction project as well as the amount authorized for appropriations for all BRAC activities, including military construction, environmental costs, relocation and other operation and maintenance costs, permanent change of station costs for military personnel, and other BRAC costs.

## LEGISLATIVE PROVISIONS ADOPTED

*Authorization of appropriations for base closure and realignment activities funded through Department of Defense Base Closure Account 1990 (sec. 2701)*

The Senate amendment contained a provision (sec. 2701) that would authorize appropriations for fiscal year 2008 for ongoing activities that are required to implement the decisions of the 1988, 1991, 1993, and 1995 base realignment and closure (BRAC) rounds.

The House bill contained a similar provision (section 2404(a)(8)).

The House recedes with an amendment to the amount authorized.

*Authorized base closure and realignment activities funded through Department of Defense base closure account 2005 (sec. 2702)*

The House bill contained a provision (sec. 2403) that would authorize military construction projects for fiscal year 2008 that are required to implement the decisions of the 2005 Defense Base Realignment and Closure round.

The Senate amendment contained a similar provision (sec. 2702).

The House recedes with an amendment to the amounts authorized.

The table included in this title of the report lists the specific amounts authorized at each location.

*Authorization of appropriations for base closure and realignment activities funded through Department of Defense Base Closure Account 2005 (sec. 2703)*

The House bill contained a provision (sec. 2404(a)(9)) that would authorize appropriations for the Department of Defense for military construction projects for fiscal year 2008 that are required to implement the decisions of the 2005 Defense Base Realignment and Closure round.

The Senate amendment contained a similar provision (sec. 2703) that would also specify the amount authorized for each military department and for the defense agencies.

The House recedes with an amendment to the amounts authorized.

The State list contained in this report is the binding list of the specific projects authorized at each location for the purposes of notifications under section 2704 of this Act.

*Authorized cost and scope of work variations (sec. 2704)*

The Senate amendment contained a provision (sec. 2704) that would require that each Base Realignment and Closure (BRAC) military construction project carried out with amounts authorized for appropriations by sections 2701 and 2703 of this title be subject to the limits on cost and scope variations contained in section 2853 of title 10, United States Code. Furthermore, this provision would establish, as a baseline for the determination of variations, the cost and scope contained in the military construction project data for each project provided to the congressional defense committees an-

nually in justification material accompanying each President's budget request.

The House bill contained no similar provision.

The House recedes with an amendment to the thresholds that trigger cost variation reports and would require a one-time report on cost or scope variations on existing BRAC construction projects for the 2005 base closure round. The amendment would also establish the amount specified for such projects in the annual military construction authorization act as the baseline for reporting.

*Transfer of funds from Department of Defense Base Closure Account 2005 to Department of Defense Housing Funds (sec. 2705)*

The House bill contained a provision (sec. 2821) that would authorize the Secretary of Defense to transfer funds from the Department of Defense (DOD) Base Closure and Realignment (BRAC) account to the DOD Family Housing Improvement Fund (FHIF), enabling the use of the privatization authorities to meet the family housing requirements associated with the 2005 BRAC recommendations. It also would allow similar transfers of funds to the Military Unaccompanied Housing Improvement Fund (MUHIF).

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would add a certification to the notice of transfer. This notice would require the Department of Defense Base Closure Account 2005 funds, used in the transfer to the FHIF or the MUHIF, to be specified for that purpose in the conference report that accompanies the most recent Military Construction Authorization Act.

*Comprehensive accounting of funding required to ensure timely implementation of 2005 Defense Base Closure and Realignment Commission recommendations (sec. 2706)*

The Senate amendment contained a provision (sec. 2842) that would require the Secretary of Defense to submit to Congress a comprehensive accounting of the funding required to ensure all decisions of the 2005 Defense Base Closure and Realignment round remain on schedule to be completed by September 15, 2011.

The House bill contained no similar provision.

The House recedes with a technical amendment.

*Relocation of units from Roberts United States Army Reserve Center and Navy-Marine Corps Reserve Center, Baton Rouge, Louisiana (sec. 2707)*

The Senate amendment contained a provision (sec. 2611) that would permit the Secretary of the Army to use land in the vicinity of the Baton Rouge airport in Baton Rouge, Louisiana to site an Army Reserve Center and a Navy-Marine Corps Reserve Center, if such location was determined by the Secretary to be in the national security and public interest of the Nation.

The House bill contained no similar provision.

The House recedes with an amendment clarifying that the funds authorized to be appropriated for base closure in this Act may be used to locate the reserve centers on a more suitable piece of property in the same vicinity as the airport. The conferees understand that the Department of the Army agrees that an alternate

parcel not adjacent to the airport is more suitable for carrying out the intent of the 2005 Defense Base Closure and Realignment Commission's recommendation for reserve component transformation in Louisiana.

*Acquisition of real property, Fort Belvoir, Virginia, as part of the realignment of the installation (sec. 2708)*

The House bill contained a provision (sec. 2837) that would direct the Secretary of the Army to enter into an agreement with the Administrator of the General Services Administration (GSA) to exchange property for the purpose of making a parcel of GSA property in Springfield, Virginia, available for incorporation into Fort Belvoir, Virginia.

The Senate amendment contained a similar provision (sec. 2853) that would permit the Secretary to enter into an agreement to transfer jurisdiction of the Springfield parcel to the Army. The Senate amendment would also allow the Army to provide additional forms of compensation to the Administrator.

The Senate recedes with an amendment that would allow the Secretary to consider and purchase other parcels in the vicinity of Fort Belvoir, in addition to the GSA property, for the purpose of relocating personnel to that installation. The conferees agree to require the Secretary to select any additional parcel of property not currently part of Fort Belvoir on the basis of best value and to use competitive procedures to acquire any such parcel of privately held land and real property.

The conferees note that the Army has already begun the process of evaluating alternate sites and support the Army's goal of relocating employees of the Washington Headquarters Service to Fort Belvoir in a way that minimizes costs and traffic congestion and facilitates compliance with the September 2011 deadline.

*Report on availability of traffic infrastructure and facilities to support base realignments (sec. 2709)*

The House bill contained a provision (sec. 2822) that would prohibit the relocation of members of the armed forces and civilian employees of the Department of Defense who are scheduled to be relocated to Fort Belvoir, Virginia, as a result of the closure of leased-office space in Arlington, Virginia, pursuant to the recommendations of the 2005 Defense Base Closure and Realignment Commission. This limitation would be obviated when the Secretary of the Army certified that the necessary transportation infrastructure, as identified by the Fort Belvoir Environmental Impact Statement, to accommodate the total number of military members, military dependents, and civilian employees to be assigned to Fort Belvoir is substantially completed.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would state the sense of Congress that the Department should consider roads at military installations significantly impacted by a realignment of forces for designation as defense access roads and that the Secretary of Defense should ensure that the full range of permanent facilities are in place and ready for use prior to the movement of members of the armed forces, civilian employees, and their fami-

lies. The amendment would also direct the Comptroller General to submit to the congressional defense committees, not later than April 1, 2008, an assessment of significantly impacted installations for the purpose of determining whether military facility requirements will be met before the arrival of forces and whether sufficient funding has been programmed in the Defense Access Roads program to mitigate community traffic congestion.

## TITLE XXVIII—MILITARY CONSTRUCTION GENERAL PROVISIONS

### Subtitle A—Military Construction Program and Military Family Housing Changes

*Authority to use operation and maintenance funds for construction projects outside the United States (sec. 2801)*

The House bill contained a provision (sec. 2806) that would further amend section 2808 of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108–136), as amended, to extend for 1 year, through the end of fiscal year 2008, the temporary authority provided to the Secretary of Defense to use funds appropriated for operation and maintenance to carry out construction projects intended to satisfy certain operational requirements in support of a declaration of war, national emergency, or other contingency. The House bill would require advance notification to Congress of such projects.

The Senate amendment contained a similar provision (sec. 2814) that would also extend the authority for 1 year and would remove the Secretary's authority to waive the annual dollar limitation on this authority.

The Senate recedes with an amendment that would remove the authority to waive the dollar limitation and would also allow the Department of Defense to use this authority retroactively for nine fiscal year 2007 projects the Department intended to execute in September 2007, but which they were precluded from executing due to the suspension of this authority resulting from the failure to provide timely notification to Congress regarding the obligation of funds for other such fiscal year 2007 projects. The nine projects are:

- (1) MUNS storage area, Balad Air Base (AB), \$22.0 million;
- (2) MNSTC–I beddown barracks, Camp Phoenix, \$37.0 million;
- (3) CSAR helicopter ramp, Balad AB, \$9.7 million;
- (4) Airfield overruns, Balad AB, \$15.5 million;
- (5) Strategic fuel reserve, Camp Speicher, \$19.0 million;
- (6) Aeromedical evacuation compound, Balad AB, \$15.3 million;
- (7) DS Maintenance facility (FY2005), Balad AB, \$10.8 million;
- (8) Dining facility #5 (FY2004), Balad AB, \$15.2 million;
- and
- (9) Pave Aspen connectors, Kuwait, various sites, \$11.6 million.

All nine of these projects are in Iraq except as noted.

The conferees believe the Department requires some flexibility to meet emerging war-related facility needs, but expect the Department to use this authority more judiciously in the future.

*Clarification of requirement for authorization of military construction (sec. 2802)*

The Senate amendment contained a provision (sec. 2818) that would amend sections 2801(a) and 2802(a) of title 10, United States Code, to add land acquisitions and defense access road projects to the definition of military construction and to the types of projects for which the Secretary of Defense and the secretaries of the military departments would be permitted to carry out once authorized by law.

The House bill contained no similar provision.

The House recedes.

The conferees intend for the Secretary of Defense or the secretaries of the military departments to include in each annual budget submission a request for specific authorization for each land acquisition and defense access road project to be carried out using appropriations for military construction. The request should be listed either as a separate project, or clearly indicated in the military construction project data in the justification material in support of the budget request if the land acquisition or defense access road is proposed to be carried out as part of a larger military construction project. The conferees intend this provision to clarify what they believe to be the requirements under existing law.

*Increase in thresholds for unspecified minor military construction projects (sec. 2803)*

The Senate amendment contained a provision (sec. 2813) that would amend section 2805(a)(1) of title 10, United States Code, by raising the threshold of the cost of a minor construction project authorized by this section from \$1.5 million to \$2.5 million. This provision would also raise the threshold of the cost of a construction project intended solely to correct a deficiency that is life-threatening, health-threatening, or safety-threatening from \$3.0 million to \$4.0 million.

The House bill contained no similar provision.

The House recedes with an amendment that would raise the threshold of the cost of a minor construction project authorized by section 2805(a)(1) of title 10, United States Code, from \$1.5 million to \$2.0 million.

*Temporary authority to support revitalization of Department of Defense laboratories through unspecified minor military construction projects (sec. 2804)*

The House bill contained a provision (sec. 2801) that would provide the Department of Defense (DOD) with additional authority to improve DOD laboratories using minor construction authorities similar to those already contained in section 2805 of title 10, United States Code. The temporary authority would expire on September 30, 2012.

The Senate amendment contained a similar provision (sec. 2815).

The Senate recedes with a clarifying amendment.

*Extension of authority to accept equalization payments for facility exchanges (sec. 2805)*

The House bill contained a provision (sec. 2805) that would extend the authority provided in section 2809 of the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108–375) by an additional 3 years, until September 30, 2010.

The Senate amendment contained a similar provision (sec. 2817).

The House recedes.

*Modifications of authority to lease military family housing (sec. 2806)*

The House bill contained a provision (sec. 2802) that would amend section 2828 of title 10, United States Code, by raising from \$500,000 to \$1.0 million in annual rental payments the threshold for which prior congressional notification of overseas leases is required.

The Senate amendment contained a similar provision (sec. 2851) that would also modify section 2828 of title 10, United States Code, to grant the Secretary of the Army additional authority to enter into high-cost leases for up to 600 units in the United States and set an annual per unit ceiling of \$100,000 on the cost of any overseas leased unit. The provision would also combine and consolidate the existing authorities for high-cost leases in Italy for the Army and the Navy into a single limit applicable to the entire Department of Defense.

The House recedes with an amendment that would delete the proposed maximum cost ceiling on a foreign leased unit but would require the Secretary of Defense to report to the congressional defense committees on leases in foreign countries costing in excess of \$60,000 per unit per year. The report would include the requirement for such high-cost leases and the options available to decrease those costs. The conferees note that the military departments have already identified to the committees leases costing in excess of \$100,000 per unit per year and intend to use this report to evaluate options for addressing this issue in the future.

The conferees believe the administration's proposal to increase the per unit cost ceiling on leased units in Korea is unaffordable. The conferees support the continued consolidation of forces in Korea and urge the Department of Defense to pursue other means to provide adequate family housing in Korea.

*Expansion of authority to exchange reserve component facilities (sec. 2807)*

The House bill contained a provision (sec. 2804) that would expand the authority of the Secretary of Defense to exchange reserve component facilities with other federal agencies including the United States Postal Service.

The Senate amendment contained no similar provision.

The Senate recedes with a clarifying amendment.

*Limitation on use of alternative authority for acquisition and improvement of military housing for privatization of temporary lodging facilities (sec. 2808)*

The House bill contained a provision (sec. 2803) that would limit the privatization of Army lodging to 13 installations. The provision would also direct the Secretary of the Army to submit a report not later than June 1, 2009 that would describe the implementation of the pilot program and evaluate its efficiency, and would direct the Comptroller General to submit to the congressional defense committees an assessment of the pilot program and of the Secretary's report.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that limits the privatization of Army lodging to 13 military installations until 120 days after the Secretary of the Army submits a report to the congressional defense committees and the Comptroller General. The Secretary of the Army's report shall be submitted no earlier than 8 months after a notice of transfer associated with the 13 military installations, and shall describe the implementation of the privatization of temporary lodging facilities, evaluate the efficiency of the program, and include any recommendations the Secretary of the Army considers appropriate regarding the expansion of the program.

The amendment would also direct the Comptroller General to submit a report to the congressional defense committees within 90 days of the Secretary of the Army's report that reviews both the privatization of temporary lodging facilities and the report of the Secretary.

Additional solicitations for the privatization of temporary lodging facilities would be permitted 120 days after Congress receives the report from the Secretary of the Army.

*Two-year extension of temporary program to use minor military construction authority for construction of child development centers (sec. 2809)*

The Senate amendment contained a provision (sec. 2816) that would amend section 2810 of the Military Construction Authorization Act for Fiscal Year 2006 (Division B of Public Law 109-163) to extend by 2 years the temporary authority provided to the Secretary of Defense to use higher minor construction thresholds for the construction of child development centers.

The House bill contained no similar provision.

The House recedes with a technical amendment.

*Report on housing privatization initiatives (sec. 2810)*

The Senate amendment contained a provision (sec. 2866) that would require the Comptroller General to submit to the Committees on Armed Services of the Senate and House of Representatives a report containing information on housing privatization transactions carried out by the Department of Defense that are behind schedule or in default. The report would describe remedies available to address the problems with these projects.

The House bill contained no similar provision.  
The House recedes with a technical amendment.

Subtitle B—Real Property and Facilities Administration

*Requirement to report real property transactions resulting in annual costs of more than \$750,000 (sec. 2821)*

The Senate amendment contained a provision (sec. 2831) that would amend section 2662 of title 10, United States Code, to require the Secretary of Defense, the secretaries of the military departments, or their designees, to notify Congress prior to entering into a transaction or contract action that results in or includes the acquisition, lease or license, or any other use by entities of the Department of Defense of real property if the estimated annual rental or cost is more than \$750,000.

The House bill contained no similar provision.  
The House recedes with a technical amendment.

*Consolidation of real property provisions without substantive change (sec. 2822)*

The House bill contained a provision (sec. 2811) that would consolidate the real property authorities provided under sections 2663 and 2677 of title 10, United States Code, as requested by the Department of Defense.

The Senate amendment contained a similar provision (sec. 2835).

The Senate recedes.

*Modification of authority to lease non-excess property of the military departments (sec. 2823)*

The Senate amendment contained a provision (sec. 2832) that would amend section 2667 of title 10, United States Code, to require the secretary of a military department to use competitive procedures to select lessees for transactions authorized by paragraph (a) of section 2667. The provision would also eliminate the authority for the secretary concerned to receive in-kind consideration or to use rental and other proceeds for facility operation support.

The House bill contained no similar provision.

The House recedes with an amendment that would authorize the secretary concerned to use procedures other than open competition to enter into certain transactions that would result in a benefit to the public. The amendment would also clarify the use by the secretary concerned of in-kind consideration, rental, or other proceeds received as a result of the transaction.

The conferees intend the definition of real property maintenance services used in the provision to be limited to pavement clearance, refuse collection and disposal, grounds and landscape maintenance, and pest control.

*Cooperative agreement authority for management of cultural resources on certain sites outside military installations (sec. 2824)*

The House bill contained a provision (sec. 2812) that would expand the authority of the Department of Defense to enter into agreements for the management of cultural resources on sites out-

side as well as inside the boundaries of military installations if such agreements would relieve or eliminate current or anticipated restrictions on military operations.

The Senate amendment contained a similar provision (sec. 1026).

The Senate recedes.

*Agreements to limit encroachments and other constraints on military training, testing, and operations (sec. 2825)*

The House bill contained a provision (sec. 2813) that would allow agreements to limit encroachment to provide for the ongoing upkeep and management of buffer zones bordering defense installations, in addition to the authority to acquire the property provided under current law. The House bill would also allow the fair market value of a group of related properties or interest to be calculated cumulatively.

The Senate amendment contained a similar provision (sec. 2833) that would permit Department of Defense entities to acquire an interest in property where the cost of acquiring the interest exceeds the fair market value of the property, if the Secretary of Defense or the secretary of a military department certifies that the military value of the acquisition provides benefits that justify a payment in excess of the fair market value.

The Senate recedes with an amendment that would also provide the authority to acquire interests at greater than fair market value if the military value of the property justifies such acquisition.

*Expansion to all military departments of Army pilot program for purchase of certain municipal services for military installations (sec. 2826)*

The House bill contained a provision (sec. 2814) that would expand the authority of the Secretary of the Army to purchase local government services for Department of Defense installations from the neighboring local governments. This expansion would allow each of the military services to conduct a pilot program with three military installations and extend the pilot program until September 30, 2012.

The Senate amendment contained no similar provision.

The Senate recedes with a clarifying amendment.

*Prohibition on commercial flights into Selfridge Air National Guard Base (sec. 2827)*

The House bill contained a provision (sec. 2816) that would prohibit the use of commercial service aircraft at Selfridge Air National Guard Base, Michigan.

The Senate amendment contained no similar provision.

The Senate recedes.

*Sense of Congress on Department of Defense actions to protect installations, ranges, and military airspace from encroachment (sec. 2828)*

The Senate amendment contained a provision (sec. 2864) that would include findings and state the sense of Congress regarding development near military installations and the Readiness and En-

vironmental Protection Initiative (REPI) program of the Department of Defense. The provision would also require a report on ways the Department can improve or make greater use of the REPI program.

The House bill contained no similar provision.

The House recedes with an amendment to modify the sense of Congress.

*Reports on Army and Marine Corps operational ranges (sec. 2829)*

The Senate amendment contained a provision (sec. 2834) that would expand a reporting requirement on changing requirements for Army training ranges that was contained in section 2827 of the Military Construction Authorization Act for Fiscal Year 2007 (Division B of Public Law 109-364), to include the impact of the proposal contained in the fiscal year 2008 budget to permanently increase the size of the active-duty component of the Army by 65,000 personnel. The report by the Secretary of the Army would also include an assessment of the potential expansion of the Joint Readiness Training Center at Fort Polk, Louisiana, and an assessment of the available training capacity in Germany.

The provision would also add a similar reporting requirement with respect to the proposal in the fiscal year 2008 budget request to expand the size of the Marine Corps by 27,000 personnel. This report would include an analysis of a proposal under consideration by the Marine Corps to expand the training range at Marine Corps Base Twentynine Palms, California.

The House bill contained no similar provision.

The House recedes with an amendment to create a free-standing report rather than a modification to a prior report, and to add a requirement for the Secretary of Defense to review and analyze the separate reports regarding the Army and the Marine Corps and inform the congressional defense committees of the steps the Office of the Secretary of Defense is taking to coordinate the activities of the Army and the Marine Corps on these matters.

The conferees expect the report by the Secretary of the Army to be informed by the programmatic environmental impact statement that the Army has conducted on the growth of the Army and, to the extent possible, by the subsequent site-specific assessments. The conferees are concerned that the Army does not have a plan in place to provide for adequate training for an additional six brigades, and that recent statements of intent to accelerate the growth of the Army ahead of the schedule in the fiscal year 2008 budget will exacerbate this problem. The conference agreement therefore modifies the Senate provision to require the report by the Secretary of the Army to address the impact of any acceleration plan that is included in the fiscal year 2009 budget request.

*Niagara Air Reserve Base, New York, basing report (sec. 2830)*

The House bill contained a provision (sec. 2817) that would require the Secretary of the Air Force to submit a report containing a plan of the aviation assets anticipated to be based at Niagara Air Reserve Base, New York.

The Senate amendment contained an identical provision (sec. 2841).

The House recedes with an amendment that would change the date on which the report is due. The plan should review C-130 aircraft which could be available in the future as additional Primary Assigned Aircraft at Niagara Air Reserve Base, beyond the 12 currently programmed for the installation, and should contain an analysis of the support structure available at Niagara Air Reserve Base to accommodate such additional force structure.

*Report on the Pinon Canyon Maneuver Site, Colorado (sec. 2831)*

The House bill contained a provision (sec. 2831) that would place conditions on any expansion of the Pinon Canyon Maneuver Site, Colorado.

The Senate amendment contained a provision (sec. 2867) that would require the Secretary of the Army to provide a report to the congressional defense committees on the requirement for and impacts of an expansion of the Pinon Canyon Maneuver Site.

The House recedes.

Subtitle C—Land Conveyances

*Modification of conveyance authority, Marine Corps Base, Camp Pendleton, California (sec. 2841)*

The House bill contained a provision (sec. 2838) that would repeal the amendment made by section 2867 of the National Defense Authorization Act for Fiscal Year 2002 (Public Law 107-107) to the underlying authority granted to the Secretary of the Navy by section 2851 of the Strom Thurmond National Defense Authorization Act for Fiscal Year 1999 (Public Law 105-261) to grant an easement for a road through Camp Pendleton, California. The House bill would remove language that limited the effect of State law with respect to this road.

The Senate amendment contained no similar provision.

The Senate recedes.

*Grant of easement, Eglin Air Force Base, Florida (sec. 2842)*

The House bill contained a provision (sec. 2832) that would grant to the Mid Bay Bridge Authority an easement for a road right-of-way over land at Eglin Air Force Base, Florida to facilitate the construction of a road connecting the northern landfall of the Mid Bay Bridge to Florida State Highway 85.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment to provide the Secretary of the Air Force the discretion to convey the property for the intended purpose.

*Land conveyance, Lynn Haven Fuel Depot, Lynn Haven, Florida (sec. 2843)*

The House bill contained a provision (sec. 2833) that would direct the Secretary of the Air Force to convey to Florida State University a parcel of land consisting of approximately 40 acres at Lynn Haven Fuel Depot, Lynn Haven, Florida, for the purpose of permitting the university to develop the property as a new satellite campus. The House bill would further authorize the Secretary to

accept reduced tuition or scholarships for military personnel as in-kind consideration for the recovery of costs to convey the property.

The Senate amendment contained a similar provision (sec. 2851) that would allow the Secretary of the Air Force to convey the property. The Senate amendment would further provide for the reversion of the property if at any time the Secretary determines that the property conveyed is not being used in accordance with the purpose as specified in the provision.

The House recedes with an amendment that would replace the reversionary clause with a requirement that if the property is not used for the intended purpose, the university would have to pay the Secretary the fair market value of the property, excluding any improvements made by the university.

*Modification of lease of property, National Flight Academy at the National Museum of Naval Aviation, Naval Air Station, Pensacola, Florida (sec. 2844)*

The Senate amendment contained a provision (sec. 2857) that would amend section 2850(a) of the Military Construction Authorization Act for Fiscal Year 2001 (Public Law 106–398) by authorizing additional educational purposes to the list of uses for which the Secretary of the Navy would be permitted to lease certain real property, without consideration, to the Naval Aviation Museum Foundation.

The House bill contained no similar provision.

The House recedes.

*Land exchange, Detroit, Michigan (sec. 2845)*

The Senate amendment contained a provision (sec. 2855) that would authorize the Commandant of the Coast Guard to enter into an equal-value land exchange with the City of Detroit, Michigan.

The House bill contained no similar provision.

The House recedes with a clarifying amendment regarding the environmental remediation of the parcels to be exchanged.

*Transfer of jurisdiction, former Nike missile site, Grosse Ile, Michigan (sec. 2846)*

The House bill contained a provision (sec. 2835) that would transfer jurisdiction over property comprising a former Nike missile site on Grosse Ile, Michigan, from the Environmental Protection Agency to the Department of the Interior to incorporate the site into the Detroit River International Wildlife Refuge.

The Senate amendment contained a similar provision (sec. 2856).

The Senate recedes with an amendment that would clarify the process used to determine the standard of remediation activities to be conducted and would delete the requirement that a specific Corps of Engineers district carry out the remediation of the property.

*Modification to land conveyance authority, Fort Bragg, North Carolina (sec. 2847)*

The Senate amendment contained a provision (sec. 2852) that would amend section 2836 of the Military Construction Authoriza-

tion Act for Fiscal Year 1998 (Public Law 105–85) to authorize the Secretary of the Army to convey, without consideration, to Harnett County, North Carolina, a parcel of real property totaling 137 acres at Fort Bragg, North Carolina, for educational purposes and the construction of public school structures. The provision would also authorize the Secretary to require the County to cover administrative and other costs for the conveyance.

The House bill contained no similar provision.

The House recesses.

*Land conveyance, Lewis and Clark United States Army Reserve Center, Bismarck, North Dakota (sec. 2848)*

The Senate amendment contained a provision (sec. 2854) that would permit the Secretary of the Army to convey, without consideration, approximately 2 acres of real property, including improvements, at a reserve center in Bismarck, North Dakota, to the United Tribes Technical College, to support education and training at the college.

The House bill contained no similar provision.

The House recesses with a technical amendment.

*Land exchange, Fort Hood, Texas (sec. 2849)*

The House bill contained a provision (sec. 2836) that would authorize the Secretary of the Army to convey approximately 200 acres at Fort Hood, Texas, to the City of Copperas Cove, Texas, to permit the City of Copperas Cove, Texas, to improve local roads for the installation and the community.

The Senate amendment contained no similar provision.

The Senate recesses.

## Subtitle D—Energy Security

### ITEMS OF SPECIAL INTEREST

#### *Energy Conversation Forum*

The conferees are aware that, in the spring of 2006, the Secretary of Defense initiated and continues to lead a monthly interagency seminar program known as the Energy Conversation Forum. The conferees are very encouraged that other departments and agencies such as the Department of Energy, the Department of State, the Department of Agriculture, the Environmental Protection Agency, and the intelligence community have agreed to actively participate in this important initiative.

The conferees acknowledge the considerable efforts of the Energy Conversation Forum and continue to support the Secretary's interagency energy education program including the energy seminar program and energy interagency networks. The conferees recognize that the energy security challenges faced by the Department of Defense, the U.S. Government as a whole, and the Nation cannot be solved by a single agency. The conferees strongly believe that all federal agencies must work together to achieve necessary national energy objectives of conservation and efficiency. Therefore, the conferees encourage the Secretary to continue efforts such as the Energy Conversation Forum to enhance information exchange as a

necessary first step in addressing the complex energy issues facing this nation.

*Report on water conservation projects*

The conferees direct the Secretary of Defense to submit to the congressional defense committees a report on water conservation efforts and methods in the Department of Defense. The report should describe the Department's investment, by type, in water conservation programs in fiscal years 2006, 2007, and 2008; the investment levels necessary to meet the Department's water conservation requirements under Executive Order 13423 of January 24, 2007; an assessment of whether water conservation projects should continue to be funded inside the Energy Conservation Investment Program or should instead be financed in a separate water conservation program; and an assessment of the demonstrated or potential return on investment of various water conservation technologies including metering, water control systems, xeriscaping, waterless urinals, utility system upgrades, and water efficiency standards for new or replacement equipment and appliances in Department of Defense facilities. The report should also include any proposed legislative changes the Secretary believes to be necessary to allow the Department to meet its water conservation goals. The report should be submitted not later than March 31, 2008.

LEGISLATIVE PROVISIONS ADOPTED

*Repeal of congressional notification requirement regarding cancellation ceiling for Department of Defense energy savings performance contracts (sec. 2861)*

The House bill contained a provision (sec. 2851) that would repeal section 2853 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109–364), which lowered the notification ceiling for the Department of Defense to \$7.0 million, and would thereby restore the notification ceiling to \$10.0 million, consistent with the ceiling established for all other government agencies in section 8287(a)(2)(D)(iii) of title 42, United States Code.

The Senate amendment contained no similar provision.  
The Senate recedes.

*Definition of alternative fueled vehicle (sec. 2862)*

The Senate amendment contained a provision (sec. 1092) that would revise the definition of alternative fueled vehicle in section 303(3) of the Energy Policy Act of 1992 (42 U.S.C. 13211(3)).

The House bill contained no similar provision.  
The House recedes with a technical amendment.

*Use of energy efficient lighting fixtures and bulbs in Department of Defense facilities (sec. 2863)*

The House bill contained a provision (sec. 2853) that would require that each building constructed or significantly altered by the Department of Defense is equipped, to the maximum extent feasible, with lighting fixtures and bulbs that are energy efficient.

Further, the provision would require that each lighting fixture or bulb that is replaced in the normal course of maintenance of buildings under the jurisdiction of the Secretary of Defense or the secretary of a military department is replaced, to the maximum extent feasible, with a lighting fixture or bulb that is energy efficient. The provision would allow the Secretary of Defense to waive the requirements of the section under certain conditions.

The Senate amendment contained no similar provision.

The Senate recedes.

*Reporting requirements relating to renewable energy use by Department of Defense to meet Department electricity needs (sec. 2864)*

The House bill contained a provision (sec. 2854) that would require the Secretary of Defense to ensure that the Department of Defense produces or procures, from renewable energy sources, not less than 25 percent of the total quantity of electric energy it consumes within its facilities and in its activities during fiscal year 2025 and each fiscal year thereafter. The House provision would also prohibit the use of leases, privatization, service contracts, or other third-party financing means to achieve the 25 percent goal.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Under Secretary of Defense for Acquisition, Technology, and Logistics to report annually on progress made by the Department toward meeting the goal of producing or procuring at least 25 percent renewable energy to meet the Department's electricity needs by 2025. These reports would include a description of the financing methods used to procure renewable energy in the previous fiscal year and a projection of the Department's future use of renewable energy through fiscal year 2025.

Subtitle E—Other Matters

*Revised deadline for transfer of Arlington Naval Annex to Arlington National Cemetery (sec. 2871)*

The House bill contained a provision (sec. 2861) that would extend the current deadline for the transfer of approximately 36 acres of land at the Arlington Naval Annex to the Secretary of the Army for incorporation into Arlington National Cemetery from January 1, 2010 to no later than January 1, 2013.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment to extend the existing deadline for 1 additional year, to January 1, 2011.

*Transfer of jurisdiction over Air Force Memorial to Department of the Air Force (sec. 2872)*

The House bill contained a provision (sec. 2862) that would require the Secretary of the Army to transfer the administrative jurisdiction, custody, and control of the Air Force Memorial to the Secretary of the Air Force.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would authorize the Secretary of the Army to transfer the administrative jurisdiction, custody, and control of the Air Force Memorial to the Sec-

retary of the Air Force and would provide that if the Air Force Memorial is transferred to the Secretary of the Air Force, the United States shall not pay any costs to maintain or repair the Air Force Memorial.

The conferees remain concerned about the requests by both private foundations and the military services to use appropriated funds for the maintenance of military memorials and museums at the expense of other military requirements. The conferees expect that original agreements signed by the private foundations for the design, construction, and maintenance of military memorials are carried out in good faith without transferring a perpetual cost for maintenance and repair of the memorial to the military services.

*Report on plans to replace the monument at the Tomb of the Unknowns at Arlington National Cemetery, Virginia (sec. 2873)*

The Senate amendment contained a provision (sec. 1048) that would require the Secretary of the Army and the Secretary of Veterans Affairs to submit a report to Congress evaluating the feasibility and advisability of repairing or replacing the monument at the Tomb of the Unknowns in Arlington National Cemetery, Virginia. The Senate amendment would prohibit either Secretary from taking any action to replace the monument until 180 days after the report had been submitted to Congress.

The House bill contained no similar provision.

The House recedes.

*Increased authority for repair, restoration, and preservation of Lafayette Escadrille Memorial, Marnes-la-Coquette, France (sec. 2874)*

The Senate amendment contained a provision (sec. 1089) that would amend section 1065 of the National Defense Authorization Act for fiscal year 2002 (Public Law 107-107) to increase by \$500,000 the amount the Secretary of the Air Force is authorized to contribute towards the ongoing repair, restoration, and preservation of the Lafayette Escadrille Memorial in Marnes-la-Coquette, France.

The House bill contained no similar provision.

The House recedes.

*Addition of Woonsocket local protection project (sec. 2875)*

The Senate amendment contained a provision (sec. 2863) that would require the Secretary of the Army to assume responsibility for the operation and maintenance of the Woonsocket local protection project in Rhode Island.

The House bill contained no similar provision.

The House recedes with an amendment requiring the city of Woonsocket to convey the property to the Secretary of the Army at no cost as a condition of the Secretary's assumption of responsibility for the project.

*Repeal of moratorium on improvements at Fort Buchanan, Puerto Rico (sec. 2876)*

The Senate amendment contained a provision (sec. 2868) that would repeal those aspects of the moratorium on construction at

Fort Buchanan, Puerto Rico that remain in effect after exceptions to that moratorium were enacted in section 2871 of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109–163).

The House bill contained no similar provision.

The House recedes with a technical amendment.

*Establishment of national military working dog teams monument on suitable military installation (sec. 2877)*

The House bill contained a provision (sec. 2863) that would authorize the Secretary of Defense to enter into an agreement with National War Dogs Monument, Inc., to establish and maintain, at a suitable location at Fort Belvoir, Virginia, or another military installation in the United States, a national monument to honor the sacrifice and service of United States Armed Forces working dog teams that have participated in military operations of the United States.

The Senate amendment contained no similar provision.

The Senate recedes.

*Report regarding removal of missiles from 564th Missile Squadron (sec. 2878)*

The Senate amendment contained a provision (sec. 1033) that would direct the Secretary of Defense to submit a report on the feasibility of establishing an association between the 120th Fighter Squadron of the Montana Air National Guard and active duty personnel stationed at Malmstrom Air Force Base. The provision would also prevent more than 40 missiles from being removed from the 564th Missile Squadron until 15 days after the report was submitted.

The House bill contained no similar provision.

The House recedes.

*Report on condition of schools under jurisdiction of Department of Defense education activity (sec. 2879)*

The Senate amendment contained a provision (sec. 2861) that would require the Secretary of Defense to submit to the congressional defense committees a report, by March 1, 2008, on the condition of schools under the jurisdiction of the Department of Defense Education Activity (DODEA).

This provision would require the Secretary of Defense to report on the standards for acceptable sizes and conditions of DODEA school facilities, to assess the existing inventory of facilities, to develop a master plan and investment strategy to correct deficiencies, and to submit this plan to the congressional defense committees.

The House bill contained no similar provision.

The House recedes with a technical amendment.

*Report on facilities and operations of Darnall Army Medical Center, Fort Hood Military Reservation, Texas (sec. 2880)*

The Senate amendment contained a provision (sec. 1047) that would require the Secretary of Defense to submit to the congressional defense committees a report assessing the facilities and operations of the Darnall Army Medical Center at Fort Hood Military

Reservation, Texas, including a plan for correcting any deficiencies identified in the report.

The House bill contained no similar provision.

The House recesses.

*Report on feasibility of establishing a regional disaster response center at Kelly Air Field, San Antonio, Texas (sec. 2881)*

The Senate amendment contained a provision (sec. 1080) that would require the Secretary of Defense, in coordination with the Secretary of Homeland Security, to submit to Congress a report on the feasibility of establishing a national disaster response center at Kelly Air Field in San Antonio, Texas, to plan, coordinate, and direct the federal, State, and local response to regional disasters.

The House bill contained no similar provision.

The House recesses with an amendment that would require a report on a regionally oriented disaster response center at Kelly Air Field. The amendment would also add findings on the need for increased disaster response capabilities and would make clarifying changes.

*Naming housing facility at Fort Carson, Colorado, in honor of the Honorable Joel Hefley, a former member of the United States House of Representatives (sec. 2882)*

The House bill contained a provision (sec. 2864) that would designate one of the military family housing areas or facilities constructed for Fort Carson, Colorado, using housing privatization authorities provided by subchapter IV of chapter 169 of title 10, United States Code, in honor of former Representative Joel Hefley.

The Senate amendment contained no similar provision.

The Senate recesses with a technical amendment.

*Naming Navy and Marine Corps Reserve Center at Rock Island, Illinois, in honor of the Honorable Lane Evans, a former member of the United States House of Representatives (sec. 2883)*

The House bill contained a provision (sec. 2865) that would designate the Navy and Marine Corps Reserve Center at Rock Island, Illinois, in honor of former Representative Lane Evans.

The Senate amendment contained no similar provision.

The Senate recesses with a technical amendment.

*Naming a research laboratory at Air Force Rome Research Site, Rome, New York, in honor of the Honorable Sherwood L. Boehlert, a former member of the United States House of Representatives (sec. 2884)*

The House bill contained a provision (sec. 2866) that would designate a new laboratory building at the Air Force Rome Research Site, Rome, New York, as the "Sherwood L. Boehlert Engineering Center".

The Senate amendment contained no similar provision.

The Senate recesses.

*Naming an administrative building at Joint Systems Manufacturing Center, Lima, Ohio, in honor of the Honorable Michael G. Oxley, a former member of the United States House of Representatives (sec. 2885)*

The House bill contained a provision (sec. 2867) that would designate the administrative building under construction at the Joint Systems Manufacturing Center in Lima, Ohio as the “Michael G. Oxley Administration and Technology Center”.

The Senate amendment contained no similar provision.

The Senate recesses.

*Naming of Logistics Automation Training Facility, Army Quartermaster Center and School, Fort Lee, Virginia, in honor of General Richard H. Thompson (sec. 2886)*

The House bill contained a provision (sec. 2868) that would designate the Logistics Automation Training Facility of the Army Quartermaster Center and School at Fort Lee, Virginia, as the “General Richard H. Thompson Logistics Automation Training Facility”.

The Senate amendment contained no similar provision.

The Senate recesses.

*Authority to relocate Joint Spectrum Center to Fort Meade, Maryland (sec. 2887)*

The Senate amendment contained a provision (sec. 2843) that would authorize the Secretary of Defense to carry out an agreement to relocate the Joint Spectrum Center (JSC) from Annapolis, Maryland to Fort Meade, Maryland or another military installation if the Secretary determined that the relocation would be in the best interest of national security and the agreement provided equitable terms to facilitate the relocation.

The House bill contained no similar provision.

The House recesses with an amendment that would designate any new construction required as part of the agreement to be authorized in accordance with section 2802 of title 10, United States Code.

The conferees encourage the Department of Defense to initiate discussions with Anne Arundel County and their developer to attempt to reach consensus on equitable terms for such relocation.

The conferees recognize that critical missions at the JSC at Annapolis are being conducted in leased facilities that may not meet the anti-terrorism and force protection (AT-FP) standards adopted by the Department of Defense in 2005. Therefore, the conferees direct the Secretary of Defense to submit to the congressional defense committees by May 30, 2008, a report on the facility at Annapolis containing the following:

- (1) the results of a security and vulnerability assessment for the facility;
- (2) a description of the plan to ensure the facility meets all of the Department’s AT-FP standards; and
- (3) an analysis of the investment required for the facility to meet AT-FP standards.

## LEGISLATIVE PROVISIONS NOT ADOPTED

*General military construction transfer authority*

The Senate amendment contained a provision (sec. 2811) that would provide an authority to transfer up to \$200.0 million in military construction authorizations between projects for fiscal year 2008.

The House bill contained no similar provision.

The Senate recedes.

*Modification of land management restrictions applicable to Utah national defense lands*

The Senate amendment contained a provision (sec. 2862) that would sunset the restrictions contained in section 2815 of the National Defense Authorization Act for Fiscal Year 2000 (Public Law 106-65) on October 1, 2013, and would also clarify the definition of Utah national defense lands in that Act.

The House bill contained no similar provision.

The Senate recedes.

*Report on opportunities for leveraging funds of the Department of Defense and States to prevent disruption in event of electric grid or pipeline failures*

The House bill contained a provision (sec. 2852) that would require the Secretary of Defense, acting through the Under Secretary of Defense for Acquisition, Technology, and Logistics, to submit to the congressional defense committees a report on approaches by which the Department of Defense may leverage Federal and State resources to harden critical infrastructure to prevent disruptions in the event of major electric grid, natural gas, or petroleum pipeline failures.

The Senate amendment contained no similar provision.

The House recedes.

The conferees direct the Secretary of Defense, acting through the Under Secretary of Defense for Acquisition, Technology, and Logistics, to submit a report on approaches by which the Department of Defense may contribute or receive funds and other resources, which when combined with resources from other funding sources, such as State System Benefit Trust Funds, Clean Air Act State Implementation Funds, and State Homeland Security Critical Infrastructure Grants, will accelerate efforts to harden critical functions on and around military and security facilities to prevent disruptions in the event of major electric grid, natural gas, or petroleum pipeline failures. This report should be submitted to the congressional defense committees not later than 180 days after the date of the enactment of this Act.

*Report on water conservation projects*

The Senate amendment contained a provision (sec. 2865) that would require the Secretary of Defense to submit to the congressional defense committees a report on water conservation efforts and methods in the Department of Defense and the investment levels necessary to meet the Department's water conservation requirements under Executive Order 13423.

The House bill contained no similar provision.

The Senate recesses.

The conferees agree to direct the Secretary of Defense to submit a report on this matter. That reporting requirement is contained elsewhere in the statement of managers.

*Retention of proceeds from enhanced use leases at Selfridge Air National Guard Base*

The House bill contained a provision (sec. 2815) that would direct that all proceeds derived from the execution of an enhanced use lease (EUL) at Selfridge Air National Guard Base (ANGB), Michigan be retained by that installation.

The Senate amendment contained no similar provision.

The House recesses.

The conferees understand that the proceeds of the proposed EUL at Selfridge ANGB are currently anticipated to be provided entirely on an in-kind basis rather than in cash. The conferees have been assured that the Air Force intends to use the proceeds from this lease at Selfridge ANGB and that if the benefit received by the Air Force ever exceeds what Selfridge ANGB could put to effective use, the remainder would be applied to other Air National Guard facilities within the State of Michigan.

## LEGISLATIVE PROVISIONS ADOPTED

*Authorized Army construction and land acquisition projects (sec. 2901)*

The House bill contained a provision (sec. 1515) that would authorize \$526.5 million in fiscal year 2008 for Army military construction projects related to operations in Iraq and Afghanistan.

The Senate amendment contained a similar provision (sec. 2901) that would authorize \$752.7 million for such projects.

The Senate recedes with an amendment that would authorize \$1.26 billion in fiscal year 2008 for Army military construction projects.

The conference agreement includes funding for additional projects not included in the House bill or the Senate amendment that were requested by the President in his budget amendment submitted on October 22, 2007.

The conferees agree to the reductions in the House bill to power plants proposed for construction in Iraq. The conferees do not believe such projects, which would provide mainly long-term benefits or return on investment, should be included in the absence of any agreement for a long-term United States presence in Iraq.

The conferees also agree to prohibit the obligation of funds for a communication center at Camp Arifjan, Kuwait and a brick factory at Camp Cropper, Iraq until the Secretary of Defense provides a report to the congressional defense committees describing the rationale for and policy implications of these projects. The conferees note that the legal implications of having detainees under the control of the United States performing labor in a brick factory have not been explained to Congress to date.

*Authorized Navy construction and land acquisition projects (sec. 2902)*

The House bill contained a provision (sec. 1515) that would authorize \$169.1 million in fiscal year 2008 for Navy military construction projects to support increasing the size of the Marine Corps inside the United States.

The Senate amendment contained no similar provision, but included funding for those projects in title XXII.

The Senate recedes with an amendment that would authorize \$198.8 million in fiscal year 2008 for Navy military construction projects.

The conference agreement includes funding for additional projects not included in the House bill or the Senate amendment that were requested by the President in his budget amendment submitted on October 22, 2007.

The conferees did not authorize funding requested for two projects in Djibouti. The conferees share the concerns expressed in the Senate report accompanying the Military Construction and Veterans Affairs and Related Agencies Appropriations Bill, 2008, that large investments in military construction in Djibouti are not justified at this time given the absence of a strategy for the new Africa Command or a long-term lease for the land these facilities in Djibouti would be built on. Furthermore, the conferees note that the determination to place a project in a supplemental request

should not be determined by the location of the installation, but rather on the enduring nature of the investment. Considering Djibouti's long-term strategic interest to the United States and the size of the investment proposed, the Department of Defense should generally insert future military construction projects for Djibouti into the normal base budget request. The conferees urge the Department to address these concerns and resubmit these projects in a future budget request, if appropriate.

*Authorized Air Force construction and land acquisition projects (sec. 2903)*

The conferees agree to a provision that would authorize \$258.7 million in military construction projects for the Air Force in support of operations in Iraq and Afghanistan.

The House and Senate bills included no similar provisions.

The conference agreement includes funding for additional projects that were requested by the President in his budget amendment submitted on October 22, 2007.

The conferees have not authorized funding of \$40.0 million requested for replacement of expeditionary facilities at Al Udeid Air Base, Qatar. The conferees are concerned that permanent facilities for the same purpose were constructed and completed in March 2007 from amounts provided in 2004 for emergency supplemental appropriations, but currently cannot be inhabited due to a lack of electricity. The conferees note that the Department of the Air Force may be in violation of section 2801 of title 10, United States Code, which states, "a military construction project includes all construction work, or any contribution authorized by this chapter, necessary to produce a complete and useable facility. . ." The conferees note that the Air Force predicts that the new dormitories, dining halls, and support facilities at Al Udeid Air Base may not be ready for occupancy until March 2008, and may require the use of portable electrical generators at significant further expense to the Air Force. The conferees direct the Secretary of the Air Force to ensure the current facilities are complete and useable with a permanent power source before requesting any further authorizations for new facilities at Al Udeid Air Base, Qatar.

The conferees have not authorized funding of \$6.3 million requested to relocate an expeditionary force site at Masirah Island Air Base, Oman. The conferees note that the project is required to relocate a current expeditionary site per the request of the host nation, and that according to the budget justification documents for this project, the "current U.S. mission requirements dictate the need for planned troop beddowns in the near term at Masirah Island." The conferees note that other statutory authorities exist to permit field commanders to meet such operational requirements.

*Authorized defense agencies construction and land acquisition projects (sec. 2904)*

The conferees agree to a provision that would authorize \$27.6 million in military construction projects for the defense agencies in support of operations in Iraq and Afghanistan and to provide facilities for the treatment of wounded service members.

The House and Senate bills included no similar provisions.

The conference agreement includes funding for additional projects that were requested by the President in his budget amendment submitted on October 22, 2007.

*Authorized base closure and realignment activities funded through Department of Defense Base Closure Account 2005 and related authorization of appropriations (sec. 2905)*

The conferees agree to a provision that would authorize \$415.9 million for military construction projects, planning, and design, and operation and maintenance for base closure activities related to the construction of new medical facilities at the National Naval Medical Center, Bethesda, Maryland, and Fort Belvoir, Virginia.

The House bill and Senate amendment included no similar provisions.

This funding was requested by the President in his budget amendment submitted to Congress on October 22, 2007 and is in addition to the funding for these same projects authorized in title XXVII of this Act, which reflects the original February budget request.

## **DIVISION C—DEPARTMENT OF ENERGY NATIONAL SECURITY AUTHORIZATIONS AND OTHER AUTHORIZATIONS**

### **TITLE XXXI—DEPARTMENT OF ENERGY NATIONAL SECURITY PROGRAMS**

#### **Subtitle A—National Security Programs Authorizations**

##### *Overview*

Title XXXI authorizes appropriations for atomic energy defense activities of the Department of Energy for fiscal year 2008, including: the purchase, construction, and acquisition of plant and capital equipment; research and development; nuclear weapons activities; nuclear nonproliferation activities; naval nuclear propulsion; environmental cleanup; operating expenses; and other expenses necessary to carry out the purposes of the Department of Energy Organization Act (Public Law 95–91). This title authorizes appropriations in five categories: (1) National Nuclear Security Administration (NNSA); (2) defense environmental cleanup; (3) other defense activities; (4) defense nuclear waste disposal; and (5) energy security and assurance.

The budget request for atomic energy defense activities at the Department included \$15.9 billion for atomic energy defense activities, a less than 1 percent increase above the fiscal year 2007 operating plan level. Of the total amount requested:

- (1) \$9.4 billion is for NNSA, of which
  - (a) \$6.5 billion is for weapons activities,
  - (b) \$1.7 billion is for defense nuclear nonproliferation activities, including \$50.0 million for fiscal year 2008 war-related funding,
  - (c) \$808.2 million is for naval reactors, and
  - (d) \$394.7 million is for the Office of the Administrator;

- (2) \$5.4 billion is for defense environmental cleanup;
- (3) \$764.0 million is for other defense activities; and
- (4) \$292.0 million is for defense nuclear waste disposal.

The budget request also included \$5.9 million for energy security and assurance within energy supply.

The conferees agree to authorize \$16.1 billion for atomic energy defense activities, an increase of \$193.3 million above the budget request.

Of this amount, the conferees agree to authorize:

- (1) \$9.6 billion for NNSA, of which

- (a) \$6.5 billion would be for weapons activities, a decrease of \$45.7 million below the budget request,

- (b) \$2.0 billion would be for defense nuclear nonproliferation, an increase of \$230.0 million above the budget request,

- (c) \$808.2 million would be for naval reactors, the amount of the budget request, and

- (d) \$400.0 million would be for the Office of the Administrator, an increase of \$5.0 million above the budget request;

- (2) \$5.4 billion would be for defense environmental cleanup activities, an increase of \$4.0 million above the budget request;

- (3) \$764.0 million would be for other defense activities, the amount of the budget request; and

- (4) \$292.0 million would be for defense nuclear waste disposal, the amount of the budget request.

The conferees agree to authorize \$5.9 million for energy security and assurance, the amount of the budget request.

The following table summarizes the budget request and the authorizations:

## ITEM OF SPECIAL INTEREST

*International Atomic Energy Agency nuclear fuel bank*

The conferees support the creation of an international nuclear fuel bank under the auspices of the International Atomic Energy Agency (IAEA). Some countries—including Iran—have justified the need for developing their own uranium enrichment and reprocessing facilities, which could make nuclear reactor fuel or nuclear weapons-usable materials, based on the claim that they could not trust foreign countries to reliably supply nuclear fuel for their reactors. The creation of international mechanisms to supplement the international nuclear fuel market could remove the need for national enrichment and reprocessing capabilities in states that do not currently possess them, and support global nonproliferation efforts and discourage new countries from developing national uranium enrichment facilities.

The conferees note that the House has already passed H.R. 885, the International Nuclear Fuel for Peace and Nonproliferation Act, and note that the Senate Committee on Foreign Relations has reported S. 1138, the Nuclear Safeguards and Supply Act of 2007. Conferees note that additional work will be required in order to provide appropriate guidance to the executive branch regarding criteria for access by foreign countries to any fuel bank established at the IAEA with materials or funds provided by the United States.

## LEGISLATIVE PROVISIONS ADOPTED

*National Nuclear Security Administration (sec. 3101)*

The House bill contained a provision (sec. 3101) that would authorize \$9.5 billion for the National Nuclear Security Administration (NNSA) of the Department of Energy, including funds for weapons activities, defense nuclear nonproliferation programs, naval reactor programs, and the Office of the Administrator, an increase of \$100.0 million above the budget request.

The Senate amendment contained a similar provision (sec. 3101) that would authorize \$9.5 billion, an increase of \$102.9 million above the budget request.

The conferees agree to authorize \$9.6 billion for NNSA, an increase of \$189.3 million above the budget request.

The budget request included \$6.5 billion for weapons activities. The House bill would authorize \$6.5 billion, the amount of the budget request. The Senate amendment would authorize \$6.5 billion, a decrease of \$39.1 million below the budget request. The conferees agree to authorize \$6.5 billion, a decrease of \$45.7 million below the budget request.

Within weapons activities, the conferees agree to authorize \$66.0 million for the Reliable Replacement Warhead, a decrease of \$22.8 million below the budget request. The conferees agree to authorize an increase of \$20.0 million above the budget request for weapons dismantlement and disposition. The budget request included \$14.9 million for responsive infrastructure. The conferees agree to authorize no funds for this item. The conferees agree to authorize an increase of \$15.1 million above the budget request in inertial confinement fusion ignition and high yield campaign as fol-

lows: a \$3.3 million increase for ignition; a \$2.5 million increase for National Ignition Facility (NIF) diagnostics, cryogenics, and experimental support; and a \$9.3 million increase in facility operations and target production. The conferees also agree to authorize an increase of \$5.0 million above the budget request in the advanced simulation and computing campaign to support NIF computational needs. The budget request included \$24.9 million for the consolidated plutonium center. The conferees agree to authorize no funds for this item. In readiness in technical base and facilities, the conferees agree to authorize the following increases above the budget request in operations of facilities: a \$36.8 million increase for infrastructure repair at the Pantex Plant; and a \$10.0 million increase for the Y-12 complex, composed of \$5.0 million for infrastructure repair and \$5.0 million for activities in support of the Uranium Processing Facility. The conferees agree to authorize \$262.7 million for the facilities and infrastructure recapitalization program, a decrease of \$31.0 million below the budget request. Within safeguards and security, the conferees agree to authorize an increase of \$20.0 million above the budget request to address training and equipment shortages at NNSA sites. Within weapons activities, the conferees agree to authorize the use of \$55.0 million of prior year unobligated balances as a funding adjustment to offset fiscal year 2008 requirements.

The budget request included \$1.7 billion for defense nuclear nonproliferation, including \$50.0 million for fiscal year 2008 war-related funding. The conferees agree to authorize \$2.0 billion, an increase of \$180.0 million above the base budget request and the amount requested for fiscal year 2008 war-related funding (the authorization of \$50.0 million for fiscal year 2008 war-related funding is provided elsewhere in Division C of this Act). The conferees agree to authorize an additional \$50.0 million in funding for the Nonproliferation and Verification Research and Development program for proliferation detection including next-generation nuclear detection technologies, nuclear explosion monitoring, and technologies to support improved nuclear material forensic capabilities. The conferees agree to authorize an additional \$13.0 million in funding for the Nonproliferation and International Security program as follows: an increase of \$8.0 million for Global Initiatives for Proliferation Prevention; and an increase of \$5.0 million for Dismantlement and Transparency, including technical support to the Six Party process on the denuclearization of the Korean Peninsula. The conferees agree to authorize an additional \$30.0 million in funding for the International Nuclear Materials Protection and Cooperation program as follows: an increase of \$20.0 million for the Second Line of Defense Core program and Megaports; an increase of \$3.0 million to reduce the risk of theft and proliferation of weapons-usable nuclear materials from the Russian Federation; and an increase of \$7.0 million to ensure the sustainability of weapons of mass destruction nonproliferation programs in Russia. The conferees agree to authorize an additional \$10.0 million in funding for the Elimination of Weapons-Grade Plutonium Production program to accelerate shutdown of the plutonium producing reactor at Zheleznogorsk, Russia. The conferees agree to authorize an additional \$77.0 million in funding for the Global Threat Reduction Ini-

tiative as follows: an increase of \$5.0 million for Reduced Enrichment for Research and Test Reactors, including the conversion of research and test reactors from the use of highly-enriched uranium to low-enriched uranium; an increase of \$2.0 million for U.S. Radiological Threat Reduction; an increase of \$40.0 million for International Radiological Threat Reduction; and an increase of \$30.0 million for Emerging Threats and Gap Material. The conferees agree to authorize \$50.0 million for the International Atomic Energy Agency nuclear fuel bank.

The budget request included \$808.2 million for the naval reactors program. The conferees agree to authorize this program at the requested level. The budget request included \$394.7 million for the Office of the Administrator. The conferees agree to authorize an increase of \$5.0 million above the budget request within the Office of the Administrator program direction account for the purposes of expanding and strengthening staff capacity, capabilities, and resources in support of defense nuclear nonproliferation activities.

*Defense environmental cleanup (sec. 3102)*

The House bill contained a provision (sec. 3102) that would authorize \$5.4 billion for the Department of Energy for defense environmental cleanup for fiscal year 2008, the amount of the budget request.

The Senate amendment contained a similar provision (sec. 3102) that would authorize \$5.4 billion for defense environmental cleanup, an increase of \$47.0 million above the budget request.

The conferees agree to include a provision that would authorize \$5.4 billion for defense environmental cleanup, an increase of \$4.0 million above the budget request. The conferees agree to authorize \$9.0 million for project 08-D-414/PED 08-01, the plutonium vitrification facility at the Savannah River Site, a decrease of \$6.0 million below the budget request. The conferees agree to authorize an additional \$10.0 million for technology development and deployment.

*Other defense activities (sec. 3103)*

The House bill contained a provision (sec. 3103) that would authorize \$764.0 million for the Department of Energy for other defense activities for fiscal year 2008, the amount of the budget request.

The Senate amendment contained a similar provision (sec. 3103) that would authorize \$664.1 million for the Department of Energy for other defense activities, a decrease of \$100.9 million below the budget request.

The conferees agree to include a provision that would authorize \$764.0 million, the amount of the budget request.

*Defense nuclear waste disposal (sec. 3104)*

The House bill contained a provision (sec. 3104) that would authorize \$292.0 million for defense nuclear waste disposal, the amount of the budget request.

The Senate amendment contained a similar provision (sec. 3104) that would authorize \$242.0 million, a decrease of \$50.0 million below the budget request.

The conferees agree to include a provision that would authorize \$292.0 million, the amount of the budget request.

*Energy security and assurance (sec. 3105)*

The House bill contained a provision (sec. 3105) that would authorize \$6.0 million for the Department of Energy for other atomic energy defense activities for fiscal year 2008 for energy security and assurance programs, an increase of \$140,000 above the budget request.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would authorize \$5.9 million for energy security and assurance programs, the amount of the budget request.

The conferees reluctantly provide the funds requested in acknowledgment of the national security nexus for a limited set of activities conducted within the Department of Energy Office of Electricity Delivery and Energy Reliability. If the Department intends to continue to request some portion of funds for this office within budget code 050, the conferees expect a fulsome description of and justification for this funding; items absent from prior budget requests.

Subtitle B—Program Authorizations, Restrictions, and Limitations

*Reliable Replacement Warhead program (sec. 3111)*

The Senate amendment contained a provision (sec. 3111) that would place a cap on the funding available for the Reliable Replacement Warhead (RRW) program and prohibit funding for any RRW activities beyond phase 2A.

The House bill contained no similar provision.

The House recedes with an amendment that would prohibit the National Nuclear Security Administration (NNSA) from using fiscal year 2008 funds to support activities under the RRW program beyond phase 2A of the phased nuclear weapons acquisition process.

The conferees note that House Report 110–146 set forth the view of Committee on Armed Services of the House of Representatives that the NNSA RRW program activities should not exceed phase 2A activities in fiscal year 2008. The conferees have provided \$66.0 million for RRW phase 2A activities.

The conferees believe clarification of the United States' long-term nuclear weapons policy is a prerequisite to any major decisions on the size and composition of the nuclear weapons stockpile and the complex that supports it. To that end, the conference agreement includes section 1062 establishing a congressionally appointed bipartisan commission to examine U.S. nuclear policy and strategic posture, and section 1070, requiring that a new Nuclear Posture Review be submitted to Congress in December 2009.

On September 7, 2007, JASON completed a technical review of the RRW with a focus on the Lawrence Livermore National Laboratory (LLNL)/Sandia National Laboratory design, now known as WR1. The review was undertaken at the request of the NNSA. In this review, JASON made four findings with accompanying recommendations. The four findings are:

(1) Certification for WR1 will require new experiments, enhanced computational tools, and improved scientific understanding of the connection of the results from such experiments and simulations to the existing nuclear explosive test data.

(2) The physical understanding of the enhanced surety features, which address a top requirement for WR1, is still under development.

(3) New fabrication processes are proposed for WR1 with the intent of simplifying manufacturing and achieving cost savings but their impact on performance must be further understood.

(4) In the absence of new nuclear-explosive testing, the challenges to certification must be met in a peer review regime that establishes confidence in the WR1 design. Peer review is essential to establishing the technical credibility of new designs. Peer review for RRW certification must play a larger role than provided for by current NNSA guidelines or envisaged in the LLNL plans.

The JASON findings begin to identify the challenges of the RRW program and the scientific work and general processes that need substantial focus and attention. The conferees believe that the RRW program will present many scientific challenges and urge the NNSA to ensure that the stockpile stewardship scientific, computational, and experimental capabilities and tools are maintained and expanded as necessary to support RRW.

The conferees urge the NNSA to approach the RRW program cautiously, with a commitment to address and resolve all issues as completely as possible. Using an outside technical review mechanism, such as JASON, is necessary to fully understand the technical issues associated with RRW. The conferees urge the NNSA to consider how a regularized external review could be undertaken.

#### *Nuclear test readiness (sec. 3112)*

The Senate amendment contained a provision (sec. 3121) that would repeal section 3113 of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108–136) and extend the requirement for a test readiness report required by section 4208 of the Atomic Energy Defense Act (50 U.S.C. 2528), but require the Secretary of Energy to submit the report biennially on March 1 of each odd-numbered year beginning on March 1, 2009.

The House bill contained no similar provision.

The House recedes.

#### *Modification of reporting requirement (sec. 3113)*

The Senate amendment contained a provision (sec. 3136) that would modify the report required by section 3111 of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109–163). Section 3111 required the Secretary of Energy to submit a report on the Reliable Replacement Warhead (RRW) by March 2007. The amendment would make the report a biennial report through 2013. In addition, the provision would require that the report be submitted in a classified form with an unclassified summary.

The House bill contained no similar provision.

The House recedes with an amendment that would eliminate the requirement for a biennial report through 2013 and retain the

requirement that the report be submitted in a classified form with a detailed unclassified summary.

The conferees note that the Secretary of Energy has failed to submit the report required by section 3111, and remind the Secretary that the report was due to Congress on March 1, 2007. The conferees believe that this report is important to future decisions about the RRW program.

*Limitation on availability of funds for fissile materials disposition program (sec. 3114)*

The Senate amendment contained a provision (sec. 3112) that would require the Secretary of Energy to certify to the congressional defense committees what portions of the fiscal year 2008 and prior fiscal years' funds for the fissile materials disposition program will be obligated and expended in fiscal years 2008 and 2009, before any of the fiscal year 2008 funds are obligated or expended. In the event that any of the fiscal year 2008 funds will not be obligated in fiscal years 2008 or 2009, the provision would authorize the Secretary to use such fiscal year 2008 funds for obligation to any other nonproliferation program in which the funds could be obligated and expended in fiscal years 2008 or 2009.

The House bill contained no similar provision.

The House recedes with an amendment that would prohibit the Secretary of Energy from obligating more than 75 percent of the funds authorized to be appropriated for the fissile materials disposition program for fiscal year 2008 until the Secretary, in consultation with the Administrator for Nuclear Security, submits a report to the congressional defense committees setting forth a plan for obligating and expending prior year funds that remain available for obligation after January 1, 2008, as well as fiscal year 2008 funds.

The conferees continue to fully support the goals of the United States Surplus Fissile Materials Disposition program, which include disposition of U.S. surplus weapons-grade plutonium and use of the mixed oxide fuel fabrication facility for such plutonium disposition. The conferees emphasize that the program has important nonproliferation benefits and is consistent with the national security interests of the United States. The disposition of surplus weapons-grade plutonium will demonstrate to the international community our commitment to permanently eliminating materials that could be used for nuclear weapons.

The conferees also continue to fully support the goals of the Russian Surplus Fissile Materials Disposition program, which include disposition of the Russian Federation's surplus weapons-grade plutonium. However, the conferees are concerned by the remaining lack of certainty on issues relating to the path forward for Russian plutonium disposition.

The conferees request an update from the Secretary of Energy at the earliest possible date on the subjects covered in the report the Secretary submitted to the congressional defense committees relating to the Russian Surplus Fissile Materials Disposition program, in response to the requirement under section 3121 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109-364).

*Modification of limitations on availability of funds for waste treatment and immobilization plant (sec. 3115)*

The Senate amendment contained a provision (sec. 3113) that would amend section 3120a of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109–364) to require an independent review and certification by the Secretary of Energy of the earned value management system for the waste treatment and immobilization plant at the Department of Energy’s Hanford Site.

The House bill contained no similar provision.

The House recedes.

*Modification of sunset date of the Office of the Ombudsman of the Energy Employees Occupational Illness Compensation program (sec. 3116)*

The Senate amendment contained a provision (sec. 3137) that would extend the sunset date for the Office of the Ombudsman for the Energy Employees Occupational Illness Compensation program for 5 years to October 28, 2012.

The House bill contained a similar provision (sec. 3118) that would permanently establish the Office of the Ombudsman, provide the Office of the Ombudsman with contracting authority, and expand the scope of the duties of the office. In addition, the provision would change the nature of the funding that supports the office from mandatory to discretionary.

The House recedes.

*Technical amendments (sec. 3117)*

The Senate amendment contained a provision (sec. 3125) that would make technical amendments to the Atomic Energy Defense Act (50 U.S.C. 2521 et seq.)

The House bill contained no similar provision.

The House recedes.

Subtitle C—Other Matters

*Study on using existing pits for the Reliable Replacement Warhead program (sec. 3121)*

The House bill contained a provision (sec. 3111) that would require the Administrator for Nuclear Security, in consultation with the Nuclear Weapons Council, to analyze and then report on the feasibility of using existing plutonium pits to remanufacture warheads in the Reliable Replacement Warhead (RRW) program. The report to the congressional defense committees would be due no later than February 1, 2008. The report would be unclassified but may include a classified annex.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would clarify the scope of the study and the report to look at the feasibility of using existing plutonium pits in the RRW program, in lieu of newly manufactured pits. The study would include an analysis of certification, manufacturing, and technical issues relating to the use of existing plutonium pits and would be due to the congressional defense com-

mittees no later than 6 months after the date of enactment of this Act.

*Report on retirement and dismantlement of nuclear warheads (sec. 3122)*

The House bill contained a provision (sec. 3113) that would direct the Administrator for Nuclear Security, in consultation with the Nuclear Weapons Council, to submit to the congressional defense committees a report on the retirement and dismantlement of the nuclear warheads that are not part of the enduring stockpile but that have not been dismantled. The report would be due no later than February 1, 2008 and would include a plan to accelerate the dismantlement of such nuclear warheads and an assessment of the feasibility of implementing an accelerated schedule.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would change the due date of the report to March 1, 2008. Further, the amendment would specify that the nuclear warheads that are the subject of the report would be those warheads that will not be part of the enduring stockpile as of December 31, 2012, but that have not yet been dismantled. In addition, the amendment would require the Administrator to include in the report an assessment of the capacity of the nuclear weapons complex and the resources needed to accommodate an accelerated schedule.

*Plan for addressing security risks posed to nuclear weapons complex (sec. 3123)*

The House bill contained a provision (sec. 3114) that would direct the Administrator for Nuclear Security to conduct an assessment of the physical security and cyber security risks posed to the nuclear weapons complex at the Department of Energy (DOE) and the security technologies employed within the complex. The report on the assessment would be submitted to the congressional defense committees and would include a site-specific description of security technologies, a description of how DOE establishes investment priorities, and a multi-year plan for replacement and maintenance of technologies.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require that the plan be prepared in consultation with the Director of the Office of Health, Safety, and Security of the DOE. The amendment would also add the report as an additional element to the National Nuclear Security Administration annual future-years nuclear security program plan.

*Department of Energy protective forces (sec. 3124)*

The House bill contained a provision (sec. 3112) that would require the Administrator for Nuclear Security to conduct a review of the protective forces at the National Nuclear Security Administration (NNSA) sites and submit a report to the congressional defense committees setting forth the results of the review. The report would be due no later than March 1, 2008 and would include an assessment of the potential risks associated with contractual incentives and mechanisms to provide protective forces. In addition, the

report would require an assessment of specific alternative management options for managing the protective forces.

The Senate amendment contained a similar provision (sec. 3124) that would require the Comptroller General of the United States to report to the Committees on Armed Services of the Senate and the House of Representatives on the management of protective forces at the Department of Energy (DOE) sites with category I nuclear material. This would include the relevant NNSA sites. The report would be due 180 days after the date of enactment of this Act and would include a discussion of the management, contractual structure, training, benefits, and alternative management options for the DOE protective forces.

The Senate recedes with an amendment that would combine the elements of each report into companion assessments and reviews of the protective forces at the DOE and NNSA sites with category I nuclear materials. These assessments and reviews would be included in sequential reports, first by the Comptroller General and then the Administrator for Nuclear Security. The amendment would require the Comptroller General report to be submitted 180 days after the date of enactment of this Act. No later than 90 days following the receipt of the Comptroller General report the Secretary of Energy, in conjunction with the Administrator for Nuclear Security and the Assistant Secretary for Environmental Management, would submit to the Committees on Armed Services a report on the management of the protective forces, using the Comptroller General report as a starting point. The DOE review would include an assessment of the options for management identified by the Comptroller General, as well as other options that the Secretary may identify. In addition, the DOE report would include an analysis and assessment of the role contractor incentives play in the management and performance of the protective forces.

*Evaluation of National Nuclear Security Administration strategic plan for advanced computing (sec. 3125)*

The Senate amendment contained a provision (sec. 3138) that would require the Secretary of Energy to enter into an agreement with an independent entity to conduct an evaluation of the strategic plan for advanced computing of the National Nuclear Security Administration (NNSA). The report would be due 180 days after the date of enactment of this Act. The report would include: an assessment of the role played by NNSA high performance computing research in maintaining U.S. leadership in computer capabilities and the impact of funding reductions to such leadership; the way in which NNSA uses computational capabilities to support the Stockpile Stewardship programs; the NNSA relationship with private industry; and the efforts of the Department of Energy (DOE) to coordinate supercomputing work within the DOE, with other government agencies, and with private industry.

The House bill contained no similar provision.

The House recedes with an amendment that would modify the elements of the assessment. Included in the report would be: an assessment of the adequacy of the strategic plan in supporting the Stockpile Stewardship program; the role of research and development in high performance computing in fulfilling the missions of

the NNSA and maintaining U.S. leadership in this area; and the impact of changes in investment levels or strategies to fulfill the missions of the NNSA. The amendment would also require an assessment of DOE efforts to coordinate supercomputing work within the DOE, to develop joint strategies with other federal agencies and private industry, and to share developments and capitalize on innovations with private industry. This amendment would also require the report to be submitted by the Secretary of Energy 1 year after the date of enactment of this Act.

*Sense of Congress on the nuclear nonproliferation policy of the United States and the Reliable Replacement Warhead program (sec. 3126)*

The Senate amendment contained a provision (sec. 3122) that would set forth the sense of Congress that the United States should take a number of actions with respect to nonproliferation matters. The provision would also set forth the sense of Congress that any decision to manufacture or deploy a Reliable Replacement Warhead should be formulated in the broader context of the progress made by the United States toward each of the enumerated goals.

The House bill contained no similar provision.

The House recedes with an amendment that would clarify several of the actions enumerated in the Senate provision. The amendment would also modify item number five with respect to the Comprehensive Test Ban Treaty by replacing it with a sense of Congress that the United States should sustain the Science-Based Stockpile Stewardship program, which provides the basis for certifying the U.S. nuclear deterrent and maintaining the moratorium on underground nuclear weapons testing.

*Department of Energy report on plan to strengthen and expand International Radiological Threat Reduction program (sec. 3127)*

The House bill contained a provision (sec. 3115) that would require the Secretary of Energy to submit a report to Congress that sets forth a specific plan for strengthening and expanding the Department of Energy (DOE) International Radiological Threat Reduction (IRTR) program within the Global Threat Reduction Initiative. The plan would include actions to address the issues raised and recommendations made in the March 13, 2007 Government Accountability Office report titled "Focusing on the Highest Priority Radiological Sources Could Improve DOE's Efforts to Secure Sources in Foreign Countries." The report would be due no later than 60 days after the date of enactment of this Act.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would direct the Secretary of Energy to submit the report to Congress no later than 120 days after the date of enactment of this Act and would modify several of the elements required to be in the report. This would include a clarification that the Secretary should give high priority to materials that present the highest risk.

The conferees support the idea that the IRTR program should concentrate on securing the radiological materials that present the highest risk, but also encourage the DOE to take advantage of op-

portunities, as they arise, to increase the security of radiological materials, even if the materials to be secured represent a lower comparative risk.

*Department of Energy report on plan to strengthen and expand Materials Protection, Control, and Accounting program (sec. 3128)*

The House bill contained a provision (sec. 3116) that would require the Secretary of Energy to submit to Congress a report that sets forth a specific plan for strengthening and expanding the Department of Energy Materials Protection, Control, and Accounting program. The plan would include actions to address the issues raised and recommendations made in the February 2007 Government Accountability Office report titled "Progress Made in Improving Security at Russian Nuclear Sites, but the Long-Term Sustainability of U.S. Funded Security Upgrades is Uncertain." The plan would also include a long-term operational plan to secure all weapons-usable material and warhead sites as quickly and effectively as possible and ensure that sufficient funding is available to carry out these activities. The report would be due 60 days after the date of enactment of this Act.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would modify several of the elements required to be in the report, and would direct the Secretary to submit the report to Congress no later than 120 days after the date of enactment of this Act.

*Agreements and reports on nuclear forensics capabilities (sec. 3129)*

The Senate amendment contained a provision (sec. 3139) that would authorize the Secretary of Energy, with the concurrence of the Secretary of State, and in coordination with the Secretary of Defense, the Secretary of Homeland Security, and the Director of National Intelligence, to enter into agreements with countries or other entities to collect data and conduct such analysis as is needed to determine the source of components or fissile materials used or attempted to be used in a nuclear device or weapon. The provision would also require the Secretary of Energy, in coordination with the Secretary of State, to submit a report to Congress identifying the progress made on entering into such agreements, including the identification of any major obstacles to such agreements. The provision would also require the President to submit a report to Congress setting forth the procedures and standards to be used to determine the source of the nuclear weapons, material, or component, and whether the country or group knowingly or negligently provided the material or component used or attempted to be used. This report would also assess the capability to make such a determination and a plan for addressing any capability shortfalls.

The House bill contained no similar provision.

The House recedes with a technical amendment.

The conferees urge the Secretary of Energy to identify in the portion of the report dealing with international agreements, in the section identifying any obstacles to completing such agreements, any additional legal or administrative authorities that are needed to implement such agreements, if such additional authorities are needed.

*Report on status of environmental management initiatives to accelerate the reduction of environmental risks and challenges posed by the legacy of the Cold War (sec. 3130)*

The Senate amendment contained a provision (sec. 3123) that would require the Secretary of Energy to prepare a report on the status of environmental management initiatives, including the progress made in reducing environmental risks and challenges, the status of enforceable milestones and plans for the future, any proposals for legislation to carry out environmental management initiatives, and an estimate of the life cycle cost of the environmental management program. The report would be submitted to the congressional defense committees concurrent with the budget justification materials in support of the Department of Energy's budget for fiscal year 2009. The provision would also require the Secretary to submit the report to the Government Accountability Office for review. The Comptroller General would be allotted 180 days to review and assess the required report and then submit a report to the congressional defense committees setting forth the results of the review.

The House bill contained no similar provision.

The House recedes with an amendment that would modify the date for submittal of the report and the elements to be included. The amendment would require the Secretary to submit the report to the congressional defense committees and the Government Accountability Office not later than September 30, 2008. The amendment would require a listing of major mandatory milestones and commitments, together with a summary providing a more general description of milestones or types of milestones that are projected to be or are in jeopardy of being missed at each site. The amendment would also require a description of the process currently being instituted by the Department in its Order 430.1A for the nomination and acceptance of new work scope into the environmental management program, as well as a listing of pending nominations, and life cycle cost estimates and schedules to address them. The amendment would further require an estimate of the life cycle cost of the current program scope. Finally, the amendment would require the Comptroller General to submit a review of the report to the congressional defense committees not later than March 30, 2009.

Subtitle D—Nuclear Terrorism Prevention

*Definitions (sec. 3131)*

The Senate amendment contained a provision (sec. 3131) that would define terms used in sections 3132 through 3135 of the Senate amendment. These provisions relate to nuclear terrorism prevention.

The House bill contained no similar provision.

The House recedes.

*Sense of Congress on the prevention of nuclear terrorism (sec. 3132)*

The Senate amendment contained a provision (sec. 3133) that would set forth the sense of Congress that the President should: make the prevention of a nuclear terrorist attack on the United

States of the highest priority; request additional funding to accelerate programs to prevent nuclear terrorism; and work with the international community to reduce the dangers of nuclear terrorism. The provision would further state that the United States and the international community should make additional efforts to ensure that all nuclear weapons worldwide are secure and accounted for and that formula quantities of strategic special nuclear material worldwide are eliminated, removed, or secure and accounted for. The provision would also specify that the International Atomic Energy Agency should be funded appropriately to fulfill its role in protecting nuclear material and combating nuclear smuggling.

The House bill contained no similar provision.

The House recesses with a clarifying amendment.

*Minimum security standard for nuclear weapons and formula quantities of strategic special nuclear material (sec. 3133)*

The Senate amendment contained a provision (sec. 3134) that would set forth the policy of the United States to work with the international community to ensure that nuclear weapons around the world are secure and accounted for and that all formula quantities of strategic special nuclear material are eliminated, removed, or are secure and accounted for. In furtherance of this policy, the provision would set forth actions that the President should take to seek the broadest possible international agreement on a global standard for nuclear security and to work with other countries and the International Atomic Energy Agency to ensure that security of nuclear weapons and formula quantities of strategic special nuclear material is upgraded to meet the global standard. Actions that the United States takes in support of this goal would include providing appropriate financial and technical support to support security upgrades, and working with other governments to ensure that appropriate security rules, regulations, and enforcement measures are in place.

The House bill contained no similar provision.

The House recesses with an amendment that would clarify that the statements urging presidential action reflect the sense of Congress.

*Annual report (sec. 3134)*

The Senate amendment contained a provision (sec. 3135) that would require the President, in consultation with relevant federal departments and agencies, to submit an annual report to Congress on the security of nuclear weapons, formula quantities of strategic special nuclear material, radiological material, and related equipment around the world. The report would include a section on relevant programs and would specifically include: a list of facilities and sites that are determined to be the highest priority for security and accounting of nuclear weapons and related equipment, or the elimination, removal or security and accounting of formula quantities of strategic special nuclear material and radiological materials; a related prioritized diplomatic and technical plan that includes the role that the international community is playing and could play, including a plan for securing contributions; and an as-

assessment of the progress made in implementing the plan. The report would be due annually on September 1, beginning on September 1, 2008.

The House bill contained no similar provision.

The House recedes with an amendment that would limit the report to nuclear weapons and related equipment and formula quantities of strategic nuclear material. In addition, the amendment would clarify that the report would not cover such weapons, material, and equipment in the United States. The amendment would sunset the reporting requirement after calendar year 2012.

#### LEGISLATIVE PROVISIONS NOT ADOPTED

##### *Authority to use International Nuclear Materials Protection and Cooperation program funds outside the former Soviet Union*

The House bill contained a provision (sec. 3117) that would amend section 3124 of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108–136) to modify certain emergency authorities relating to the use of Department of Energy International Nuclear Materials Protection and Cooperation program funds outside the former Soviet Union.

The Senate amendment contained no similar provision.

The House recedes.

##### *Findings*

The Senate amendment contained a provision (sec. 3132) that would set forth a number of findings concerning: the possibility that terrorists may acquire and use a nuclear weapon against the United States; the programs and international mechanisms designed to address that threat; and the recognition that additional efforts are needed to address that threat.

The House bill contained no similar provision.

The Senate recedes.

The conferees note that the “National Strategy for Combating Terrorism” states that “[w]eapons of mass destruction in the hands of terrorists is one of the gravest threats we face.” Similarly, former Senator Sam Nunn has stated that “[s]tockpiles of loosely guarded nuclear weapons material are scattered around the world, offering inviting targets for theft or sale.”

The conferees support strengthening and expanding, as much as possible, the programs designed to address these threats and other threats arising from the proliferation of nuclear, as well as radiological, weapons and weapons-related materials, technologies, and expertise. Such programs include the nonproliferation programs of the Department of Energy (DOE). These programs are critical to U.S. national security and should be a top priority. Significant progress has been made over the last 15 years, but much remains to be done. The DOE nonproliferation programs would benefit from additional funding to support new and expanded program activities. Elsewhere in this Act, the conferees have included a number of provisions and additional funding for these programs to ensure that, wherever possible, actions are taken to address threats involving nuclear and radiological weapons, and weapons-related materials, technologies, and expertise, including actions to

reduce the possibility that a terrorist could ever acquire and use a nuclear weapon against the United States.

## TITLE XXXII—WAR RELATED NATIONAL NUCLEAR SECURITY ADMINISTRATION AUTHORIZATIONS

### LEGISLATIVE PROVISION ADOPTED

*Additional war-related authorization of appropriations for National Nuclear Security Administration (sec. 3201)*

The House bill contained a provision (sec. 1517) that would authorize \$50.0 million in additional fiscal year 2008 funding for Operation Iraqi Freedom and Operation Enduring Freedom for defense nuclear nonproliferation, the amount of the fiscal year 2008 war-related budget request for that purpose.

The Senate amendment contained a similar provision (sec. 3101) that would include in the overall amount authorized for defense nuclear nonproliferation an additional \$50.0 million for the defense nuclear nonproliferation programs requested in the fiscal year 2008 war-related budget.

The Senate recedes with an amendment that would specify that of the amounts authorized, \$30.0 million is for the International Nuclear Materials Protection and Cooperation program and \$20.0 million is for the Global Threat Reduction Initiative.

## TITLE XXXIII—DEFENSE NUCLEAR FACILITIES SAFETY BOARD

### LEGISLATIVE PROVISION ADOPTED

*Authorization (sec. 3301)*

The House bill contained a provision (sec. 3201) that would authorize \$22.5 million for fiscal year 2008 for the Defense Nuclear Facilities Safety Board (DNFSB).

The Senate amendment contained a similar provision (sec. 3201) that would authorize \$27.5 million for the DNFSB.

The Senate recedes.

The conferees are concerned that in the future the DNFSB may not have the resources to attract and retain the technical staff needed to meet its statutory responsibilities.

## TITLE XXXIV—NAVAL PETROLEUM RESERVES

### LEGISLATIVE PROVISIONS ADOPTED

*Authorization of appropriations (sec. 3401)*

The House bill contained a provision (sec. 3401) that would authorize \$17.3 million for the operation and maintenance of the Naval Petroleum and Oil Shale Reserves.

The Senate amendment contained no similar provision.

The Senate recedes.

*Remedial action at Moab Uranium milling site (sec. 3402)*

The House bill contained a provision (sec. 3402) that would require the Secretary of Energy to complete remediation at the Moab site and remove the tailings to the Crescent Junction site in Utah no later than October 1, 2019.

The Senate amendment contained a similar provision (sec. 879) that would require the Secretary to develop a strategy to complete the remediation of the Moab site no later than January 1, 2019. In addition, the provision would direct the Secretary of Energy to submit a report to the Committee on Energy and Natural Resources of the Senate, the Committee on Energy and Commerce of the House of Representatives, and the Committee on Appropriations of each of the Senate and the House of Representatives on how the existing cost, scope, and schedule for remediation would be changed to meet the implementation plan.

The Senate recedes with an amendment that would direct the Secretary of Energy to submit a report to Congress no later than October 2, 2019, if the Secretary will not be able to complete the remediation at the Moab site by October 1, 2019.

The conferees urge the Secretary to submit any such report notifying Congress of any delay as soon as the Secretary of Energy is aware of any delay.

## TITLE XXXV—MARITIME ADMINISTRATION

## LEGISLATIVE PROVISIONS ADOPTED

*Authorization of appropriations for fiscal year 2008 (sec. 3501)*

The House bill contained a provision (sec. 3501) that would authorize a total of \$135.3 million for fiscal year 2008, equal to the President's budget request. Of the amount authorized, \$20.0 million would be available for the disposal of obsolete vessels; \$13.8 million for capital improvements at the United States Merchant Marine Academy; and \$8.3 million for maintenance and repair of school ships at the State Maritime Academies.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would increase the amount authorized by an additional \$9.0 million. Of the additional amount authorized, \$1.5 million would be for maintenance and repair of school ships at the State Maritime Academies; and \$2.5 million would be for expenses and capital improvements at the United States Merchant Marine Academy.

The amendment would further clarify the amounts currently authorized in law for expenses: to maintain and preserve a U.S. flag merchant fleet under chapter 531 of title 46, United States Code, \$156.0 million; for paying reimbursement under section 3517 of the Maritime Security Act of 2003 (46 U.S.C. 53101 note), \$19.5 million; for assistance to small shipyards and maritime communities under section 54101 of title 46, United States Code, \$25.0 million; and for the cost (as defined in section 502(5) of the Federal Credit Reform Act of 1990 (2 U.S.C. 661a(5))) of loan guarantees under the program authorized by chapter 537 of title 46, United States Code, \$30.0 million.

*Temporary authority to transfer obsolete combatant vessels to the Navy for disposal (sec. 3502)*

The House bill contained a provision (sec. 3502) that would allow the Secretary of Transportation to transfer no fewer than three combatant vessels in the non-retention fleet of the Maritime Administration to the Navy for disposal.

The Senate amendment contained no similar provision.  
The Senate recedes.

*Vessel disposal program (sec. 3503)*

The House bill contained a provision (sec. 3503) that would require the Secretary of Transportation to submit a comprehensive report on the current plan for disposal of vessels in the non-retention fleet of the Maritime Administration.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of Transportation to convene a working group composed of representatives from the Department of the Navy, the Maritime Administration, the Coast Guard, the Environmental Protection Agency, and the National Oceanic and Atmospheric Administration, and any other federal or State organizations who deal with the disposal of obsolete vessels. The Secretary is directed to charter the working group to make recommendations for the best practices that meet or exceed, and harmonize, the requirements of federal and State environmental laws and regulations applicable to the storage, disposal, and interim transportation of such vessels. The amendment would further require the Secretary to report the results of the working group to the Senate Committee on Commerce, Science, and Transportation, and the Committees on Armed Services of the Senate and the House of Representatives.

Subtitle B—Programs

*Commercial vessel chartering authority (sec. 3511)*

The Senate amendment contained a provision (sec. 5101) that would amend chapter 575 of title 46, United States Code, to allow the Secretary of Transportation to enter into contracts or other agreements on behalf of the United States to purchase, charter, operate, or otherwise acquire the use of any vessels documented under chapter 121 of title 46, United States Code. The amendment would authorize the Secretary to use this authority as the Secretary deems appropriate.

The House bill contained no similar provision.  
The House recedes.

*Maritime Administration vessel chartering authority (sec. 3512)*

The Senate amendment contained a provision (sec. 5102) that would amend section 50303 of title 46, United States Code, to allow the Administrator of the Maritime Administration to charter vessels under the control of the Administrator. The consent of the Secretary of Defense would be required for vessels in the Ready Reserve Force or in the National Defense Reserve Fleet maintained in a retention status.

The House bill contained no similar provision.

The House recedes.

*Chartering to State and local governmental instrumentalities (sec. 3513)*

The Senate amendment contained a provision (sec. 5103) that would amend section 11(b) of the Merchant Ship Sales Act of 1946 (50 U.S.C. App. 1744(b)), which would allow for chartering of vessels of the Ready Reserve Fleet on a reimbursable basis to States, localities, or territories of the United States.

The House bill contained no similar provision.

The House recedes.

*Disposal of obsolete Government vessels (sec. 3514)*

The Senate amendment contained a provision (sec. 5104) that would amend section 6(c)(1) of the National Maritime Heritage Act of 1994 (16 U.S.C. 5404(c)(1)), which would require the establishment of a priority system for the disposal of obsolete vessels consistent with their material condition and their subsequent danger to the environment.

The House bill contained no similar provision.

The House recedes.

*Vessel transfer authority (sec. 3515)*

The Senate amendment contained a provision (sec. 5105) that would amend section 50304 of title 46, United States Code, to allow for the Secretary of Transportation to charter to other departments of the United States Government vessels under the jurisdiction of the Secretary, with prior consent required by the Secretary of Defense for vessels in the Ready Reserve Force or the National Defense Reserve Fleet.

The House bill contained no similar provision.

The House recedes.

*Sea trials for the Ready Reserve force (sec. 3516)*

The Senate amendment contained a provision (sec. 5106) that would amend section 11(c)(1)(B) of the Merchant Ship Sales Act of 1946 (50 U.S.C. App. 1744(c)(1)(B)) to change the period of activation and sea trials of vessels of the Ready Reserve Force to every 30 months, which would conform with current Coast Guard regulations.

The House bill contained no similar provision.

The House recedes.

*Review of applications for loans and guarantees (sec. 3517)*

The Senate amendment contained a provision (sec. 5107) that would require the Administrator of the Maritime Administration to develop a comprehensive plan for the review of traditional and non-traditional applications for loans and guarantees under chapter 537 of title 46, United States Code.

The House bill contained no similar provision.

The House recedes with an amendment that contains a statement of findings and would require, within 90 days of receipt of all required documentation for a loan or guarantee, defined as a traditional loan, under chapter 537 of title 46, United States Code, the

Administrator to either accept or reject such application. The amendment would also require that within 180 days of receipt of all required documentation for a loan or guarantee, defined as a non-traditional loan under chapter 537 of title 46, United States Code, the Administrator to either accept or reject such application.

#### Subtitle C—Technical Corrections

##### *Technical corrections (secs. 3521–3529)*

The Senate amendment contained a Title (Title LII—Technical Corrections) including a series of provisions (secs. 5201–5210) that would make corrections to various sections of title 46, United States Code.

The House bill contained no similar provision.

The House recedes to the following provisions of the Senate amendment: section 5202 (as amended); section 5203; section 5204; section 5205; section 5206; section 5207; section 5208, with the exception of subsection (c), (Oceanographic Research Vessels); section 5209; and section 5210.

The conferees understand that these provisions are technical or clarifying in nature and are part of the ongoing work of the Office of Law Revision Counsel to complete the re-codification of title 46, United States Code. The Committee on the Judiciary has reported legislation, H.R. 3387, with an accompanying report (H. Rept. 110–437) that would make substantially the same technical and clarifying changes to title 46.

#### LEGISLATIVE PROVISIONS NOT ADOPTED

##### *Short title*

The Senate amendment contained a provision (sec. 5001) that would name the division of the bill as the “Maritime Administration Authorities Act of 2007”.

The House bill contained no similar provision.

The Senate recedes.

##### *Technical corrections*

The Senate amendment contained a Title (Title LII—Technical Corrections) including a series of provisions (secs. 5201–5210) that would make corrections to various sections of title 46, United States Code.

The House bill contained no similar provision.

The Senate recedes to the following provisions: section 5201; subsection (a) of section 5202, Personal Injury to or Death of Seamen; and subsection (c) of section 5208, Oceanographic Research Vessels.

The conferees were advised by the Committee on the Judiciary of the House of Representatives and the Committee on Transportation and Infrastructure of the House of Representatives that these provisions would not be necessary in connection with the re-codification and could have unintended substantive effect.
